This Well Chain is vastly superior to rope, being durable, sanitary, easy to handle and more economical in the long run. It is furnished in standard patterns and sizes and with either S.R.P. or Hot Galvanized Finish. The S.R.P. Finish is produced by a special process of zinc electroplating, which provides an exceptionally good protection against rust.

"Acco" Pump Chain

Well Chain
Tenso Pattern

Dominion Twist Link pattern is furnished in sizes No. 2/0 to No. 3 inclusive, and is packed in kegs of 500 feet. "Tenso" pattern is furnished in sizes No. 4/0 to No. 1 inclusive, and is packed on reels of 250 and 500 feet.

"ACCO" Pump Chain is especially recommended for use in bucket pumps. It is a simple matter to open the links to make adjustments or attach buckets. The chain is Hot Galvanized after forming, making a special finish, which assures maximum service.

Supplied in standard sizes No. 5 and No. 6. Packed in kegs of 100 lbs. or in casks of 500 lbs.

Of Course It's Efficient and Dependable

Fig. 720

—*It's a JENKINS Rapid Action VALVE*

It isn't possible for you to give your customer a more satisfactory quick-opening valve than this genuine Jenkins Model.

Particularly adapted for laundry service these Rapid Action Valves save valuable time in filling washers. They open full with one-quarter pull of lever and stay open automatically. A slight pull on lever and they are closed tight. No leakage. No water waste.

Jenkins Rapid Action Valves are made for use in laundries, garages, creameries (for bottle washing), shower baths, steam pressing tables and wherever else a quick-opening valve is needed.

Write for prices and descriptive literature.

TRADE FRAIM MARK

A Substantial Spare Tire Lock

No. 574
Actual Size

Every motor car owner is willing to spend money to safeguard his spare tires. Here is a substantial lock to meet that nation-wide need that can be retailed profitably from 85 cents to $1.00 each.

This lock has a shackle especially made to fit the tire carriers furnished with the Ford, Buick, Hupmobile, Oakland, Overland, Reo, Liberty and other popular-priced cars. It is made of cast brass highly polished and the shackle, which is adjustable to several openings, is of steel with rustless black finish.

This illustration from a recent Imperial Polarine advertisement is typical of advertising which is now running in every section of Canada. It will pay you well to tie up to this advertising and make your store Imperial Oil "headquarters" in your territory.

Your Opportunity

The Imperial Chart of Recommendations, flanked by a prominent display of the familiar litho-sealed cans containing the five grades of Imperial Polarine, is a constant reminder to customers of their lubricating requirements. In fact, many hardware dealers tell us that their oil sales have jumped at least 20 per cent. since they started featuring Imperial Polarine and selling it by the Imperial Chart of Recommendations. A marked increase in sales of staple lines has also been noted.

More than 8 out of every 13 car, truck and tractor owners use Imperial Polarine Motor Oils exclusively. Many of them are already your customers and you can attract many more if you go after their business.

Ask our salesman to supply you with the Chart of Recommendations for your wall. He will also be glad to tell you about the other good dealer helps which are available for boosting your sales of Imperial Polarine Motor Oils.

The Everlasting Veneer Toilet Seats

This is the strongest and cleanest toilet seat made. There are no cracks —made of 7 and 9-ply, air-seasoned wood veneer, held together by our special wood cement.
These seats are proof against heat, cold or dampness—will never crack, warp or split. They cost no more than the so-called "cheaper" toilet seats, and always bring repeat business.
Have you written for our prices?

Success that Fails

Not quite a year ago, states Printers' Ink, a company making a long line of products selected one of them as a leader, advertised it extensively, put a powerful sales effort behind the advertising and got distribution in about sixty days. The campaign continued for a number of months after this and was very successful.

Under the impression that its market had been won, the company relaxed effort. The advertising campaign ran its course and stopped. Dealers lost interest. The manufacturer's sales force had nothing to talk about and was obliged to stand aside while competitors stepped forward and took orders. Today the company's advertised leader has disappeared from public view. Dealers with stocks on hand are incensed and the company is inclined to feel that the venture was a failure because it did not carry on of itself.

The product was right and the company made money on the campaign while it lasted. The failure came to pass from poor judgment and insufficient knowledge of advertising as a business.

The moral is so obvious that it scarcely needs pointing out, save for one thing: There are some people who remember the campaign and class it as a failure of advertising because they are unacquainted with the facts.

Plenty of advertising campaigns have failed on account of an imperfect product, a poorly planned campaign or an unwise use of advertising funds. But the campaign here referred to failed because it succeeded too well.

Let advertisers who are dabbling at it, who have not yet learned that advertising requires brains as capable as for manufacturing or engineering, find encouragement in the fact that going into advertising is exactly like going into business.

More prospective advertisers would be advertisers could they think of advertising as of business. There is one concern that has made a phenomenal success of house-to-house selling. While the success of this company is due in a large measure to its national advertising, back of the advertising there is a sales policy, a solidly built field organization and a system of reward and advancement. Scarcely a week passes that some small concern, attracted by the success of this large organization, does not approach an advertising agency and ask for a plan that will enable it to duplicate the success of the larger company. It could use the same advertising, had it the money, and the advertising might bring in the business, but success would lead inevitably to failure without an organization to handle the business obtained.

Advertising entails responsibility in exact proportion to its success. The concern first mentioned above did not fail at all—it decided to stop succeeding. That is an entirely different thing from failure. The other company did not want to be a success merely, but laid its plans to keep on succeeding.

Strikes Affecting Hardware Prices

Railway Strike May Be Less Serious Than Shortage of Cars Due to Lateness in Moving Grain—Miners Would Rather Sell Small Part of Output at Big Profit Than Large Turnover at Small Margin—Sydney Coal All Right for General Heating But Little Use to Steel Mills

EDITOR'S NOTE.—The continuation of the coal and railway strikes this week and the probable effect of their continuation, upon hardware prices, is the subject of prime importance to retailers particularly as higher prices on galvanized sheets and bar iron and steel this week are attributed in some degree to the effect of these strikes. While it is difficult to secure definite data on the effect of these labor unrests, the following interviews will serve to throw some light on the subject:—

A. T. ENLOW. president Dominion Sheet Metal Corporation, Hamilton, Ont., states:—

"Regarding the possibility of the supply of sheets being hampered by present coal and railway strike situation in the U.S., we are of the opinion that the railway end will take care of itself very satisfactorily in the near future, but that a shortage of cars will develop with the grain movement in the U. S. and Canada and that we will before many weeks be up against the old car shortage problem which means that material already made will lay in the mills and cannot be shipped.

"The coal feature is a much more serious one as both the miners and operators seem to agree that nothwithstanding the President's appeal no actual assistance will be given to start up mining and shipping.

Miners Prefer to Loaf

"Apparently all the government can do is to protect those who wish to work and if no one wishes to work, then there will be no production. Having lived in the mining country for a great many years, I would say from firsthand knowledge that the miners would just about as soon 'loaf' as work and there is no danger of them starving as long as any crops remain available in the surrounding district and as far as the operators are concerned they are the kings of profiteering and would rather sell 10% of their output at a whale of a profit than to sell it all at close margins.

"We therefore are inclined to believe that the situation in regard to the coal is very serious indeed and we may look for a restricted supply of galvanized and black sheets even though English sheets come in to a greater extent."

Depends on Duration

E. H. Gurney, The Gurney Foundry Co., Ltd., Toronto, states that the seriousness of the situation will depend upon the duration of the strikes. "The whole effect of the strikes makes for scarcity of material and stiffer prices because of higher costs. I believe that to-day any retailer has ample justification for anticipating his fall requirements."

Col. W. M. Gartshore, president of the McClary Manufacturing Company, in discussing the business outlook for the coming months, and the situation created by the possibility of a coal shortage and a railway tie-up was inclined to be optimistic.

"We have coal supplies on hand sufficient to last us running full time for six weeks," he said, "and if we do not get any more we are equipped for using a certain amount of fuel oil and hydro so that I do not think we shall be so badly off. We have good stocks of raw materials on hand and will be able to take good care of all business until the first of the year. By that time things will, I hope, be in better shape. The general situation of course depends entirely upon how long the trouble continues.

Not Looking for Reductions

"Prices will depend on what happens. In view of conditions I am not looking for any reductions. Business has been going along nicely and while crop conditions in many sections are spotty I think there will be a good general harvest."

Asked regarding the matter of obtaining coal supplies from England, Col. Gartshore said it would cost, he believed, about $17 a ton to lay British soft coal down in London.

In further discussion of the effect of the coal strike and the threatened extension of the railway strike in Canada upon industry in general, and particularly the steel industry, with various producers in Montreal and district, Hardware and Metal is informed that while present coal supply is in most cases sufficient for some weeks, the question of further supply is now an important one. With deliveries of coal curtailed in the past weeks many of the larger users are working on reserve and stocks on hand which will last from four weeks to four months are reported by various firms.

Cape Breton Coal for General Industries

With no hope in sight for American coal, manufacturers are looking to other fields and locally our domestic mines in Cape Breton and the Welsh mines appear to be the most practicable sources of supply. Montreal is undoubtedly somewhat more fortunate than other Canadian industrial centres because of its geographical position and comparatively easier access to either of the above fields. Coal from the Nova Scotian mines is said to be of sufficient quality for general heating purposes required by the average manufacturer, and much depends upon developments there for future supplies.

With regard to present conditions at Sydney, the outlook is reported as none too promising. During the past winter months and even up to the present there has been much labor trouble with the result that production has been greatly curtailed. If manufacturers could be assured that producers

and mine workers would reach an agreement, greater developments might be expected and as far as industry in Eastern Canada is concerned, there would be little chance of a coal famine during the coming winter. It is understood that even now these mines are able to supply a part of the requirements of the New England States and here again is where the Canadian Government could assist domestic manufacturers by shutting off foreign shipments for the further supply of our own industries.

Steel Industry Harder Hit

"Coal from the Sydney mines, although of an inferior quality to that received from U. S. coal fields or Welsh coal will amply meet the requirements of heating purposes required by the average manufacturer," said an official of a local steel plant to Hardware and Metal. "Unfortunately, however, the steel industry cannot use this coal for cooking or gas purposes, because of the large amount of sulphur contained. Steel producers in Nova Scotia are able to use this coal because they have installed a system whereby they are able to wash the coal before turning it into coke for the manufacture of pig iron. It would be necessary therefore for it to undergo this treatment before we here could use it and to install a system whereby this process could be done would be too costly for relief from the present situation."

The intention then of local steel companies is to negotiate at once with overseas mines for their supply and this has already been done by various concerns. Welsh coal has the desired qualities for steel manufacturing requirements and if there is no settlement of the strike in sight immediately it is altogether probable that much coal will be on its way from overseas within the very near future. Naturally, importation must become quite extensive from now until the close of navigation if the requirements of next winter months are to be supplied. Whether ample supplies from this source can be secured is yet problematical, but steel manufacturers have every hope at present of relieving the situation to a considerable extent at least.

Western Points Less Fortunate

Either importing coal from overseas or bringing it from the fields in Nova Scotia might be practicable to points as far west as Western Ontario, according to another local official. Transshipping at Montreal to afford passage through the canal and enter the Great Lakes would mean to a manufacturer west of Montreal a considerable figure, but in the face of a serious shortage this procedure would be probably carried out. Dealing with points farther west, such as the head of the lakes and the Western Provinces, this manufacturer stated that it was his opinion that neither English coal nor a supply from the Maritimes would be of much use because of the long haulage and transportation costs. At the present time steel plants at the head of the lakes are using coal from Central Western States, and were doubtless giving the question of the coal strike more serious consideration than plants in the East. When further questioned regarding a shortage in the steel industry in later months particularly next winter, this official stated that for some concerns undoubtedly the problem would reach serious proportions, while with other steel plants a shortage was likely, but it was improbable that a famine would be reached.

Effect on Prices

Owing to the conservative buying methods during past months, stocks of iron and steel in general are now at a low level. Purchases have been made from hand to mouth since the commencement of the more active period during the spring months and even today buyers were not anticipating their requirements for future to any extent. Previous to strike conditions the industry was recognized as being on a healthier basis, but this was attained by actual consumptive requirements. With stocks in their present shape curtailment of production at the present time would almost directly reflect on the situation. This naturally would also have a direct bearing on prices and it would not be surprising to see a general stiffening of iron and steel, much more pronounced than has been evident during recent weeks.

Start a "Rotary Club" In Your Own Store —A Plea for Store Meetings

Written for Hardware and Metal by G. V. WHITE

"ROTARY," "Kiwanis," "Canadian," and other "get together" clubs for the general good, have long flourished and their success has proven their worth. Why not link up this successful plan with the retail store? Next to the home the retail store is the most "personal" of all communities. Its members spend one-third of their time together, and yet it is still very often without any common meeting ground and the staff without any means of first hand learning of aims, policies and company ambitions. Too often they know too little of the firm whose interests they are trying, but blindly, to serve.

No person can talk intelligently on a subject they know nothing about, and still in three quarters of the stores in this country the clerks—the company's representatives—are daily trying to explain to customers as best they can, why certain lines have been dropped and others substituted; the special reasons for taking certain agencies; why deliveries are slow, and a hundred other things which they are given no opportunity to know.

The loss is the company's, not the employee's. Not only does it cause clerks to constantly but unintentionally misrepresent, according to his own imagination, but the management injures itself by failing to keep in close touch with "the personal link" between the store and the buying public.

There is little dead stock in the store that holds weekly meetings where all get together as members of one common staff with one common interest, namely the good of the company. The buyer has an opportunity to explain why certain goods are bought and to pass on the enthusiasm and selling ideas which he had in mind when the purchase was made. And in turn the salesmen can tell the management how the public like certain goods, any comments they have heard as to improvements or criticisms of store policies, etc. Complaints can be gone into and the benefit of general consideration in arriving at a solution.

The clerk invited to such conferences feels he is not there so much as a "hireling" as a company man and his interest will be greater. If you have never tried these store meetings I most heartily commend them to your attention. Get to know the members of your staff and you will be surprised to find the amount of interest they are desirous of taking in your business and how readily they will grasp the opportunity to improve their knowledge of merchandise and their general usefulness in the store. Such co-operation is necessary to success.

GAS CAN'T REPLACE COAL FOR HEATING

"Use of gas in coal furnaces as a substitute for coal for heating purposes is wasteful, extravagant, and out of question," said Arthur Hewitt, general manager of the Consumers' Gas Co., Toronto, when asked whether gas would serve any appreciable part in staving off a coal famine. "Special appliances would be necessary, and we have been working experimentally along this line with a view to gas as a substitute for coal for house heating, but the experiments have never been sufficiently developed—have never reached a point where gas could serve as a substitute. Another question is: Where would we get the extra coal when others can not get it?"

Hardwareman Wins in Competition For Business of Local Sportsmen

A Western hardwareman's window display which includes 350 rifles being a full assortment of different models and calibers of four different makes. The rifles were put in groups of five to ten of each kind with the size and selling price marked on a ticket. The mass idea overcame competition of an exclusive sporting goods store which boasted a wider choice for customers. Some helpful ideas for the arrangement of rifles are shown in this striking display.

HERE IS AN extensive display of rifles which offers a number of suggestions for showing rifles and such sporting goods of interest to the Fall hunter who will soon be starting out. There is, of course, a story underlying this arrangement of 350 rifles, and here it is.

A retail hardware firm located near the Rocky Mountains where there is a long season of hunting, was faced with some new competition in the form of an exclusive sporting goods store. The hardwareman did not object to the competition, but this particular sporting goods dealer made it his boast that he would put the hardwareman out of the sporting goods business entirely and that his was the only logical place to buy that class of goods because he carried the stock and could give wider selection.

The hardwareman arranged this window containing a full assortment of different models and calibers of rifles as made by four different manufacturers, to show that he too could offer a very wide selection in sporting goods. The rifles were put in in groups of five to ten of each kind with the size and selling price marked on a ticket.

The same idea of mass displays was carried out in different seasons with fishing tackle, baseball goods, etc., and it was only about two years until the competition of the sporting goods store was definitely reduced to the stage where no danger existed.

The hardwareman who conducted this plan stated to Hardware and Metal that a big moral is involved in the success of this plan. It definitely indicates that mass grouping of stock to indicate an extensive range offering wide selection is one of the important elements in retail merchandising. No doubt it is part of the secret of success of the department stores, chain stores and 5, 10 and 15 cent stores. In this particular case it became necessary to mass the stock for the purpose of showing that an equally wide range or perhaps a wider selection could be offered by the hardware store. It is not necessary to wait for such competition, however, for many mail order customers who are not anxious to send their money out of town do so because of the wide selection offered by the mail order catalog and the hardwareman might retain such business by showing that a proportionately large choice is available in his store.

Systematic Investment is the Only Way

Some Sane Advice to the Merchant on the Subject of Investment —The Man Who Saves $35.52 Every Month Starting at the Age of 30 Years, Will Have a Competence of $50,000 at 65 Years

By HENRY JOHNSON, Jr.

SAM Partridge, industrious young hardwareman, lifted the telephone receiver.

"Partridges," he said, in his usual attentive, ready-to-serve, well-modulated voice, and this came back to him over the wire in carefully measured unhurried tones:

"Mr. Partridge, this is Worthington Cranmer speaking, representative of Henry Blonson & Co., members of the Chicago and New York Grain Exchanges. I have opened offices in the Beck Block, directly across the street and should like to have the opportunity to invest a little money for you where it would make a nice profit."

Sam was a bit flustered, but also he felt flattered with the courtesy of Mr. Cranmer's address and a trifle unbalanced to find himself all at once in the class supposed to have money to "invest," but, though he talked a little with Cranmer, he did nothing further, except say he'd "drop in and see" Cranmer.

About a week later, Cranmer got on the line again and spoke thus:

"Pardon me for taking the liberty to call you again, Mr. Partridge, but the wheat market is very active to-day. Prices have been low and appear to be due for a sharp advance. Why not trade in a small lot—say a thousand bushels—and make a little profit on the side?"

Sam was swept off his feet and before he knew it he had placed "an order" to buy a thousand bushels and and promised to send over the require margin of $35. In the first interval of leisure, he took the money over himself and, nothwithstanding Cranmer showed him that the market already ha jumped half a cent so that he "made five dollars profit" in the three hours since he had placed his order, he had a scarey feeling as he parted with his coin.

The Sucker Always Loses

Sam's instinctive fright was correct premonition; for his "account" at Cranmer's showed "profits" and "losses," but the profits never came clean and the losses made further margins persistent.

Weeks followed during which Sam spent so much time in Cranmer's "office," neglecting his business in such noticeable fashion that he had to invent excuses. His nights were sleepless. Fo hours he lay restless or dropped into fitful slumber from which he awakened in a cold sweat from dreams of losing all he owned. His appetite suffered. He became fretful and snappy to his wife and the babies. Mrs. Sam could not understand her husband's moods.

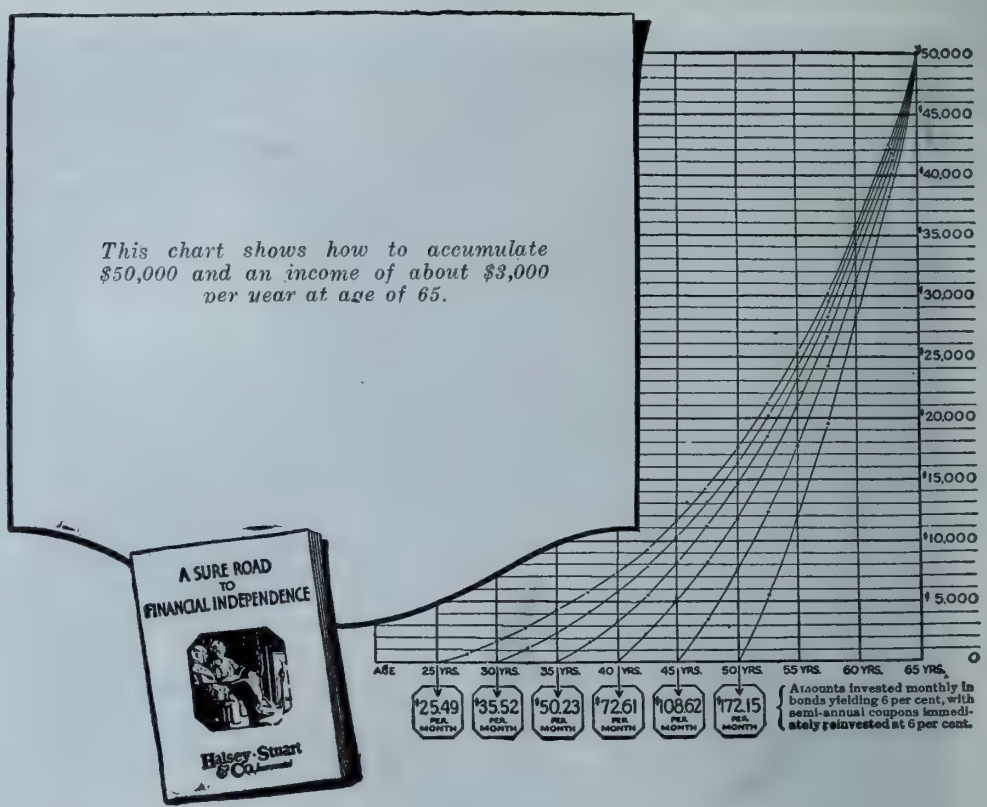
Finally, with a sudden slump in wheat he realized that he was some $700 to the bad. It was a sum he could in no way afford to lose, but he knew that to continue was to risk all he had. So he closed his account and took his medicine. His lesson was learned. He had paid a stiff price, yet his experience was cheap at the cost, for he had one wonderfully valuable fact:

That investment is not speculation! Cranmer always talked of "investment" but what he dealt in was pure gambling. Sam knew that now.

With the close of his account, Sam recovered his sanity. The pull was hard, but only a few weeks after he had regained his poise so that he could laugh even though a little grimly at something he saw in a comic sheet. It re thus:

"One trouble with having a run for your money is that it is such a long walk back."

It was some time before Sam had any spare money to invest; but when he did he really did invest it. He had the sense to consult his banker. He learned about sound bonds. He looked carefully before he leaped. He learned discrimination. He knew now that money accumulated by thrifty self-denial was too precious to risk on promises of alluringly high "interest" or "earnings" and that six per cent. is about the limit consistent with safety.



Shortly after the experiences I have outlined, Sam happened across a chance which pictured the potentialities of consistent savings and safe investment so graphically that any child could understand it. That chart I reproduce, and I urge every reader to study it with the greatest care for such study may readily result in the accumulation of a sufficient competence by many who otherwise would have little or nothing to show for their life work

Sam was still a young man. What struck him about the chart was the smallness of the monthly sum necessary to produce a handsome competence while yet any normal man's expectation of life would promise several years of independent ease.

By tracing the graphic lines carefully, one by one, he found that a man who began to save at thirty years putting aside $35.52 per month and who continued this without a break until he was 65, would then have the comfortable sum of $50,000. "Surely, such a sum—only $426.24 a year—can be put aside by any business man, and he will never miss it," he thought.

He traced the lines more minutely and discovered another important point: that such accumulations would result in his having $17,500 when fifty years

Hardware Stores Forming Strong Chain of Service for Tourists now Visiting Canada

How Hardware Merchants Are Catering to Motorists By Supplying Needs for Gasoline, Oil, Automobile Accessories, Camping Equipment, Sport Goods, etc.—Regular Hours of Hardware Store Bring Business—45% of Hardware Stores Have Gasoline Pumps for Motorists

THAT the hardware trade offers a strong Dominion-wide chain of service to the motorist, is readily apparent from the large proportion of retail merchants now catering to both the tourist and resident automobile owner. Such a chain is comprised of the many individual hardware stores throughout the country where automotive equipment departments have been installed, and where the selling of gasoline and lubricating oils are connecting links in a uniform development which is fast receiving the general recognition of the motorist as a class.

While the marketing of auto accessories and other supplies through the hardware industry has long been recognized as a legitimate phase of the retail hardware trade in Canada, yet it is the universal adoption of this principle which serves to directly emphasize the proven service of the hardware merchant.

In addition to the sale of gasoline and oils and the opportunities thus provided for other incidental selling of various accessories, a service of this nature to motorists in general is looked upon as a more or less direct drawing card, for it is another means of bringing the buying public to that particular store to secure camping goods, sport equipment, etc. Many retail merchants have fully enlarged this type of service with the object of directly furthering the sale of other basic hardware commodities, and many report having noticed an increase in volume of sales since the installation of such a department.

The hardware trade in general, therefore, supplies a solution to the problems of the motorist in the constant need for gasoline and accessories.

Many Garages Just Temporary

A number of garages are of a temporary nature, being open for just a few months in the summer when such trade is at its best, and closing down for months at a time when cold weather decreases the volume of current business. Touring parties frequently report the early closing of some garages when the "quiet" period has arrived, while the regulated hours of the hardware store assure service during this time of the day, irrespective of the month or season. Comparatively, therefore, in cases of this kind, the hardware merchant has been found to be more reliable than the transient garage.

In many instances, hardware specialties are brought into particular prominence, and window displays attract specific attention when the merchant is engaged in "filling her up." These are by-products of the service. But a most important factor is in establishing the sale of gas or oil. This is the primary step, and as such can only be accomplished when the car owner who needs supplies of this nature knows that he can obtain what he requires at the hardware store.

The sign of the gasoline pump has been claimed as a uniform landmark, which is the unit of service the motorist seeks. This is frequently installed outside the store, with the tank underground, and the pump at the curb, or sideway. The installation of such curb gasoline equipment is reported to be increasing in numbers year by year. While there are no official figures available, yet it is generally estimated by authorities in a position to judge impartially that approximately 45 per cent. of the hardware stores throughout Canada are

(Continued on page 60)

An indication of how hardwaremen throughout Canada are linking up in a chain of service to motor tourists is evident in this illustration showing Elliott's Hardware at Brantford, Ont. Note the up-to-date curb pump and the window of automobile accessories where it will receive most attention from motorists waiting to get their supply of gasoline and oil. Accessory lines mostly required by motorists on long trips are prominently shown, such for instance as tools, tire patches, vulcanizing outfits, windshield cleaners, spot lights for night driving. Much other equipment such as camping supplies, rugs, etc., can also be linked up to good advantage, and if not on display are generally suggested by the man who takes care of the motorist's gasoline needs.

Strikes Increasing Hardware Prices

THE COAL and railway strikes continue to hold the close attention of all engaged in the hardware and metal industries because of the broad effect of such disturbances on this industry. Higher prices made on galvanized sheets, bar iron and steel and some other hardware have been more or less attributed to the effect of these strikes and the prospect is for higher prices on other lines if no early settlement is made. Prevailing conditions remind one of the unrest caused a few years ago in the industry due to abnormal war requirements, but one of the chief differences is the fact that during the war steel was high on the priority list in the securing of coal supplies whereas to-day the steel mills are classed in the unpreferred fifth class along with general industry.

While there has been some talk of developing Canadian coal for domestic industries, this would bring little relief to the steel mills because of the fact that coal from Nova Scotia contains too much sulphur to be used for the ordinary gas and coking work in the steel mill.

Some authorities in the trade have expressed the opinion that the railway strike situation is not as serious as will be the car shortage which will follow upon the present stagnation in movement of merchandise and the fact that the grain crop will require to be moved. A car shortage will make the situation very aggravating, recalling past times when mills have had warehouses filled with finished products awaiting shipment while distributors have been compelled to pass up business.

Some curtailment of production has been made as result of the strikes and some mills are installing oil burning equipment at costs which are bound to be reflected in prices of their product. Some arrangements are being made to bring British coal to Canada and the suggestion has been made that if the threatened coal strike does not materialize in Nova Scotia on the 15th of this month, that steps be taken to bring coal from the Maritimes into general use in Eastern Canada. To do this production will have to be speeded up however, as figures secured by Hardware and Metal from the Department of Mines indicate that the amount of coal available for consumption in Canada in recent months has declined considerably and the output of recent months has been only about sixty per cent. of the output for the same months in the three preceding years.

The Official Organ Mistake

WITH a lack of foresight which indicates an old-fashioned ignorance of the successful relations between a trade paper and the members of the trade it represents, the Timber Industries Council of British Columbia has decided to establish a journal of its own and arrangements have been completed under which the Pacific Coast Lumberman becomes the OFFICIAL ORGAN of the Council.

Apart altogether from the fact that the Pacific Coast Lumberman and the Western Lumberman have, in active competition, been giving the lumber trade of the Pacific a splendid service by maintaining healthy relations with the lumber consuming markets and that the manufacturers have now taken a questionable step in taking over one paper to be continued on competitive terms which can hardly be regarded as fair or equitable, is the conclusion born of experience that official organs defeat the very purposes for which they are conducted.

The well conducted trade paper represents various branches of the trade itself as well as the consuming public upon which that trade is dependent. Unless the relations between manufacturer, wholesaler, retailer and consumer are healthy business stagnates. To maintain such relations problems must be continually faced and solved. Many of them are unpleasant but their solution is the function of the trade paper which is properly serving its field.

The official organ must obviously serve selfishly the interests of the particular branch of the trade which controls it. If owned by manufacturers then wholesalers or retailers will not believe that it serves their interests; if owned by wholesalers or retailers, likewise it is regarded as their man Friday. In no case is the public interest likely to be properly respected. The result is that the official organ is conducted to please the people who are paying for its publication —and they usually pay heavily in the long run—and it is ignored by other sections of the trade with whom there should be co-operation and understanding in the interests of all concerned. Printers' Ink has effectively shown "Why Trade Associations Should Stay Out of the Publishing Business," and the following extracts are from articles which recently appeared in that publication:

When an association starts a periodical and goes out in the trade to solicit advertising, it is asking them to support a paper which is not founded on sound publishing principles.

A few associations decide that the independent papers do not "write them up" often enough and start their own publications so as to insure an unlimited flow of puffery.

The circulation is artificial; this circulation is generally mantained by virtue of the subscriber's membership in the association and is kept up regardless of the editorial merit of the paper.

Advertising in such publications is seldom sold on its merits. Seldom will the clever salesman remove the velvet glove from the mailed fist, but the hard iron of the implied threat is nearly always visible to the discerning buyer.

Such publications are of doubtful advertising value because of the difficulty inherent in the proposition of keeping the editorial contents on a par in reader interest with that maintained by a well-edited, independent paper.

When the lumber manufacturers of the Pacific Coast own their own paper they may expect to have their "fur rubbed the right way," but how can they expect this to improve those relations with the dealers which make for good business and mutual advantage? And when they advertise they should appreciate that they are paying to reach other manufacturers rather than the dealers who sell their goods and maintain the all-important connection with the consumer.

Editorials in Brief

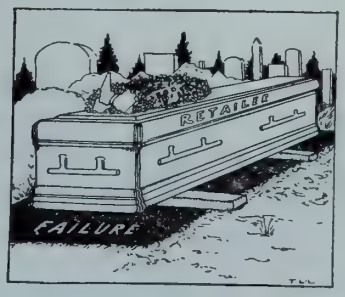
IT IS an interesting indication of the present trend of prices that bar iron is back to $3.25 per cwt. in some places. This level has not been in effect since October of last year, prices having sagged as low as $2.65 in the period from February to April of this year. This compared with $2.00 in 1915 and $5.15 in October 1920.

The Slogan—Load it With Meaning

The Sad Gruesome Story of the Retailer
Who Shouldered an Empty Gun

or

What Happens to the Fellows Who Make
Mental Reservation to Promises



HERE is a sad, gruesome but instructive cartoon. 'Tis the picture of a poor retailer who didn't know the rules of the game—who forgot that the other fellow might be well armed too.

You know the old story of the bully with the empty gun. He got into an argument and pulled the gun at the first sound of strife. His opponent, not knowing the gun was empty, drew his and fired with deadly aim. And of course the bully would have been much better off had he had no gun at all. Well—the same thing happened to the retailer.

And here is the story.

The retailer whose future home you see in the illustration employed a slogan in his store. He advertised in newspapers, direct mail campaigns, store cards, and everywhere else that he could hang the words, that every customer in his store would find:

"Satisfaction or money cheerfully refunded."

But it never worked out like the slogan. Apparently the retailer had a mental reservation that sounded like "you just try and get it back."

And folks who tried to return goods found the money was well glued to the store's cash drawer and there was nothing cheerful in the atmosphere.

There you have the retailer using a slogan dishonestly—and as he was to find out, he would have been much better off had he had no slogan at all.

He was in the position of the bully with the empty gun. The public thinking the gun was loaded with the bullets of Meaning was persuaded to buy—but finding the gun empty the public started to shoot its own gun called Gossip in which are used the deadly bullets called Resentment—and, well, the picture tells the rest. The retailer is buried in the grave of Failure.

Slogans are a good means of building business, but slogans are made to live up to—not to be ignored at every opportunity. And the retailers who use slogans in their stores should be certain that they are not making extravagant claims or promises and that those promises are maintained to the letter—and beyond it if possible.

If you promise in your slogan that you give prompt service, give it. Don't make the customer wait half an hour or a day beyond the time promised.

If you claim in your slogan that you guarantee everything you sell, guarantee your goods. Don't try to hedge when the customer asks you to make good.

If you promise to cheerfully refund money to dissatisfied patrons, refund it with a smile.

Live up to your slogans and you will build bigger trade. Show yourself to be a "good sport" and watch the good sports come back and trade with you. The world is what the retailer makes it—treat it square and it showers you with prosperity—treat it with contempt and you may put up the umbrella for the torrent of trouble that will fall your way.

By all means use slogans if you like 'em but make 'em honest—load 'em with meaning—and build bigger, better business with them.

Hardwaremen at Quebec Convention

Fifteenth Annual Convention Held in Quebec City—Representative Gathering From All Parts of Province—Various Tax Laws Discussed—All Officers Re-elected—First Delegation of Merchants to Call on Lieutenant-Governor

By Special Representative Hardware and Metal

QUEBEC.—The 15th Annual Convention of the Quebec Provincial Board of the Retail Merchants' Association of Canada Inc., was held in Quebec City on July 31st and August 1st. Registration of the delegates commenced at 9.30 o'clock on the morning of the first day and by the encouraging number of members in attendance, a successful gathering was assured. Delegates from all parts of the province were present, showing that the efforts of the board during the past year have met with good results from a membership standpoint.

His Worship, Mayor Samson, delivered his address of welcome and stated that the City of Quebec was open to the delegates, he realizing, as did the people of the city, that the interests of such a representative organization were also the interests of the people. J. E. Sansregret replied and thanked the Mayor for the welcome extended.

Joseph Savard, president of the Quebec District, whose committee was in charge of entertainment, officially welcomed the provincial board of delegates and offered them the city council chambers in which to hold their convention. He explained that through the courtesy of the Mayor and City Council he was able to secure these comfortable quarters.

Short addresses then followed from J. C. Watson, representing the Quebec Board at the Dominion Executive Council, E. M. Trowern, secretary of the Dominion Board, J. R. Lafond, president of the Hull District, A. Larue, president of Three Rivers District, G. A. Lapointe, president of the Montreal District, L. Coderre, representing Sherbrooke District, L. J. Dubois, representing St. Hyacinthe District, Mr. Morency, representing Lewis Branch, J. W. Moreau, A. Sansregret.

Outlined Work Done

After the roll call of officers and the minutes of last year were read, J. E. Sansregret, president, delivered his annual address outlining the work done during the past year. He was followed by Joseph Elie, first vice-president, and A. Sauve, second vice-president, who also explained to the members what had been done to protect the merchant since last election.

M. Lapointe then explained how the Province of Quebec had been divided into six districts, each district having a secretary and separate office to look after the affairs of the district. The first district formed was the one of Montreal, followed by Hull, Sherbrooke, Quebec, Three Rivers, and St. Hyacinthe. Each district takes in several counties of their surroundings where branches are opened and local merchants act as secretaries who communicate with the secretary in the district, who in turn communicates with the secretary of the Provincial Board. In this way a close touch is kept with each section of the province and Quebec is the only province in the Dominion having such a system of giving service to its members.

Mr. Lapointe then pointed out the progress that had been made from the standpoint of membership, 1,100 new members had been enrolled during the year, making a total of 2,465 members at the present time.

A letter was read from the Dominion President, J. Banfield, expressing regret at not being able to be present, but he wished the convention every success possible.

Welcomed by the Lieutenant-Governor

After adjournment for mid-day the convention re-opened at 2 p.m. when about 40 automobiles conveyed the delegates and their wives to Spencer Wood, the residence of Lieutenant-Governor Sir Charles Fitzpatrick. Here a welcome awaited the visitors, Sir Charles being assisted by Lady Fitzpatrick and their daughter. Each lady member of the delegation was presented with a bouquet of flowers from Lady Fitzpatrick. The president, on behalf of all members, tended a vote of thanks for the reception given, stating that it was the first time that a Lieutenant-Governor of a province had officially received a delegation of merchants. The delegation then proceeded to the Government boat "Druid" which had been placed at the disposal of the convention by Hon. E. Lapointe, Minister of Marine and Fisheries, and a trip through the harbor down the river and back as far as the Quebec Bridge was enjoyed.

At 7.30 in the evening special cars were detailed to convey the party to Montmorency Falls and Kent House, where the annual banquet was held.

Representative Body

Hon. L. A. Tascherau, Premier of Quebec, who was the principal guest at the banquet, addressed those present in a pleasing manner, when he referred to the Retail Merchants' Association as being one of the most representative bodies in the Dominion. On more than one occasion in the past it had been strong enough to bring pressure to bear on the Government. He hoped that further progress would be made, not only in the province of Quebec but in the Dominion Association as a whole.

E. M. Trowern gave a very interesting and instructive talk on what the association really meant to the retail merchant. It was not an association with its name and large membership its biggest asset, but was an incorporated body of men which had the interests of the individual merchant at heart. A

E. SAUVE

President of the hardware merchants section Montreal branch R. M. A., who was re-elected second vice-president of the Quebec Board, R. M. A., at the annual convention.

JOSEPH C. SAMSON

Of the hardware firm of Samson and Filion Hardware Co. Ltd., Quebec City, and Mayor of Quebec, who addressed the annual convention of the Quebec Board. R. M. A.

London Hardwaremen Have Big Day

Seven Hundred Picknickers Go To Springbank for Big Program of Races and Other Contests—Hardwaremen Show Outstanding Ability and Skill in Baseball Game and in Contests—Merchants From Outlying Points Also Attend

By special representative of Hardware and Metal

LONDON, ONT.—The seventh annual outing of the London Retail Hardware Dealers' Association was held at Springbank this year for the first time in the history of the organization. The change from Port Stanley to the city's beautiful park did not affect the success of the picnic in the least and the 700 people who went with the hardwaremen had the best kind of a time.

From start to finish the gathering was a real joy-time for the youngest kiddie and the oldest merchant. Every one was out to have fun and they had it and kept on having it. Every event on the big program was filled with contestants. They were out not so much to win the prize as to do their share to make the day an enjoyable one. This spirit of co-operation was noticeable throughout and showed as nothing else can do the good feeling that exists on all sides.

When it is considered that staid individuals like "Tom" Purdom, whose waist line isn't anything like as slim as it once was, challenged speed artists like Howard Crummer, of Cowan Hardware Co., to race and the challenge was accepted, some idea of the spirit that prevailed may be gained. Both entered even though they knew they were going up against youths like Russell Beattie, who was never in better trim. Length of legs counted, and in this case Howard Crummer was a winner, although it is probably years since he had tried to run a hundred yards at top speed. Tom Purdom finished third, but even then he had more wind left than either of the others.

The executive in charge of the big picnic of the London Retail Hardware Dealers' Association shown above includes top row left to right—Will Summers, E. Russell, President C. H. Summers, Howard Crummer, Russell Beattie, William O'Dell; bottom row—Charlie Craig, Tom Purdom, Charlie McKerlie and J. G. Steele.

The Baseball Game

But it was in the baseball game between the married men and the single men that the real staying powers of the contestants developed. Spurred on apparently by the "warming up" or "sweating out" that he sustained in the foot race, "Tom" Purdom went into the pitcher's box and for seven strenuous innings unpacked an assortment of shoots and curves that proved undeniably that when he entered the hardware business, the Big Leagues lost perhaps an Alexander or perhaps even a Christie Mathewson.

Everybody who saw the game admits that it wasn't the pitcher's fault that the single men won out by a score of 24 to 22. It was anybody's game right up to the minute the last man was out and it looked almost certain as if it would be necessary to play overtime. Every man on both teams got hits, plenty of them, and ran his legs nearly off, stealing bases and scoring runs. But at that the opinion was unanimous that no ball teams ever played a better game or had half as much real fun. It didn't matter one bit who won. The only thing that counted was that everybody had lots of fun, and the spectators enjoyed the game as much as the umpire, W. B. Gillespie, who never even had a decision questioned.

Major League Scouts Out

It was stated after the game, but could not be confirmed up to the time of going to press, that four major league scouts who were among the spectators are preparing contracts to be offered to Charlie McKerlie, Charlie Craig, Tom Purdom and J. G. Steele. It is understood that this is on the strength not only of their playing but the damage they did to the swat statistics, each having a batting average that makes Ty. Cobb appear a mere tyro.

Feeding the Monkeys

Howard Crummer and Charlie Craig also distinguished themselves in another branch of athletics. In a novelty contest which proved perhaps the biggest laugh producer of the afternoon they captured first and third prizes, the second prize going to Russell Beattie. The contest was known as "Feeding the Monkeys." The men contestants were the monkeys and each had a partner whose duty it was to open a box of chiclets as speedily as possible and then from a distance of four feet proceed to toss them, one at a time, into the open mouths of the men who had to kneel on the grass. According to the rules they were allowed to bend their backs or twist their necks in any way as long as they did not put their hands on the ground. Howard Crummer went through a variety of contortions that would have made him famous had the late P. T. Barnum discovered him before he went into the hardware business. It didn't make any difference how wide his partner heaved the chiclets Howard made a swoop or a dive and got them. He denies absolutely that he has an elastic neck or any special magnetic qualities which draw chiclets to him and declares that he won first prize by reason of sheer agility. He also declares that in spite of the speed with which he swooped and dived he did not swallow a single chiclet. Russell Beattie, it is understood, swallowed three or would have tied with Howard for first place.

Elopement Race

D. Westman proved that he is a "go-getter" where the ladies are concerned, and if the father of the girl he wants to marry, objects, needs to watch closely if any elopement is planned. In the elopement race in which the contestants had to start from a given point, run fifty yards to J. Steele and obtain their

Alberta Farmers' Hardware Equipment at Low Mark

Latest Reports Indicate Better Than Average Crop in Alberta and Farmers' Requirements Will Probably Be Taken Care Of—Fair Movement of Finishing Hardware—Some Price Revisions

CALGARY, Alta.—July is the between seasons month here, and this year it seems to have shown this characteristic more than usual. The spurt in business which accompanied the putting in of the crop has passe on, and the expected spurt necessary to the taking off of the crop has not begun. Seasonable sales at attractive prices are noticeable; it is evident merchants are not going to carry over tail ends of summer stocks. The buying public are practising thrift, whether from choice or necessity, but they do respond to the right sort of initiative, and any special effort to attract trade generally meets with at least a measure of success.

Crops are now at the point where it is safe to prophesy. From Lethbridge south to the border, crops are good; Lethbridge north to Calgary, fair to good; North of Calgary, poor to fair. The net result should be better than an average crop, with the heaviest returns from the districts which have suffered most in recent years.

Dealers feel that farmers' equipment is at a lower mark than in years, and that they will undoubtedly be called on to fill a lot of accumulated needs necessary to the handling of this crop, and even if this does not go beyond the necessities, it will mean nice business spread over next few months.

Fair Movement of Finishing Hardware

Building activity is mostly confined to house construction; a good portion of which is now nearing the finishing stage, and a better movement of medium-finished hardware is noticed; some dealers report this department quite active. Competition on this line is keen, and in some cases prices offered are lower than would seem justified.

The paint trade, and especially paint sundries, has held up splendidly throughout the season. The majority of dealers report increased business over previous years, and give a good deal of credit to the educational value of the "Save the Surface" campaign. The jobber and dealer have co-operated to cash in on this advertising, and like any intelligent co-operation, it has brought results.

Those dealers who feature sporting goods, all report the best trade in years on summer lines. Stocks are low and large orders have had to be brought in by express. Just now the streams are clear and fishing good and the demand for tackle very active. Golf, tennis and baseball have been particularly active all season.

With few exceptions recent price changes have been few and unimportant. Rather more in the nature of price adjustments than price changes. No price reductions have come through so far that are traceable to freight reductions on raw materials. On the other hand heavy buyers of steel goods feel that the coal strike unless quickly settled, will start heavy goods on the up grade again.

Lower Prices on Lanterns

New prices showing a reduction have come through on lanterns. Prices now are $10.32 for No. 2 and 3 plain and $10.83 for japanned.

Bale ties show a reduction of 65 cents per 100 lbs., and are now quoted at $5.25 head of lakes and $6.90 Calgary.

Stove pipes and elbows are reduced to following figures:

	per 100
6 in. patent pipe	16.36
7 in. patent pipe	17.89
6 in. ready-to-rivet pipe	14.83
7 in. ready-to-rivet pipe	16.36
6 in. riveted pipe	16.36
7 in. riveted pipe	17.89
	Doz.
6 in. heavy elbows	2.59
7 in. heavy elbows	2.92
6 in. light elbows	1.98
7 in. light elbows	2.27

Pneumatic steel tanks are quoted about 15 per cent. lower than last week. New prices are:

24 x 6	63.50
30 x 6	82.40
30 x 8	101.00
30 x 10	116.50
36 x 6	98.00
36 x 8	122.25
36 x 10	141.25

The price on orange and white shellac has followed advances on eastern markets, and is now $5.50 and $6.00 respectively, in one gallon jugs.

Local markets did not reflect last month's sharp advances on turpentine until quite recently, when two advances went through to present price of $2.00 per gallon. This represents an advance of 35 cents.

Local jobbers have adjusted their prices on lead goods to bring them in line with recent advances on eastern markets. Latest quotations are:

Pig lead, small pigs	$10.50
Pig lead, large pigs	$10.25
In ½ ton lots, deduct	50
Sheet lead, roll lots	$13.65
Lead waste pipe, case lots	$15.00
Lead coil pipe, coil lots	$14.10

Lead traps and bends, less 4 per cent.

Telegraphic advice of advances in the linseed oil market, resulted in a sharp advance of 8 cents per gallon. Prices now ruling up to two barrel lots on raw is $1.37 and on boiled $1.40.

R. B. Wilkinson has purchased the hardware business of Holton-Bradley Hardware Co., Stettler. This makes the third hardware store in Alberta operated by this enterprising young hardwareman.

Geo. M. Christie, manager of the Calgary branch of the G. F. Stephen & Co. Ltd., accompanied by Mrs. Christie, is spending a holiday on the west coast.

AN ENLARGED EDITORIAL SERVICE FOR WESTERN CANADA READERS

In keeping with the plans which Hardware and Metal is constantly making to improve its service to readers in all parts of the country ,this week sees the inauguration of a weekly market and news letter concerning developments in Alberta, from a special representative established in Calgary.

This letter will appear weekly in Hardware and Metal giving news of interest to the trade and outlining price changes and market tendencies on various lines. This will fill in the gap between Winnipeg and Vancouver which cities are now reported in each week's issue.

With a weekly report from Calgary to supplement those now appearing from Vancouver, Winnipeg, London, Ont., Hamilton, Toronto, Montreal, St. John and Pittsburg, our readers are provided with a comprehensive service such as all close followers of national movements require to intelligently direct their business.

WESTERN CANADA NOTES

Central Hardware is commencing business at Broadview, Sask.

D. T. Small has commenced a tinsmith business at Lashburn, Sask.

M. Kassian has commenced a hardware business at Vegreville, Sask.

Standard Hardware is commencing business at Vegreville, Sask.

L. Holmes, representing the Laidlaw Bale Tie Company, Limited, of Hamilton, Ontario, spent a few days in Winnipeg before returning to the East. H. F. Moulden & Son represent this firm in the West.

W. S. Gibson of The Sheet Metal Products Co. of Canada, Ltd., spent a few days in Calgary recently, looking over the branch this firm opened here a year ago, and calling on old business connections.

A. E. Dykes, general manager of the J. H. Ashdown Hardware Co., Ltd., Winnipeg, spent two days in Calgary last week on his return from a very pleasant trip to Alaska.

L. Dutil, hardware merchant of Blairmore, Coleman and Three Hills, Alta., spent a day among the jobbers of Calgary last week.

Wyman and Small of Ponoka and Drumheller have purchased the business of the Allen Hardware Co., Bowden, Alberta.

Ben McLaren, who has represented the J. H. Ashdown Hardware Co., Ltd., for years in different portions of Alberta, has accepted a position with the Winchester Repeating Arms Co., and will represent this firm in Alberta and British Columbia. Besides having a splendid connection with the hardware trade of the province, Mr. McLaren is one of the leading trap shots of Canada, and is splendidly qualified to handle his new position. Mr. McLaren has the good wishes of a host of friends.

Maritime Hardware Wholesalers Will Watch Margin of Gross Profit

Claim Made That Reduced Volume of Business and Maintenance of Overhead Costs Necessitates Revision of Lines Carried—Prices on Screws, Copper Tacks and Nails, White Lead, Etc., Revised

ST. JOHN, N. B.—Each week seems to bring forth some announcement of expansion that will have the tendency to help boost business. The latest announcement is that the Nashwaak Pulp and Paper Co., Ltd., is to spend a half million dollars in expanding the St. John mill. The new project will bring an increased demand for local labor. Last week the St. John Board of Trade received an enquiry from an English firm asking to be put in touch with manufacturers of wood boards and mouldings. Enquiries were also received from Havana and Oklahoma.

Hon. W. E. Foster, Prime Minister of New Brunswick and also president of a large wholesale house, stated recently that although there was complaint about the scarcity of money, payments have been better than was anticipated. July 4 is a heavy bank day in his business and this year paper was well met, which would indicate that retailers still have resources to draw upon.

Much Lumber Sent Across Border

Very large quantities of Maritime lumber have been sent across the border during the last few months, and when asked what he thought about the prospect for operations this winter, a prominent lumber exporter stated that there was no doubt but that there would be considerable logging, but the quantity would mainly depend upon how holders succeeded in cleaning up present stocks.

Must Watch Margin of Profit

In an interview with the press, the new president of the Maritime Wholesale Hardware Association stated that the jobbing trade had reached a time when it must take more thought about its margin of gross profit. Mr. Morton, (the president), went on to say that the trade finds itself with a decreased turnover as compared with the period of business inflation, and at the same time finds itself with very much the same overhead expenses. Just what could be done with regard to correcting this was hard to say, but if they were to remain in business the jobbers must insist upon a fair margin of profit.

This week has seen a new price on screws, and the assortment of sizes reduced in many cases. Copper tacks, all sizes, are quoted at 48 cents and copper nails, all sizes, 45 cents. White lead is quoted in 100 lb., 50 lb. and 25 lb. irons at $14.85, $14.75 and $12.85; in 12½ lb. irons, $15.25, $15.35 and $13.35. Short Stop mouse traps have been reduced to 25 cents and Four Hole chokers to $1.40. Wire nails, $3.70 per keg base, St. John, Fredericton, Amherst, Moncton, Sydney and North Sydney. $3.95 per keg base Halifax and New Glasgow. $3.90 per keg base Yarmouth. Cut nails, $5.35 per keg base St. John, Fredericton, Amherst, Moncton, Halifax, Yarmouth, Sydney, North Sydney and New Glasgow.

Some Questions Every Hardwareman Should Ask Himself

DO I KNOW that Sales Quotas, Stock Limits, Margins and Expenses are the four factors which protect my profits and that I must have a thorough understanding of each to successfully direct my business?

Do I Know the right mark up for my particular business, having in mind the percentage of administration expense, sales expense and profit?

Do I Know the factors concerned in my cost of doing business and have such record that I know at all times where I am at?

Do I Know the right mark up for each line of hardware, based on the number of turns of stock normally expected?

Do I Know that more sales are lost through poor assortment than anything else and that Stock Limits can be set for all grades of merchandise to protect me against this?

These are only some of the important elements of modern retailing which are taken up and dealt with in detail by Frank Stockdale, retail merchandising expert, in an article specially prepared for the **August 19 issue of HARDWARE AND METAL.**

The Questions Are Answered In the Annual Fall Number

Watch for it.

Events in the Trade

NEW FIRMS

Walter Davis & Co. have commenced a hardware business at 1433 Yonge St., Toronto.

The Queen City Hardware has commenced business at 1883 Queen Street West, Toronto, Ont.

FIRE LOSS

Newboro, Ont.—R. G. Bawden, hardware, has suffered fire loss.

OBITUARY

Arthur S. Bowron, for some years secretary of the Malleable Iron Range Co. of St. Thomas, Ont., is dead.

The death of George W. Ketchum, which occurred on Sunday, July 29, removes one of the leading business men of the Maritimes connected with the iron trade. Mr. Ketchum began his business career as a boy with the firm of I. and E. R. Burpee of St. John, steel and iron merchants. Later he became a director of the firm. When this firm retired from business he became identified with the St. John Iron Works, and was with them until his retirement about a year ago. Mr. Ketchum leaves behind him a record as business man and citizen of the highest order. He will be greatly missed by his friends in the trade.

PERSONALS

Among the visitors to Montreal this week were: F. O. Barber of P. & F. Corbin, New Britain, Conn., F. C. Dananenburg of Wiss Shear Co., and Mr. Griffith of Surpless Dunn & Co., New York.

Miss Margaret Wade, who is known to those in the trade as editress of "Wireless," the house organ of the McClary Mfg Co., London, Ont., is leaving about August 15th to take a position in Windsor. Miss Wade was for some years private secretary to the late John McClary.

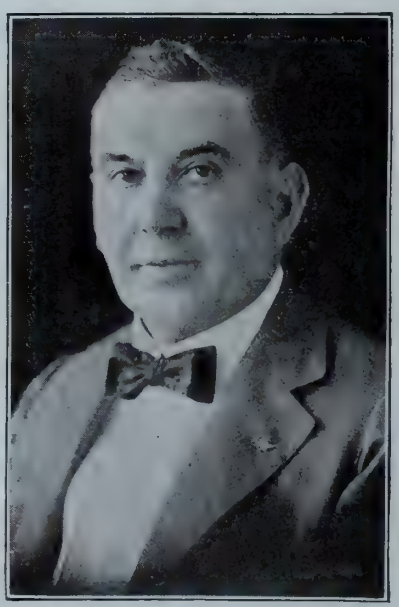
The following traveling men were in St. John last week: E. W. Long, representing Dominion Battery Co., Ltd., Harry Hart and R. C. Holder, representing Paint & Varnish, Ltd., C. Williams, representing Canada Paint Co., Ltd., Harold Ferry, representing Sargent & Co., Ltd., New Haven, Conn., James Moir, representing Corbin Cabinet Lock Co., New Britain, Conn. T. S. Isaacs representing Messrs. Hounsells (Bridgeport) Ltd., England.

J. E. Sansregret, president, and M. Lapointe, secretary of the Quebec Provincial Board, also J. G. Watson representing the province on the Dominion Executive Council are leaving Saturday night of this week for Winnipeg to attend the convention of the R. M. A., which will be held on August 8th to 11th. On August 7th, a meeting will be held of all provincial secretaries of the Dominion.

OTTAWA RETAIL CLERKS MAKE PRESENTATION

At the conclusion of its regular meeting last Saturday evening, the executive of Local No. 353 of the Retail Clerks' International Protective Association presented a traveling bag to Donald Dear, as a token of esteem and gratitude for the generous contribution of his leisure time in helping the Clerks' Association to secure their summer half-holiday under the provision of a civic by-law.

The presentation was made by J. Emile Richard, vice-president; O. Paquette, financial secretary, and Thos. Marcil, past president, who all addressed words of appreciation to Mr. Dear and reviewed the progress attained regarding the half-holidays.



CHAS. A. BOWER

Known to the hardware trade through a connection of twenty years with Clayton and Lambert Mfg. Co., Detroit, who, as announced in last week's issue of Hardware and Metal, was honored at an informal dinner given by the management.

BOOTH COULTER CO., HOLD PICNIC

The Booth Coulter Copper and Brass Company of Toronto, held an across-the-lake-excursion from Toronto. Leaving on the early 7.30 boat, 200 employees spent the day at Queenston Heights.

B. GREENING WIRE CO., HOLD PICNIC

Hamilton.—The annual shop picnic of the employees of the B. Greening Wire Company, was held on Saturday at Hanlan's Point, Toronto. The steamer Corona, of the Canada Steamship lines, leaving Hamilton at 8 a. m., arriving at Toronto at 11 a. m., conveyed the picnickers to their destination. The day was delightful and warm, a large turnout of the employees and friends attending. Among the special features of the picnic was the baby show, F. H. Rutherford and K. Knudsen acting as judges. Another feature was the needle and thread race. Dinner was much enjoyed, the committee furnishing coffee, tea, ice cream, milk, chocolates and cigars.

The success of the picnic is due to the efforts of the following members of the committee: E. Borrows (chairman), T. Rieger (treasurer), R. H. Jackson (secretary), J. Childs, J. Brunton, G. King, C. Buckingham, J. Bairstow, C. Semmens, A. Dafoe.

NOW KNOWN AS "HOTPOINT" WORKS DIVISION, C.G.E.

Stratford, Ont. — Commencing on August 1, to-day, the name of the Canadian Edison Appliance Company has been changed to "Hotpoint Works Division of the Canadian General Electric Company." R. S. Morgan, secretary-treasurer of the Canadian Edison Company, becomes manager of the local plant, under the title of "Manager of Works."

Chief officers of the works are either local people or men who have been here for some time. The principal ones are the following: chief engineer, F. W. Cuffe; works accountant, J. J. Barnes; superintendent, H. S. Smith; chief inspector, W. J. Tubman; production manager, J. Kidd.

GOOD FIELD FOR AUTO ACCESSORY TRADE IN N. B.

Fredericton, N. B.—Hon. P. J. Veniot announced that there were 16,000 automobiles registered in New Brunswick, and that the receipts from taxes were $280,000. It is evident that the hardware merchants of New Brunswick have a good field for automobile accessories.

NEW COMPANY IN KINGSTON

Kingston, Ont.—The Norman Silver Plate Co., is the name of a new concern starting business here.

RUMORED PURCHASE OF 1900 WASHER CO. BY BEATTY BROS. LTD.

Rumors are in circulation that the 1900 Washer Company through its head office in Birmingham, N. Y., is negotiating the sale of its Canadian plant to Beatty Bros., Ltd., of Fergus, Ont. Hardware and Metal endeavored to get confirmation of this report from H. Morris, manager of the Toronto branch of the 1900 Washer Company, but he was absent from the city. Beatty Bros., Ltd., declined to make a statement in regard to the matter.

CRANE LIMITED DONATE CUP

Montreal.—A new and valuable cup has been donated to the Manufacturers' Hockey League of this city by Crane Limited, through R. T. Crane, Jr., for competition next winter and years following. Mr. Crane is very interested in hockey and decided to give the cup as a perpetual challenge one. Firms which competed in the league last year were: Imperial Oil, Northern Electric, Berliner Gramaphone and Crane Limited, but more teams are expected this coming season as new applications for entrance have already been received.

CAMPBELL & CAMPBELL OPEN ST. JOHN OFFICE

Messrs. Campbell and Campbell have opened up offices and warehouses in St. John, where they are carrying a full line of Campbell axes. They are also selling agents for the Welland Vale Company and associate companies, representing them for the Maritime provinces. In an interview with Hardware and Metal, G. Wilford Campbell, stated that the axe business was picking up considerably, and that they had on hand several good orders, one or two very large ones. This would indicate that the lumber business was showing signs of improvement.

HARDWARE SALESMEN ARE OPTIMISTIC

St. John, N. B.—T. S. Isaacs, representing Messrs. Hounsells (Bridgeport) Ltd., England, is starting his semi-annual Canadian tour from St. John, having already covered his territory in the States. The St. John representative of Hardware and Metal had the opportunity of discussing business conditions this week with a number of salesmen, and found them all to be very optimistic. Mr. Hart of Paint & Varnish, Ltd., said that he was finding good results from the "Save the Surface" advertising campaign, and that business was shaping up in good form. He noticed that many of the municipalities throughout the Maritimes were painting their public buildings, and jokingly added that he hoped there would come a time when the telegraph and telephone companies would paint all their poles. Mr. Holder of the same firm, and C. Williams of Canada Paint Co., also spoke along the same lines. In answer to questions regarding the outlook for builders' hardware, H. Ferry, Sargent & Co., Ltd., stated that there was considerable improvement, and that several large jobs were under way throughout his territory. He noticed the gradual increase of business as building commodities declined in price, and was firmly convinced that conditions were rapidly righting themselves.

Disston To Make Hand Saws In Canada

Another Addition to the Hardware Industry in Canada—Large Investment Required to Provide Machinery for 35 Major Operations

AN important step forward has been taken by Henry Disston & Sons, Limited, of Toronto, who have just completed the installation of new equipment, and who are now turning out hand saws in Canada. The company have been operating in Canada for the past ten years but until recently have not actually made hand saws in Canada. Efforts in the past have been confined to bandsaws, circular saws and other large saws for the lumber trades, etc. The Canadian plant will now make handsaws, hack-saws, nest, compass, keyhole, pruning and butcher saws. On the invitation of Mr. Dingee, manager of the Canadian plant, Hardware and Metal was shown through the Disston plant at Toronto in order, as Mr. Dingee stated, "to show you that what I am telling you is right, and that we are actually making these lines here." A trip through the plant proved beyond doubt that the saws are actually being made here from the blanks to the finished product. Various processes were exceedingly interesting and as there are thirty-five major operations in the manufacture of one of these hand saws, some idea may be gained of the importance of this new industry. While counted only as one major operation, there are really eight operations in the hardening furnace, and six distinct operations in the tempering furnace.

An exceedingly large amount of special new equipment was necessary for commencing this new industry in addition to which employment is given to a large number of additional employees. Experts from the parent company have been transferred to the Canadian plant. Asked as to the trade mark of the company which has been in use for such a great many years, Mr. Dingee stated that it would remain practically unchanged except for the substitution of "Toronto" for the word "Philadelphia." Simultaneously with the announcement of the new development at the Canadian plant, has come a price revision, which on some lines shows a decline of twenty per cent.

ACTIVE TRADE IN BUILDERS' HARDWARE TOOLS

London, Ont.—July broke all past records for building permits, the next nearest figure being July, 1914, just before the outbreak of war. The figures for the month just past total 169 permits valued at just over $300,000. In July of 1914 there were 157 permits. Permits this year to date total 1,171 with an estimated value of $1,700,000.

Hardware merchants report a really excellent season in building supplies, tools and roofing. Farmers they say have been big buyers of roofing and the many fine new homes which are being erected require large quantities of glass, electric fixtures, builders' hardware and plumbing supplies and also offer many opportunities for general trade. A feature of the situation is that building permits are continuing to be issued as rapidly as ever indicating that there will be a large amount of work in hand right up to the time the snow flies.

OTTAWA EARLY CLOSING BY-LAW IS QUASHED

Ottawa.—Early closing by-law of city of Ottawa was quashed by Justice Middleton on the ground that the by-law was not in accordance with what was asked in the petition on which the by-law was passed.

Peter White, K.C., for the applicant, an Ottawa merchant, said the authority for the by-law was taken from a section of the Factory, Shop and Office Buildings Act reading:

"If an application is presented to the council of a city or town praying for the passing of a by-law requiring the closing of any class of shops situated within the municipality, and the council is satisfied that such application is signed by not less than three-fourths of the number of occupants of shops within the municipality, and belonging to the class to which such an application relates, the council shall, within one month after the presentation of such application, pass a by-law giving effect thereto and requiring all shops within the municipality belonging to the class specified, in the application to particular day of the week during such time or hours between 12.30 o'clock noon and 5 o'clock of the forenoon of the next following day, and be closed, and remain closed on one such period of the year as named in the application."

He stated the petition asked for closing from 12 noon, while the by-law authorized closing from 12.30 p.m., contending that on this ground, as well as others, the by-law was invalid.

Figuring the New Stamp Tax

ALL CHEQUES issued after August 1 must bear stamps at the rate of 2 cents for each $50 or fraction thereof. Cheques for $5,000 must bear stamps to the value of $2 which is the maximum cheque tax. A cheque up to $50 requires 2 cents in stamps but a cheque for $50.01 requires 4 cents in stamps. The following schedule shows the tax required on cheques. Clip it out and paste it in a handy place in the office.

Amount of Cheque	Tax	Amount of Cheque	Tax	Amount of Cheque	Tax
$ 50	$ .02	$1750	$ .70	$3450	$1.38
100	.04	1800	.72	3500	1.40
150	.06	1850	.74	3550	1.42
200	.08	1900	.76	3600	1.44
250	.10	1950	.78	3650	1.46
300	.12	2000	.80	3700	1.48
350	.14	2050	.82	3750	1.50
400	.16	2100	.84	3800	1.52
450	.18	2150	.86	3850	1.54
500	.20	2200	.88	3900	1.56
550	.22	2250	.90	3950	1.58
600	.24	2300	.92	4000	1.60
650	.26	2350	.94	4050	1.62
700	.28	2400	.96	4100	1.64
750	.30	2450	.98	4150	1.66
800	.32	2500	1.00	4200	1.68

HARDWARE MEN AT QUEBEC CONVENTION

(Continued from page 38)

complaint or a suggestion received from either a Provincial Board or an individual member received its proper attention in the hands of the Dominion Executive. The gain in membership during recent years had been of a very encouraging nature not only in Quebec but in all other provinces, and it was his opinion that this was wholly obtained by work which they had been able to do in helping the retail trade in general.

Taxes Under Discussion

Topics which received special attention on the morning of the second day were the taxes contained in the last budget announced by the Federal Government. These included the sales tax, income tax, stamp tax, and the tax on receipts. Now that the Government had definitely decided to collect extra revenue through the sales tax, there were some alterations advocated and these would be further discussed at the convention of the Dominion Board in Winnipeg next week. It was pointed out where the merchant would lose in connection with the stamp tax. The retailer would during the year receive a great number of cheques from his customers for payment of bills, and it was considered safe to say that in many of these cases a stamp would not be affixed. Previously it meant two cents on every cheque, but in future the amount lost would be much greater. Although every person presenting a cheque must according to law affix the stamp, there were many instances in the life of the retail merchant where he would not force his customers to do so. The tax on receipts was criticized and it was hoped that further action on this would be taken in Winnipeg next week and some pressure brought to bear on the Government before this was applicable on January 1st, next.

Election of Officers

All officers for the ensuing year were re-elected. Mr. Savard, president of the Quebec District, asked the members present to endorse what he thought was the best plan for the association. He urged that the same board as last year be re-appointed because the work which they had accomplished in the year previous was very praiseworthy and it was his opinion that a new slate of officers could not step in and continue the good work as capably as the former officers. This was unanimously approved of, but in addition J. A. Lapointe was elected third vice-president according to a regulation approved during the last term whereby each Provincial Board is allowed this post.

Following are the re-elected officers for the coming year:

President J. E. Sansregret; 1st vice-president, Joseph Elie; 2nd. vice-president, E. Sauve; 3rd vice-president, J. A. Lapointe; secretary, M. Lapointe; treasurer, Joseph Filiatrault.

Representing the Quebec Board on the Dominion Executive, J. G. Watson.

SYSTEMATIC INVESTMENT IS THE ONLY WAY

(Continued from page 34)

old, or nearly $25,000 on his fifty-fifth birthday, while at 60, he would have over $35,000.

Taking it another way, he found that if he continued saving on this plan for the entire 35 years, until his 65th birthday, he would have put away a total of $14,918.40—but he would then have $50,000! This would show that somebody had worked, planned, sweated and labored to give him $35,081.60, and that this premium of nearly $2.50 for each of his own dollars paid him by another, who then also returned all his own dollars, would come automatically.

What are You Working For?

The man who starts at 25 only puts in $12,235.20 in the 40 years, so he gets a premium of $37,764.80; but any man who starts in anywhere on this plan has the advantage of security, freedom from worry and the knowledge that the biggest, brainiest, business moneymakers in the country are working for him. Moreover, they are working willingly, gladly, eagerly, without supervision or thought on his part. He saves and sleeps nights. They work and worry—and pay him for the privilege. Talk about your plutocrats—think of bloated bondholders—rave about the money-power if you will; the fact remains that the true employer of other men's brains, who lives carefree while taking toll of other men's efforts is the systematic saver. The man who uses his accumulated labor, meaning some of the money he earns and sets aside, in sound investments is top of the heap every time.

So now stop and ask yourself what you are working for. Maybe you have thought you were working for money. If so, probably you have noticed that each year ends with a greater accumulation of stock. fixtures and accounts—but no more money.

But the true thing to work for is a competence. something on which you can depend when age overtakes you which will keep you independent of others to the end—in peace, comfort and sufficiency. And the way to get this is systematically to withdraw a certain sum of money—MONEY, note, for nothing else will do—from your business and put it away in sound investments.

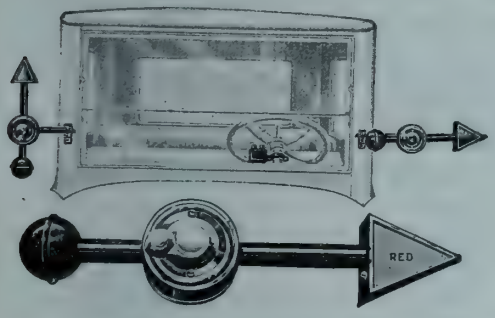
New Hardware Goods

Offered to Canadian Hardwaremen

HANKEE DIRECTION SIGNAL

The "Hankee" signal, a new accessory product marketed by the Naser Electric Co., of Minneapolis, Minn., is an all-electric directional traffic indicator, operated by a patented electric motor located in the central housing of the arrow arm. The winding is stationary and no contacts or brushes are used. The ball on the end opposite the arrow housing acts as counter balance, permitting the signals to work at any angle and preventing them from dropping down through vibration of the car in motion.

The push of a button conveniently mounted on the steering column lowers the signal, at the same time causing a two candlepower lamp inside the arrow housing to light up, showing a red light to the rear and a white light to the front. A second short push of the same button brings the signal back into normal position. No current is used by the



motor either when at rest or when in the signalling position. There is, it is claimed, no drain on battery. The current used is only for the second or so that the button is pushed .

The signals are visible from the front as well as from the rear, day and night. They operate in clear view of the driver.

They are installed like a spot light; all wiring being under the dashboard. It is pointed out that the left side signal makes a convenient parking light .

STARRETT MICROMETER

The L. S. Starrett Co., has brought out a new micrometer, which is now offered to the trade. The manufacturers state this tool is moderately priced, either with or without ratchet stop. This one-inch micrometer caliper, No. 435, has a black enameled, drop-forged, rigid construction frame. Decimal equivalents are marked on the thimble. As the screw is .312 in. in diameter and the contact points .270 in., the makers point out that there is an unusually large wearing surface which insures long life.

"HUSKIE" CAMP STOVE

The Sheet Metal Products Co., of Canada, Ltd., Toronto, are now making the "Huskie" camp stove in 2 hole and 4 hole sizes. The manufacturers state that these are made of heavy sheet iron, and the measurements are as follows:

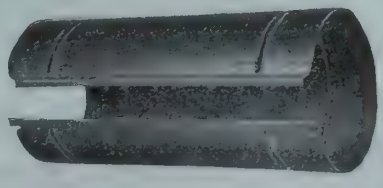
The stoves are equipped with 2 or 4 cooking holes, with covers, and an oven which has direct and indirect draft. For quick fire, the direct draft is used, but for heating the oven, the indirect draft is used by operating damper. This, it is claimed, sends the heat entirely around the oven, making it a perfect baker.

The fire box is an extra size to accommodate large pieces of wood, and the draft is regulated by two draft holes with damper in front of the stove. The stove is fitted with 5 in. collar, and 5 in. collapsible pipes which fit same.

One feature of the "Huskie," is the fact that they can be folded and packed in a very small space in a short time. It is further claimed that the stove can be taken down and set up again in about five minutes.

END LOCK STOVE PIPE

The end lock stove pipe is a new line placed on the market by Sheet Metal Producers Co. of Canada, Ltd., River St., Toronto. It is designed in a manner which enables it to be easily put together. The manufacturer states that it is notched and folded at both ends in such a way as to leave a lock consisting of the folded edge. This means that

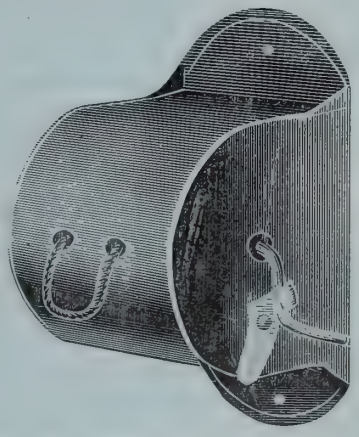


the tongue or cleat is double, and will outlast the pipe itself. The makers further state that to set up a pipe, it is only necessary to hook the folded edges together and bend the tongues down on the inside, with the fingers or a pair of pliers.

"IDEAL" CLOTHES LINE

An article which is described as an entirely new line for Canadian production is the Dominion "Ideal" clothes line reel, being manufactured by the Sheet Metal Tools and Hardware Co., Toronto. This product is specially designed for use in kitchens, bathrooms, back verandahs, laundries and similar places. It consists of a small metal case totally enclosing a cotton clothes line.

The Ideal reel is being made in three grades, No.'s 1, 2 and 3. The first is supplied with only twenty feet of line, is painted black and without the stop for securing the rope. The other two classes are fitted with thirty feet of line, being also equipped with a stop or catch so as to enable any length of rope to be used up to the full quantity in the reel. No. 2 is painted in a color enamel with baked finish. No. 3 is nickel-plat-



ed finish. Screws and hooks are furnished complete. The Sheet Metal Tools & Hardware Co., was formerly known as the Coleman Fare Box Co.

DOMINION 30-30 CARTRIDGE

The Dominion Cartridge Co., Ltd., Montreal, are announcing a new 30-30 cartridge which, it is claimed, has an increased velocity of 200 feet more per second. The new Dominion 30-30 is loaded with a progressive burning powder that gives a flatter trajectory, and according to the manufacturers also has greater penetration and shocking power. The additional velocity is a feature of direct interest to the sportsman. The makers also point out that on account of this increased velocity, it will be necessary when using these new Dominion cartridges to adjust the sights accordingly.

Weekly Hardware Market Reports

Statements from Buying Centres

Markets at a Glance

MANY substantial price reductions as well as important increases appear on the current hardware markets. Easier levels are noted on the Henry Disston line of hand saws, Weed, Rid-O-Skid and Dreadnought makes of auto tire chains, Community plate, stainless steel cutlery, large head roofing nails, single barrel guns, linseed oil, and various patterns of pruning shears made by Peck, Stow & Wilcox.

A marked increase is recorded in galvanized sheet levels, this being attributed to the southern rail and coal strikes and their combined effect upon the steel industry. Curtailment in production, due to coal shortage, has emphasized the scarcity of galvanized sheets to meet the current call for these products. Another increase of ten cents is reported in some circles on bar iron, but this higher price has not been generally adopted. Lead is again firmer and lead sheet prices are stronger. The ingot metals are again showing signs of recovery with spelter on the upward climb. A slight increase in sash weight quotations, both solid and sectional, has also been announced.

Price revisions are still pending on roofings, no new developments being evident in this situation. Boiler tube prices have been slightly changed, this market still being devoid of uniformity and the current levels nominal. Scrap materials remain quiet, and waste rubber prices have sagged. Some temporary unsettlement is reported in the wire nail situation, price shading having resulted in the appearance of quotations away below the average base. The seasonal call for builders' hardware is still evident. The more serious effect of southern strike developments on domestic steel interests has forced manufacturers to negotiate for future coal supplies with Welsh fields. The bar iron market is strong, but the present period of lighter requirements has offset the tendency to higher levels.

Western markets report that anticipations for an average crop have considerably bolstered up trade conditions, while the realization of optimistic harvest reports would undoubtedly form the basis of an improved business movement generally. Retailers continue to purchase threshers' supplies and seasonal lines in moderate quantities, and certain wholesalers have expressed the opinion that a last minute rush for hay forks and similar goods would severely tax their ability to meet such requirements and rapidly deplete stocks.

Montreal Markets

MONTREAL, August 3.—The general trend to hardware prices is somewhat the reverse of recent weeks as price revisions are mostly in a downward direction. One of the outstanding changes is on Disston saws, a substantial reduction being announced on the various lines of hand saws. American large headed roofing nails are reduced one dollar per hundred lbs., and Weed, Dreadnought and Rid-O-Skid tire chains have new lower list prices. Community plate, stainless steel knives show a decline in price. There is little improvement to date on the local wire nail situation and a base price much below former levels is still being quoted. In steel producing circles the coal situation is attracting more attention and manufacturers report that they are now working on reserve supply. Certain relief is expected from importation of Welsh coal and shipments from mines in Nova Scotia, but the undertone of the steel industry is very firm. Recent shipments of English galvanized sheets have arrived locally, and stocks are temporarily replenished. A fairly strong undertone is reported in the ingot metal markets, spelter continuing on its upward trend.

SALES TAX AFFECTS CUT NAIL PRICES

Montreal.

Owing to certain jobbing houses further advancing quotations on cut nails five cents per keg, on account of the sales tax, thus charging the dealer only 2¼ per cent., there is a slight variation in quotations among local distributors. The base price f. o. b. Montreal should read $4.60 with the five cents extra in some quarters.

STILL ACTIVE DEMAND FOR CORRUGATED SHEETS

Montreal.

There is very little change in the corrugated sheet market. Manufacturers state that recent shipments from overseas have replenished their stocks of flat galvanized sheets and with further arrivals expected they hope to be in a position to continue to supply the demand. The call for corrugated sheets has been very extensive this year and with an active trade during the fall months dealers look for a record season. Quotations are somewhat more settled than they were in previous weeks, especially on the lighter gauges, and following are recent prices and discounts:

CORRUGATED SHEETS—

	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 26 U. S. gauge	8 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins 75 cents per sq. extra.

AMERICAN ROOFING NAILS REDUCED IN PRICE

Montreal.

A reduction of $1.00 per 100 lbs. is made in quotations on American large head roofing nails, and these are now quoted at $9.50 per keg with the usual two cents per lb. extra for smaller quantities.

PRICES ON BRASS AND COPPER GOODS UNCHANGED

Montreal.

While virgin copper on primary markets has recently shown a fair amount of strength, no change has been made in local quotations on such lines as sheets, rods and tubing. Trade in these lines is described as only of fair propor-

tions, this fact being taken into consideration by manufacturers and distributors in adjusting their higher cost basis. The undertone of the market remains firm at the following prices:

	Base
BRASS—	
Sheets base	0 24
Rods, ½ to 1 inch, round	0 22
Tubing, seamless, base	0 30
COPPER—	
Rods, ½ to 2 inch	0 29
Soft sheets, plain, 16 oz. and heavier, lb.	0 32
Plain tinned, 16 oz. and heavier, lb.	0 36
Polished, and tinned, 16 oz. and heavier, lb.	0 41
Tubing, lb.	0 32

Above prices are for full sheets or bars. Cuts 5c. per lb. higher.

WIRE NAILS NOW QUOTED AT $3.25 BASE

Montreal.

Recent developments on the local market for wire nails, when an unsettled feeling among manufacturers and jobbing houses resulted in price shading of the former base price, leave the quotation of $3.25 base most general. While this price is recognized as ridiculously low when compared with the former price level, and in comparison with replacement cost, this condition has prevailed for the past three weeks, although it was thought that the situation would have righted itself before this date. It is still hoped that an agreement will be reached whereby higher prices will rule in the very near future.

REDUCED LIST PRICES ON TIRE CHAINS

Montreal.

Distributors of Dreadnought, Weed and Rid-O-Skid tire chains, announce a slight reduction in list prices, with the usual discount of 25 per cent. Following are new lists and discounts on chains and cross chains:

TIRE CHAINS— Size	Weed Per Set	Rid-O-Skid Per Set
30 x 3½	6 00	3 75
32 x 3½	6 60	3 95
31 x 4	7 25	4 10
32	7 50	4 25
33	7 75	4 50
34	8 50	4 75
35	9 00	....
32 x 4½	8 75	4 75
33	9 00	....
34	9 25	5 00
35	9 75	....
33 x 5	10 00	....
34	10 50	....
35	10 75	....
36	11 25	....
37	11 75	....
36 x 5½	14 50	....

Discount 25 per cent.

Cross Chains per 100—	
3½ inch	11 00
4 inch	12 00
4½ inch	13 00
5 inch	15 00
5½ inch	18 00
6 inch	22 00

Discount 25 per cent.

STEEL PRODUCERS NOW NEGOTIATING FOR FURTHER COAL SUPPLIES

Montreal.

The possibility of the coal strike and threatened railway strike having a much more serious effect on the steel industry, continues to attract the attention of both producer and distributor. Coal stocks of domestic manufacturers are dwindling and various plants are seeking new sources of supply. Reports given Hardware and Metal this week indicate that manufacturers are now working on coal reserves which will last from four weeks to four months, various firms being more fortunate than others in this regard. Because of the quality of coal from our domestic mines in Nova Scotia, steel producers claim that it cannot be used for coking or gas purposes and naturally importing from the Welsh coal field is now looked to as the most practicable source. It is hoped that importations from overseas will meet the situation sufficiently to assure consumers that curtailment of operations will not reach serious proportions at least for some time.

Local quotations on bar iron and steel remain at $3.15 base, and with the present situation, as outlined above, a strong market is anticipated for the ensuing weeks. It is pointed out that stocks of iron and steel are at a low level and if production is curtailed it will have a direct bearing on the situation. There is however, a usual period of lighter requirements ahead, and before the active buying movement in the Fall there is time to work on a surplus, thus improving stocks for the following Fall and Winter months.

IRON AND STEEL—	
Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single reeled machinery steel	5 25
Band steel	3 50
Spring steel	4 75
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

PRICE REVISIONS PENDING ON ROOFINGS

No definite change has been announced with regard to the situation on ready roofings. In support of the contemplated changes outlined in last week's issue of Hardware & Metal, however, one manufacturer stated that rubber roofing will likely reach lower price levels in the near future, also mineral surfaced roofing and shingles. Probable reductions on tarred felts are outlined, but sheathings are described as selling on a very low basis. Although no date has been set for such price revisions, it is expected that a decision will be reached in the next week or so. In the meanwhile one manufacturer has announced that prices are guaranteed against decline for thirty days from the date of the shipment of the order

DISSTON SAWS AT REDUCED PRICES

Montreal.

New lower prices are given on the Henry Disston line of hand saws. The new quotations show a reduction of approximately 20 to 25 per cent. on the various sizes and grades. Following are present net prices on some of the better known lines.

DISSTON SAWS—

D. 8 x 18, $23.65 per doz. D. 8 x 20, $26.10 per doz. D. 8 x 22, $28.00 per doz. D. 8 x 24 $30.00 per doz. D. 8 x 26, $31.25 per doz. D 8 x 26R, $31.25.

No. 12 x 20, $3210 per doz. No. 12 x 22, $35.00 per doz. No. 12 x 24, $37.50 per doz. No. 12 x 26, $40.00 per doz. No. 26R, $40.00 per doz.

No. 7 x 22, $25.00 per doz. No. 7 x 24, $26.25. No. 7 x 26, $27.50. No. 7 x 26R, $27.50.

ARRIVALS OF ENGLISH SHEETS SUPPLY MARKET

Montreal.

The current situation on galvanized sheets is somewhat improved this week insofar as local stocks are concerned, as recent shipments have arrived from overseas. A consignment at the close of last week brought temporary relief to distributors and further shipments are expected to follow at regular intervals from now on. It is also reported that a shipment from domestic mills lately relieved the shortage in a few quarters. Distributors still anticipate a very strong undertone but owing to the English market the chances of a serious shortage, because of more serious developments in the United States coal strike, is thought to be remote. Bookings for Canada plate for Fall delivery are now being sought, but up to the present these are somewhat backward, dealers for the most part apparently willing to wait until actual demand is felt. Following are prevailing prices:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 00	7 50
26 gauge	6 75	7 25
24 gauge	6 15	6 65
22 gauge	5 80	6 30
18—20 gauge	5 10	5 60
Other Brands—		
10¾ oz.	6 75	7 25
28 U. S. gauge	6 35	6 85
26 U. S. gauge	6 05	6 55
24 gauge	5 90	6 40
22 gauge	5 90	6 40
18—20 gauge	5 75	6 25
16 gauge	5 60	6 10

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	13 00
20 x 28 IC, 112s	13 50
20 x 28 IX, 112s	15 50
20 x 28 IXX, 56s	9 00
20 x 28 IXXX, 56s	9 75
TERNE PLATE—	
20 x 28 IC, 112s	14 00
CANADA PLATE—	
Half bright 52s	5 00
Half bright 60s	5 10
Blued, 52s	5 25
Blued 60s	5 35
Welsh, polished, 52s	7 00
Welsh, polished, 60s	7 25
Galvanized, 52s	7 25
Galvanized, 60s	7 75

COMMUNITY STAINLESS CUTLERY PRICES LOWER

Montreal.

A reduction is made on Community plate, stainless steel cutlery and following are new prices on the hollow handle Grosvenor, Adam and Patrician designs: medium knives, $18.10 doz.; dessert knives, $17.60 doz.; fruit knives, $15.20 doz.

SEASONAL TRADE RECORDED IN SCRAP MARKETS

Montreal.

Dealers in scrap metals state that notwithstanding the present mid-summer period there is a fair amount of business being done, one dealer describing present trade as, "not brisk by any means, but quite satisfactory considering we are now in the midst of real mid-summer." Prices, with the exception of scrap rubber, which is very dull with quotations easier, are being fairly well maintained at unchanged levels. Dealers anticipate a fair amount of strength in the market generally for future because of the upward swing in the primary steel markets and higher production costs. Average dealers' buying prices are the following:

WASTE MATERIALS—

Automobile tires		0 50
Rubber shoes		0 02
Yellow brass	0 05 to	0 06
Red brass		0 08¾
Light brass		0 04
Scrap zinc		0 03½
Lead, heavy		0 04½
Lead, tea		0 03
Light copper	0 08½ to	0 09
Heavy copper		0 11
Wrought iron R. rd., No. 1, per gr. ton		10 00
Malleable scrap (ton)	9 00	10 00
Pipe scrap (ton)		7 00
Heavy melting steel	9 50 to	10 00
No. 2 busheling		3 00
Boiler plate	8 00	9 00
No. 1 machinery cast	20 00 to	21 00

SEASONAL DEMAND FOR CEMENT: PRICES UNCHANGED

Montreal

Cement quotations are unchanged with trade continuing in seasonal proportions. Building permits in the city promise an active building program for Fall and dealers anticipate a good movement up until the earlier winter months. Following are unchanged local quotations:

CEMENT—

Car load lots, per bag, f.o.b. cars	$0 92
Per bag, delivered	1 00
Less car lots, per bag, f.o.b., yard	1 00
Per bag, delivered	1 10

Less 5 per cent.
Rebate of 20 cents for empty bags.

SLIGHTLY IMPROVED TONE IN BOILER TUBES

Montreal.

The general upward trend in iron and steel markets is said to reflect a slightly firmer tone in boiler tubes. It is pointed out however that chances of a stiffening of prices locally will largely depend on the movement of these products in the ensuing weeks. Trade at the present time is quiet and quotations are on a purely nominal basis. Unless a more active consumptive demand becomes in evidence there is little incentive to increase prices. There is usually a fair amount of repair work in the later summer months however and a slight improvement is looked for at a little later date. Following are average nominal quotations:

BOILER TUBES—	Seamless	Lapweld
1 inch	20 00	....
1¼ inch	22 00	....
1½ inch	22 00	....
1¾ inch	23 50	....
2 inch	22 00	16 00
2¼ inch	24 00	20 00
2½ inch	25 00	20 00
3 inch	29 00	24 00
3½ inch	34 00	28 00
4 inch	43 00	35 00

STRENGTH STILL APPARENT IN INGOT METAL MARKETS

Montreal.

During the past week the ingot metal markets have been somewhat irregular although a strong tone is still shown. Conditions in the U. S. A. are naturally affected by the strike situation which has caused a certain advance in prices, but apart from this metals in general are firm and would seem to point to higher figures. The London market remains quite strong and demand is generally well maintained.

TIN.—After showing an advance of almost two weeks duration, London had a slight set-back in the early part of the week, but it is considered difficult to say whether this is temporary or not. July figures show a decrease of 2,000 tons in visible supply and shipments from the Straits are lower than any previous month this year. It remains to be seen whether London can advance prices in face of lessened consumption in the U. S. A. Local market is still firm at 36½ cents.

COPPER.—The New York market remains steady with reports fairly good and domestic demand well maintained. It is stated that if it were not for lower consumption owing to strike conditions there might be a scarcity of early shipment copper, as it will be several months before new production is available. London has been slightly higher during the past week with prospects of a steady market continuing. Locally this metal is quiet with electro quoted at 17¾ cts., casting at 17½ cts.

SPELTER. — Spelter remains the strongest metal on the list and new high prices are being registered each day. Spot metal, East St. Louis, has sold as high as 6.30, and a figure of 6.50 would not be surprising. Such prices will naturally stimulate production, but this will not be available for some little time. London has advanced about £4 during the past few weeks and this market may have to look to this side for supply. Local market is strong at 8¾ cents.

LEAD.—This metal shows a little better tone in the U. S. A. without much change in prices, while spot metal is as scarce as ever in London It is considered remarkable how the price of lead has been maintained as it is on a much higher basis than other lines. Supplies in Canada are reported ample with prices following the trend of foreign markets. Present quotation 7 cents.

ANTIMONY.—Antimony is quiet, although prices are said to have probably touched bottom on this movement. Quotations are unchanged at 6½ cents for Chinese and 7½ for high grade English.

ALUMINUM.—This market is still very quiet with practically no change in the market tendency. Quotation is unchanged at 24 cents.

Toronto Markets

TORONTO, August 3.—A number of substantial price advances and declines attract special attention to the current hardware markets. Reductions include the Disston line of hand saws, Community plate stainless steel cutlery, Weed and Rid-O-Skid auto tire chains, roofing nails, single barrel guns, and various patterns of pruning shears. Marked increases appear on galvanized sheets, while a further ten-cent advance is reported in some quarters on bar iron prices, this upward move, however, not being generally adopted as yet. Sash weight prices on both sectional and solid types are at a slightly higher level. The upward trend continues in the ingot metal markets, lead and spelter leading the way towards recovery. Some temporary unsettlement is noted in the wire nail situation. Minor revisions have appeared in boiler tube prices, these levels being nominal and the market still devoid of uniformity. A firmer tone is evident in trough and piping, these products reflecting the higher prices on flat galvanized sheets, as well as a seasonal call. Price revisions are still pending on roofings.

BIG PRICE REDUCTION ON DISSTON HAND SAWS

Toronto.

The Henry Disston line of hand saws has been substantially reduced in price, the changes in quotations on some lines being as much as $9.00 and $12.00 per dozen. Lists showing the old prices, the new levels, and the extent of the decline in each case are included elsewhere in this section.

It is stated that these products are now being made in Canada, and quotations have been lowered accordingly. Hand saws, buck saws, compass, pruning and butcher saws are all reduced between 15 and 20 per cent.

SLIGHT INCREASE IN SASH WEIGHT PRICES

Toronto.

A slight increase has been announced in the local prices on both solid and sectional sash weights. These products are now quoted as follows: solid, $2.60 per cwt.; sectional, ½ and 1 lb., $3.00 per cwt.

PRUNING SHEARS ON EASIER PRICE LEVELS

Toronto.

A slight reduction has been announced on various patterns of pruning shears made by the Peck, Stow & Wilcox Co. The extent of the revision is around five per cent.

LOWER QUOTATIONS ON SINGLE BARREL GUNS

Toronto.

Single-barrel guns also appear with a slight reduction in prices this week. The non-ejector is quoted at $10.80, and with ejector the price is now $11.25.

DECLINE IN PRICE ON WEED TIRE CHAINS

Toronto.

Reduced list prices on Weed and Rido-skid tire chains have been announced, the new levels being effective from August 1. The extent of the decline is stated as approximately five per cent. Following are revised list prices with discounts applying:

WEED TIRE CHAINS FOR AUTOMOBILES—

Sizes	List Prices Per Pair
30" x 3½"	6 00
32" x 3½"	6 60
31" x 4"	7 25
32" x 4"	7 50
33" x 4"	7 75
34" x 4"	8 50
35" x 4"	9 00
32" x 4½"	8 75
33" x 4½"	9 00
34" x 4½"	9 25
35" x 4½"	9 75
33 x 5"	10 00
34" x 5"	10 50
35" x 5"	10 75
36" x 5"	11 25
37" x 5"	11 75
36" x 5½"	14 50

WEED CROSS CHAINS—

	Per 100
3½"	11 00
4"	12 00

Sizes	List Prices Per Pair
30" x 3½"	3 75
32" x 3½"	3 95
31" x 4"	4 10
32" x 4"	4 25
33" x 4"	4 50
34" x 4"	4 75
32" x 4½"	4 75
34" x 4½"	5 00

Discounts 1 to 10 pair in one shipment, List Less 25%. 11 to49 pair, 30%. 50 to 99 pair, 33 1-3 %.

TEMPORARY UNSETTLEMENT IN WIRE NAIL MARKETS

Toronto.

While price shading is reported on wire nails in eastern distributing centres, owing to some unsettlement between manufacturers and jobbers, the local quotation on these products is reported as unchanged. The base of $3.65 is being generally maintained, manufacturers stating that no change has been made, while wholesalers look upon the lower levels reported as merely a temporary situation.

No Decision Regarding Furnace Prices

Rising Costs of Raw Materials Caused Movement to Pass Along Advances—Manufacturers Watching Coal and Rail Strike Situation—These Conditions Offset the Possibility of Easier Levels—Will Not Increase Prices Unless Forced to Do So

REFERRING to the recent reports that production costs of furnaces and ranges were going up and that prices on these products may have to be advanced in the near future as a result, one manufacturer stated to Hardware & Metal that the conditions outlined undoubtedly contributed towards such a situation, but they would not consider advancing prices unless absolutely forced to do so. It was pointed out that with the increased cost of foundry iron, coal, sheets and plates, all of which materials enter into the manufacture of stoves, ranges and furnaces, production figures have recorded a marked rise. That a movement to reflect these higher levels in the quotations on furnaces, etc., for the coming season had been noted in certain quarters, was also admitted.

It was further stated, however, that the scarcity of coal combined with the transportation difficulties were the two principal factors which stove and furnace manufacturers were now watching, and unless these conditions became much more drastic no immediate action of a price nature was being considered. That it was not considered advisable to increase prices at this time of the year, was the impression, even although primary costs might warrant such a change.

On the other hand, however, no indication regarding the actual trend of prices could be secured, it being explained that the situation was indefinite and would probably remain so while present conditions existed in the raw material markets. That some reductions might have been announced seems to be the feeling in some quarters, was the opinion of this manufacturer, if the factors above outlined had not caused producers to re-consider cost figures in relation to selling levels. As it is, the present situation tends to decidedly strengthen the present quotations.

ROOFING NAILS ALSO AT REDUCED PRICES

Toronto.

American roofing nails have been lowered in price, the extent of the decline being $1.00 per 100 lbs., or around ten per cent. The new level is $9.50 per keg, and less quantities at $11.50.

COMMUNITY STAINLESS CUTLERY PRICES LOWER

Toronto.

Some reductions have been made in Community plate, stainless steel cutlery. The revised prices following apply to hollow-handled knives in Grosvenor, Adam or Patrician patterns.

STAINLESS STEEL CUTLERY—

Medium knives, $18 10 per dozen. Dessert knives, $17.60 doz.; Fruit knives, $15.20 per doz.

Knife and fork sets, six knives and six forks:

	Per Doz.
Medium, with flat handled forks	14 19
Do., with hollow handled forks	17 87
Dessert, with flat handled forks	13 77
Do., with hollow handled forks	17 49

ANOTHER INCREASE IN BAR PRODUCT PRICES

Toronto.

Bar products have risen another ten cents, thus placing quotation of $3.25 on the local market. However, the previous level of $3.15 is still obtainable. This upward climb represents the insufficiency of transportation and lack of coal in southern primary markets, which developments have been responsible for a curtailment in steel production. The coal shortage is assuming a more serious stage, and following the banking of several furnaces in the American fields has come the institution of priority regulations by the Interstate Commerce Commission governing the distribution of available coal supplies. This ruling places iron and steel in the fifth group along with general industry.

Owing to the rising trend in pig iron prices, this similar increase in bar product quotations was more or less expected. The situation as affecting steel and steel products generally is being keenly watched, in view of the direct reflection on domestic prices and current conditions. Revised price levels follow:

IRON AND STEEL—

Mild steel bars, base	3 15	3 25
Mild steel bands 3-16 in. base	3 65	3 75
Bar iron, base	3 15	3 25
Angle iron, base	3 22	3 35
Horseshoe iron	3 75	3 85
Tire steel	3 35	3 45
Spring steel	7 00	8 00
Sleigh shoe steel	3 15	3 25
Hoop steel	4 00	4 10
Norway iron	....	12 50
Toe caulk iron	4 00	4 10
Crucible cast sheet steel		28 00
Mining drill steel		18 50
Cast tool steel, high grade		30 00
Cast tool steel, medium		18 00

LEAD SHEETS FIRM UP HALF CENT PER LB.

Toronto.

Lead sheets have now generally firmed up in price, the extent of the upward movement being approximately one-half cent per lb. This change brings the current average price to 9½ cents per lb. whereas the former quotation was nine cents. Other lead and zinc products continue unchanged in price, the upward revisions recorded recently

still being in effect. The undertone of the market is reported strong, with primary metals again on the road to improvement, consuming interest being on the increase and slightly higher levels now prevailing. Following are current levels on these products:

LEAD AND ZINC GOODS—

Lead pipe, list per lb.		0 13
Lead Waste, pipe, list, per lb.		0 14
Do., over 8 in., list per lb.		0 15
Lead pipe is subjected to a discount of		10%
Lead traps and bends		15%
Lead sheets 4 to 6 lbs. sq. ft. in rolls, lb		0 09½
Cut sheets, ½c to ¾c lb. extra and cut sheets to size 1c lb. extra.		
Solder, wire, per lb.		0 30
Do., strictly, lb.		0 22½
Do., wiping, lb.		0 21
Do., guaranteed, lb.		0 24
Do., commercial, lb.		0 21
Zinc sheets, per lb.	0 09	0 10

MARKED PRICE ADVANCE ON GALVANIZED SHEETS

Toronto.

Another advance of thirty-five cents per 100 lbs. is recorded on galvanized sheets, this development being a direct result of the coal and rail strikes in the U. S. and their combined effects upon the steel industry. As noted in recent reports, galvanized sheets have been in good demand and the curtailment in production due to coal shortage resulted in a scarcity of these products. Consequently, quotations are climbing and the rise recorded this week, while being of a more extensive nature than recent changes in this direction, serves to emphasize the more serious side to the situation from a production viewpoint. A higher sheet market has been more or less freely predicted during the past week or two, as the continuation of a coal strike and the shortage of cars resulting from the tie-up in rail transportation, brought forth the announcement from southern mills that several furnaces had to be banked. Black and blue-annealed sheets remain unchanged in price, the demand for these being more moderate. Consumers continue to exhibit marked concern over delivery. Following are average revised levels:

BLUE ANNEALED SHEETS—

10 gauge, base	4 00
12 gauge	4 05
14 gauge	4 10

BLACK SHEETS—

18-20 gauge	4 80
22-24 gauge	4 85
26 gauge	4 90
28 gauge	5 00

A charge of 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Hd.
28 gauge	7 50
26 gauge	7 25
24 gauge	6 65
22 gauge	6 30
18 and 20 gauge	6 10

	Premier and	Apollo
10¾ oz.	6 75	7 30
U. S. 28 base	6 35	6 90
U. S. 26 base	6 05	6 60
22 and 24	5 90	6 45
18 and 20	5 75	6 30
16	5 60	6 15
12 and 14	5 45	6 00

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown is 20c. per 100 pounds.

GASOLINE PRICE DROPS ONE AND HALF CENTS

The price of gasoline has declined one and a half cents, thus bringing the current quotation to 34 cents per gallon.

MINOR REVISIONS IN BOILER TUBE PRICES

Toronto.

Another slight revision in boiler tube prices has been made, this time the change showing a distinct upward tendency. The large sizes of seamless tubing record a slight reduction, but minor increases are noted on other sizes and also on certain sizes of lapweld. The market governing these products is still described as nominal, and the new quotations merely represent the average levels at which trade in boiler tubes is being consummated. Repair work to heating plants is reported as bringing a fair amount of small business, while the developments in the steel markets generally reflect a much stronger tone and upward price tendency on the finished goods.

BOILER TUBES—

	Seamless	Lapweld
1 inch	19 00	....
1¼ inch	20 00	....
1½ inch	20 00	....
1¾ inch	21 50	....
2 inch	20 00	16 00
2¼ inch	22 00	19 00
2½ inch	23 00	20 00
3 inch	27 00	24 00
3¼ inch	32 00	28 00
4 inch	41 00	35 00

SAYS NO ADVANCE IN FENCE PRICES: PRICES ON WOVEN WIRE FENCE HAVE NOT CHANGED

Toronto.

The early part of July one fence concern, selling direct to farmers, advertised that prices would advance July 15 but according to one of the largest fence producers in Canada, lists are now being distributed to the hardware and implement trade, by an individual, styling himself as manufacturers' agent, offering a price that is even lower than that price at which the company in question has been selling since last winter. It is frequently stated that in looking up the directory this man, offering the lower prices to the trade, is given as the superintendent of the fence company.

A more stabilized condition of the steel market and the effect of the settlement of the railway shopmen's and coal strike, will be the main factors in determining woven wire fence prices but it seems to be the desire on the part of the larger makers to reduce the prices.

New Quotations On Disston Saws

Disston Hand Saws—	Old Price	New Price	Reduction

F.o.b. Toronto

FIRM UNDERTONE IN COPPER AND BRASS

Toronto.

A firm undertone is reported in copper and brass goods, prices on these lines remaining firm at the recent upward revisions. No further developments have been recorded, it being stated that the primary markets continue to show signs of strength, with more consumer interest reflecting a stronger tone. Prices are firm at the following levels, with a fair seasonal movement:

BRASS—

Sheets base, per lb.	0 23
Tubing, base, per lb.	0 28
Rods, base, per lb.	0 20

COPPER—

Rods, base, per lb.	0 28
Soft Sheets, plain, 16 oz. and heavier, per lb.	0 29
Do., plain tinned 16 oz. and heavier, per lb.	0 36
Do., polished and tinned, 16 oz. and heavier, lb.	0 41
Tubing	0 32

BRISK CALL FOR BRASS COMPRESSION GOODS

Toronto.

The current demand for brass compression goods is stated to be fairly

brisk, the seasonal activity in building circles being responsible for a good movement in valves and similar lines. Quotations have been on a much steadier basis during recent weeks, and no change is recorded, the following discounts remaining in effect locally:

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard ¼ in. to 2 in.	60%
Do., 2½ in. to 3 in.	48%
Globe angle and check valves, standard	25%
J. M. T.	20-10%
J. M. T. C.	25-10%
J. M. T. Gate Valves	25-10%
Jenkins gate or straightway	25-10%
Jenkins Globe	19-10%
Radiator valves, standard	58%
do., removable disc	58%
Emco check valves, standard	25%
Emco, J. D. rad. valves, screwed	33%
Emco swing check, ⅜ in. and ½ in.	40%
Do., Do., Do., other sizes	33%
Webber gate valves	33%

BASIN COCKS:—

No. 0 and 1, Fuller pattern	30%
Quick opening, No. 3633	50%
No. 3623, plain or index handle	34%

PIPE FITTINGS ON STEADIER PRICE LEVEL

Toronto

The movement of pipe fittings continues in active proportion to the brisk seasonal call for building materials in general. As a consequence of the improvement recently noted in these products, prices have remained on a much steadier basis, and are unchanged at prevailing levels. A general note of firmness has now developed throughout practically all markets where basic materials include ores, foundry iron, coke, coal, and these primary markets are thus affected more or less directly by elements such as the coal strike and similar tendencies. Business is reported as distinctly better by both manufacturers and distributors. Following are current discounts:

PIPE FITTINGS—

Cast iron fittings	30%
Plugs, cast iron	30%
Do. solid	30%
Do., countersink	30%
Bushings, mall.	32%
Bushings, cast	32%
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%
Flanged unions	30%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, blk., and galvd. ⅛ to 4 in., close and short	60%
Do., 4½ in. and larger	50%
Do., long, ⅛ in. to 4 in.	65%
Do., 4½ inch and larger	55%
Do., running thread	40%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—

New piece list, adopted June 1, 1922. Discounts 70 and 5 per cent.

FIRM SITUATION IN SOIL PIPE AND FITTINGS

Toronto.

Prices on soil pipe and fittings are described as very firm, due to the rising costs of production elements such as pig iron and fuel. The market tendency has been upward during past weeks owing to the seasonal increased call for these products combined with developments in eastern distributing circles. Local manufacturers, however, state that while a brisk demand is being maintained, price advances may serve to check the incentive to build dwelling houses and carry out other construction plans during the latter part of the season. For that reason efforts were being made to place unchanged levels before the market, but it is more or less evident that with the present situation remaining in effect, higher quotations are quite likely. Current discounts follow:

SOIL PIPE—

2 inch	40%
3 inch	40%
4-inch	40 and 5%
5 and 6 inch	40%
8 inch	net

FITTINGS—

2 to 6 inch fittings	50 and 5%
8 inch fittings	net

Price Pendulum on Iron and Steel Again Swings Back Toward Higher Levels

FOLLOWING is a comparison table showing average base prices on bar iron and steel on the first of each month from October 1921 until now. It will be noted that in February, March and April of this year prices reached the lowest depths of the downward swing and since that time have been steadily climbing with prospects for still higher prices before they are lower.

1921	Bar Iron	Steel
October	$3.25	$3.40
November	3.00	3.25
December	2.90	2.90
1922		
January	2.80	2.80
February	2.65	2.65
March	2.65	2.65
April	2.65	2.65
May	2.75	2.75
June	2.95	2.95
July	2.95	2.95
August	3.15	3.15

It is interesting to note that a further advance has been made in certain quarters of 10 cents per cwt., thus bringing the base quotation of $3.25 again into effect. The present market trend indicates a general firming up to this level in the near future. Bar iron is therefore back again at the figure which prevailed last October, the lowest point during the past eleven months being $2.65 base, which was recorded in February and March of the present year.

UPWARD TREND IN INGOT METAL MARKETS

Toronto.

The ingot metal markets continue to maintain the level of improvement recently recorded and prices have generally remained at the slightly higher levels. The statistical position of copper is considered stronger in view of the reduction in the stocks of scrap which previously hampered the market. Consumers are reported to be booked up for the next few weeks, but the undertone is steady. Tin is appearing with a slight reaction in certain quarters, but lead and spelter continue stronger. Antimony and aluminum are dull, trading being exceptionally quiet and the market practically featureless.

COPPER.—Some slight improvement has been recorded in the demand for both foreign and domestic requirements. The statistical position of copper is regarded as stronger, and prices in some quarters are slightly higher. There is a lack of animation to trading, however, although the undertone is reported firm. Local prices are unchanged at 17 cents.

TIN.—The tin market is recording a slight reaction, with American prices receding, although London cables show an advance. The demand for this metal is only moderate in proportion. Quotations locally remain at the level recorded last week of 36 cents.

LEAD.—The market is stronger with buying now active . The demand has improved, thus showing a recovery from the recent quietness. The reserve stocks are reported as relatively smaller, and prices are again firming up, the local price of $7.25 continuing in effect.

SPELTER.—Zinc continues to advance on primary centres, and although consuming demand is considered moderate, stocks are reported low and the position of this metal is stronger. Producers are considering increased output. Local quotations continue at the higher level of $7.75 recently established.

LOWER QUOTATIONS ON PERFECTION OIL STOVES

A reduction is announced in list prices on Perfection oil heaters and wicks. Revised quotations follow:

No. 525, black japanned	**$8.00**
No. 530, black drum with nickel trimmings	**9.00**
No. 630, blue enameled drum	**12.00**

Discount 30 per cent.

No. 500 wicks and carries, $3.85 net.

London Markets

LONDON, August 3.—Business here at present, although not brisk, is very good for this season of year. A great many travellers and salesmen are on their vacation, and the depleted staffs are kept busy handling orders.

Price changes include lower levels on tire chains, the Disston line of saws and window glass. Collections are reported as good.

SUBSTANTIAL REDUCTION IN DISSTON SAW PRICES

London, Ont.

New prices have been announced on the Henry Disston line of saws, which show a reduction of between ten and twenty per cent. on the different styles. These changes cover hand, bucksaw, compass, pruning saws and butcher saws. New quotations are shown elsewhere in this section.

REDUCED PRICES ON WEED TIRE CHAINS

London, Ont.

New prices are now in effect on weed tire chains, the reduced levels being effective from Aug. 1. The list prices are lower approximately five per cent. with the following discounts applying:

One to ten pair in one shipment, list less 25 per cent.

11 to 49 pair in one shipment, list less 30 per cent.

50 to 99 pair in one shipment, list less 33-1/3 per cent.

ANNOUNCE DISCOUNTS ON WINDOW GLASS LIST

London, Ont.

A discount of ten per cent. on window glass in lots of less than 25 cases, and of fifteen per cent. on lots of 25 cases or over, is the decision reached in regard to the unsettlement recently apparent in this market. These discounts off the $6.00 box list merely brings into official recognition the average level at which glass has been recently selling.

EXPECT DOWNWARD CHANGE IN LINSEED PRICES

London, Ont.

Linseed oil continues to record a fair seasonal sale, but easier quotations are expected owing to the lower prices on flax seed. No change has been recorded at present, however, the following levels prevailing:

LINSEED OIL—	Raw	Boiled
1 to 2 bbls., per gal	1 20	1 23
3 to 5 bbls., per gal.	1 19	1 22
6 to 9 bbls., per gal.	1 17	1 20

Less barrels, add 15 cents gal.

UNCERTAINTY OVER FUTURE TREND OF TURPENTINE

London, Ont.

The feeling in the turpentine market is one of uncertainty, as the transportation difficulties in the U. S. have already begun to delay shipments from southern producing centres. Local prices remain at unchanged levels and although trading is described as quiet, the condition of stocks show no improvement and continue low due to the factors outlined above.

TURPENTINE—	Imp. Gal.
1 bbl. lots	$ 1 80
2 to 4 bbl. lots	1 79
5 gal. lots	1 95

MODERATE TRADE IS RECORDED IN PUTTY

London, Ont.

Putty is naturally included among the paint products at present registering a seasonal movement. Distributors generally report that the demand for putty has been expanding during recent weeks, and the current tone is described as satisfactory. Quotations remain unchanged at the levels recorded at the opening of the season, which are locally as follows:

PUTTY—	Per 100 lbs.
Standard, 100 lb. drums	6 30
Do., 25 lb. drums	6 55
Pure, 100 lb. drums	7 80
Do., 25 lb. drums	8 05

GOOD SALE FOR SCREEN WIRE CLOTH

London, Ont.

Screen wire cloth is in good demand for summer homes, at following prices:

Painted black $3.00 per 100 sq. ft. Galvanized $3.60 per 100 sq. ft. Bronze $10.00 per 100 sq. ft.

CALL FOR INSECTICIDES CLEANS OUT STOCKS

London, Ont.

An excellent demand is generally reported for insecticides, and local stocks for both Paris green and arsenate of lead are described as almost exhausted. The cut-worm, potato bug and caterpillar are undoubtedly very active this year and farmers are generally kept busy fighting the pests. Following are average prices on these products:

PARIS GREEN—

½-lb. pkgs., 40c. lb.; 1 lb. pkgs., 38c.; 25 lb. drums, 36c.; 50 lb. drums, 34c; 100 lbs. 34c; 250 lb kegs, 32½; 600 lb bbls., 32c, lb.

DRY ARSENATE OF LEAD—	
In ½ lb. pkts., per lb.	0 35
In 1 lb. pkts.	0 33
In 5 lb. tins	0 32
In 10 lb. tins	0 31
In 25 lb. drums	0 28
In 50 lb. drums	0 27
In 100 lb. barrels	0 25

ACTIVE MOVEMENT IN HAY FORK PULLEYS

London, Ont.

General reports indicate a good sale for hay fork pulleys, the usual seasonal movement of these products now being evident. Following are current prices;

HAY FORK PULLEYS—

6" Wood Knot Passing Malleable Frame, each 87c. 6" Iron Do., 99c. each.

GOOD MOVEMENT OF WHITE LEAD IN OIL

London, Ont.

The demand for white lead in oil has been brisk all season, and still continues in good proportion. Prices continue at the new levels recently in effect, which follows:

WHITE LEAD IN OIL—	Tons Per 100 lbs.	Less Tons
Pure	13 55	13 90
Elephant	14 05	14 40

ROPE AND CORDAGE SALES STILL ACTIVE

London, Ont.

Although the current sales of rope and cordage are now somewhat lighter, the prevailing volume of sales is described as active. Prices are steady at the following revised quotations:

ROPE—	lb. base
Pure Manilla	0 21
Braver Manilla	0 19
New Zealand Hemp	0 19
Sisal	0 17

Winnipeg Markets

WINNIPEG, August 3.—Crop conditions in Manitoba are in excellent shape while in some parts of Saskatchewan and Alberta rain is badly needed. Generally speaking, however, business continues to show a better undertone and good crop returns would undoubtedly be made the basis for a forward movement. Over 43,000 men will be needed this year to harvest the crop according to current estimates, and 37,000 will be needed from the East to help. Undoubtedly hay forks will be in good demand but at the present time dealers report that retailers are only buying in small quantities just sufficient to meet their necessary requirements, but unless they book their orders from now on they will not be able to meet the demand for this line and other threshers' supplies. There are few price changes in hardware commodities. All markets are showing a firmer tone. The feature of the market has been the advance of eight cents per gallon on linseed oil. There is an active sale for seasonable hardware lines and stocks are rapidly becoming depleted.

GOOD TRADE CONTINUES IN LEAD PRODUCTS

Winnipeg.

There is no further change in the market for lead products since the advanced quotations some short time ago. Metals on primary markets are ruling firm and with a fairly brisk building activity the demand for these goods is normal.

COTTON WASTE FIRM: UNCHANGED IN PRICE

Winnipeg.

Although higher prices have been announced on cotton waste in other outside markets local prices are unchanged. The tone of the market is ruling firm but no change is expected owing to the presents demand at this season of the year.

PIPE FITTINGS STILL IN GOOD DEMAND

Winnipeg.

As building has been fairly active the demand for pipe fittings has shown an improvement in the demand. Quotations on these products remain unchanged.

TROUGH AND PIPES CONTINUE ACTIVE

Winnipeg.

Manufacturers of eavestrough, conductor pipe and other similar products report general activity with good prospects if building activities continue. The strength apparent in the steel industry, especially on flat sheet products that enter into the production of trough and piping contributes towards the present firm tone.

SOIL PIPE IN SEASONABLE DEMAND

Winnipeg.

Soil pipe and fittings continue firm in price with business for these products described as good. The movement during recent weeks has been accentuated by the activity in building circles, and as the demand is keeping up a seasonable volume of business for soil pipe is expected. Quotations are reported steady and unchanged.

SEASONABLE DEMAND FOR THERMOS BOTTLES & KITS

Winnipeg.

A seasonable demand is reported for thermos bottles and luncheon kits. Retailers are displaying these picnic goods and the warmer weather has led to many sales. Quotations continue unchanged at list price—25 and 10 per cent.

GOOD DEMAND FOR NAILS AT UNCHANGED PRICES

Winnipeg.

There has been a good demand for nails due to the activity shown in building. A good movement is still in evidence at unchanged quotations.

HIGHER QUOTATIONS APPEAR ON LINSEED OIL

Winnipeg.

Quotations on linseed oil show an advance of 8 cents per gallon, making local quotations on boiled at $1.36 per gallon and $1.33 for raw in barrel lots.

HAY FORKS AND HOES IN SEASONABLE DEMAND

Due to the heavy wheat crop in Western Canada this year hay forks and hoes will be in good demand. Stocks at the present time are not very heavy and jobbers state that retailers should pay attention to having their orders booked early in order to meet the heavy demand, or else they will not be able to get any further supplies, as wholesalers' stocks are getting into small compass already.

TURPENTINE STILL AT HIGH LEVELS

Winnipeg.

The tone of the turpentine market continues firm and quotations are $1.85 per gallon.

Hamilton Markets

HAMILTON, August 3.—The announcement from certain large American steel producers that they will be forced to close down unless a settlement in the coal strike is reached in the immediate future, comprises one of the primary elements in the steel and hardware trades. The upward climb of prices on many products is expected to continue as a result of these conditions. It is noted that in addition to the shortage of coal, there has developed a scarcity of cars at southern mill centres as a consequence of the railroad troubles. Domestic producers state that they are not yet seriously affected, but are admittedly watching the situation with marked interest owing to the question of deliveries. The coal shortage is also stated to be affecting some domestic manufacturing concerns whose stocks of fuel have beeen depleted through delayed shipments and heavier operations.

Already some shortage is noticed in pig iron, resulting in a sharp advance in prices, with a corresponding rise in sheets and bar product quotations. The coal strike and threatened extension of the railway strike presents a serious situation for many hardware manufacturers, and little relief for this class can be secured through the medium of the priority schedules prepared, which place manufacturers in the east in fifth place.

The trade in automobile accessories is reported good and there is a steady demand for builders' supplies. With favorable weather, the farmers should be in good shape, and by the end of the year trade may take on a more permanent form. Prices are stiffening in most lines. The trade will reap some benefit from reduced freight rates. Payments keep up fairly well. Wholesalers are now receiving large shipments of ammunition, and are evidently confident that there will be a good demand.

The fact that U. S. rail difficulties have already delayed shipments of turpentine from southern producing centres, has produced an unsettled feeling on domestic markets regarding the trend of future prices owing to scarcity. Present stocks are described as low and with the continued tie-up in the railroad service from Savannah and other points, the difficulties attending delivery of fresh supplies are liable to increase to the point where domestic holdings will be at a premium.

Pittsburg Markets

PITTSBURG, August 7.—Production of pig iron and steel has continued to decline, and the rate of output is now between 5 and 10 per cent. below the highest rate, which was attained late in June. There had been a rapid increase in the rate of production in the first three months of the year, and a small increase in the next three months, after the coal strike began. The restriction now is due chiefly to poor functioning of railroads, on account of the shopmen's strike begun July 1. The roads serving non-union coal fields in West Virginia and Kentucky were, however, overburdened, there being extra production induced by the failure of supplies from union fields, and the great decrease in production in the Connellsville region, where there have been many sympathetic strikes. In particular, by-product coke plants were depending largely upon West Virginia and Kentucky coal.

Government Steps

The Government has taken charge of coal distribution and coal prices, a general priority system being announced July 25 by the Interstate Commerce Commission, while July 28, H. B. Spencer was appointed coal administrator. However, in this district the Pennsylvania Railroad and the Pittsburgh & Lake Erie have announced that as they are functioning 100 per cent. they have no occasion to observe the general priority and will make no change in the operations unless specifically instructed from Washington. Where the priority system has to be observed iron and steel producers and consumers are unlikely to get any coal, as naturally they are far down in the list.

Set prices, at something like a moderate level, say $3.50 for mine-run, are expected to be enforced, and in the last three days of last week the local coal market gradually lost its activity, consumers deciding to hold off for lower prices. Connellsville steam coal had reached a firm level of $8.50 but declined to $7.50 by Saturday. Connellsville coke, which is a rarity and has scarcely been bought at all except by foundries, advanced to $14 for furnace and $15 for foundry, but lower prices are now expected.

Operations in the iron and steel industry are affected chiefly by coke supplies, as steel mills seem to have enough coal to make and roll all the steel they can produce, once they have the pig iron. As to coke, the change is chiefly in by-product production. Some by-product plants have had their coal receipts reduced much more than others, while some have stocks, say enough to last 30 days more without any fresh receipts. Accordingly, the banking and blowing out of blast furnaces has been spotty, eastern Pennsylvania and the valleys being conspicuous, while the Buffalo district is probably next in line for a great decrease in furnace operations.

A "Property Improvement Club"

To Assist Property Owners to Take Advantage of Adequate and Timely Painting When They Are Unable to Immediately Finance It—Hardwaremen Points Out That Deterioration is Greater Hazard Than Fire—The Reaction of Cheerful Surroundings on Community Life

AS THE campaign in the interests of "Save the Surface" progresses further, it becomes apparent that certain well defined arguments in favor of the preservation of property are shaping up. These form definite pointers which hardware merchants might adapt to their paint business with good success.

One of these factors is dealt with in the following advertisement which a hardwareman ran in his local paper:

"Paint insurance is as necessary as fire insurance and in the long run will prove far more profitable. Scarcely anyone now needs to be persuaded of the value of insurance.

"But the case for insuring one's house against fire, overwhelmingly strong though it is, lacks at least one argument, that can be used for insuring it by the use of paint against decay. For while fires are deplorably frequent, not all houses are burned, and the chief risk to careful people is from the carelessness of others.

"If you are among the fortunate people whom these precautions secure, and live among neighbors who are in this respect like yourself, you will be paying premiums for a long time with no return. But every householder who lives in one of our wooden houses will find his house progressively degenerating in value unless he paints it reasonably often.

A Greater Hazard

"If you believe then in insurance where there is some risk of loss, but where with luck you may escape altogether, do you not believe still more in insurance, where, without it, there is a dead certainty of loss, for no luck can possibly avail?

"If you are frightened by the chance that you may be looking at the charred remains of your home and exclaiming: 'Fool that I was, why didn't I insure? Are you not disturbed by the knowledge that while you jog along—saying of your house; 'It doesn't look too bad yet—We'll let it go another year.' Damage is being done which does not show itself in looks at all, but will show itself when you want to sell and have to accept an enormous cut in price for deterioration, or when you are forced by the risk of things falling asunder to rebuild what you need only have painted.

"It is as poor economy to say 'Paint is too, dear' as to say 'Premiums are too high.' The question is not whether you can afford to insure, but whether you can afford not to insure. So too you should ask yourself not whether you can afford, but whether you can afford not to paint."

A Property Improvement Club

In some communities hardwaremen have by co-operation assisted in bringing about a plan whereby those property owners who ordinarily might be unable to immediately finance the thorough painting of their properties, can secure the advantages of adequate paint protection before any deterioration sets in. This plan is the formation of a "Property Improvement Club" as a Bank Savings plan. It is found that people will save when they have a definite object in view and a convenient method of saving. As indication of the extent to which people make use of such plans is the fact that last Christmas over 72,000 people in one of our larger cities received checks from banks as results of their weekly deposits in Christmas Savings Clubs. In much the same way the banks can be asked to organize Property Improvement Clubs which people can join on the basis of depositing 1, 2, 3, 4 or 5 dollars per week, for 50 weeks. The banks will advertise why painting and repairing are important if property is to be conserved. In return for this the local paint trade will offer to distribute the bank's folders, put window cards in their windows, endorse the plan in meetings of paint dealers and paint clubs, in some cases devoting some co-operative advertising in the newspapers to it, and help in every way to get the public to join A Property Improvement Club.

The recent advertising conferences in Buffalo, passed a resolution as follows:

Whereas The Property Improvement Club idea will help to encourage individuals to save for painting purposes,

Therefore be it resolved that encouragement be given to the promotion of Property Improvement Clubs by banks and in return for such promotion the members present at this conference express their willingness to co-operate in securing the active help of their agents, representatives, and salesmen in each locality where the Property Improvement Clubs are organized by banks.

It is expected that the savings bank section of the American Bankers' Association will father the Property Improvement Club idea and urge banks throughout the country to secure the co-operation of the paint trade in the establishment of such clubs. This is an activity to be pushed in 1923.

Reaction of Cheerful Surroundings

An interesting letter received by the "Save the Surface" committee, showing the possibilities involved in this idea is as follows:

"There lived in this town a few years ago an embittered old maid by the name of Miss Brown. She was disgruntled, so gossips said, because she has never been invited by a male to participate in a marriage ceremony. She owned and lived in a little house at the edge of town which was as bedraggled looking as herself.

"An alert hardware merchant came to town who was a great advertiser. He inaugurated a 'Paint 'Em Up' Cam-

Every Customer A Prospect For A Brush

Such a Wide Range of Household Brushes Now Offered That Nearly Every Customer Can Be Looked Upon As a Prospect—Two Types of Customers to be Considered

THE BASIS of the appeal in selling various kinds of brushes is to-day changed about as much as the brushes themselves, as compared with a few years ago. From the time when the first brush was made from a bundle of twigs bound together with grass, there have been almost incredible changes and developments in every article of household equipment, including brushes, and to-day the household brush is a highly specialized article designed, made and finished in accordance with the highly specified demands of the users. Many dealers seem to overlook the advances which have been made judging by the way they continue to handle brush trade.

The actual sale of brushes in the hardware store indicates that there are two distinct types of customers. First there is the class who come in and want just brushes, such as were known by their forefathers. Luckily this element is growing smaller every day.

The Other Class

The other class have noticed the displays and listened to the dealer's outline of the improvements made in the brushes and the new uses to which they may be put. These customers have kept pace with the times, largely the result of the work of those progressive dealers In selling to this class the first element necessary is a knowledge on the part of the dealer of just what this new and better brush is. Brushes are household necessities and among the class that receive very little care and a maximum of hard usage. The modern brush must perform the functions which brushes have performed for generations plus the exacting demands of modern specialization in housework.

The first result of this, of course, is the demand for a better quality, but even more important than this is the resulting demand for the special style, and therefore of the necessity of display.

The "grandmother" type of brush could be hung in the back of the store, packed in drawers, stood in corners. until it was asked for, but the up-to-date brush must not only be prominently displayed, if possible it must be where the customer can feel and examine it. It seems to be particularly efficacious in selling brushes for the customer to "get acquainted with them," one dealer put it.

In selling brushes to-day perhaps one of the strongest points is "sanitary" talk. Brushes are almost universally used in or on soiled articles, and the facility with which they may be cleansed, their ability to remove dust and dirt instead of spreading it around, and above all their cleanly and wholesome appearance are points of extreme importance.

The idea of having specially designed brushes for cleansing inaccessible places is one of the best of selling talks.

The modern housewife is fond of using brushes and it is safe to say that a good window display backed up by an up-to-date stock for selection will not only bring the hardware dealer a good profit, but bring into his store customers who are going to linger and look about and examine. Every dealer knows that this customer always buys many items.

"PROPERTY IMPROVEMENT CLUB"

(Continued from page 54)

paign, offering attractive inducement for people who would paint up their premises with his paints.

"Painting up became an epidemic, which eventually reached to Miss Brown's weather-beaten old barn. The structure had fallen into such a state of neglect that it didn't seem possible that all the paint in the world could have given it life. Yet that was exactly what it did. There wasn't a board that was not riddled with cracks, yet when the painter had finished his job, it had the smiling appearance of a new barn.

"Before the campaign was over the good work had reached to the house and then to the interior. Then apparently finding herself the only discordant note in her sunny surroundings, the lady bought some 'Bloom of Youth' and other accessories to brighten up her own sallow self. Within the year, she had married a bachelor whom she had known for years: 'How did it happen,' was the big community question.

"Those who claim to know declared that it was the psychological effect of the 'Paint 'Em Up' campaign. The advantages of giving the necessary paint and varnish to our premises is great—it preserves them, but there is also another far reaching effect—the reaction of cheerful surroundings on our own lives and the community at large."

HYDRO POWER FOR MONCTON, N. B.

Moncton, N. B.—Dr. E. A. Smith, chairman of the New Brunswick Electric Power Commission, has advised the city of Moncton, that the Hydro current would be in that city by December 1.

Talks "Save The Surface" To Farmers

Paint display in Mitchell's Hardware, Brandon, Man., showing an attractive grouping of paint, varnish and brushes. This firm is using such displays to stir up interest in painting now that the harvest season is drawing nigh and farmers with a good crop will be in a receptive mood for suggestions having for their object the preservation of property. The "Save the Surface" idea is talked by this firm and every opportunity taken to show the banners and other literature in connection with it.

Boeckh's Brush News

Get 'em Early—and Keep Your Till Smiling

That old adage: "The early bird catches the worm," is true to-day as in the past. And your till tells every time whether you're an "early bird." Get your fall stock of Boeckh's Brushes early this year, and keep your till smiling. Don't delay. Don't take for granted you'll have enough to "tide you over." Many good sales are lost every fall by merchants who figure this way.

Bigger Advertising— Means Bigger Demand

We are planning to do considerable advertising this fall. And we are anticipating a bigger demand for Boeckh's Brushes than ever before.

To get **your** share of this increased business you must be ready when the demand comes. And you'll need to start right now. Go over your stock of Boeckh's Brushes, and see what you need. Then get your order placed by the earliest possible date.

If you wait a few weeks, you'll be too late. Your opportunity will be lost—and your till will tell the sorry tale. For you will miss not only Boeckh's Brush sales, but sales of kalsomine, paints, oils, varnishes, stove-pipe lead, and much other merchandise that people purchase along with brushes.

Remember that wise old bird—and get ready early this year—early enough to catch every Boeckh Brush sale that should be yours. That's the way to keep your till smiling.

When ordering, be sure to state what advertising matter you require.

Weekly Paint Markets

Montreal

MONTREAL, August 3.—Featuring the paint markets this week is a substantial reduction in the quotations on linseed oil. Current prices in most quarters record a decline of twelve cents per gallon in sympathy with the flax-seed market which has developed a somewhat easier tendency during the week. Crushers state that with very favorable crop conditions for fall, the spot seed market reflected a considerable lowering. Turpentine prices show a reduction among certain distributors who were formerly quoting comparatively high figures while other firms are maintaining former price levels. The undertone of this market in the South is reported as fairly steady for the present season of the year although a somewhat lesser demand is now in evidence. Unless European demand shows a spurt, an easier tendency in this market would not be surprising to local importers. No definite information is yet given on the probable trend of brush prices, but it is stated that in all probability an announcement will be made around September first. Business in paint and varnish circles shows a slackening, the usual summer dullness being generally reflected. Current prices remain unchanged at the revision of three weeks ago.

LINSEED PRICES SHOW SUBSTANTIAL DECLINE

Montreal.

Linseed oil is featured this week with a price decline of twelve cents in most quarters, while certain firms announce that prices will be reduced, but just to what extent has not yet been determined. It is quite probable however that prices generally will be lowered to around the dollar mark, the quotation of $1.01 now being given. The present recession is said to be entirely in sympathy with the seed market, reports of bumper crops having had the effect of lowering the spot market. This development commenced at the beginning of the week and while certain interested parties were awaiting further developments before taking any action with regard to oil prices, it is apparently considered a genuine fluctuation by most crushers who announce the above reduction. The July seed position has now run out and crushers are working on future markets. October seed is said to be approximately twenty cents lower than present cash seed and with the chances of October option still showing a further reduction, the trend of linseed oil may prove to be an interesting one during the following weeks. Following are present average quotations:

LINSEED OIL—		
1 to 2 barrel lots, per gal ...	1 01	1 03
5 to 8 barrel lots, per gal.	0 99	1 01

Less barrels, add 10 cents per gallon.

MORE UNIFORM PRICE BASIS ON TURPENTINE

Montreal.

Price developments on the local turpentine market this week are noted only with some firms while other distributors are maintaining former levels. Dealers who were formerly quoting as high as $1.80 in one barrel lots announce a reduction of fifteen cents per gallon, which leaves prevailing quotations on a much more uniform basis. Reports from the South indicate that demand has slackened to an extent while new receipts are somewhat heavier. This has naturally tended to weaken the situation, although up to the present price recessions have been of a very minor nature. Importers state that the market at producing centres is keeping on a surprisingly steady basis when the present season of the year is considered. With the usual falling off in demand during the remainder of the summer weeks, however, a somewhat easier tone would not be surprising. Present prices are as follows:

TURPENTINE—	Imp.	Gal.
1 barrel lots	1 63	1 65
2 to 4 barrel lots, per gal.....	1 61	1 63
Broken lots	1 73	1 75

SUMMER SLACKENING NOTED IN VARNISH SALES

Montreal.

Paint manufacturers state that business is now reflecting the usual summer slackening, and orders are not as plentiful as in previous weeks. This can only be expected at this season and little further activity is anticipated until the later Fall months when outside painting recommences. Business this season has been of a satisfactory nature and manufacturers are quite optimistic regarding Autumn trade. Prices on the various lines of paints and varnishes remain at recent revisions with the undertone of the market generally in a steady to firm position. There is some speculation with regard to the probable trend of prices a little later on and the question of both sales tax and current quotations is likely to be discussed at the usual Fall meeting of manufacturers in September next.

REVISION IN BRUSH PRICES EXPECTED AROUND SEPTEMBER FIRST

Montreal.

The question of the probable trend of the brush market in the Fall is still uncertain, and beyond some speculative remarks there has been little further development in recent weeks. Hardware and Metal was informed by one manufacturer that a reduction of approximately 5 per cent. would not be surprising while another dealer was of the opinion that any revision made would involve changes both in an upward and a downward direction, depending entirely on the bristle market in the ensuing weeks. It is stated than any announcements forthcoming will in all probability be made around September 1st.

Toronto

TORONTO, August 3.—A sharp reduction in linseed oil prices, owing to the recession apparent on the flax seed markets, comprises the feature change on the current paint markets. A variation is still noted in linseed prices locally, but the flax crop conditions for Fall are described as very favorable and crushers state that they are now working on the basis of future markets. Seed prices receded and oil quotations were lowered in conjunction.

Turpentine still retains the firm position recently recorded in these markets, southern distributing centres reported strength and steady levels, while domestic distributors point to the delay in securing fresh shipments as tending to create a shortage of this product locally. The strike situation in the United States has more or less affected the transportation of turpentine from producing points, and unless a settlement is reached in the near future, domestic stocks may be at a premium. However, the current call is comparatively light.

Brush prices are unsettled, but an announcement involving changes in both an upward and downward direction on the different bristle products is expected around September 1.

The new discounts on window glass box list announced last week, have been verified and are now generally accepted as the average level throughout this district.

The call for Paris Green and dry arsenate of lead still continues, and stocks of these insecticides have been practi-

Floglaze

"The Finish that Endures"

EXTERIOR SURFACES

Painting in the Fall pays from both the dealers' and the consumers' standpoint. Dealers are rapidly being convinced that the logical time for paint selling is in the Fall when conditions are much the best.

Consumers realize that surfaces are drier, better seasoned, and more in need of paint in the Fall than in the Spring. Better protection is afforded, moisture and dampness kept out, with the result—longer life to property.

Floglaze Exterior Surfaces gives more than average protection, better brushing and greater spreading qualities. Dealers will do well to avail themselves of early stocks.

TORONTO PAINT MARKETS

(Continued from page 58)

cally depleted. Distributors state that as fast as new supplies come to hand they are promptly shipped out to meet requirements. Prices are unchanged on these lines.

The paint and varnish trade has recorded a slight moderation in the volume and size of orders at this time of the year, conditions usually being a little quieter during the vacation period. Preparations are generally being made for a renewal of brisk trading in the Fall, with business up to the present being reported as satisfactory and up to expectations.

STRENGTH MAINTAINED IN TURPENTINE MARKETS

Toronto.

Quotations on turpentine are locally unchanged, the general market situation maintaining the firmness recently that new shipments are more or less recorded. Local stocks are still described as low, it being further claimed difficult to secure owing to the restricted transportation facilities over railways from southern producing centres. The walk-out of railway shop men has seriously curtailed freight services on some lines, while the coal shortage also serves to delay rail transportation. Prices on turpentine at Savannah are being steadily maintained, the average level recently showing a more even trend. That future supplies may be more or less at a premium if present conditions are not speedily settled, was the expression of one local distributor of turpentine, it being pointed out that the consuming demand does not enable any stocks on hand to speak of. Turpentine is not very plentiful, but with a cessation of strike conditions, this condition would be remedied. Average local quotations have firmed up to the following levels:

TURPENTINE—

1 barrel lots	1 75
2 to 4 barrel lots	1 74 1 79
5 gallon lots	1 90 1 95

Less than one barrel lots, 15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Carload lots of 70 barrels, price on application.

RECESSION NOTED IN LINSEED OIL PRICES

Toronto.

Linseed oil prices have receded during the week, this development being attributed to the trend of the flax seed markets. Prices on seed have dropped to a marked extent, this change having been primarily caused by the very favorable flax crop conditions. A variation in prices is recorded on the local market, certain crushers and distributors quoting a price of $1.03 per gallon for raw oil, while others are maintaining the higher levels recorded below. The average quotation obtainable, however, continues to vary, the range at present being between the price recorded above and $1.10. The current call for linseed is described as quiet, a condition which is usual at this time of the year, large consuming requirements having been covered. Crushers state that they are now working on the basis of the future seed markets, with price naturally on a relatively lower level. Following are revised local prices:

LINSEED OIL—	Raw		Per Gallon Boiled	
1 to 2 barrels,	103	1 10	106	113
3 to 4 barrels	1 02	1 09	1 05	1 12
6 to 9 barrels	1 00	1 03	1 03	1 10

Less barrels, 15 cents per gallon.

STRONG BASIC CONDITION IN ROSIN MARKETS

Toronto.

The firm tone noted in the rosin market during recent weeks is still maintained, and although the strength does not compare with the rapid developments witnessed in the turpentine markets, yet prices are slightly higher than formerly. This is attributed to the tendency in southern producing centres, and while the present is usually a quiet season for these products, the medium grade G, are $9.25 per 100 lbs. and water white, $11.25, for similar quantities.

LONDON HARDWAREMEN HAVE BIG DAY

(Continued from page 39)

ring, dash along another fifty yards and grab a license and then run 50 yards more to where the girl was waiting and race back with her, Mr. Westman and his companion Miss O'Dell showed real speed, making the trip many seconds ahead of the nearest competitor. The event was greatly enjoyed and many of the men in their anxiety lost time by dropping the ring or the license. Many of them by the time they reached the girls were so winded that the girls had to pull them the rest of the way, greatly to the delight of the crowd.

Instead of holding a supper this year the hardware men put up a big tent and here eatables and soft drinks were distributed with ice cream cones to all.

In addition to the events mentioned, there was a big program of races for the children, and several events for the ladies. All were keenly contested and the entire outing was voted by all a great success.

Several of the district merchants motored in, among others who had a good time being W. H. Cuddy of Strathroy, and James Wright of Glencoe.

H. Scratch, district representative of Lowe Brothers, had an exceedingly busy time acting as starter in the various races, and also in the ball game and A. J. Wharton of the Alabastine Co., who was catcher for the single men, worked harder perhaps than anybody on either team.

A CHAIN OF SERVICE

(Continued from page 35)

equipped with a gasoline pump in a visible position to the passing traffic.

Of this proportion, the greater number of these merchants are undoubtedly situated in rural districts and small towns, thus providing a national service chain to all motoring enthusiasts, both domestic and transient, where its necessity is most strongly apparent.

According to the official report from the Weights & Measures Inspection Service at Ottawa, there were some 15,363 curb gasoline pumps inspected in Canada in the fiscal year ending March 31, 1921. The later figures are not yet available, but this number has undoubtedly been greatly increased since that date, and while a fair proportion are installed in conjunction with garage services, the hardware merchants total comprises a substantial ratio.

Of the total number of curb gasoline pumps in Canada, the extensive field for garage proprietors and auto dealers in the cities and larger towns represents a heavy proportion. While hardware merchants in the cities have often passed up the possibilities of revenue and increased business which may be contained in the curb pump, this has been principally because of the comparative nearness of the elaborate filling stations which oil interests have instituted. In the country, however, both the garage and the hardware store have found a place in the gasoline and auto equipment supply field.

It has frequently been suggested that any authentic record as to the exact number of retailers supplying "gas" by means of the outside pump, would show even more favorably than the 45 per cent. quoted above. To compile such a record, however, would entail the personal canvass of every individual hardware store in Canada, and by the time any such work was completed, it would almost be necessary to repeat the performance, in order to correctly tabulate the new installations and also those purchased through secondary channels.

It should also be remembered that in addition to those hardware merchants who have a gasoline pump installed outside the store, there are a very large number having pumps inside the store. Some disadvantages are attributed in certain quarters to this method, but even in spite of any suggested handicap, the fact that the hardware merchant sells gasoline has been found to fill a very pressing need on countless occasions.

In some districts it is considered necessary to obtain the consent of city authorities for installation of such gasoline equipment which entails outside space. Other official regulations, however, do not hinder but rather encourage the curb pump. With the product stored in the underground tank outside the store, its contact with other commodities in the store is eliminated. This is also recognized as the safest method of storing and handling gasoline by the fire underwriters, the various safety devices thus reducing the hazards and risks frequently associated with gasoline in previous years.

That Reminds Me!

Time and again people go to hardware stores, notice the CANADA BRUSH display on the counter and exclaim: "That reminds me I want a brush."

Sale after sale is made because the brushes are right out in plain sight to act as a **reminder.**

The illustration shows only one of our practical dealer helps to increase your brush business—we have many others.

Wouldn't you like to be put on the road to greater brush business and to greater brush profits?

TINKER TOM'S TALKS

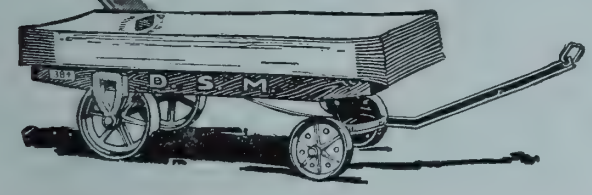
Talk No. 370

WHAT WILL IT PROFIT

A man if he be the best tinsmith in the countryside and has no sheets when orders come flying in?

Get ready now for the after harvest rush. Order your "Premier" Galvanized Steel Sheets for September and October delivery now. Give your jobber a chance by getting the order in to him now.

TINKER TOM



MADE IN PREMIER CANADA

"I also want to say as a new subscriber, that I am very much pleased with the Post and consider it simply invaluable to the investor."

This is the opinion of a Maritime subscriber who had asked information about our "Answer to Inquiry Department" regarding how he might well invest $10,000 coming due from an insurance policy.

The Need of Sound Advice

Not many have that amount of money for investment at any one time. All, however, who are counting upon building up an estate, are realizing the need of regular investments.

All who are making those regular investments appreciate that these must be in sound securities—securities upon which one may rely to give a regular return.

Your own business requires so much of your attention that perhaps you cannot give the scrutiny to investments that these deserve. An offering appears promising but you are not quite sure. In this position the subscriber to THE FINANCIAL POST has a big advantage. He may inquire of the Editor of THE FINANCIAL POST—state exactly what he has in mind—state any particular point having an influence on the investment problem.

And a Service That Gives It

The inquirer may count upon perfect secrecy if he so requests. And remember this, the man with a few hundred dollars to invest receives the same consideration as does the subscriber investing $50,000.

This is one of the services which the subscribers of THE FINANCIAL POST have open. Those of our subscribers, and they run into the thousands, who make use of this service are finding it of great value to them.

Fill in the coupon now.
Invest $5.00 where it may save you many times that.

EVERY MacLean Circulation Salesman (excepting resident Local Agents who would be personally known to you) is provided with an Authorization Card such as this:

This is the Home of
THE MACLEAN PUBLISHING COMPANY
143-153 University Avenue, Toronto

The Largest Organization of its Kind in the British Empire

This is to certify that

.....

is authorized to take subscriptions until

APRIL 30, 1922
(New Card Given Each Month.)

to our publications mentioned on the back of this credential, at the regular subscription rates.

NOT GOOD AFTER ABOVE DATE

Circulation Manager.

ALWAYS demand to see this card before giving either a new or a renewal order to any MacLean publication.

This is the protection we offer you against the Menace of the Fake Agent. By looking for this card you are protected.

AND if anyone unable to produce this card attempts to sell you a subscription or make collection for your present subscription, please telephone or wire us at once and we will not only appreciate your action, but we will gladly pay all charges in connection with the call.

Our whole object is your protection, but we can not help you unless you help us. And don't forget that we will gladly pay any expenses.

K. & S. TIRES & TUBES

Give You More than You Pay For

K. & S. Tires are made up to the highest standard possible. Quality is the primary consideration. Our only instructions to the factory are to use the best materials obtainable, and to give each and every tire individual attention. The result is that K. & S. Tires are absolutely dependable and in a class by themselves. K. & S. Tires are made in Canada for Canadian roads.

ACME WASTE MFG. CO., LIMITED

492 Wellington St. W., Toronto

These Pliers Are Expensive

—Unless

You figure them on a basis of service cost per year.

No. 55 CROSBY PLIERS

Made in Sweden

IT'S THE STEEL

The thin nose slip joint pliers—designed to fit the hand and grip tight—tested to cut wire, nails, etc. Drop forged of **SWEDISH** tool steel—noted for its strength and dependability.

Combines four practical tools in one—a wire cutter, plier, screw driver and wrench.

Natural black hammer-forged finish. Polished jaws. 7¼ inches long. Can be retailed for $1.00.—Unconditionally Guaranteed.

ORDER FROM YOUR JOBBER—OR WRITE US

ELIMINATE THE BACK-BREAKING SHAKING

Know the goods you recommend and give the reason *WHY*.

IF THE

BANNER ASH SIFTER

has merit and is worthy of your recommendation, recommend it; **if not, don't.** The fact of the greatly increased sales every year must be some recommendation. Your jobber or the Burrowes Mfg. Co., Toronto, can supply you.

Don't Throw it Away

Does Your Granite Dish or Hot Water Bag Leak ?

USE **MENDETS**

A PATENT PATCH

A Quick Cure for Leaky Utensils

When a favorite utensil gives way and begins to leak, it's a grave calamity in most households. This is the foundation for your profits and successful sales of Mendets. Sell the Mendets—but sell the idea, too, that Mendets in the house are a safeguard against loss of time and patience.

Collette Mfg. Company, Collingwood, Ont.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

HELP WANTED

WANTED Hardware man, three years' experience. Must be able to sell. State salary wanted and give references. Fleming Bros., 1036 St. Clair Ave., Toronto.

WANTED—A first class hardware man to take charge of a retail hardware business in growing city in Nova Scotia. An excellent position with a good salary for the right man. Apply in writing to P. O. Box No. 664, stating fully qualifications.

WANTED: Traveller to call on wholesale hardware trade.

Canadian distributors selling wholesale trade only want live wire to sell complete line European cutlery, tools, skates, etc. in Ontario. Non competing lines permitted. Only those having established connection need apply. Splendid opportunity. Replies confidential. Box 54, Hardware and Metal, 128 Bleury Street, Montreal.

WANTED—EXPERIENCED HARDWARE salesman, as traveller in Toronto and Hamilton. Must be a man who wishes to create a future connection, and one who is not afraid of work. You are not employed by us at present, because our men all know that this advertisement is to appear. Apply, giving complete details regarding experience, age, appearance, qualifications, and salary required. Box 16, Hardware and Metal.

FOR SALE

FOR SALE—SMALL STOCK OF CANADA Paint and Varnish in first class shape. A snap for a quick buyer. Box 98, Hardware and Metal.

HARDWARE STOCK, ABOUT SEVEN THOUSand, located in Western Ontario. Ill health forces me to sell. Box 18, Hardware and Metal.

STOVE AND FURNACE REPAIRS. FIRE brick, iron linings and grates for Supremes, Acmes, Garlands, Sunlights, Crown Hurons, Marvels, Champions, Huron Red Hots, Pen Esthers, Welcomes, Renowns, Magnet, Souvenirs, Colonists, Arklands. Write for complete list and prices. Gundy Bros., Strathroy, Ont.

AN OLD AND WELL ESTABLISHED HARDware and paint business in one of the best sections of West Toronto—and growing. Applicant must be financially able to handle stock and fixtures—can be reduced to fifteen thousand. Address Box 175, Hardware and Metal.

MANUFACTURERS' AGENTS

WHOLESALE JOBBER CALLING ON HARDware, garages, electricians, painters, etc. Winnipeg and suburbs, open for one or two lines. Apply Hardware and Metal, Box 203.

SITUATIONS WANTED

BY EXPERIENCED HARDWARE MAN AS salesman or stock-keeper or would consider position on road. Box 102, Hardware and Metal.

HARDWARE SALESMAN, 26, TEN YEARS' thorough experience, wants position as head clerk or manager, in retail hardware store. Box 101, Hardware and Metal.

WANTED

WANTED—A FIRST CLASS HARDWARE man to take charge of a retail business in a growing city in Nova Scotia. An excellent position with a good salary for the right man. Apply in writing to P. O. Box No. 664, Hardware and Metal, stating full qualifications.

MISCELLANEOUS

NICKEL PLATING — ORDERS EXECUTED promptly. Prices on application. Communicate with F. W. Higginson, 173 William St., Montreal. Telephone Main 8144.

QUICK RESULTS

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word, with 10c additional for Box Number.

When CANADIAN HARDWARE BUYERS Consult the thirty-fourth Annual Fall Buying and Directory Number During the Fall and Winter Months Will They Find Your Message There?

Read and re-read by the largest buyers of hardware in Canada. These men will purchase over $83,500,000.00 worth of goods in the next 6 months.

WHAT IS IT?

34th Annual Fall Buying and Directory Number of HARDWARE AND METAL. An Annual Buyers' Guide that is used extensively during the Fall and Winter months by buyers representing over 95% of the hardware purchasing power in Canada.

WHERE DOES IT GO?

It goes by paid invitation to every wholesale hardware company in Canada, over 90% of the hardware merchants rated in Dun's and Bradstreet's; 900 hardware sections of department or general stores.

WHEN DOES IT GO?

Date of Issue is August 19. Reaches the trade at a time when many of the most important orders for Fall and Winter trade are about to be placed.

WHO USES SPACE IN IT?

Manufacturers and wholesalers of heavy and shelf hardware, builders supplies, tools, paints and varnishes, iron and steel, guns and ammunition, stoves and furnaces, electrical goods, household labor saving devices, automobile accessories, oils and greases, cutlery, toys, and a wide range of other lines which are sold extensively by the hardware trade in Canada.

WHAT CAN YOU SAY?

You can solicit the Fall and Winter orders of the Canadian hardware trade. You can illustrate and describe lines which you have for sale to the hardware trade. You can give the names of distributors of your products in Canada. You can assist your present jobbers by featuring your products to the hardware trade, and giving a list of jobbers from whom your goods may be secured. You can feature any new lines which you have brought out during recent months. You can supply the retail clerks with useful selling points regarding your products—and the clerks will pass these points on to the buying public. You can place your house and your products before, practically, the entire hardware trade of the Dominion, thus showing Canadian hardwaremen that you desire their good-will, co-operation and business.

WHEN SHOULD YOU RESERVE SPACE?

Right Now. Write us a letter at once instructing us to reserve space for you. Last forms close August 16. Our Advertising Service Department will co-operate with you, without additional cost, in the preparation of suitable copy for the Canadian hardware trade.

We have specialized on "Publicity To the Canadian Hardware Trade for 34 Years." This is the last call for the 34th Annual Fall Buying and Directory Number. He who hesitates now, misses the most important "Hardware Buyers' Guide of the Year." Address your order, copy, and cuts to

"We, also, used it."

Two centuries of unassailed supremacy is the proud heritage of Brandram's Genuine B. B. White Lead. Down through succeeding generations, in every corner of the civilized world where painters ply their trade, it has been recognized as the one standard for quality. The ancient formula employed by Brandram in 1729 and handed down to us is in use to-day, and is the secret of the unapproachable smoothness and great covering capacity which characterizes our product.

In spite of all modern inventions it is still the finest White Lead in the world and it forms the base of our famous B-H "English" Paint.

EVEREADY

PORTABLE LIGHTING OUTFIT

EVEREADY'S newest success—a lighting outfit consisting of one 6-8 volt, 2 C. P. Lamp, 10 feet of cotton cord, bayonet socket, all ready to attach to a "Hot Shot" Battery. The ideal form of lighting for camps, cottages, closets, outbuildings, motor-boats, and for side or tail lights on vehicles. The complete outfit is packed in an attractive carton and retails at $2.75.

The average amount of use that can be obtained with this outfit from one 1561 Hot Shot Battery is as follows:—

One hour per day	80 days service	80 hours
Two hours per day	35 days service	70 hours
Three hours per day	20 days service	60 hours
Four hours per day	14 days service	55 hours
Five hours per day	10 days service	50 hours
Continuous burning	40 hours service	

Although the 1561 Hot Shot is recommended for use with one six-volt, 2 C. P. lamp, it is, of course, more economical to use the 2562 Hot Shot, which gives 35 to 50% more service on the same use than two 1561 Hot Shots used one after the other.

Order your stock through your jobber now and be prepared for the camping and vacation season. There is an all-year-round sale for this lighting outfit for indoor use in the home and on the farm.

Making the Lantern Business Pay

There's one way to make the lantern business pay and that is to sell the best working lantern on the market. That lantern is the SMP Beacon Cold Blast Lantern.

Rough handling or shock can't blow out a Beacon. It will go on brightly shining in the wildest storms or violent winds. It is very strong and will stand all kinds of wear.

We are now producing Beacon No. 31 Side-light, which is a No. 3 Beacon Lantern specially fitted with red disc, and also a bracket for attaching to side of buggies, wagons, etc. It is ideal as a side- and tail-light, and can be easily detached and used as a stable lantern.

Price Reduction

Ask our traveler about our big reduction in price on Beacon Lanterns which went into effect June 17th. The new price makes the Beacon easily the most attractive lantern proposition on the market.

Motorists Are Big Boosters For HATCH GARAGE Door Outfits

"Hatch Outfits Make Extra Sales for You"

Reasons Why

THE HATCH garage door outfits give permanent satisfaction to the user, without trouble of any kind.

Slamming or sagging of the doors is absolutely impossible, thus eliminating danger of damage or annoyance.

Ice and snow cannot interfere with the hanger, thus ensuring complete satisfaction during stormy winter weather.

The doors slide easily and conveniently out of the way, with a minimum of effort on the part of the motorist.

Motorist can enter or leave the garage quickly in winter weather, and suffers no delay through obstructions of ice or snow.

Hangers cannot freeze up or jump the track. They operate easily and freely during all seasons of the year.

Every User of a "Hatch Outfit" is a Booster

Why YOU should use "Armco" Ingot Iron

Your future business prosperity depends upon the foundation on which you are building. There is no surer way to build this foundation in your business than to guard against the use of inferior materials.

There are a certain number of working hours in a day. You have a certain capacity for work, whether it be personal work or guiding the work of others. All the money you make is dependent upon yourself and the number of working hours in a day. Therefore, every job you do should not only pay you a good profit, but should also be a means of bringing more work to you by representing the kind of work you do.

What you do today, if done right, brings you more work and more profit years from now. It is the greatest testimonial you have to your ability as a sheet-metal worker. It is your advertisement to everybody who needs sheet-metal work done.

Can you afford then to use materials that will not stand up as long as they should, in hard service? Are you willing to risk your future reputation and business by using metal that is inferior to rust-resisting "Armco" Ingot Iron?

It does not take much salesmanship as a rule to show the people you are planning to work for why they should use "Armco" Ingot Iron, even though the first cost is a little more than that of an ordinary sheet metal. You can convince them that it will be actually much cheaper in the long run. And so every job you do will really mean more business if you can persuade them to use "Armco" Ingot Iron; more money will be involved in it—and more profit.

The pure base metal of "Armco" Ingot Iron makes it easy to form, and the galvanized coating adheres so tenaciously that severe forming and bending operations do not cause it to crack or peel.

Among the many reasons why you should use "Armco" Ingot Iron, do not overlook those which are so important to *you*.

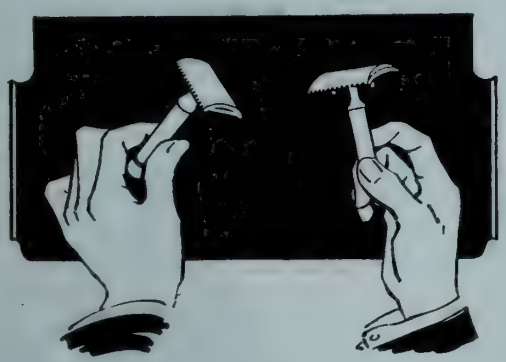
READY FOR BOTH MARKETS

Says the Wise Old Owl

There's a man who says "I'll get it
I just sold my last today."
There's another man who's got it,
And the business goes his way.
So if your stock is running low
Sort up without delay.
Until tomorrow, don't put off
What should be done today



The Brownie Gillette has opened up for you a market new and separate from your old $5.00 one.

It has brought to you as prospects for Gillette Razors and blades the thousands of men in your locality who could not afford to pay $5.00 for a razor—even the best.

With the Brownie Gillette and a good selection of different New Improved sets, you can turn every shaving enquirer into a Gillette owner and a buyer of blades in your store. Both razors use the same fine Gillette blades as you have always known.

And the buyer of a Brownie is always a prospect for the New Improved Gillette.

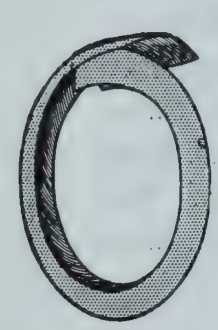
This Familiar Line---

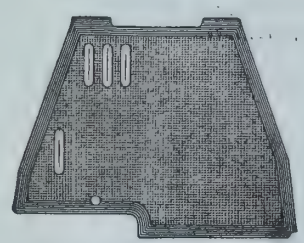
"GUTTA PERCHA"

ACCESSORIES

Keeps Down Selling Costs



Reliners



Heat-proof Mat (for Fords)

Time-consuming argument, so necessary in selling obscure, little-known brands, costs money in every hardware store where obscure lines are permitted. Every extra minute required to close a sale adds to your selling costs and reduces your annual net profit.

"Gutta Percha" Accessories are tried, proven, well-established products. Many of your customers have used them satisfactorily before. Others have had agreeable experience with "Gutta Percha" Tires, Belting, Outing Shoes, etc. To all your customers, the "G.P." Trade mark has a familiar, friendly influence because of the continuous advertising in more than eighty Canadian advertising mediums.

the best MEAL I ever ate

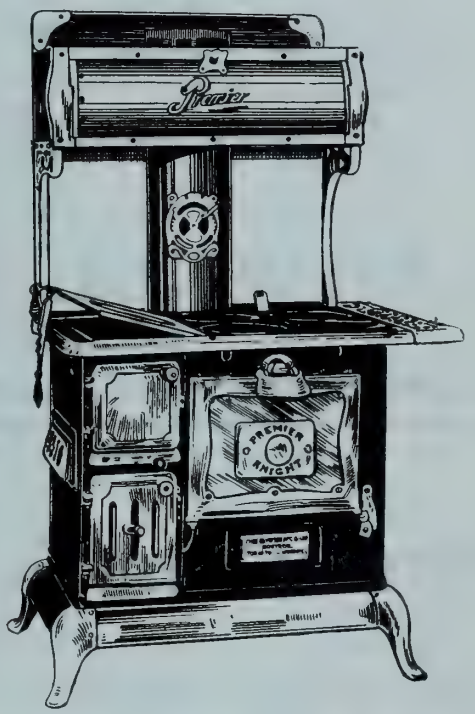
said Father, after the first dinner cooked on our new "PREMIER KNIGHT."

This is the headline of one of our advertisements which forms part of the campaign we are running in all the big dailies in Canada.

Davidson's not only produce the Premier line of Stoves and Ranges in Canada but they back up the quality of their goods with a generous amount of advertising, all directed to the benefit of the dealer.

This dealer co-operation is one of the big advantages to the stores which carry Davidson's Ranges. It influences trade and it materially assists in educating prospective buyers as to the difference between superior quality and mere price consideration.

Sixty years of active representation among the trade has won for Davidson's a name which stands for Reliability and Highest Quality workmanship.



Our New Line—the "PREMIER KNIGHT"

ALL STEEL KITCHEN RANGE

Has all the points of superiority which characterize the various Davidson Ranges. White enamelled panels or tiled back and oven door, nickel plated trimmings. It is constructed to burn coal, coke or wood. A roomy oven has braced bottom to prevent warping—fire box has cast lining and duplex two-piece grates—one side for coal and coke, and turned over, is suitable for temporary summer grate for wood. Cast iron fire door and ash-pit door, both heavily nickelled. "PREMIER KNIGHT" can be supplied with or without high shelf and Persian Closet. A thoroughly competent and reliable grate, yielding even combustion of coal and maximum heat for cooking. Well insulated and well ventilated, ensuring quick baking.

Write for Catalogue "Davidson's Stoves and Ranges" featuring other Premier Stoves—"Marathon," "Leader," "Argus," "Royal," "Chieftain."

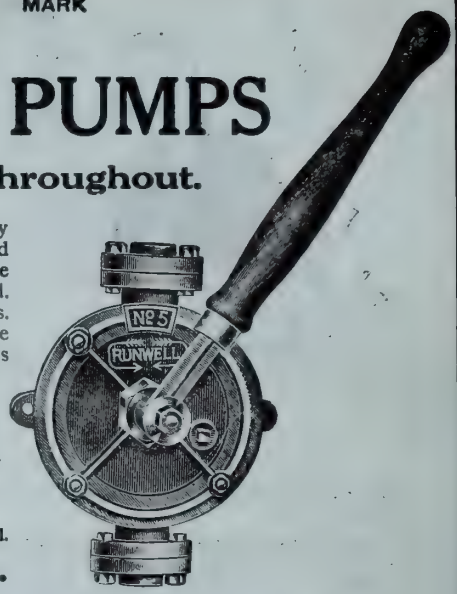
TRADE RUNWELL MARK

SEMI-ROTARY WING PUMPS

Are BRITISH MANUFACTURE Throughout.



The "Runwell" Semi-Rotary Wing Pumps are **British Manufacture,** and by reason of their general adaptability for a variety of circumstances, where a reliable and efficient pump is necessary, are becoming increasingly popular. The pumps are liberally designed to withstand rough usage and to give the full capacity specified. They are subjected to a rigid examination and are also tested under working conditions.

The "Runwell" Semi-Rotary is easy to manipulate and is designed to raise more water than any other type of hand-operated pump. All pumps have counter flanges fitted to branches, tapped Briggs standard thread.

Preying on the Retailers

Every retail merchant will want to read the sensational disclosures of a campaign on retail merchants being made by an oil firm in Texas. The story is told in a current issue of THE FINANCIAL POST, Canada's investment weekly.

Dozens of retail merchants have already been induced to "invest" in this company. One Toronto merchant has put in over $5,000. Possibly you have received their tantalizing literature.

"Investment Stories from Real Life"

is the title of an interesting series of stories now running in "THE POST" telling about every day people and how they solved their investing problems. They will have a real interest for you. If you subscribe now we will send you reprints of all these vital human documents that have appeared to date.

SPECIAL OFFER

If you have any investment problem at the moment send it along with your subscription—written on a separate sheet of paper, and the editor will give you the benefit of his advice.

Dollars Have Wings If They Are Not Safely Invested

You work hard for the dollars you save. Properly invested they can be made to work hard for you. But they must be properly invested.

If you feel the need of a guide to show you how to invest your money to bring you the biggest return consistent with safety; to show you how to avoid the pitfalls of investment; to tell you the difference between such "fly-by-night" propositions as the one mentioned above and the sound, profitable opportunities, you need THE FINANCIAL POST.

It will give you a personalized investment service. Its articles every week will tell you what you want to know about investing. Its discussion of current business and national problems will give you a new angle on economic and political questions.

You will have too all the privileges of the Investors' Inquiries Department. You may ask as many questions as you like about your own investment and financial problems—the standing of your broker, and the analysis of particular securities, insurance problems, etc. This service is free to all readers.

Stop losing money in bad investments. Invest $5 now where it may save you $500 or $5,000. Fill in the coupon at once before you forget.

——————————————Tear Off Here——————————————

THE FINANCIAL POST,
143 University Avenue, Toronto.

Send me THE FINANCIAL POST for one year (52 issues) for which I enclose $5.00. Please send me a copy of the issue containing the exposé of the oil company's raid on retail merchants. Also send me reprints of all "Investment Stories from Real Life" that have appeared to date.

Basement Type Paint Oil Battery

Handle Paint Oils Safely And Economically

No matter how large or how small the volume of your paint and lubricating oil business, you will profit by a battery of Bowser tanks, such as shown above. Install a tank of each kind of oil. The all-metal, evaporation-proof construction prevents leakage and gumming. The piston-type measuring pumps deliver exactly the amount of clean oil required, eliminating spillage. Thus you will be paid for all the oil you buy.

And you save three-fourths of the time used in measure and funnel service.

The complete equipment keeps your store neat and clean and gives it an inviting appearance—which results in greater patronage.

Bowser equipment has never started or contributed to a fire.

Write for illustrated booklet C-16 and learn how to make more money selling oils and paints.

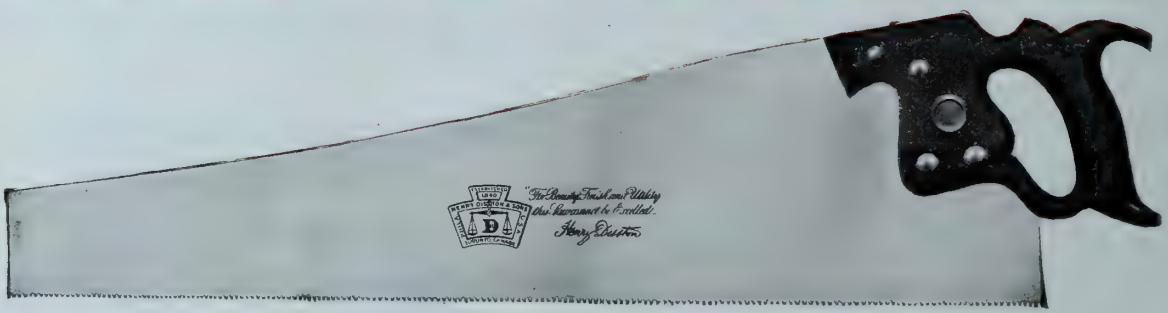
DISSTON

HAND SAWS



THE SAWS MOST CARPENTERS USE

ALL MODERN AND NEW MACHINERY

All the machinery used in the manufacture of DISSTON Handsaws in Canada was specially made up at the Philadelphia factory, and embodies the latest improvements in saw-making machinery.

A staff of specially trained mechanics from the Philadelphia factory is in charge of each operation through which a saw passes during manufacture.

All the material used in the manufacture of the famous DISSTON Handsaws is melted and rolled at the DISSTON mills at Philadelphia, and is unequalled for quality.

These conditions assure the maintaining of the famous DISSTON quality, WHICH IS THE STANDARD FOR QUALITY THE WORLD OVER, AND HAS BEEN FOR OVER 80 YEARS.

Four Advantages of Revised Sales Tax

Both Manufacturers and Wholesalers Charging Total Sales Tax on Transaction With Retailer and Eliminating from Tax Sales From Manufacturer to Wholesaler Would Relieve Wholesalers of Big Load, Facilitate Collection, Pass on Whole Tax to Consumers and Increase by 10 Per Cent. the Government's Revenue.

EDITOR'S NOTE:—That the means now taken and the means likely to be taken in the near future by the government for the raising of revenue by taxation, provide a subject of paramount interest among all branches of the trade to-day is indicated by the close attention which is being paid to any information secured as result of experience with present measures or as to taxation changes likely to be made in future.

In the July 21 issue of Hardware and Metal appeared an article based on an interview with an authority pointing to the possibility of an extension of the Sales Tax principle of raising revenue. This article was reproduced in The Financial Post, the editor of which has received a lengthy communication from the general manager of a large supply firm with branches in most important cities throughout Canada. This communication brings out many interesting points of interest to retailers, wholesalers and manufacturers and is reproduced in full as follows:

"I HAVE read with very great interest indeed an article in your issue of July 21st, entitled, 'Ottawa May Extend Sale Tax to Take Place of Income Levy.' With particular interest for the reason that the writer has been urging the administrators of the Act, up to and including the Finance Minister, constantly since early in December of 1921, to amend the administration in such a manner as to relieve the intermediate source of distribution of an unfair tax.

"It was freely admitted by all authorities interviewed that the fundamental principle of the Act was to distribute the load as widely as possible, or in other words pass on the entire tax to the ultimate consumer.

"When the tax was first instituted it was on a much lower basis than at present, and the sources of distribution lying between the manufacturer and the ultimate consumer, that is to say the jobber and retailer were under the impression from the indefinite wording of the Act, that a certain proportion of the tax should be chargeable against their profits and as the individual item was small the matter was not given proper consideration. Thus the practice came into being which, if continued, will have the effect of forcing the jobber and wholesaler into liquidation, as I am under the impression there is no jobber or wholesaler in Canada, except possibly in strictly luxurious lines, who makes an average profit over a term of years much in excess of 2¼ per cent. on the turnover.

Eliminate Tax on Certain Transaction

"My suggestion to the Government was that the tax should be eliminated on all sales from the manufacturer to the jobber or wholesaler and on sales from one jobber or wholesaler to another jobber or wholesaler, the classification of the jobber or wholesaler to be determined by license issued by the Government as at present. The manufacturer would, however, when selling direct to the retailer or consumer, charge the full tax of 3 per cent. as it was in December last, or 4½ per cent., as it is at present, and the wholesaler or jobber when selling the retailer or consumer would also charge 3 per cent. or 4½ per cent. tax as it is at present.

"If the Act were amended in this way it would have a fourfold effect.

"In the first place the jobber or wholesaler would be relieved of an unfair and unbearable load.

"In the second place the Government would collect its revenue from one source on each transaction, rather than from two sources, thus reducing the expenses of collection.

"Third, the entire tax would be passed on to the ultimate consumer, which is the fundamental principle of the Act.

"Fourth, the annual net revenue secured by the Government would be increased probably not less than 10 per cent.

How It Works Out

"In explanation, my statement regarding the increase is based on the assumption that the average jobbers' preferential is not less than 20 per cent. Using this as a basis, a bill of goods which the manufacturer would sell to the retailer for $1,000, would be sold to the jobber for $800. At present this bill of goods passing from the manufacturer to the wholesaler is invoiced at $800, on which the sales tax at 2¼ per cent. is $18. The wholesaler invoices the same bill of goods to the retailer at $1,000, on which the sales tax is 2¼ per cent., amounting to $22.50, so that on the double transaction the Government collects $18 from one source and $22.50 from the other, or a total of $40.50.

"If the manufacturer was allowed to sell the wholesaler free of tax and the wholesaler when re-selling the retailer charges a 4½ per cent. tax as suggested, the singe tax would amount to $45.00. In other words the Government would collect $45.00 from one source, being an increase of $4.50 or slightly over 11 per cent. more than from the double source.

"Furthermore, the wholesaler would be relieved of the necessity of absorbing the tax charged him by the manufacturer and in turn the manufacturer would be relieved of the necessity of absorbing the 2¼ per cent. tax which he finds necessary at the moment in selling direct to the retailer, in competition with the wholesaler.

Price to Retailer Also Increased

"It is freely admitted that the wholesaler cannot absorb this tax and exist. Failing action on the part of the Government to remedy the situation it will be necessary for the manufacturer to so amend base discounts as to protect the

wholesaler through which class probably 95% of the business of the country is transacted, and it will undoubtedly be found that any remedial action on the part of the manufacturer will add more than the amount of the tax to the ultimate cost of the goods. To illustrate —assuming the manufacturer's discount to the wholesaler is 60/17½% off. At present the gross revenue accruing to the manufacturer would be 33% on. The wholesaler, however, instead of making 17½% gross as was intended, must pay 2¼% sales tax, thus reducing the revenue below a living gross profit. To remedy the situation the manufacturer will amend the wholesale discount to 58/20%. This will increase the manufacturer's revenue slightly as it will in this case amount to 33.0%. The wholesaler in re-selling to the retailer in the first instance would invoice him at 60% off, so that the retailer's cost is 40% on. In the second instance would invoice the retailer at 58% off, which is equivalent to 42% on. Consequently the cost to the retailer is increased 5%. The retailer when re-selling to the consumer will probably add at least 33 1/3%, plus the tax which the retailer pays the wholesaler and manufacturer, and which he is entitled to charge to the ultimate consumer. We find in the second instance the consumer's cost would be 42 plus 33 1/3%, which equals 56% plus tax, still showing an increase of 5%.

"The increase will of course vary appreciably in the several lines of business in proportion as the base discount is over or under 60%, but it is safe to assume as experience has clearly proven that the manufacturer in revising base discounts will be absolutely certain to see that sufficient change is made to protect the source of distribution.

"I am quite confident it will be impossible to induce the Government to make the suggested change unless very considerable pressure is brought to bear, supported by large and influential deputations, and I trust most sincerely your publication will carry on the good work.

"I have been in constant correspondence for the last eight months with dozens of manufacturers and wholesalers in Canada, practically all of whom are strongly in favor of the suggested amendment."

DANFORTH BUSINESS MEN HOLD PICNIC

The business men of Danforth Avenue, Toronto, held their annual picnic in Withrow Park on Civic Holiday. Many thousands of people of the district came to partake in the numerous races, games and other contests arranged and many splendid prizes were donated. Addresses were given by prominent personages in the district, each pointing out the advantages of supporting the business men of the district for the benefit of the locality as a whole. There was plenty of ice cream and other refreshments for the hundreds of children who gathered, and throughout the day splendid music was provided.

Maritime Business Shows Much Improvement

Customs Receipts For July Are Biggest in History in St. John—Very Little Unemployment—Building Totals Much Bigger Than Last Year—Some Hardware Price Revisions

ST. JOHN, N. B.—Business in automobile accessories, sporting goods, paints, etc., continues to be very satisfactory. The jobbing houses in the Maritimes are now shipping out large quantities of ammunition to the retailers for fall shooting. The sale of guns and rifles has not been large, but the ammunition business seems to hold its own at all times.

The total cost of building permits issued by the St. John building inspector for the month of July is far in excess of the total for July 1921, according to figures given out by the building inspector. The total value of permits for the year to date is also greatly in excess of the total for the corresponding period in 1921. In July the value of new buildings was estimated at $180,000, while in July 1921, the total was only $48,500. For this year to date the total value of new buildings $475,600, compared with a total for last year to the end of July of $148,700. While there is no building boom in St. John, the figures given are a healthy sign of greatly increased activity in building, and as these figures are increased each month, the hardware trade cannot help but feel that so far as building is concerned, things are moving in the right direction for more business in builders' hardware.

Customs Receipts Increase

The Customs receipts for July have created a record for the St. John Custom House. The announcement has been given out that in July the largest monthly customs receipts in the history of St. John were collected. In the month just passed the sum of $820,604 was collected here, an increase of $85,469 over July 1921, when the receipts amounted to $735,135. Each month this year there has been an increase, but last month caps the climax, and to the citizens of St. John who saw the announcement came the feeling that times were surely getting better.

Labor Situation Improves

With regard to the local labor situation in St. John, there is evidently a wonderful change for the better.

Emery cloth in quires is quoted; 00; $1.90, 0—$1.90, ½—$1.95 1—$2.10, 1½ $2.15, 2—$2.30. 2—2½—$2.50, 3—$2.70. Automobile springs are quoted at 25 cents per pound. Wash boilers are quoted to the trade as follows: 800-IC-FTB $13.04; 900-IC-FTB, $14.06; 08-IC round $14.25; 09-IC-round $15.83; 80-IC-FCB $18.86; 90-IC FCB $21.10; 800-IX-FTB $14.07; 900-IX-FTB $15.11; 80-IX-FCB $19.90; 90-IX-FCB $22.15 95-XXXX-FCB $35.51; 80-all copper $40.00; 90-all copper $43.24. Building papers and felts are quoted as follows. Carpet felt $4.15 per 100 lbs., tarred felt $3.65 per 100 lbs, heavy dry sheathing $3.40 per 100 lbs. The following quotations are for rolls: Tarred sheathing No. 2, 90 cents, light dry star No. 2, 69 cents, surprise dry sheathing, 74 cents, certain-teen, $1.15, cyclone dry sheathing, $1.19

Hollow rubber balls, terra cotta are quoted as follows: 1½ in., 48 cents per doz.; 2 in. 85 cents; 2¼ in., $1.05; 2½ in., $1.30; 3 in. $1.86.

Framed buck saws No. 50, $15.58; No. 45, $16.32. Buck saw blades No. 26, $8.10; No. 45, $7.43. Saw rods, $2.00. Saw frames, plain No 4, $3.60. Saw frames, red, No. 04, $4.10.

Latest prices on English shelf brackets show a substantial reduction as follows: 5x7, $1.85; 6x8, $2.10; 7x9, $2.45; 8x10, $3.05; 10x12, $4.20; 12x14, $5.50.

Light Manilla Paper Bags have been slightly reduced and are now offered in full packages at the following quotations per thousand to which ten per cent is added for less than full packages: ¼ lb., 70c; ½ lb., 84c; 1 lb., $1.05; 2 lbs., $1.35; 3 lbs., $1.68; 4 lbs., $1.97; 5 lbs., $2.61; 6 lbs., $2.94; 7 lbs., $3.32; 8 lbs., $3.86; 10 lbs., $4.43; 12 lbs., $5.13; 14 lbs, $5.83; 16 lbs., $6.32; 20 lbs., $7.72; 25 lbs., $8.42.

HERE IS A GOOD ONE

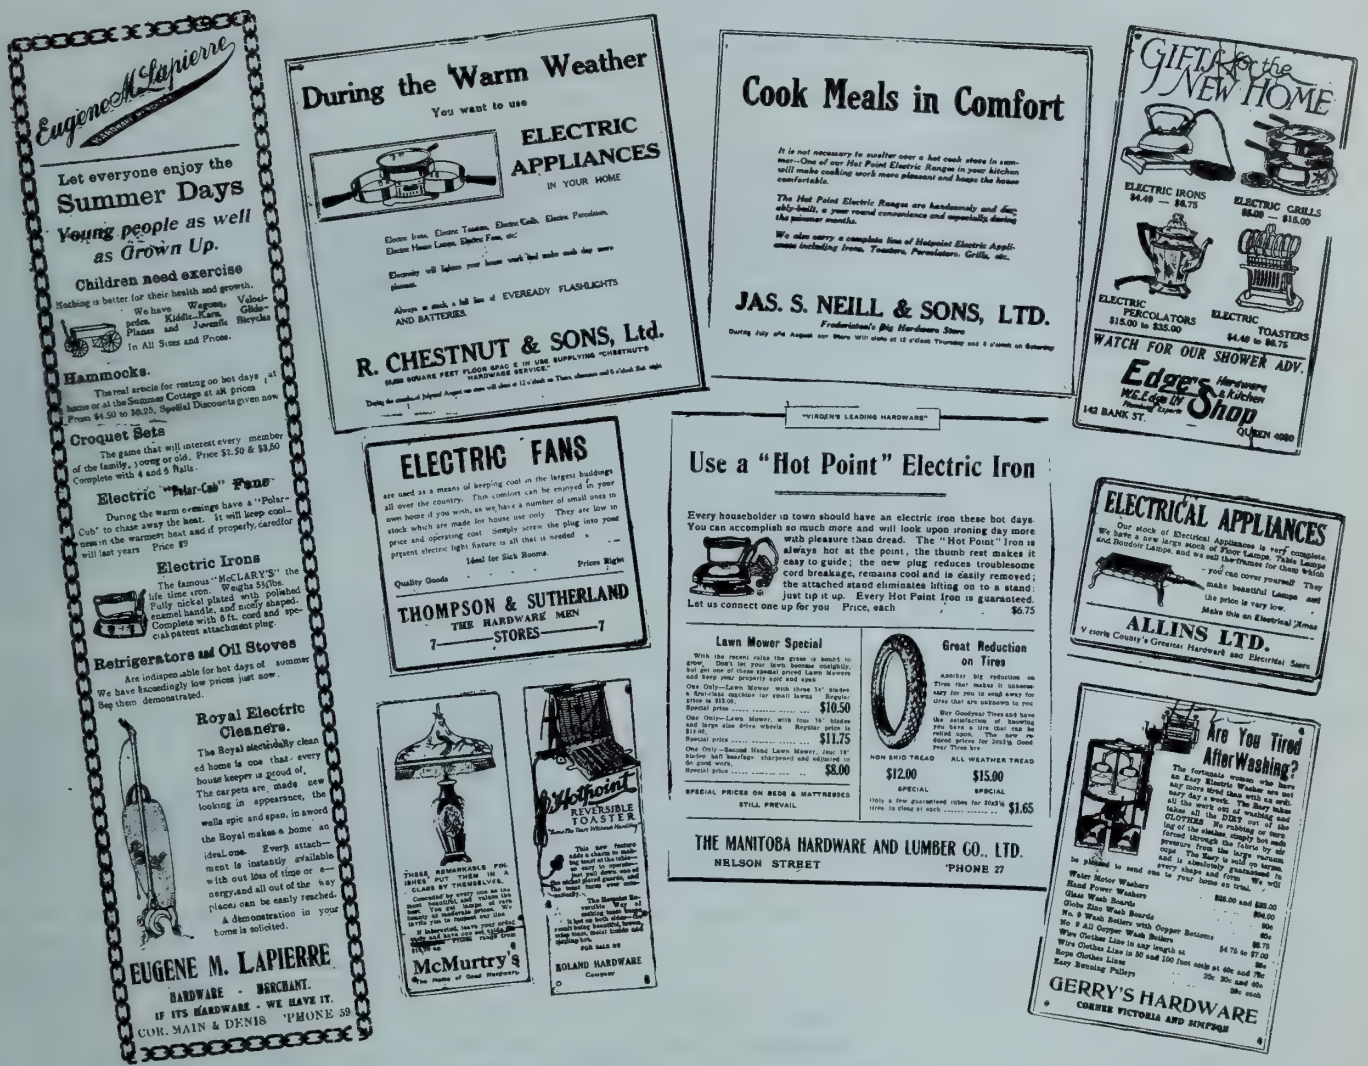
By way of illustrating the present financial situation in Germany, Trade Commissioner Gordon B. Johnston, writing from Scotland to the Department of Trade and Commerce at Ottawa, tells the following story:

"A Russian in the nail business went to Germany with 25 million roubles. Germany having a high exchange as compared with Russia, he only received sufficient marks for all his millions of roubles to buy one wagon load of nails. He took the wagon of nails to Russia, and sold them for 30 million roubles, a profit of 20 per cent. When he returned to Germany with his 30 million roubles he found that the Russian exchange had depreciated, and he could only get enough marks to buy half a wagon of nails.

He took the half wagon to Russia, and sold it for 35 million roubles, and well satisfied with his profit, returned to Germany, where this time, owing to a further depreciation of the Russian exchange, his 35 million roubles bought only enough marks to pay for four cases of nails. He returned to Russia and sold the four cases for 40 million roubles, but when he came back to Germany the Russian exchange had fallen again, and he only got enough marks to buy one nail, so he hammered it into the wall, tied a rope to it, and hanged himself.

Electric Devices on Summer Verandas

Woman Writer Urges The Fixing Up of Summer Verandas and Use of Electric Appliances to Lighten Labor of Summer Housework—Many Appliances Can be Used—Some Suggestions For Dealer's Summer Advertising of Electrical Goods



THAT there are many splendid opportunities for effective advertising of electrical goods in summer trade is vouched for by these sample ads. That of E. M. Lapierre of Buckingham, Que., points out the advantage of an electric fan, iron and vacuum cleaner in the hot weather. Under the heading "During the Warm Weather" the ad. by R. Chestnut & Sons, Ltd., Fredricton, N.B., continues "you want to use electric appliances in your home, such as irons, toasters, grills, percolators, lamps, fans, etc. Electricity will lighten your house work and make each day more pleasant."

An ad. confined to fans by Thompson & Sutherland, Nova Scotia hardwaremen, says "Electric fans are used as a means of keeping cool in the largest buildings all over the country. This comfort can be enjoyed in your home and we have fans in stock for house use only. They are low in price and operating cost. Simply screw the plug into your present fixture."

An ad. confined to toasters is used by Roland Hardware, Roland, Man. The ad. by J. S. Neill & Sons, Fredericton, N. B., says "Cook Meals in Comfort. It is not necessary to swelter over a hot cook stove in summer. One of our electric ranges in your kitchen will make cooking work more pleasant and keep the house comfortable. Our electric ranges are handsomely and durably built, a year round convenience and especially during the summer months."

Manitoba Hardware and Lumber Co., Virden, Man., advertise that everybody should have an electric iron in the hot weather. The ad. says, "You can accomplish so much more and will look upon ironing day more with pleasure than dread."

With September brides gift season in the offing some ads such as that of W. G. Edge & Co., Ottawa, Ont., might be used which illustrates irons, grills, percolators and toasters showing a range of prices and suggesting these as gifts. Allins, Ltd., Lindsay, advertise a range of electrical goods. Gerry's Hardware, Fort William, devote an ad. to the electric washer under the heading "Are you tired after washing? The fortunate women who have an electric washer are not any more tired than with an ordinary day's work. This machine takes all the work out of washing and takes all the dirt out of the clothes."

Pointing out the advantages of using suitable electrical appliances to make the porch or veranda of the house a room where much hot work can be done by the housewife in the summer months, a woman writer on the subject has the following to say:—

(Continued on page 28)

"The porch in summer has been termed the outdoor living room, but this designation does not begin to cover its functions. The modern, electrically equipped porch not only serves as living room but in many homes is used as a dining room, kitchen, sewing room, reception room and sleeping room. In fact an entire day's tasks may be performed on the porch and performed with more comfort and convenience than in any other part of the house.

In House Planning

"In drawing plans for the modern home the porch should receive generous attention and space. As a matter of fact it is ofttimes desirable to sacrifice the size of the interior rooms in order that the porches may be sufficiently spacious. The ideal house should have three porches—an upstairs or sleeping porch, a convenient back porch, where breakfast may be served, and an extensive and spacious veranda where almost every household task may be performed.

"To obtain 100 per cent. efficiency from the veranda at least four convenient outlets for electric service should be installed. These will permit the use of an electric fan; a tea wagon equipped with grill, toaster, chafing dish, percolator, etc.; an electric cleaner with its myriad uses, an electric sewing machine, iron heater or whatever appliance meets the moment's requirements.

"A family of my acquaintance practically lives out of doors in its screened veranda from May to October. Then it is enclosed in glass and made cozy and comfortable during the winter months by the addition of auxiliary electric heaters.

"A sequestered vine-covered corner of this porch conceals the ironing board and electric iron where the children's dresses and underthings are ironed with ease and comfort to the languid drone of an electric fan. Here the fireless cooker is also concealed which enables the housekeeper to prepare a hot meal for the cool of the evening. Here she pares and prepares fruit and vegetables and here, during the canning season, many a delectable conserve and jam is electrically perfected.

"A summer-time schedule is in effect in this household which includes breakfast on the veranda at eight, consisting of fruit and electrically cooked eggs, toast and coffee.

Electric in the House

"To further simplify housekeeping the kitchen of this home boasts of an electric refrigerator where food, cooked or uncooked, may be kept for days and weeks at a time; and an electrical dishwasher in which the dishes are stacked after each meal but washed only once a day.

"Grass rugs, wicker furniture with cretonne cushions, a roomy porch hammock, ferns, cut flowers, the latest books and magazines and an electric phonograph and fan, make this spot a veritable oasis during the summer months. Here family and friends gather for an iced drink after a hectic day in town or on the links; here one may rest and read one's favorite author or fashion frocks and furbelows with the aid of the motor driven sewing machine.

"In the evening the place may be transformed into a moonlit glade by means of colored electric lamps and music for singing or dancing furnished by the phonograph. Likewise, when required for reading, sewing or other close work, the veranda may be flooded with light, free from glare.

"This veranda has been adequately wired for electric service. There are two separate circuits — one for light and one for power and the outlets for lighting are as numerous as the outlets for appliances."

The foregoing gives hardware merchants some material with which to do some effective promotion work. What housewife will not be influenced by the suggestion of fixing up the veranda as a cool place to work and the use of electric appliances to lighten summer labor.

A Fall Campaign For Bigger Receipts

OPPORTUNITIES for increasing trade during the fall months are being realized more and more by hardware merchants. To bring business in the months of September, October and November on a level with that enjoyed during the usual spring period is the endeavor of many dealers to-day. The success in this direction has not been wholly gained, but in practically all cases where a campaign has been put on, sales have been appreciably increased. Inquiries made from retailers who commence after the hot summer months a campaign on the selling of fall goods reveal the fact that the hardware trade offers a good many lines which are seasonable at this time of year and by putting forth a little special effort encouraging results have been attained.

The importance of reaping a harvest before the winter sets in was recently outlined by a Montreal merchant to Hardware and Metal. Trade in certain months of the winter was proverbially quiet in all lines of business, the hardware trade no exception. The only remedy was to reduce this dull period to a minimum length of time, and this could only be accomplished by lengthening fall trade and commencing early in the spring for spring trade. No retail business, hardware or otherwise, could afford to rest on its oars especially in times like the present. If forced to do so to an extent in mid-winter this must be offset by active business in the other seasons of the year.

There was a time, he said, when many hardware merchants, and themselves included, were apparently content to take full advantage of spring and its usual sales results and leave the balance of the year to take care of itself. Apart from making a special drive on some well advertised line at various times the general run of business was left to make its own headway. This method of doing business might have been profitable to many well established firms a few years ago, but certainly not to-day in this merchant's opinion. The retailer unfortunately has little chance of reducing his overhead expenses. His rent, a large factor in his expense account, goes on at the same figure whether business be good or bad. His newspaper advertising, another large expense item, has to be increased rather than diminished when times are dull. The same thing applies to window decorations, delivery service, donations to charity and all other things which tend to keep up necessary popularity. All this has a great bearing on the merchant's ability to pay his bills and he has got to push ahead at full speed at practically all times.

The point endeavoured to be brought out by this merchant can perhaps be more vividly described by quoting a merchant at a recent convention. When speaking to his fellow merchants, he said: "I don't believe you fellows realize how serious it can be for you when your cash receipts fall off for a time." He thereupon used the illustration appearing on this page.

"Suppose you are the owner of a business which, in normal times, takes in $2,000 a week. Your expenses are 25 per cent. of your sales, or $500. You have, therefore, in ordinary times, $1,500 to send away to your creditors on Saturday night.

"But let a slump come along which cuts off a fourth of your cash receipts. Instead of $2,000 you take in only $1,500. But your expenses are $500 just the same; you can't possibly reduce them without endangering your whole future.

"Now see where you stand. You take in $1,500. You pay out $500 in expenses. That leaves you exactly $1,000 to send away to your creditors on Saturday night. The slump reduced your volume of business 25 per cent., but your ability to pay is reduced one-third."

Summer Clearance Sale Prepares The Way for Brisk Fall Campaign

After selecting the lines which are to be placed on sale in the Summer Clearance Sale, they should be grouped according to their respective needs, each price marked plainly with the distinctive tickets being used for the sale and then arranged where they can be handled by customers. Some distinctive features for showing kitchen utensils, tools, and various lines of shelf hardware are apparent in this store interior of a hardware firm which makes a big success of its annual Summer Clearance Sale.

WITH the summer getting fairly well along, hardware retailers are looking over stock records with a view to establishing how they are going to "break" on the summer's business. The records will show some lines well cleared out, while others have been slow in moving. The fact that Fall hardware lines are now coming in and will shortly be on display in the store makes it necessary to take steps to clear out the slow moving summer stock. It is unwise to leave this movement until the tail end of the season for then everybody is at it and prices will have to be slashed.

The solution is to go closely over the stock and select the lines which require some extra effort and then group them on tables with price tickets plainly on each. A "summer clearance sale" can then be advertised, and the store decorated in distinctive fashion for the occasion. It will be better to give bargain prices to clear out this merchandise than to have it left on the shelves until the end of the season or perhaps carried over into next summer. It should be kept in mind that profits depend upon turnover, that a smaller profit on goods turned over frequently is much better than a larger profit on goods turned fewer times in the year, and that holding out for a large margin may result in the goods being left on the shelves for such a length of time that they will finally need to bring a still higher price for a less margin of profit due to the fact that overhead charges have been steadily piling up against that stock.

Clean up Odds and Ends

The Summer Clearance Sale will do a lot of good in cleaning up odds and ends of summer lines, and in these days of economy many people are waiting for these end-of-the-season sales in order to purchase requirements at lower prices. Many stores in all lines of business are reporting this condition to be more evident this year and last year than for some time past. Hence we see much activity around the straw hat counters these days.

Many customers will be glad to purchase garden tools, hose, kitchen utensils, preserving supplies, screens, hammocks, camp chairs, vacuum bottles, camping kits, fishing and baseball supplies, poultry netting, bicycles, wheel toys for children, electrical goods, oil stoves, flashlights, harvest tools, ice cream freezers, ladders, etc. Many of these lines can be sold in the Fall months of the year, while others are strictly seasonal, but in any case, there are many purchasers who are looking for bargains and all these lines can be featured in the Summer Clearance Sale to good advantage.

A plan followed by one or two Ontario stores visited this week by Hardware and Metal, in staging a Summer

Sales Tax Act Should Be Revised

THE MANY difficulties which have arisen in connection with the present application of the Sales Tax Act, and the fact that many business men have discovered that this imposition has developed into something of a burden and discriminatory in character, has influenced a thorough study of the question. As result of this study some constructive suggestions are offered, and in view of the likely extension of the Sales Tax in future it is timely that consideration be given these comments and attention be given by the government to the suggested improvements.

The fundamental principle of the Sales Tax Act when it was adopted by the government was simple enough but its application was not clearly outlined and a wide variation is noted in the way it is now applied by various branches of business. It was the government's intention that the tax be passed on to the consumer, but a loophole was left by the provision that manufacturers could absorb up to 50 per cent. of the tax. Then, too, there have been many varying definitions given of the ruling by collectors of customs in various parts of the country which have led to much misunderstanding. The fact that some manufacturers who formerly absorbed part of the Sales Tax have foreseen an increase in this tax in future and have stopped the practice of absorbing any part of the tax has also created a situation which is misunderstood by certain retailers. Wholesalers, who normally operate on the basis of a large turnover and a small margin, have found it a hardship to absorb the Sales Tax such as they are practically forced to do to equalize their prices with those of manufacturers selling direct to the retailer who absorbs part of the tax. These and other discrepancies have been dealt with in detail in various issues of Hardware and Metal.

One of the most constructive suggestions yet offered is that outlined fully in this issue and which has been dealt with briefly in recent issues. This plan provides for the application of the whole tax of 4½ per cent. on sales by either manufacturer or wholesaler to the retailer, and no tax on sales from manufacturer to wholesaler or as between manufacturer and manufacturer or wholesaler and wholesaler except where such goods were to be consumed or used by that manufacturer or wholesaler.

It is claimed that this amendment to the Act would have the effect of relieving wholesalers from a big burden, it would enable the collection of the Sales Tax revenue from one source on each transaction rather than from two sources, it would allow of the entire tax being passed on to the retailer in each instance no matter from where he purchased his goods, and it is estimated that as result the net revenue to the government would he increased ten per cent. By the continuation of the plan now followed, of manufacturers adjusting prices to protect wholesalers is continued, it is estimated that the cost of the goods to the retailer is increased five per cent.

From the retailer's standpoint difficulty has been experienced on some lines in passing on to the consumer the full amount of the Sales Tax. On certain of these lines rather than make odd prices the retailer has absorbed the tax particularly where part of it has already been taken up by the wholesaler or manufacturer. Passing on the whole amount of the tax may be another matter. If legislation is to be enacted making it necessary for manufacturers and wholesalers to pass on the full amount of the tax then some consideration must be given the retailer's ability to in turn pass it on to the consumer as it is intended to be.

Improvement in Trade and Changes in Buying Tendencies

THERE are many definite signs of improving conditions throughout Canada and an active Fall trade in hardware commodities should be experienced providing the effect of the coal and railway strikes is not too serious. Latest reports from various parts of the West indicate that a better than average crop will be harvested, despite earlier reports of poor conditions. It is realized that many Western farmers have been postponing necessary purchases for the last couple of years awaiting better crops and lower prices. With a good crop this year and hardware prices pretty well stabilized there should be active business for Western hardwaremen who go after this trade aggressively. An indication that better buying is already being done is the fact that summer hardware lines have been pretty well cleared out.

On the B. C. coast, the fruit crop shows almost record volume and the mining and lumbering industries are more active. Building construction is active throughout the Dominion and some increase in prices of building materials has followed the sudden demand at a time when stocks were low. Last month the wholesale price index of 48 building materials advanced slightly and is now 79.7 per cent. above 1913 compared with a peak of 183.8 per cent. reached in May 1920. Production of building materials is increasing. An authority discussing the subject pointed out to Hardware and Metal that apparently the crest of the first wave of building activity represented by speculative development has been passed and a sounder period is being entered wherein better types of buildings will be constructed. Many public buildings, educational, institutional and business buildings are now being commenced after a long period of delay.

Governmental figures of Customs collections and revenue from Sales Tax show a big increase in recent months thus indicating a bigger volume of trade. These figures are the more notable in view of the decline which has been experienced in prices, thereby indicating an even greater turnover of merchandise than is at first apparent.

In planning on future business it behooves retailers to give consideration to these indications of improvement and changes which are taking place in buying tendencies.

SOMEBODY said that the windows are the eyes of the store. They used to be. Nowadays they are the eyes through which the passers-by see what the store offers.

DON'T NEGLECT the proper advertising and display of goods because they are fast sellers. Make hay while the sun shines by making fast sellers sell faster.

The Seal of Approval

On Hardware and Metal's Stand in Regard to the Merchandising of Electrical Appliances

The Results of Competition in Ham and Eggs

EDITOR'S NOTE:—Under the heading "The Results of Competition in Ham and Eggs," Electrical Merchandising, one of the splendid publications of the McGraw-Hill Co., Inc., New York, and looked upon as one of the outstanding authorities on the electrical industry, has some potent remarks to make concerning the use of various retail channels for the marketing of electrical appliances.

The stand taken in this article supports the attitude taken by Hardware and Metal in a recent controversy with a Canadian electrical contemporary, and shows from a new angle the fallacy of endeavoring to confine the merchandising of goods to any one channel, all other things being equal. The article is as follows:—

TOURISTS who motor into the little town of Chittenango, New York, are amazed at the number of signboards along the roadside which are devoted to the exploitation of ham and eggs. One sign announces that the hotel makes ham and eggs a specialty; another tells us that one of the restaurants is the best place to get ham and eggs; while a third sign in huge type and shrieking colors declares a certain roadside pavilion to be the original ham-and-eggery.

The motorist reads the first sign without enthusiasm or interest. When he reads the second sign a reminiscence comes to him of the fine, well-smoked ham and the fresh, still-warm eggs that he used to get down on grandfather's farm. When he reads the third sign, his foot instinctively lifts from the accelerator and connects with the brake. He is sold. As the result of those three signs, we suppose, more fried eggs are sold in that one small community than are sold in all the hundred towns along the Mohawk Trail.

Which indicates the value of competition.

We in the electrical business are sometimes inclined to throttle competition. We try by various devices to put the other fellow out of business. It can't be done. What we need in this industry is not fewer dealers and contractors to divide the business, but more dealers, more contractors, and more salesmen clamoring for more business.

It's the clamoring that counts—the solicitation and publicity. Clamorous advertising will sell anything that's salable. It sells ham and eggs in Chittenango. It will sell electrical merchandise in your town.

Events in the Trade

NEW FIRMS

Johnson & Tait have commenced in the hardware business with a store at 257 Coxwell Ave., Toronto. Mr. Tait was formerly with Ramsay & Co., of Winnipeg.

H. Stainton, Ltd., has opened a new branch hardware store at 3231 Yonge St., Toronto, with T. S. Roberts in charge.

J. E. Hedley, Hardware, has commenced business at 2023 Yonge St., Toronto.

FIRE LOSS

Woodstock, N. B.—Fire destroyed $150,000 worth of property in the village of Syrna Mills, in Aroostock county, about twenty-five miles west of Woodstock. The fire started in the rear of the large general store of J. E. Tarbell and Bros., and wiped out the entire group of buildings owned by the firm, with most of the contents, including a hardware stock.

INCORPORATION

Purdy Radio Phonograph Co., Ltd., head office Toronto, capital $40,000 to manufacture and deal in radio supplies, phonographs etc.

Toronto Simonizing Co., Ltd., head office Toronto, capital $40,000 to manufacture and deal both wholesale and retail in paints, varnishes, enamels, oils, white lead, turpentine, etc.

PERSONAL

S. F. Wood, manager of the Hobbs Manufacturing Co., London, Ont., is enjoying a couple of weeks fishing in the vicinity of Wiarton.

J. M. Webber, Western Ontario traveller for the Hobbs Manufacturing Co., London, is spending his holidays at his home near Rodney.

J. C. Reid, for the past two years representative of the Canadian Oil Co. in Middlesex, Kent and Lambton has been appointed Western Ontario sales manager with headquarters at London. Percy Pearson has been named representative for Lambton county.

W. H. Bartlett of the St. Mary's Hardware Co., St. Mary's, Ont., is home again after spending a couple of weeks motoring through Michigan.

S. W. Newman of the Warner Patterson Co., Toronto, is calling on the trade in this district.

A. Boitard, representing Sabatiere Pere & Fils, Thiers, France, manufacturers of cutlery, was a visitor at the Toronto office of Hardware and Metal. Discussing conditions in France he pointed out that the popular opinion that there was unrest in that country was due to the political disturbances only and that commercially France was developing quietly but consistently, gradually regaining export trade. Mr. Boitard stated that there is much activity in northern France and that big strides have been taken in rehabilitating the war devastated areas.

NEW PLANT FOR FIRESTONE TIRES

Announcement is made that the Firestone Tire and Rubber Co. of Canada will be prepared to undertake production at its Hamilton plant, now nearing completion, early in September. Initial output is estimated at 1,500 tires a day.

WESTERN ONTARIO NOTES

W. Willis, who recently purchased the Chambers Hardware at Springfield, Ont., has taken over the business.

Burglars who obtained entrance through a cellar window got away with ten auto tires and a revolver at the hardware store of Clements & Co., Milton.

CONTRACTS AWARDED

The Hobbs Manufacturing Co., London, Ont., has been awarded contract for the glass in the new store being erected for the Cowan Hardware Co. Work is rapidly progressing on the new building which is one of the most modern and up-to-date hardware stores in Western Ontario and it is expected it will be ready for opening in October.

D. B. McCOY

Who, as announced recently in Hardware and Metal, has been transferred to the Toronto sales staff of the Steel Company of Canada in succession to C. G. Knott. Mr. McCoy comes from Vancouver where he has represented this company for the past three years.

John A. Brownlee of London, Ont., has been awarded the sheet metal work in connection with new Sarnia Collegiate Institute.

BURGLARS ENTER HARDWARE STORE

Montreal.—For the third time since the beginning of the year burglars entered the hardware store of Omer DeSerres on St. Denis street this week On this occasion they secured about $500 in cash and vouchers from the safe, and about $300 worth of expensive pocket knives. Entrance was gained from the rear of the store at the third floor window, the burglars being obliged to first tear off the steel covering of the window and then break in the wired glass. Mr. DeSerres believes that the intruders were entirely inexperienced as the front of the safe was literally torn to pieces after a number of holes had been bored by a hand drill.

CLEVELAND STONE CO. ACQUIRES GRINDING WHEEL CONCERN

The Cleveland Stone Co., Cleveland, Ohio, has now entered the field of artificial abrasives, having acquired a prominent grinding wheel concern. This addition to the grindstone department will be known as the abrasive department. H. W. Caldwell, vice-president, will have direct supervision and A. W. Curtis will be sales manager.

BASSICK MFG. CO. LOCATES IN BELLEVILLE

Belleville, Ont.—This city has been decided upon as the location of a plant for the Bassick Manufacturing Co., head office at Bridgeport, Conn., a prominent concern in the production of castors and furniture hardware. E. W. Bassick, president of the company, and Mr. Fesler arrived here and bought the plant of the Wood Manufacturing Company. The Bassick Manufacturing Company of Chicago, which has been the promoter and manufacturer of the Alemite products, established a small branch here a little over a year ago to try out the possibilities of manufacturing in Canada. The business has been most successful from the start, and this later enlargement has been the fruit of that experience. A charter was secured for the original company in Canada, known as Alemite Products, Ltd. This company will be merged into a new incorporation that will be known as the Bassick Alemite Company of Canada. The new company expects to manufacture here every line that is made in the Bassick plants in the United States.

MARITIME BOARD OF TRADE MEET

The Maritime Board of Trade will hold a meeting in St. John during the week of the exhibition. It is expected that there will be a very large attendance from all three provinces.

PILKINGTON BROS., LTD., APPOINT NEW MONTREAL MANAGER

H. R. Harrison has been appointed Montreal manager of Pilkington Bros., Ltd., and is taking up his new duties from August 1st. Mr. Harrison has been connected with the above company for the past twenty years and in this time has represented them both in Canada and England. When first coming to this country some years ago, he was appointed salesman travelling from Vancouver. Later he was transferred to the Montreal branch and remained here until he was sent to the Maritime Provinces to establish the Halifax warehouse in 1918. Following this he was recalled to England and remained there until his present appointment.

ONTARIO RETAIL HARDWARE ASSOCIATION IS INCORPORATED

Announcement is made by H. C. Nixon, Ontario Provincial Secretary, of the incorporation under The Ontario Companies Act, of the Ontario Retail Hardware Association, constituting George Edward May, John Caslor, Harry Noah Joy and David Spencer Griffin, hardware merchants of Toronto, and Wilmott Ferdinand Macpherson of Prescott, retired hardware merchant, and any others who may become subscribers to the agreement, a corporation to foster the interests of those engaged in the retail hardware and stove business; to reform abuses relative thereto; to secure freedom from unjust or unlawful exactions therein and to disseminate any and all information in respect to lines handled by any of its members; (b) To procure uniformity and certainty in the customs and usages of trade and commerce, particularly for those engaged in the retail hardware and stove business; to settle differences between members and to promote a more enlarged and friendly intercourse between business men engaged in the retail hardware and stove business; and to secure united action of all retail hardware and stove merchants in the Province of Ontario upon all matters relating to the trade, provided the same is not contrary to law, or to the purposes of the association; (c) To establish and extend more intimate acquaintance among members of the association; to exchange suggestions and ideas of business plans and methods; to promote and cultivate friendly relations with manufacturers and wholesale hardware merchants, and to give expression of views as an association on matters relating to the trade; and (d) Generally to do all and everything necessary, suitable and proper for the accomplishment of any of the purposes, or the attainment of any of the objects, or the furtherance of any of the powers hereinbefore set forth, either alone, or in association with other corporations, firms or individuals, and to do every other act or acts, thing or things incidental to or growing out of, or connected with the aforesaid purposes or powers or any part or parts thereof, provided the same be not inconsistent with the laws under which the corporation is organized or the laws of the Province of Ontario; with its head office at the said town of Prescott.

CANADA'S TRADE IN BINDER TWINE

There was a total of 38,566 tons of binder twine available for consumption in Canada in the year 1921. Of the above amount, 16,176 tons were manufactured in Canada and the remainder imported. The value of binder twine and rope manufactured in Canada during the year was $6,297,142, exports $1,194,475. Imports were valued at $7,372,691 and the total available for Canadian consumption was valued at $12,475,358.

BROADCASTING STATION WOULD HELP

Moncton, N. B.—Alderman Hutchinson of Moncton city council, is making a strong effort to induce the Marconi Company to erect the radio station which they are contemplating erecting in the Maritime Provinces, in Moncton. Alderman Hutchinson says that radio is here to stay and that a broadcasting station would be of great benefit to the city. The station is to be erected either in St. John or Moncton.

R. W. Pike, of the firm of Bromley & Hague, Ltd., Winnipeg, who has been confined to the house through illness, is rapidly recovering.

Retailers' Sectreary Compliments Quebec Merchants

Says Quebec Convention One of Best Ever Held —Indicative of the Co-operation given to Have Prominent Officials in Attendance — Intelligent Organization Work by Quebec Retailers

"IT WAS one of the best provincial conventions that has ever been held," said E. M. Trowern, secretary of the Dominion Board, Retail Merchants' Association of Canada, upon his return to Ottawa from the annual provincial convention in Quebec city.

Mr. Trowern was very enthusiastic about the success of the meeting. "It was certainly inspiring to the outside delegates to see the old Quebec city hall decorated with flags, bunting and flowers and to find the entire population doing their best to make the visitors feel right at home. The retail merchants as a body caught the spirit of the occasion and as a result no room was left for improvement in the general arrangements.

"The organization work of the R. M. A. in the province of Quebec is developing along sound and safe lines. The French mind may, in some things, move slower than their English confreres', but it moves with great accuracy and every step taken is reasoned thoroughly.

"They have applied these principles to their organization as is evidenced by the fact that for efficiency purposes they have divided the province into six districts with capable men in charge of each district, each of them having had extensive retail experience.

"I would like to offer a word of appreciation of the splendid efforts put forth by Mayor Samson to make the delegates feel as welcome as the flowers in May. Mr. Samson is a wholesale and retail hardware merchant and a right good fellow. He delivered the address of welcome, which was responded to by prominent merchants from all parts of the province. The convention was presided over by Alderman Sansregret, who is the chairman of the Montreal council. J. B. Savard, president of the Quebec branch, also took a prominent part in the proceedings and did his share towards creating a feeling of good fellowship among the delegates.

"It has long since been recognized that for hearty expression of appreciation and welcome, the old city of Quebec does not take a second place in Canada. From the opening to the close of the convention, the air was charged with a spirit of welcome. It was quite an inspiring sight to see sixty-seven automobiles lined up at the city hall to take the delegates around the ancient capital. Every automobile was decorated with flags and bore the words: Retail Merchants' Association. One of the outstanding figures in the procession around the city was the chief of police who was brilliantly garbed in his scarlet reception uniform with brass buttons.

"The general point of view taken by the delegates on the taxation question was that there were too many different systems. They considered the income tax was unfair inasmuch as some merchants were presenting correct returns, because they kept a proper set of books, whereas others were not giving their returns correctly, because their systems of book-keeping prevented them from doing so. They considered that any system of taxation which enabled people to be dishonest was wrong."

News of Western Canada

For Comment on Winnipeg Hardware Market Tendencies see "WEEKLY HARDWARE MARKET REPORTS."
For Current Prices see Winnipeg Section of "CURRENT HARDWARE QUOTATIONS" in this Issue.

Fruit Prospects Stimulate Buying in B. C.

Turnover of Hardware Well Up to The Average Despite Serious Forest Fires—Okanagan Crop Will be 85 Per Cent. of Bumper Crop of Last Year —Paint, Grindstones, Barbed Wire, Sash Cord, Nails and Bar Iron Advance.

VANCOUVER.—Coast merchants say that while they expect a slow-up in trade at this season, turnover is well up with the average. Building in this and surrounding districts is continuing strong and this has had a good effect upon sales of building hardware and interior furnishings.

The forest fires which have been the worst in many years are having an adverse effect upon sales of logging and machine tools, for operators have been forced to use every available man in fighting fires. The situation is gradually improving and some camps are again opening up, but there have been days in succession when the smoke has screened the mountains even across Burrard Inlet.

Country merchants in the Okanagan and boundary districts, have been ordering a little more freely this week, according to wholesalers, owing to the good prospects for fruit, which will be 85 per cent. of the bumper crop of last year, and increasing activity in mining. In the Cariboo, the same applies but along the Grand Trunk, a serious forest fire 120 miles in length has put a temporary quietus on trade with the coast.

Buyers' Week Postponed

At a meeting of firms interested in Buyers' Week, which was to have been staged during the week of the Vancouver Exhibition, it was decided to postpone this event until the week of the Associated Boards of Trade convention to be held here in February, the delay being occasioned by the fact that not all the firms desired, have been lined up.

Steamship lines operating out of this port are making a bold bid for the movement through Vancouver of the 10,000 ton order of rail steel placed a week ago with the Consolidated Steel Corporation of the United States for Manchuria. The new intercoastal rate on steel has dropped from 60 to 30 cents under the rate war tariff and local interests are of the opinion this trade can move through this port cheaper even than the direct haul through the Panama Canal.

Several list price changes have been named during the week. Grindstones are advanced twenty-five cents a hundred, and barbed wire is up ten cents a spool. Sash cord is up four cents a pound on coils and hanks alike. Wire nails show an advance of ten cents a keg to $5.20 f. o. b. Vancouver and Dominion bar iron is up 25 cents a hundred to $3.75.

In the lower list of adjustments are cold blast lanterns, 25 per cent., ten per cent. in builders' hardware, Wearever Aluminumware an average of twenty per cent., and manilla clotheslines.

Paint Prices Advanced

Owing to the increased cost of raw materials and the Sales Tax, a small advance has taken place in paints for the first time in several months. Porch, floor and house paints are up about ten cents a gallon while shingle stain and the cheaper grade of varnishes have been jumped five cents. High grade varnishes are ten cents higher. White lead has been boosted twenty-five cents to $1.05 in less than hundred pound lots and $15.05 by the ton. Turpentine is up thirty cents a gallon to $2.50 per gallon by the barrel.

THOS. DAVIDSON MFG. CO. OPEN OFFICE IN VANCOUVER

The Thos. Davidson Mfg. Co., Ltd., head office Montreal, have opened a new branch warehouse at 123 Powell St., Vancouver, B. C., under the personal direction of S. H. Carpenter, a hardwareman. A full general line of products comprising enamelled ware, tinware, japanned ware, sheet iron goods, range boilers, anvils, stoves, etc., will be kept in stock.

BIG PLANT PLANNED BY COAST PROVINCE

VICTORIA, B. C.—Legislation for the establishment of iron and steel works in British Columbia will be put through at the next session of the Legislature. The announcement was made following a Cabinet meeting to representatives of the Coast Range Steel Company, a $15,000,000 corporation organized a year ago under H. J. Landahl.

According to the announcement, the Provincial Government will unite with the Imperial and Canadian Governments and guarantee as its share bonds not to exceed $4,000,000. Under plans which have been discussed by the steel people with the British Columbia Government and the Facilities Committee of the Imperial Board of Trade, the total investment in the plant will run to $12,000,000 for the production ultimately of $120,000 tons of finished steel.

WESTERN CANADA NOTES

John Ashton, hardware, Zealandia, Sask., suffered fire loss.

D. McIver, sales manger of The G. F. Stephens & Co., Ltd., Winnipeg, has returned from his vacation at Minaki.

S. H. Whyte of the S. H. Whyte Manufacturing Co., Winnipeg, who has been on a business trip to eastern cities has returned.

Harry C. Martin, of Martin, Finlayson and Mather, Vancouver, an enthusiastic golfer headed the field in the qualifying round in the annual golf tournament of the Terminal City Clubplayed over the Burquitlam course. There were fifty players. Mr. Martin's score was 82 which with a handicap of 18 made his net 64.

T. E. Pooley of the Vickers firm in England is still on the coast looking into the advisability of the construction of a plant on the coast for the big engineering firm. He has been making an exhaustive study of iron and steel possibilities and when in Victoria, interviewed members of the provincial government. He stated that the iron was here and that a market existed—it was only a matter of cheapness of production.

ANNUAL PICNIC OF ASHDOWN HARDWARE STAFF

Winnipeg.—The annual picnic of employees of the J. H. Ashdown Hardware Co., both wholesale and retail departments, was held to Selkirk Park on Saturday last. There were many contests including races for boys and girls, single ladies and men's races, three-legged race, walking race for old timers, fat men's race, ladies thread and needle race, potato race, biscuit race, and a tug-of-war between the retail and wholesale departments with ten on each side. A football game also attracted much interest. Many lovely prizes were donated to the winners and all returned to the city tired after a big day's enjoyment.

Little Summer Hardware To Be Carried Over in Alberta

Seasonable Weather Has Moved Out Retailer's Stocks of Summer Lines—Active Building Insures Continued Trade in Building Hardware—Farmers Will Require Much Hardware.

CALGARY, Alta.—A week of hot weather has brought a brisk demand for hot weather goods, and stocks of screen doors, windows, wire cloth, refrigerators and lawn mowers have moved quite freely. Stocks are easy now and very little of above lines will be carried over. Gardens are now showing the result of care and the demand for the numerous small lines needed by the amateur gardener has helped round out the daily sales.

The preserving and canning season is in full swing and window displays and advertising this week feature the needs the season develops. One very effective down town window attracted noticeable attention, and was a splendid example of how goods ordinarily considered commonplace and unattractive can be made to appeal at just the right time. Jobbers report good conservative repeat business on all small kitchen hardware.

Good Trade in Camping Supplies

The increasing popularity of week-end automobile camping trips has developed a new outlet for camping supplies, and this business naturally drifts to the hardware store. All sorts of ingenious space-saving furniture and outfits generally, are shown, and the out-of-doors man is much interested in any new goods displayed. Those who anticipated this business have found it a profitable addition to their sporting-goods departments, and a drawing card for the many tourists who come in from the south.

Building permits for July will total $275,000, a big increase over July of last year, and an indication that the present movement in builders' hardware will be sustained.

The Crop in Alberta

Latest crop reports fully justify optimistic estimates of the yield for southern Alberta. Government, railroad, and bank reports indicate the largest yield since 1915. Hail losses have been very slight, and the danger period from this cause is now behind us. Business generally shows little evidence that the farmer is cashing in on the prospect, but the needs are there and merchants are preparing for a run on all sorts of crop requirements.

The coal strike which began April 1st is still unsettled, and has had its effect on business in the mining centres of southern Alberta and in a degree throughout the province. Recent developments seem to show some hope of an early settlement. The coal fields of this province are called upon for a large percentage of the coal required for the three prairie provinces, and an early settlement is essential to avoid a shortage and consequent suffering. There is an air of general expectancy that another week will see a return to work on the part of the miners pending a settlement along certain defined lines.

An examination of the price changes for the week seems to show an upward tendency on the heavier lines sold on the tonnage basis, while easier prices are reported on lines of a more expensive nature. After a sharp advance of 8 cents a gallon last week, linseed oil shows two declines this week totaling 10 cents and present quotations are 1.27 for raw and 1.30 for boiled.

Advance in Nails

An advance of 25 cents per keg is recorded on cut nails. This is of interest only as it indicates market tendencies on similar lines.

Bar iron and mild steel show an advance of 10 cents. Current prices are as follows:

Rounds and Squares, 3/16, ¼, 5/16, 6.15 base.

Rounds and Squares, ⅜ to 2 in. and Flats up to and including 1 x 4, 5.10 base.

Rounds and Squares over 2 in. up to and including 2¾ in. and Flats over 1 x 4 up to 6 in. wide, 5.55 base.

Rounds and Squares over 2¾ up to 6 in. 5.85 base.

Band Iron or Steel, 5.60 base.

Sleigh Shoe Steel, 6.35 base.

Sport Goods Reduced

New price levels are noted on Hillerich and Bradsby base ball bats. Louisville slugger autograph series are now quoted at 21.60 per dozen, a reduction from 28.80.

(Continued on page 36)

New Freight Rates Affect Binder Twine And Ammunition on Shipments to the West

Minimum Weight of Carload Lots Increased With Slight Reduction in Freight Tariffs — Changes Made in Time For Fall Trade

RECENT changes in the tariffs on shipments of binder twine and ammunition to the west, supply an interesting factor in the movement of these products at this season. The minimum weight of carload lots of binder twine has been increased from 30,000 lbs. to 50,000 pounds, this revision applying from various eastern points including Montreal, Brantford, Toronto and Quebec to western distributing centres such as Fort William, Port Arthur and westward. By this means a reduction in the shipping rate is secured to Fort William, the tariff now being 25 cents, whereas the charge was previously 35 cents.

Cordage Manufacturer Speaks

An eastern cordage manufacturer stated to Hardware and Metal that they had been negotiating with the railways on the question of rates for some time past, and it was thought that the decisions made in this respect would materially assist the trade at this season. Although no change has been made in the rates to points further west than Fort William, it was stated that large quantities of binder twine are shipped to western Canada, trading of this nature being exceptionally brisk now and during the following weeks. The amount of binder twine needed by western farmers is calculated to be away in advance of the quantities consumed last year, as the crop outlook is decidedly better and preparations are being made accordingly. Carloads previously shipped have always been in excess of the 30,000 lb. minimum, and it was stated that the equalization in rates would enable western distributors to maintain the lower price levels on twine announced earlier in the year.

A similar situation is evident with regard to ammunition, the decision in this respect also coming into effect in time for the fall trade. A reduced rate of 1.12½ on metallic and paper cartridges in carload lots has been decided upon and manufacturers state that the change in this direction would no doubt be welcomed by the jobbers throughout western Canada. However, it was also pointed out that before the concession of this nature was made by the transportation interests, the minimum in carload lots was increased from 24,000 lbs. to 30,000 pounds. The opinion was expressed, however, that these changes would have very little effect upon the individual purchase of ammunition owing to the large number of rounds in 100 lbs. The difference would be chiefly to wholesalers, although shipments to distributors in the west usually consisted of well over 30,000 lbs. It was also stated that the new arrangements were considered more or less of a temporary nature, as no definite information was forthcoming as to the length of time the revised tariffs would be applicable.

Both binder twine and ammunition manufacturers expressed the opinion that increasing the minimum carload lots in order to secure the benefit of slightly lower rates would not effect the prices on the individual purchases, the new arrangements for the coming season merely enabling jobbers to maintain the reduced quotations recently in effect.

Annual Convention Dominion Board R.M.A.

Resolutions Concerning Sales Tax Act Passed—Recommend Abolishing of Stamp Tax on Receipts And Bank Checks And Advance in Sales Tax to Cover This.

HALIFAX, N. S.——The seventeenth annual convention of the Dominion Board, Retail Merchants' Association of Canada, was held from Tuesday till Saturday of this week. Officials present included E. M. Trowern, Dominion secretary, W. J. McCully, Stratford, president Ontario board, Wilfred Hodgins, London, Ont., T. A. Sharp, Midland, Ont., W. A. Ziemann, Preston, Ont., D. W. Clark, Toronto, treasurer Ontario board and W. C. Miller, secretary Ontario board. Resolutions concerning the Sales Tax act and new stamp tax, passed by the convention read in part as follows:

"That having heard an explanation of the operations of the present Sales Tax Act presented to this meeting, we are of the opinion that the present Act has been drafted in such a muddled and confused manner that it can never be made operative and satisfactory to the retail trade in its present form, and we request the incoming Dominion executive council to ask the government that the Act be redrafted and placed in such language that it can be understood by ourselves and by our customers, who are the general public.

"We recommend that the stamp tax on receipts and bank checks be abolished, and if necessary to produce the revenue required by the government that the sales tax be increased to cover this amount."

A resolution was passed opposing the establishment of an eight-hour day. Another resolution charged that a large number of co-operative societies, co-operative farmers' associations, and chain stores had been endeavoring to secure custom by false representation of the manner in which they conducted their business, and instructed the incoming Dominion executive council to prosecute, if necessary, firms whose advertisements were false and misleading.

LITTLE SUMMER HARDWARE TO BE CARRIED OVER IN ALBERTA

(Continued from page 35)

New lists on tire chains are issued, showing a slight decline in the list with a discount of 25 per cent. for 1 to 10 pair and 30 per cent. for orders of 11 pairs or over plus 20 cents per pair for sizes up to 34 x 4, and 25 cents per pair for sizes over 34 x 4. This represents a slight decrease up to 10 pair, with the price for over 10 pair averaging about same as previous quotations.

Substantial reduction are in effect on buck saws. Happy medium are now 13.80, Lance 16.50, and Prince Rupert 18.50, with corresponding reductions on bucksaw blades.

Holstein cow bells are quoted about 17½ per cent under prices of last week. Present prices, 0, $10.50 1, $8.50 2, $7.00; 3, $5.35; 4, $4.55; 5, $4.12; 6, $3.40 per dozen.

Peter Wright anvils and vises are 10 to 15 per cent. lower. Latest quotations being: anvils 60-69 .27, 70-79 .25½, 80 and over, .23, vises up to 40 lbs., 14.-90 each, 45 lbs. and over .31 per lb.

SUMMER CLEARANCE SALE

(Continued from page 29)

Clearance Sale, was to group such lines on special tables and racks near the door, each bearing a distinctive ticket printed in yellow on which were the words "Summer Clearance Sale" and the price. Bands of yellow paper were wound around pillars and pennants of yellow with the words "Summer Clearance Sale" were hung close together on lines strung across the store from the top of the wall cases. These lines were about two feet apart and were strung throughout the depth of the store giving a novel appearance and denoting a special occasion.

The windows were, of course, dressed with samples of the various lines on sale and a suitable window card pointing out the reason for the sale and drawing attention to the bargains offered those looking for end-of-the-season specials. The lines shown on the sale corresponded with those dealt with in the advertising. In each case where such a sale has been put on, it has met with splendid success, a large volume of business being done, and many regular lines being sold to bargain seekers. There is also a big advertising advantage in getting the crowds coming to your store.

A More Extensive Market Service For Hardware And Metal Readers

THE executive officials of large industries who direct the operations of plants involving the employment of hundreds of individuals and hundreds of thousands of dollars of capital—those who do business in a big way and whose slightest error of judgment might cause the loss of much money—invariably seek the utmost information concerning factors which are likely to affect their business one way or another.

Such men find that they must look at conditions on a broad scale and take care not to become confined in their outlook. The same thing applies to retail hardware merchants.

For many years the market service given each week in Hardware and Metal has given hardware merchants valuable information. From time to time as necessity arose this service has been extended. Now a further extension has been made which puts the market service on a strictly national basis with every section of the country represented.

Commencing with the

Annual Fall Number August 19,

market letters from Calgary, Alta., and St. John, N.B., appear, supplementing market reports regularly appearing from Vancouver, Winnipeg, London, Hamilton, Toronto, Montreal and Pittsburg.

This NATIONAL SERVICE will enable Hardware and Metal readers to intelligently size up the probable trend of developments affecting their lines by the details given in these reports of doings in other parts of the country.

You Will Benefit by Taking Advantage of This Unique Market Service Appearing in Each Issue Commencing With August 19.

New Hardware Goods

Offered to Canadian Hardwaremen

WAKYTE BUSTER CAR

The Wakyte buster car is an improved product of the S. H. Whyte Manufacturing Co., Ltd., Winnipeg. In describing this new line the manufacturers state that it is equipped with three pressed steel disc wheels, these having the added feature of rubber tires. The body of the Wakyte buster car is finished in canary yellow enamel, and the wheels in vermillion enamel. It is made in two types, No.'s 100 and 111. Each are identical as to size and are packed three to a crate.

WATSON FRONT SIGHT

Several distinct features are claimed for the Watson front sight No. 6, made by the Watson Gun Sight Co., 384 Victoria St., Toronto. These products are supplied in four sizes of beads, from 1/16 in. to 1/8 inch. They are also made with either gold, silver or white enamel beads. Each sight has a dead-black finish, which is claimed to prevent reflection in strong sunlight. The gold used is pure 24k. with two per cent. of platinum added, which is said to give Watson sights a lustre that is seen in the most trying light. The silver bead is composed of pure silver. The white enamel tip sights will remain white and not turn yellow after coming into contact with oil or weather conditions, according to the manufacturers. It is pointed out that they can be compared with ivory, bone or other white tip sights. The entire surface of the beads is flat, which it is claimed gives true outline and uniform reflection in all kinds of light.

VIKO WINDOW TRIM

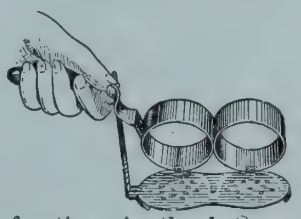
In order to assist dealers to arrange strong roaster displays for the Thanksgiving and Christmas seasons, the Aluminum Goods Manufacturing Co., Manitowoc, Wisc., are offering through their jobbers a special three-piece Viko roaster window trim.

This trim is printed in orange and black. Its main banner measures 39 in. x 9½ in. and the two side panels both measure 39 in. x 7½ in. By using this sepcial trim in connection with roasters, the manufacturers state it makes a powerful and attractive window display which should prove effective in selling the consumer.

These products will be nationally advertised early in the season by the makers and the window display is designed to complete the link in the chain. Further particulars regarding Viko products and the roaster trim can be obtained from the jobbers, or direct.

MAGUIRE EGG POACHER

The Maguire egg poacher is the product of the Aluminum Specialty Co., of Canada Ltd., 61 John St., Toronto. This utensil is described as a practical, handy, economical poacher, a popular kitchen product in the home, restaurant, club, hospital or camp. They are made of high quality aluminum, and by a simple method of operation, the poached egg can be served firm and round. A slight pressure of the thumb lifts the cups and releases the eggs. Another feature pointed out by the makers is the fact that the water is allowed to drain off through the raising of the rings and



the perforations in the bottom. The manufacturers state that no spoons are necessary, no portion of the egg or eggs is lost, and the fact that the Maguire poacher is made of aluminum enables the eggs to be kept warm until served, as this metal retains heat.

NEW RADIAL ARM DRILL

The Van Dorn Electric Tool Co., Cleveland, Ohio, has introduced a radial arm drill, to be attached to the wall or column for performing various work of a heavier stationary nature where great rigidity and accuracy may be required. It is called the Millwright Special, and the makers claim is strongly built, encased in an aluminum housing and also arranged for quick dissembling.

The motor is of the universal type, for either A. C., or D. C., circuits. A special drill chuck permits the use of drills up to ⅝ inch diameter, for drilling holes in iron or steel, while much larger wood bits can also be used. Two large pivot brackets bolted to the wall or column support the entire arm. At the opposite end of the main arm casting is a second pivoted joint on which the short fore-arm swings. The outer bearings of the fore-arm, form a support and guide for the drill bracket column.

END LOCK STOVE PIPE

In the description of the end lock stove pipe, which appeared in last week's issue of Hardware and Metal, the name of the manufacturer was incorrectly spelled. This should have been as follows: The Sheet Metal Products Co., of Canada Ltd., River Street, Toronto.

NEW LINE OF SCALES

Geo. Brousseau, Limited, Quebec, announce that they are now manufacturing a complete line of platform, Champion and household scales, and are now offering same to the trade. All scales have the required government stamping and are fully guaranteed. Detailed information and catalogs furnished upon request.

TRADES ACCOUNTING SYSTEM

A system of accounting, designed especially for merchants, has been prepared by the Trade and Accounting Associates C. P. R. building, Toronto. For a nominal monthly charge a balance sheets and profit and loss statement, as well as the regular book-keeping routine, are handled under the Simplex system, with the co-operation of the merchant to the extent of furnishing daily statements of cash received and similar items on a weekly report form. Under this service, the Trades Accounting Associates, also prepare the merchants income tax return, and point out that under the installation of the Simplex system, the tradesman has the advantage of proper accounting methods, without operating any books.

B. & S THICKNESS GAUGE

The new Brown & Sharpe Thickness Gauge, No. 646, affords a relatively inexpensive precision tool of this type, which it is claimed, fills an important need. It contains six blades: .0015, in., .002 in., .003 in., .004 in., .006 in., and .015 in. in thickness, which can be used together or singly and give a variety of measurements up to .0315 in. These sizes have been selected by the makers as ones most frequently used, and to give a complete range of measurement. These blades are not rolled to size, but are ground to the correct thicknesses.

The gauge has been designed with an eyelet in one end so that it can be carried on a ring or hung up. It is especially useful to the motor mechanic and to automobile drivers, for it answers the requirements in many places around a car:—for setting valve tappets, distributor headpoints, spark plug gaps, fitting pistons, and determining the size of shims for joints or par where there is play or looseness. The manufacturers state there is a broad range of use for this gauge. This new tool is described in detail, in an attractive pamphlet issued by the manufacturers.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

KLYMAX WASHING MACHINE

Ontario Retail Hardware Association, of Prescott, Ont.—Please advise the name of the makers of the Klymax vacuum electric washing machine.

Answer:—The Slade Mfg. Co., Owen Sound, Ont.

CEMENT WORKERS' TOOLS

The Bernier Hardware Co., Montreal—We would like to know if cement workers' tools are made in Canada. If so, who makes them?

Answer:—The Abram Cement Tool Co., Windsor, Ont.; The Cummings Brass, Iron & Wire Co., Winnipeg, Man.; The London Concrete Machinery Co., Ltd., London, Ont.; Wettlaufer Bros., Spadina Ave., Toronto, Ont.

THE HOOVER POTATO DIGGER

Messrs. S. E. Eakins, Millbrook, Ont.—Who are the manufacturers of the Hoover potato digger?

Answer:—The Hoover Mfg. Co., of Avery, Ohio; The John Deere Mfg. Co., of Welland, Ont., are the Canadian representatives.

VIKO ALUMINUM WARE

Peart Bros. Hardware Co., Ltd., Regina, Sask.—Would you advise us the manufacturers of Viko aluminum ware?

Answer:—The Aluminum Goods Mfg. Co., Manitowoc, Wis.

TOBOGGANS

McKinley & Northwood, Ltd., Ottawa, Ont.—Kindly advise us who are the makers of toboggans.

Answer:—J. H. Gignac, Ltd., Quebec, Que.; A. L. Telfer, Montreal, Que.; The Northland Ski Mfg. Co., St. Paul, Minn.; J. E. Beauchamp & Co., Craig St. W., Montreal, Que.; Walter Dean Canoe & Boat Co., Toronto; The Peterborough Canoe Co., Ltd., Peterboro, Ont.; J. B. Laliberte, Quebec, Que.; Henry Ross, Indian Lorette, Que.

CROQUET SETS

The Montreal Supply Co., Ltd., Montreal—Could you supply us the name of the manufacturer of croquet sets.

Answer:—The Henry Wise Woodenware Co., Palmerston, Ont.

CLARK JEWEL OIL STOVE

Chas. W. Mullett, hardware merchant, Bancroft, Ont.—Can you inform me where I can procure repair parts for Clark's Jewel oil stove?

Answer:—The G. M. Clark & Co., Chicago, Illinois; The Happy Thought Foundry Co., Ltd., Brantford, Ont., have these in stock and can furnish repair parts.

THERMOSTATIC REGULATORS

Messrs. J. B. MacKenzie, Georgetown, Ont.—Could you supply me with the name of a firm who manufactures thermostatic regulators for incubator use?

Answer:—The Taylor Instrument Company, 110 Church St., Toronto, Ont.

RAPID POTATO MASHER

M. R. Seed, jobbers and manufacturers' representative, Aylmer, Ont.—Kindly advise as to who manufactures the Rapid potato masher and beater.

Answer:—Messrs. Browne & Dowd Mfg. Co., Meriden, Conn.

EXTENSION POLES

Jos. E. Lemieux, 11 Rue St. Pierre St., Quebec City.—Will you kindly give me the name of a firm making extension poles and trimmings?

Answer:—The Newell Mfg. Co., Prescott, Ont.; Geo. H. Hees Mfg. Co. Ltd., Toronto, Ont.

CARRIAGE WOODWORK

Messrs. Lang, Morden & Weber, of Laird, Sask.—Kindly advise us the name of a manufacturer in Ontario of carriage woodwork.

Answer:—The Victoria Wheel Works, Galt, Ont.

ELECTRIC FLOOR SCRAPER

The Cochrane Hardware Limited, Sudbury, Ont.—Will you please put us in touch with a manufacturer of an electric floor scraper?

Answer:—The Hurley Machine Co., 413 Yonge St., Toronto, Ont.

ROYAL GASOLINE SAD IRON

W. Marchand St. Barbe Co., Huntingdon, Quebec—Could you tell me the name and address of the manufacturer of the Royal gasoline sad iron?

Answer:—The Royal Self Heating Iron Co., 556 Wayne St., Big Prairie, Ohio, U. S.A.

SHOW CARD WRITING

The Smith Hardware Co., Belleville, Ont.—Could you advise where we can procure a book on show card writing and lettering?

Answer:—We discontinued the technical book department of our paper some time ago. There is a book called, Modern Show Card Lettering, published by the Thompson School of Lettering, Pontiac, Mich.

CHEMICAL CLOSETS

The Aikenhead Hardware Co. Ltd., Toronto—Can you advise us who makes sanitary chemical closets?

Answer:—S. H. White Co., Winnipeg; Jas. Morrison Mfg. Co. Ltd., Toronto; Steel Trough & Machine Co., Tweed, Ont.

Trade Enquiries

Names and addresses of enquiries can be obtained only by those interested in such lines upon application to Department of Trade and Commerce, Ottawa, Canada. Please quote reference number when requiring addresses.

3731. **General hardware.**—A Manchester firm are always open to consider offers of general ironmongery goods, enamelled ware, brushes, cutlery, fancy goods and toys.

3732. **Metals hardware and sundries.**—A London firm buying goods on commission for clients in India, the Far East, and Australasia, are anxious to receive particulars from Canadian manufacturers and exporters of metals, hardware and laundry lines suitable for the above markets, since they are desirous of dealing to a larger extent in Canadian goods.

3736. **Scrap metals.**—A Manchester firm are in a position to consider offers of scrap metals, particularly copper and brass.

3736. **Steel.**—A firm in London ask to be put into touch with Canadian manufacturers of steel billets, bars and slabs, not already represented in the United Kingdom.

3675. **Hardware, household utensils.**—A Johannesburg firm of manufacturers' agents, covering all centres of the Union, wish to get in touch with Canadian manufacturers of hardware, household and general.

3678. **Nails, screws, bolts, nuts, rivets, etc.**—A South African firm of manufacturers' agents are prepared to take up the representation for the Union and Rhodesia of any firm manufacturing for export the above lines.

3680. **Wheelbarrows (steel).**—A Johannesburg firm handling truck and other agencies are prepared to take up, for the Union of South Africa, the representation of a Canadian-made all-steel tubular wheelbarrow.

3737. **Hot rolled steel strip.**—A London firm exporting hot rolled steel strip to a special specification are anxious to know of any Canadian firms in a positon to supply the material in question. Specifications on application to the Department of Trade and Commerce, Ottawa, Canada.

3738. **Aluminium and aluminium ware.** — A Spanish merchant firm ask to be put into touch with Canadian manufacturers of aluminium and aluminium goods seeking business in Spain.

4425. **Iron and steel—A Birmingham firm** are open for quotations on bright mild steel strip, 16 and 18 WG by about 4 inches; bright mild steel rods, 11/22 inches long straight length; also pure nickel. They also import iron rod, wire and strip.

Twenty Years Ago

Following items are reproduced from Hardware and Metal of July 19 and 26, 1902.

There is a tradition that when the annual excursion of The Gurney Foundry Co., Ltd., is held the fates always smile upon it. Good weather is commonly known as "Gurney weather" around the establishment. On July 11 the company's annual excursion was held to Niagara Falls and the steamer Garden City had nearly 700 people on board. Edward Gurney took a fatherly interest in everybody and he had able lieutenants in his son Cromwell Gurney and T. B. Alcock, secretary of the company.

Thomas Marshall, of Congdon & Marshall, Dunnville, Ont., was in Montreal this week and spent several days visiting his friends among the wholesale trade. He was much struck with the establishment of E. Cavanaugh & Co., Notre Dame St., one of the best equipped hardware stores in the country.

The McClary Mfg. Co., London, have purchased in that city the whole block of land enclosed by William, Nelson and Adelaide Sts., and the river and a large parcel of land east of Adelaide. They will construct a series of buildings wherein something like 400 men will be employed.

The paint factory established in a building on Wellington St., Montreal, by Henderson & Potts, proprietors of The Nova Scotia Paint Works, was destroyed by fire on Friday morning, July 11, to the extent of $25,000 fully covered by insurance.

The Canada Hardware Co. have been appointed agents for the Jewel mixed paints manufactured by Wadsworth Howland & Co., Chicago.

D. Moore Co., Ltd., Hamilton, have made further extensive warehouse additions to their plant to facilitate the handling of increased output.

E. S. Hunt, of The Hoyt Metal Co., of St. Louis, Mo., is in Toronto making arrangements for the erection of a factory.

The by-law to give W. J. Copp and Harold E. Copp, of Hamilton, $15,000 to locate a stove, range and foundry works in Ft. William, was carried.

Wm. Vallance, of Wood, Vallance & Co., Hamilton, Ont., has left for the Old Country on a business trip.

Weekly Hardware Market Reports

Statements from Buying Centres

Markets at a Glance

HARDWARE prices continue to fluctuate in both directions. Current reductions appear on coal oil, certain makes of roofings, tin plates, welding compound, tinned spoons and forks, roller skates for fall trade, and small brass butts. Higher quotations are in effect on soil pipe and fittings,—the development having been more or less anticipated owing to the rising cost of production —while cotton gloves, cotton mason's lines, linseed oil, and ingot copper, tin, lead and spelter, are other commodities registering advanced levels. Prices on lead sheets have generally firmed up one half cent per pound owing to strength of virgin metals. Some revision is looked for in the near future on Lufkin tapes and measures.

The raw cotton market continues to fluctuate and following a sharp advance, current prices are again easier. This upward trend has reflected a firmer tone in manufactured cotton products and while minor changes are recorded in prices on finished goods, the future tone shows additional strength based on the estimated season's crop report.

A more settled feeling is evident in wire nails on eastern centres, while other sources report a scarcity of cut nails with factories several weeks behind in delivery A brisk call is still being experienced for these goods and there has been a heavier season owing to the requirements of the building trades. Construction activity reflects on many hardware lines including builders' hardware, tools, cement, eavestrough, conductor pipe, metal lath, corrugated sheets, soil pipe and similar goods. A steady call has been evident throughout the current season, with an active period still ahead.

Galvanized sheets are still on a very firm basis, while the steel industry is feeling the greater pressure of strike conditions in primary centres. It is expected that bar iron quotations will likely firm up to higher levels under the existing pressure, the trend of prices still being in an upward direction. The steel industry is awaiting the developments in strike conditions, but meanwhile continues to function in spite of these handicaps. A new impulse is needed to awaken interest during the quiet summer period, chief interest at present attaching to when a settlement of coal and rail labor troubles will be effected.

Current business is described as good, with bookings for fall coming along nicely. Judging from present buying on the part of retailers, it is estimated that large stocks are the exception. The carry over of summer goods will be unusually small, many merchants clearing out these lines through the medium of special sales. Jobbers also report that the size of orders being placed by dealers is gradually increasing.

Montreal Markets

MONTREAL, August 10—The current hardware markets are again featured with price revisions, both in an upward and downward direction. One of the outstanding changes is an advance in quotations on both soil and pipe fittings. Through a revision in discounts these products show price increases of varying extent according to sizes. Also attracting attention is the latest development in the local wire nail market when the base price is increased twenty-five cents over the level reached during the recent period of price-shading, although the new price is fifteen cents lower than quotation ruling a few weeks ago. A firmer tendency is again evident in the raw cotton markets and although up to the present only cotton gloves and certain kinds of mason's lines are affected through a price increase, other products such as cotton rope, sash cord, etc., are reported with a much firmer undertone. Lead sheet quotations are advanced one-half cent per pound. Reductions are made in prices of tin plate in full boxes. Small brass butts are also reduced in price. The strike situation still plays an important part in the steel industry and both the sheet markets and bar product prices are very firm at existing levels.

WIRE NAILS NOW $3.50 BASE, F. O. B. MONTREAL

Montreal.

Following the recent unsettlement in the wire nail market, a new quotation of $3.50 base, f. o. b. Montreal, is given by local jobbing houses. Although this price is lower than quotation ruling some few weeks ago, it is twenty-five cents in advance of the level reached during the unsettled period.

ADVANCED QUOTATIONS ON SOIL PIPE AND FITTINGS

Montreal.

Advanced quotations are recorded on both soil pipe and fittings, the extent of the increase varying on the different sizes. Two, three, four, five and six inch pipe is now quoted at less 35 per cent., and eight inch pipe at net prices. Two to six inch fittings are now less 45 per cent. while the eight inch fittings are also net.

In announcing this revision manufacturers state that in line with other iron and steel products production costs have increased, the recent higher levels on pig iron being one of the chief factors. While the market tendency on these products has been upward for some time past, no definite decision to increase prices was reached until the coal situation attained a more serious stage. Trade in both pipe and fittings is described as very satisfactory for this season of the year, and following are the revised quotations:

SOIL PIPE—	
2 and 3 inch	35%
4 inch	35%
5 and 6 inch	35%
8 inch	net
Fittings—	
2 and 6 inch	45%
8 inch	net

MINOR REDUCTION IN TIN PLATE PRICES

Montreal.

A slight revision is made in tin-plate quotations, full boxes being reduced fifty cents per box. Recent shipments of this product have been received from overseas and importers state that the present change is merely an adjustment of prices as the undertone of the market is quite firm. With regard to imports of tin-plate from the United States a local distributor states that in all probability a much firmer tendency will be in evidence during the fall months unless an early settlement is reached in the coal strike. It was pointed out that much of this product will be required by can manufacturers for the pack of fruit and vegetables and for this reason tin-plate would be placed on the priority list. Mills would be forced to ship almost any sized sheets for this business as present stocks are low with little hope of further production. Following are prevailing prices:

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	12 50
20 x 28 IC, 112s	13 00
20 x 28 IX, 112s	15 00
20 x 28 IXX, 56s	9 00
20 x 28 IXXX, 56s	9 75
TERNE PLATE—	
20 x 28 IC, 112s	14 00
CANADA PLATE—	
Half bright 52s	5 00
Half bright 60s	5 10
Blued, 52s	5 25
Blued 60s	5 35
Welsh, polished, 52s	7 00
Welsh, polished, 60s	7 25
Galvanized, 52s	7 25
Galvanized, 60s	7 75

TROUGH AND PIPE STILL ON ACTIVE MOVEMENT

Montreal.

A fairly active movement and the continued firmer tendency in flat galvanized sheets still contribute a strong undertone in eavestrough and conductor pipe. Although at this season of the year sales usually show a slackening, especially in rural districts, when the harvesting season is in full swing, business in these products this year has been well maintained. Quotations are firm at the following discounts:

EAVESTROUGH:

O. G. round and half round, per 100 ft. 8 in., $16.90; 10 in., $18.70; 12 in., $22.20; 15 in., $29.80; 18 in,, $37.80.

O.G. Square bead, per 100 ft.: 8 in., $15.90; 10 in., $17.70; 12 in., $21.20; 15 in., $28.80; 18 in., $36.80.

Discount 70|10 per cent.

Conductor Pipe, Round, Plain and Corrugated, per 100 ft.; 2 in., $18.40; 3 in., $22.30; 4 in. $29.60; 5 in., $40.00; 6 in. $49.00.

Discount 70|10 per cent.

CONDUCTOR ELBOWS—

Plain or corrugated, price per doz.
2 in., $5.25; 3 in., $6.00; 4 in., $10.50; 5 in., $24.00; 6 in, $29.00.

Discount 60 per cent.

LEAD SHEETS HALF CENT PER POUND HIGHER

Montreal.

The continued stronger tendency in metals on the primary markets still reflects on lead and zinc products, and lead sheets have firmed in price, all weights being one-half cent per pound higher. Other lines such as traps and bends, lead pipe and solders are unchanged but if the stronger tendency continues in primary circles, higher prices on other lines of finished products would not be surprising. Revised quotations are as follows:

LEAD AND ZINC PRODUCTS—

Lead pipe, per 100 lbs., up to 2″	13 00
Do., 2″ to 8″	14 00
Do., 8″ and over	15 00
Lead waste, per 100 lbs.	14 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs. sq. ft., lb.	0 10½
Lead sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¼
Do., 4 to 8 lbs. sq. ft., lb.	0 9½

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 24½
Do., commercial, lb.	0 21½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11
Do., broken lots	0 11½

HIGHER PRICES RECORDED ON COTTON GLOVES

Montreal.

An increase of from 5 to 10 per cent. is announced on quotations on the various lines of cotton gloves. The no-wrist style is now quoted at $1.20 per dozen, and the knitted wrist at $1.80 per dozen.

MINOR REDUCTION IN SMALL BRASS BUTT QUOTATIONS

Montreal.

Quotations on small brass butts, narrow, medium and broad, are revised and are reduced approximately 5 per cent.

CONSTRUCTION DEMANDS QUANTITY OF METAL LATH

Montreal.

Metal lath continues to sell well, activities in building construction demanding supplies. Trade in this product has been good during the spring and early summer months and with prospects of an active building program during the remainder of the summer, business is expected to reach very favorable proportions before the close of the year. Prices are unchanged at the following levels:

METAL LATH—	
Painted—	per sq. yd.
26 gauge	23c.
24 gauge	28c.
23 gauge	32c.
Galvanized, 10c. per sq. yd. extra.	

GALVANIZED SHEETS STILL ON VERY FIRM BASIS

Montreal.

Notwithstanding the English market is still supplying fair quantities of sheets, particularly galvanized, to this centre, distributors are very much concerned over recent developments in the United States coal strike and production difficulties. Dealing with the situation one local importer stated this week that from present indications there was little or no hope of securing even fair supplies of galvanized sheets from this source for the fall trade. An active demand is usually experienced for galvanized sheets in the following months as a good amount of repair work is done not only in the larger centres but in rural districts. This informant had just returned from an extensive trip through producing centres in the South where mills advise that deliveries in future will experience a further delay. Importations from England are now meeting the situation quite satisfactorily but it is pointed out that the present season is usually not as active as at a little later date and it remains to be seen whether the overseas market can supply when a heavier demand is felt. The local market may receive ample shipments, but it is considered very doubtful whether points farther west can be taken care of. Present prices are firm at the following levels:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 00	7 50
26 gauge	6 75	7 25
24 gauge	6 15	6 65
22 gauge	5 80	6 30
18—20 gauge	5 10	5 60
Other Brands—		
10¾ oz.	6 75	7 25
28 U. S. gauge	6 35	6 85
26 U. S. gauge	6 05	6 55
24 gauge	5 90	6 40
22 gauge	5 90	6 40
18—20 gauge	5 75	6 25
16 gauge	5 60	6 10

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

SLIGHTLY HIGHER PRICES ON COTTON MASONS' LINES

Montreal.

Increased prices are announced on masons' lines, both in balls and hanks. The former records the greater advance and both No. 27 and No. 45 are now quoted at 61 cents per lb. Lines in hanks only show a minor change of approximately three per cent.

STEEL INDUSTRY FEELS PRESSURE OF COAL STRIKE

Montreal.

Current quotations on bar iron and steel products remain unchanged at $3.15 base, but these prices are very firm owing to disturbing factors in the industry. Production difficulties which become more pronounced from week to week in Southern centres, and gradually more apparent with domestic mills, are still occupying the minds of those concerned. Reports from the U. S. Mills this week indicate that furnaces in all districts are being banked and a further curtailment of steel operations because of coal shortage seems certain. Already crippled in their production, steel men declare the situation grows more serious from day to day, and adding to the trouble is the possibility of widespread unemployment of steel workers unless something is done to get coal and coke to the mills.

Local mills state that there is little change in the situation insofar as they are concerned. Coal stocks are becoming less, but there is hope of replenishment from the Welsh coal fields in the near future. A certain amount of

this coal has already reached this port, and extensive importation is expected in the following weeks. Present prices are the following:

IRON AND STEEL—

Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single reeled machinery steel	5 25
Band steel	3 50
Spring steel	4 75
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

BUILDING ACTIVITY REFLECTS ON HARDWARE LINES

Montreal.

Hardware lines for which a steady call has been received during past months and which are quite active at the present time are those appertaining to the building industry. Jobbing houses state that builders' hardware and tools are now moving well while dealers in heavier commodities such as cement, eavestrough and conductor pipe, metal lath, corrugated sheets, soil pipe, etc., state that business is well up to expectations. That a good period for these lines is still ahead is assured by building permits issued for the closing months of summer and fall. Also, apart from new building construction there is always a good amount of repair work done in these months, and taken altogether dealers are quite optimistic regarding future trade, with many predicting a record year in some commodities.

FURTHER STRENGTH IN RAW COTTON MARKETS

Montreal.

A further stiffening tendency is again evident in the raw cotton markets in the south due, it is stated, to the crop estimates for this fall, when production will not reach figures at first anticipated. There has been considerable damage to the yield from wet weather conditions, and the acreage is somewhat smaller in some producing states. This upward tendency is reflected to an extent on domestic markets when certain lines of cotton twines are advanced in price. Such lines as cotton rope, sash cord, awning cord, etc., are unchanged up to the present but the undertone of these products is described as very firm.

FAIR DEMAND CONTINUES FOR RANGE BOILERS

Montreal.

Current trade in range boilers is said to continue fair, demand for these products being fairly well governed by activity in building circles. Later summer and fall usually bring a bigger demand for range boilers and this, coupled with continued new building, promises well for future trade. Quotations are unchanged with a certain firmness in the tone of the market owing to the stronger tendency in practically all galvanized sheet products. List prices and discounts remain unchanged.

Crude Oil Production Exceeds Consumption

Easier Trend in Crude Oil Market During Recent Weeks. Producers Anxious to Unload Stocks, Claim They are Working on a Loss. Reflected on Domestic Markets.

As pointed out in a recent issue of Hardware and Metal there has been a rather unsettled feeling among crude oil products in the United States. During recent weeks an easier tendency has crept into the market and reports received from the south would indicate that production exceeding consumption is responsible for the present softer tone in the market. This tendency was recently reflected on gasoline prices when a further reduction was announced in southern centres, immediately followed by a reduction of 1½ cents per gallon in domestic prices.

R. L. Welch, secretary and counsel of the American Petroleum Institute, in outlining the situation gives the following facts which are of interest to domestic circles in view of their application to the primary source of supply:

"From the fall of 1920, the refiners of the United States taken as a whole produced gasoline and other petroleum products at a loss.

"The explanation lies in two facts: First, to produce one barrel of gasoline it is necessary for the oil industry to produce about four barrels of crude and by-products The principal by-product is fuel oil, which is sold at all seasons of the year at prices below even the cost of crude at the wells.

"Second, the burden of cost must therefore be borne by the principal product—gasoline. But even as to this product, more is produced during the winter and early spring months than is consumed, and during this period the financial necessities and lack of storage facilities of many refiners compel them to sell below the cost of production.

"The domestic production of crude oil in 1921 was 469,639,000 barrels and 125,000,000 barrels were imported from Mexico. Of the total of 594,639,000 barrels, 66,000,000 barrels went into storage, indicating that 528,639,000 barrels of crude were either refined or sold as fuel oil without refining.

"Consumption of gasoline fluctuates more than 100 per cent. between periods of maximum and minimum demand. On the other hand, refinery operations must be continued on a reasonably uniform basis throughout the year. Otherwise the refiners of the country would be fifty per cent. shut down during periods of lowest gasoline consumption and would be unable to meet the demand from current production during the seasons of high consumpton. Gasoline prices were rising in May and June of this year because of the increase in the demand in relation to the supply.

"Since November 1921, the oil industry has been producing and importing more oil than was consumed and exported. The excess of production and imports over consumption and exports from November, 1921 to May, 1922, was 70,302,678 barrels."

SLIGHTLY EASIER TONE IN INGOT METAL MARKETS

Montreal.

The ingot metal markets have not been quite as firm during the past week, although the declines in prices are not very great. After the sharp advance in certain metals, a slight reaction is not surprising, especially in view of unsettled conditions prevailing in the United States and the uncertain state of finance in Germany.

TIN.—London has declined slightly this week probably owing to lack of support from this side as it is considered difficult to see how consumption can increase with labor conditions so unsettled. The undertone of the market however is described as good, and higher prices not unlikely later on. The local market is quiet at 36 cents.

COPPER.—There is nothing new in this metal, as it is not affected by the coal strike to the same extent as other lines. Domestic demand continues good and supplies seem sufficient for the present. Electro is still quoted at 17¾ cts., casting at 17½ cts.

SPELTER.—The immediate demand for spelter having been apparently satisfied, prices are slightly lower, but it is not thought that the decline will extend very far. It is considered probable that England will have to look to this side, which will mean lower prices. Local quotation is unchanged at 8¾ cents.

LEAD.—This market remains steady without any change in prices, and the situation is described as quieter. Supplies and demand are said to be fairly well balanced at present, and no immediate change is looked for. Lead is quoted at 7 cents.

ANTIMONY.—This metal remains quiet with practically no change in the undertone of the market. Chinese is still quoted at 6½ cts., high grade English at 7½ cts.

ALUMINUM.—Aluminum still fails to show much action and no change is recorded in the market tendency. Quotation remains at 24 cents.

Toronto Markets

TORONTO, August 10.—The trend of hardware markets continues to provide price developments of a mixed nature. Recessions and increases again appear, the declines affecting coal oil, which is lower one per cent per gallon and a minor reduction on certain roofings. Through a revision in discounts, higher quotations are now in effect on soil pipe and fittings, this change being attributed to increased production costs, manufacturers claiming that pig iron, coal and other elements are relatively higher. A brisk movement of binder twine is generally recorded. Strike conditions continue to affect delivery of sheets, and an increased call has consequently developed for domestic sheets. It is evident that the duration or possible cessation of the coal and rail labor difficulties remain the principal current factors in the steel industry. The upward movement in ingot metals has reached the stage where higher levels on tin, copper, lead, and spelter have been adopted locally and while the improvement has halted for the present, primary market conditions remain fairly steady.

COAL OIL NOW LOWER ONE CENT PER GALLON

Toronto.

In conjunction with the reduction of 1½ cents per gallon on gasoline prices, which was announced in last week's issue of Hardware & Metal, coal oil quotations are also lower one cent. This revision brings the current levels to twenty cents per gallon on Royalite and 23 cents for Palacine grade.

HIGHER QUOTATIONS ON SOIL PIPE AND FITTINGS

Toronto.

As pointed out in recent issues of Hardware & Metal, a decided upward tendency has recently been apparent in the market for soil pipe and fittings. This change has now developed in the nature of revised discounts, thus placing quotations on a higher level on sizes 2 to 6 inches, both pipe and fittings in medium and extra heavy. The revised discount on pipe is 33 1-3 per cent., while all fittings with the exception of 8-inch, are now on an even basis of 45 per cent off list. Eight inch pipe and fittings remain at net list.

In discussing the reasons for this revision with manufacturers, Hardware & Metal was informed that higher production costs were the principal factor, a tendency outlined in a recent issue. It was pointed out that pig iron has rapidly advanced in price, while coke is also higher. A shortage of raw material in this class is now commencing to become apparent due to the poor transportation facilities and delayed deliveries caused by the rail strike in southern centres. The demand for soil pipe and fittings is stated to be keeping up well and the season's volume is on a very satisfactory basis, a condition which has been materially assisted by the activity in building circles. New discounts follow, these applying to the standard list of October 1, 1907:

SOIL PIPE—

2 inch	Less 33 1-3 per cent.
3 inch	Less 33 1-3 per cent.
4-inch	Less 33 1-3 per cent.
5 and 6 inch	Less 33 1-3 per cent.
8 inch	net

FITTINGS—

2 to 6 inch fittings	Less 45 per cent.
8 inch fittings	net

TEN CENT REDUCTION ON CERTAIN ROOFING

Toronto

One local distributor of roofing papers has announced a reduction of ten cents per roll on ready roofing, the new prices being as follows: 1 ply, $1.50; 2 ply, $1.85; 3 ply, $2.20.

NEW PRICES EXPECTED ON LUFKIN MEASURES

Toronto.

Some revision in prices on the Lufkin line of rules and measures is anticipated in the near future, according to recent information from the manufacturers.

BRISK BINDER TWINE MOVEMENT RECORDED

Toronto.

The seasonal movement of binder twine has assumed distinct proportions, the general demand throughout the country being reported by manufacturers and distributors as much heavier than last year. This is attributed to the improved crop conditions and general expectations regarding harvest results. The easier price levels at which binder twine is selling this season, when compared with last year, is also described as a factor assisting in this direction. It is stated that unless unforeseen elements detract from the size of this season's crop, the volume of binder twine will compare favorably with previous records. Prevailing conditions in the trade are stated to be satisfactory.

RANGE BOILER PRICES ON STEADIER BASIS

Toronto.

Conditions in the range boiler market are described as much more satisfactory during recent weeks, and compare favorably with the situation recorded at this time last year. The current volume of trade is also on an improved basis, and from the price shading which was so common at that time, quotations have firmed up considerably until distributors are generally interested in maintaining the current list. The strength of the steel industry is described as serving to maintain prices on range boilers, flat galvanized sheets being higher in price as well as somewhat scarce owing to delayed deliveries. Following is the nominal list with discounts:

RANGE BOILERS—

Size	List Price
5 gallon	$ 13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 60
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent.: Extra heavy, 40 per cent.

CALL FOR BUILDERS' HARDWARE STILL EVIDENT

Toronto.

As the season advances, an increasing demand is noted in many quarters for builders hardware. This is taken to indicate that many houses and other erections are now nearing the stage of completion and products of this nature were not previously contracted for. In addition, there remains a good amount of new construction, especially dwellings and the smaller type of building, which has resulted in a steady call for materials in this class. Prices generally remain firm and unchanged.

FIRMER MARKET IN TROUGH AND PIPING

Toronto.

Trade in eavestrough, conductor pipe and elbows is still described as seasonably brisk, with a good amount of dwelling house construction promising a fair call for these products throughout the latter part of the season. Owing to the recent trend of the steel market and the higher prices on galvanized sheets, quotations on trough and piping are reported considerably firmer. Following are unchanged list prices and discounts:

TROUGH (Eave)—

O. G. Square Bead and half round. Size in girth:	Per 100 ft.
8 in.	$ 15 90
10 in.	17 70
12 in.	21 20
15 in.	28 80
18 in.	36 50

Less 70 and 10 per cent.

PIPE (Conductor)

Plain, round or corrugated.	Per 100 ft. in 10 ft. lengths.
2 in., in 10 ft. lengths, list	18 40
3 in. in 10 ft. lengths, list	22 30
4 in. in 10 ft. lengths, list	29 60
5 in. in 10 ft. lengths, list	40 00
6 in. in 10 ft. lengths, list	49 00

Less 70 and 10 per cent.

CONDUCTOR ELBOWS—

Plain round or round corrugated:	
2 inch, list	$ 5 25
3 inch, list	6 00
4 inch, list	10 50
5 inch, list	24 00
6 inch, list	29 00

Less 60 per cent.

CEMENT NOW REPORTED IN MODERATE DEMAND

Toronto.

No change has been reported in cement prices, and while it was previously thought that some easier prices may develop owing to the slight easing in

freight rates, the opinion is now expressed that any such development has been postponed. The scarcity of coal and higher prices now obtaining for same are pointed out as increasing cement production costs, and while no great call for cement is looked for during the Fall season owing to the completion of present construction programs by that time, yet the market has remained fairly steady. Up to the present, therefore, the following quotations continue in effect:

CEMENT—Carload Lots—

Per barrel	$ 3 75
Less Carload Lots—	
Per barrel, f.o.b. yard	4 40
Per barrel, delivered	4 60

Single bags, $1.15 each; 4 bags to barrel.
Extra charge of $1.50 per load on less than 24 bag lots.
Rebate of 20 cents for empty bags.

SCRAP MATERIALS STILL IN DULL CONDITION

Toronto.

The scrap material markets are still reported in a dull condition, with very little movement in current trade conditions. The only bright spot, if it can be described as such, is the fact that copper again appears to be a little stronger in virgin metal circles. Other waste metals remain generally unchanged, with prices being maintained where possible by dealers, but it is noted that the present trend is inclined to be easier in some instances. Following are the usual averages of local buying prices for fairly large quantities:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	**$13 00**	**$14 00**
Borings and turnings	**6 00**	**7 00**
Rerolling rails	**12 00**	**13 00**
Scrap pipe	**5 00**	**6 00**
No. 1 railroad wrought	**10 25**	**11 25**
Steel turnings (Hamilton)	**9 75**	**10 25**
Agricultural malleable	**12 00**	**13 00**
Railroad malleable	**13 00**	**14 00**
Net tons—		
No. 1 cast	**18 00**	**19 00**
Stove plate	**15 00**	**16 00**
Grate bars	**14 00**	**15 00**
Standard car wheels	**15 00**	**16 00**
Scrap Metals		
Heavy copper and wire	**10 75**	**11 25**
Light copper	**9 25**	**9 75**
No. 1 composition	**9 00**	**9 50**
No. 1 comp. turnings	**7 25**	**7 50**
Light brass	**3 50**	**4 50**
Heavy yellow brass	**5 50**	**6 50**
Heavy Lead	**5 00**	**5 50**
Tea lead	**2 75**	**3 50**
Scrap zinc	**4 25**	**4 50**
Scrap Rubber		
Boots and shoes		**2 00**
Lumbermen's rubber boots	**1 25**	**1 50**
Auto tires	**0 40**	**0 50**
Solid tires	**6 60**	**1 00**

STRIKE CONDITIONS AFFECT DELIVERY OF SHEETS

Toronto.

Trade in galvanized sheets continues on a brisk basis and primary conditions in this market show very little change. Deliveries are vitally affected by the rail and coal strike complications, and the settlement of these factors remains the chief element in the steel industry in general. The view prevails in the trade that even with an early settlement of the two strikes, steel producers would not be greatly helped immediately as some time must elapse before stocks of coal can be built up again. Meanwhile many American producers are conserving their supply of fuel by slowing down operation, and in addition, due to the enforcement of priority orders on coal shipments, many mills in the south report further curtailment in production. It is noted that certain manufacturing consumers have taken less steel because shortage of fuel has also affected their operations. An increased call for domestic sheets is evident. Consequently, galvanized sheets continue on a very firm price basis. Local quotations follow:

BLUE ANNEALED SHEETS—

10 gauge, base	**4 00**
12 gauge	**4 05**
14 gauge	4 10

BLACK SHEETS—

18-20 gauge	**4 80**
22-24 gauge	**4 85**
26 gauge	**4 90**
28 gauge	**5 00**

A charge of 25c per 100 lbs. is made for less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Hd.
28 gauge	7 50
26 gauge	7 25
24 gauge	6 65
22 gauge	6 30
18 and 20 gauge	6 10

	Premier and	Apollo
10¾ oz.	6 75	7 30
U. S. 28 base	6 35	6 90
U. S. 26 base	6 05	6 60
22 and 24	5 90	6 45
18 and 20	5 75	6 30
16	5 60	6 15
12 and 14	5 45	6 00

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.
An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown is 20c. per 100 pounds.

Steel Industry Awaits Strike Developments

New Impulse Needed to Reawaken Interest During Quiet Summer Session—Trend of Prices Still in Upward Direction — Industry Continues To Function in Spite of Strike Handicaps

WITH the middle of the summer period in the steel trade now at hand, a new impulse is needed as both buyers and sellers are generally awaiting further developments before acting. As pointed out recently, the spread between various quotations apparent on the local market on bar iron is expected to become uniform in the next few days, a tendency to firm up to the higher level of $3.25 base being generally evident. But for the quieter session, it is stated that the range would have been eliminated prior to this.

In spite of the obstacles and uncertainties caused by the strike conditions in the steel industry, production and distribution continues. However, more producing capacity is gradually being put out of commission as the shortage of fuel becomes increasingly noticeable. Deliveries of certain steel goods are being extended, new tonnage consequently having slowed down during the current quiet period. Naturally chief interest attaches as to whether the coal strike will be settled in the near future, although production of both pig iron and steel has kept up better than was generally expected would be the case under such circumstances.

Nothing but labor troubles and the dislocation of industry caused by the present strikes is held to stand in the way of there being active and satisfactory business not only throughout this year but into next year. It is almost universally recognized, however, that this is a very important qualification.

Among the ranks of the trade it is hard to draw out any predictions as to how the future market will develop. The general tendency is to take the attitude "wait and see." The two strikes will of course come to an end somehow or other. Either one of the strikes would complicate matters, while the two combined make a complication represented by multiplying the two influences together rather than adding them up.

IRON AND STEEL—

Mild steel bars, base	3 15	3 25
Mild steel bands 3-16 in. base	3 65	3 75
Bar iron, base	3 15	3 25
Angle iron, base	3 22	3 35
Horseshoe iron	3 75	3 85
Tire steel	3 35	3 45
Spring steel	7 00	8 00
Sleigh shoe steel	3 15	3 25
Hoop steel	4 00	4 10
Norway iron	....	12 50
Toe caulk iron	4 00	4 10
Crucible cast sheet steel		**28 00**
Mining drill steel		**18 50**
Cast tool steel, high grade		**30 00**
Cast tool steel, medium		**18 00**

UPWARD MOVE IN INGOT METAL PRICES

Toronto.

Ingot metals are somewhat higher in price practically all through the list, due to firmer conditions and increased quotations on the primary markets. The stabilization of the exchange situation is cited as the keynote to permanent improvement in this direction, and until this object is achieved, the current demand for non-ferrous metals is expected to be somewhat spasmodic and prices continue to fluctuate accordingly. Copper is higher one-half cent locally, tin also registering a similar increase. Spelter records the greatest comparative advance, quotations being $8.25, compared with the former level of $7.75. Lead also shows another increase. Antimony and aluminum are unchanged.

COPPER.—Fair sales of copper are being recorded, and consumers are now showing more interest in future positions. There is a lack of animation in the current market, but prices are steady. Local quotations have firmed up to the levels of 17½ cents.

TIN.—Owing to the recent advance in London prices, local levels have also registered slight increases, the current average being 36½ cents. There has also been a slight improvement in demand, and quotations on primary centres are consequently higher.

LEAD. — This market continues strong with a good consuming demand. The upward trend to primary markets is still evident, and local prices are also relatively higher. The new level is $7.50.

SPELTER.—This metal records another marked increase in domestic circles, and the new local price is $8.25, compared with the former level of $7.75. This is the third increase recently announced on this market, but while the current trend is firm and prices are steady, the upward climb has halted in primary centres. This is naturally expected after such a strenuous movement. The outlook is described as fairly good.

ANTIMONY.—There is very little to report in the antimony situation, prices remaining unchanged and the current demand of a quiet nature Present local prices are remaining between 6 and 7 cents.

ALUMINUM.—The dulness which has characterized the aluminum market during recent weeks is still in evidence, and no new features have been recorded. Local quotations are unchanged at the previous levels of 20 to 21 cents.

London Markets

LONDON, August 10.—Business here continues good. Seasonal lines are in steady demand and stocks are low in most lines. Jobbers and factories are now shipping booked orders for fall goods and merchants are preparing for the coming season.

Price changes are light this week, most quotations being very firm. Collections in this district are reported as good.

REVISED LOWER PRICE ON WELDING COMPOUND

London, Ont.

The various grades of welding compound have been reduced in price, the extent of the decline being around ten per cent. Following are revised levels: Climax, Boravette and Cherry Heat, 11½ cents per lb.

LOWER PRICES ON TINNED SPOONS AND FORKS

London, Ont.

Tinned spoons and forks have again been lowered in price, the reduction being in the neighborhood of five per cent. Following are new prices on these products:

TEASPOONS—

	Gross
No. 900—Tinned Teaspoons	2 75
No. 900—Tinned Dessert Spoons	5 35
No. 900, Tinned Table Spoons	5 50
No. 900—Tinned Dessert Forks	6 00

DECLINE IN PRICES ON ROLLER SKATES

London, Ont.

New lower prices are now in effect for fall business on roller skates. Revised quotations on the Union make follow:

ROLLER SKATES—

No. 3. With plain steel wheels, $1.00 pair; No. 5. With ball bearing wheels, $2.10 pair.

STRENGTH MAINTAINED IN TURPENTINE MARKETS

London, Ont.

Quotations on turpentine are locally unchanged, the general market situation maintaining the firmness recently recorded. Local stocks are still described as low.

TURPENTINE—	Imp. Gal.
1 bbl. lots	$ 1 80
2 to 4 bbl. lots	1 79
5 gal. lots	1 95

EXPECT RECESSION IN LINSEED OIL PRICE

London, Ont.

Owing to the downward trend of flaxseed prices, the market for linseed oil is consequently weaker and a reduction is expected at any time. Easier levels are recorded on most markets, but with moderate stocks and a fair demand for this season of the year, the following quotations have been maintained during the past week:

LINSEED OIL—	Raw	Boiled
1 to 2 bbls., per gal	1 20	1 23
3 to 5 bbls., per gal.	1 19	1 22
6 to 9 bbls., per gal.	1 17	1 20

Less barrels, add 15 cents gal.

CUT NAILS SCARCE BRISK CALL EVIDENT

London, Ont.

A good sale is still reported for nails, both cut and wire. Cut nails are reported very scarce at present, and factories are several weeks behind with their delivery. Following prices prevail:

NAILS—

Wire, base	3 65
Cut, base	4 60

CARBORUNDUM FILES IN POPULAR CALL

London, Ont.

Dealers report that there is a good sale at this season for carborundum section knife files. The current quotation on these products is $8.75 per dozen for the No. 57.

ONLY SPASMODIC CALL FOR ELECTRIC FANS

London, Ont.

The sale for electric fans has been rather spasmodic this season, the prevailing movement being light. Sales of these products are of a relatively smaller volume when compared with last season, as July and August were exceptionally hot months a year ago, and the call for electric fans in 1921 was correspondingly heavy. Prices remain unchanged at the following levels:

Polar cub, 6 inch .....$5.75 each
Polar cub, 8 inch .....$8.00 each

HARVEST TOOLS STILL IN SEASONAL DEMAND

London, Ont.

A good harvest tool demand is now in evidence, hay forks and similar products still registering an active movement. Quotations remain at list less sixty per cent.

GOOD SALE NOTED FOR COLD WATER PAINTS

London, Ont.

Many dealers throughout this district have reported that a brisk seasonal call for Alabastine cold water paints is evident. Prices remain at the following levels:

Colors and White

2½ lb. packets .....$10.10 per 100 lbs.
5 lb. packets .....$ 9.60 per 100 lbs.

FAIR BUSINESS NOTED FOR CATTLE CHAINS

London, Ont.

Business in cattle chains is reported fairly good and orders are now being booked at the prevailing level of list plus 25 per cent.

LIVELY MOVEMENT OF FLY OIL RECORDED

London, Ont.

A lively sale for fly oil is now reported. Warm weather usually experienced at this time of the year creates a seasonal call for this product. Prices remain unchanged at the following levels:

FLY OIL—

Dr. Williams	Per Doz.
1 gal. cans	12 00
½ gal. cans	8 00
Crenoid	
1 gal. cans	12 00
½ gal. cans	8 00

Winnipeg Markets

WINNIPEG, August 10.—Business is showing an improvement. Prices are advancing on iron and steel bars. Linseed oil has shown a decline and is now quoted at $1.23 for raw and $1.26 for boiled. Turpentine prices are ruling steady. Peter Wright anvils have declined 2 cents per pound. Galvanized sheets are reported scarce. Putty has shown an advance as well as cut nails.

ANVILS SHOW DECLINE OF TWO CENTS PER POUND

Winnipeg.

There has been a decline of two cents per pound on Peter Wright anvils. New quotations are from 60 to 69 pounds—26 cents per pound. 70 to 79 pounds—24½ cents and weights over—22 cents.

TROUGH AND PIPE SHOW FIRMER TENDENCY

Winnipeg.

Eavestrough and conductor pipes show a seasonable activity and with the stronger tone in galvanized sheets and the present shortage on the local market the tone of the market is decidedly firmer.

STRONG UNDERTONE IN WROUGHT PIPING

Winnipeg.

Wrought iron and steel piping prices are unchanged and the market is in a strong position. The American pipe market is reported very firm.

GALVANIZED SHEETS NOW REPORTED SCARCE

Winnipeg.

The situation in galvanized sheets is reported scarce as local supplies are being rapidly depleted. Prices are firm and unchanged.

SOIL PIPE QUOTATIONS FIRM BUT UNCHANGED

Winnipeg.

Quotations on both soil pipe and fittings remain unchanged with current trade reported satisfactory due to the improvement in the movement of building. With the firmer tendency in iron and steel products and the continuation of the coal strike the tone of the market is much firmer and if this continues an advance can be expected in the near future.

LINSEED OIL SHOWS DECLINE IN PRICE

Winnipeg.

The weakness that has featured the southern markets has been reflected on the local market in two separate declines. Raw linseed oil is quoted at $1.23 per gallon with boiled at $1.26.

PIPE FITTINGS MARKET SHOWS NO CHANGE

Winnipeg.

The demand for pipe fittings continues to show a slight improvement. The market is ruling steady with quotations on the different lines unchanged.

STEEL AND BAR IRON PRICES ADVANCE

Winnipeg.

Current quotations on the various grades of bar iron and steel have shown an advance of ten cents per hundred pounds. Local distributors state that a firmer tone will likely continue if the production is curtailed in steel plants and it will only be a matter of time when this will be reflected locally.

CUT NAILS ADVANCE TWENTY-FIVE CENTS

Winnipeg.

An advance of twenty-five cents per keg is now in effect on cut nails. Current trade in wire nails is reported fair.

HIGHER PRICES ON PUTTY

Winnipeg.

There has been an advance of about 50 cents per hundred pounds on putty and new quotations on 100 pounds is $6.00.

TURPENTINE REMAINS AT UNCHANGED PRICES

The Southern markets are reported steady and the movement fair. Locally there is no change in price and turpentine is quoted at $1.85 per gallon.

Strong Future Position Of Raw Cotton

Estimated Crop Shows Consumptive Demand in Excess of Supply Resulting in Firm Price Trend on Manufactured Cotton Goods—Current Quotations Steady—No Immediate Advances Expected

QUOTATIONS on raw cotton again show a decided upward tendency, with future prospects exhibiting marked strength. Fluctuations have recently been recorded, but the statistical position remains very firm, and reports from southern cotton markets indicate that the future trend can hardly be expected to reach lower levels.

Following the publication of the official estimate of the current crop report, it is observed that the probable consumptive demand is well in excess of the size of the forecasted crop. The ten-year cotton crop average is 13,053,000 bales, and when this is compared with the estimated 11,449,000 bales for this season, the trade consequently fears a supply far below current needs. This condition is naturally reflected to some extent in quotations on the various manufactured cotton lines, such as cotton rope, clothes lines, sash cord, seine twine and similar goods.

Probable requirements are figured in the neighborhood of thirteen million bales, a situation which has caused October cotton values to rise. That several other factors enter into the crop results are admitted, these elements including weather conditions, the annual weevil damage, the amount of rain and the condition of the plant.

In discussing the cotton market with prominent distributors of manufactured lines, it was pointed out to Hardware and Metal that such factors make the future conditions extremely difficult to gauge. The recent fluctuations and resulting firm trend have had the effect of making lower quotations on finished products more remote. As regards higher prices, however, it was admitted that no increases are at present being contemplated and while current prices were fairly firm, higher levels would of course depend upon future upward movements in the primary markets. Manufactured cotton goods registered advances to a varying extent comparatively recently and raw cotton conditions result in maintaining these quotations on a steady basis.

Hamilton Markets

HAMILTON, August 10.—The coal and railway strikes continue to hold the close attention of all engaged in the hardware and metal industries because of the broad effect of such disturbances on this industry. Higher prices on galvanized sheets, bar iron and steel and some other hardware lines, have been more or less attributed to the effect of these strikes and the prospect is for higher prices on other products if no early settlement is made.

In discussing the effect of the coal strike and the threatened extension of the railway strike in Canada upon industry in general, and particularly the steel industry, with various producers, Hardware and Metal was informed that while present coal supply is in most cases sufficient for some weeks, the question of further supply is now an important one. With deliveries of coal curtailed in the past weeks many of the larger users are working on reserve, and stocks on hand which will last from four weeks to four months are reported by various firms.

Hardware merchants report a really excellent season in building supplies, tools and roofing. They state farmers have been big buyers of roofing and the many new homes which are being erected require large quantities of glass, electric fixtures, builders' hardware and plumbing supplies and also offer many opportunities for general trade. A feature of the situation is that building permits are continuing to be issued, thus indicating that there will be a large amount of work and opportunities for trade in these lines until well into the fall season.

Building activity is mostly confined to dwelling-house construction; a good portion of which is now nearing the finishing stage, and a better movement of medium-finished hardware is noticed; some dealers report this department quite active. Competition on this line is keen.

Those dealers who feature sporting goods generally report the best trade in years on seasonal lines. Stocks are low and just now the streams are clear and fishing good and the demand for tackle very active. Golf, tennis and baseball have been particularly active all season. Seasonable sales at attractive prices are noticeable; it is evident merchants are not going to carry over tail ends of summer stocks.

Anticipations for an average crop have considerably bolstered up trade conditions, while the realization of optimistic harvest reports undoubtedly form the basis of an improved business movement generally. Retailers continue to purchase supplies and seasonal lines in moderate quantities.

James M. Rae & Company, Medicine Hat, Alta.—Can you tell us where we can secure repairs for the Walker Oak Heater?

Answer.—The Hall, Zryd Foundry Company, Limited, Hespeler, Ont.

Sells Paint By Showing the Finished Effect

Realizing That He is Selling a Finished Effect on a Certain Surface, Hardwareman Keeps Samples of Work Done by Each Line Carried—Local Property Transactions Provide Prospects—More Paint Sold by Suggestion Than Anything—Speeding Turnover

DISCUSSING paint business with a hardwareman who has had long experience in the trade but who is just commencing a new store in a strange community, Hardware and Metal unearthed some ideas which are particularly applicable to those stores which are working up a new clientele or for those stores which find necessary some radical change in selling policies in the paint department. This hardwareman pointed out that the dealer who sells a can of paint, varnish, enamel or stain should realize that he is not selling just so much material, but he is selling the customer a finished effect on a certain surface. He early realized this fact and found that a change in his policies whereby he sold ideas instead of cans, resulted in a stimulation of his business.

When a customer wants some varnish for a floor he shows him a sample of flooring (several pieces of flooring about 14 inches long, tongued and grooved and cleated in back) which he has had on hand, finished with the floor varnish they sell. The prospective customer thus sees exactly how the floor will look when finished with that particular varnish. The same plan is carried through in selling enamels, stains, house paint, floor paint, automobile finishes, etc. It requires some time to get these samples, but they are very effective in closing a sale and in interesting new prospects.

This merchant also keeps a close watch on local property transactions realizing that these give him a tangible basis on which to work up paint business. He secures a list of real estate transfers from the local records offices and immediately calls up the purchasers of the properties and tells them he is selling paint and suggesting that they will probably want to freshen up their new property with some new paint. Frequently he gets invitations to come up and discuss the matter. Those who promise to come to the store to discuss the matter are checked up closely and if they do not come they get a reminder or he tries to see them personally.

Uses Property Transfers

This hardwareman finds that property transfers are productive of much business because it is a time of change when people are considering the expenditure of money and it is also the time when they are considering means for altering and improving the new premises. It has been his experience that most orders received in this way are for large quantities.

This merchant gives some good tips on other points as well. He says:

"Don't forget, paints and varnishes, probably more so than any other line of products, are often sold by suggestion. Mr. Home Owner comes into a hardware store for some nails. If he has to pass by the paint department with its nice display of panels, etc., he probably thinks of some surface about the home that needs finishing and right here is a probable sale.

"Some time ago we put in a small stock of paint (about $300) but rather than put the stock in back or upstairs we arranged it around a pillar right up in the front of the store.

"Then we went to it. A newspaper campaign was arranged for and other means were employed to start the paint department off with a bang.

"Just a word about the newspaper ads. They consisted mostly of small 'liner' ads which were run frequently. At certain intervals larger space was used to bring out special offers."

Six Turnovers a Year

The following, from a letter written by the merchant, is interesting:

"We turned over our paint stock twice the first month. We do not expect to keep this up every month during the year, but the way our line is selling, I could surely predict a turnover of six or eight times during the year.

"This especially surprises me, as I had no idea we could do this with paint. We have given the stock a prominent position near the front entrance, and we have run ads at different times in the papers, inviting the people to come in for samples of varnish and varnish stain. We followed this up with small runners about five in each issue, appealing to the women.

"Our town has about 10,000 people, and since putting in paints, close to two months ago, we have sold around $1,000 worth."

To illustrate the snappy kind of advertising this firm does, here is one of the "liner" ads:

"Oh!	Girls!	Girls!
Paint	Paint	Paint

"You can add greatly to the complexion of your floors and furniture by putting on a coat of paint or varnish. Special drive on paints at ——— Hardware Store."

Many dealers think they have no chance of getting the paint to be used on new homes being built in the neighborhood. Not so with this firm. Just as soon as their stock arrived they went after every job in sight—and they landed a good proportion of them.

Building Prospects

This merchant does not go after the owners of new homes when they are ready for paint, but he starts when the foundation holes are dug. His system is to keep in touch with owner and contractor and by pointing out the advantages of quick service he gets the order.

Here is what he has to say about the paint business:

"Two years ago, when I opened this store I placed a $422 stock order for paints.

"I do not feel that we are well established as yet; therefore, we cannot state at this time what will be our paint business in a few years to come, but you can judge for yourself as to what the outlook for our paint sales will be. Our stock averages $600 and our last year's sales were $3,193.33 and still climbing.

"This territory in which our store is situated is a recently developed location, and many new homes are being built, and we have got much of the paint business that goes along with new work. We feel that much painting will be done this fall. We sell a good amount of interior paints in the fall."

In telling the story of these two firms in the paint business the main point brought out is that aggressive methods will get business—no matter what the obstacles are. Another point to remember is the display—get your paint stock up front where it can be seen and serve as a reminder to folks that they need paint or varnish to do some job.

Then don't forget that the products that make money are those that turn over frequently — and here is where paint comes into its own. A dealer can "get by" very nicely with a small line of paint because he can get fill-ins quickly. In these days of small profits it's the turnover that counts and the products that turn over frequently deserve a place up in front.

PRATT & LAMBERT-INC. HOLD SALES MEETINGS

That this fall the paint and varnish industry will experience an opportunity for a greater volume of business than it has had in many years, was one of the many optimistic statements made by general manager A. D. Graves at the Divisional Sales Meetings of Pratt & Lambert-Inc., held in Chicago, Buffalo and New York, successively. The central division, embracing Buffalo and Canadian territory, met at the Buffalo plant. A dinner followed the first day's session in each city, the men at Buffalo motoring to the Lake Shore Hunt Club, where P & L and "Save the Surface" songs enlivened the occasion. Felicitations were cabled to J. H. McNulty, who is abroad with his family. Flowers, accompanied by a letter expressing the wish for steady and permanent recovery, were sent to W. H. Andrews, now convalescing from a serious illness at his home in Buffalo. The presence of both Mr. Andrews and Mr. McNulty at these midsummer conventions in the past has contributed not a little to their success.

R. W. Lindsay, sales manager, discussed the work and problems of the industrial salesmen. W. P. Werheim, advertising manager, outlined the company's advertising program for the next six months and displayed the features to be used. Mr. Graves conducted the discussions on trade sales, in which the salesmen freely participated.

Expect Some Changes in Brush Prices

General Revision in Quotations for Fall Would Likely Contain Slightly Lower Prices on Certain Types of Brushes With Some Higher Levels on Other Classes—Method of Marketing Bristles Responsible for Higher Production Costs

THAT no radical changes will be made in the price of brushes this Fall was the opinion expressed to Hardware & Metal by E. C. Boeckh, of the Boeckh Co., Ltd., Toronto, brush manufacturers. It was stated that there may be some lower quotations on the longer bristle types of brushes, but any revisions of this nature would be small. On the other hand, some higher levels may have to be put into effect on the smaller sizes of brushes, owing to the recent developments in the bristle markets. It was pointed out that in the Chinese bristle market especially, the shorter sizes of bristles were both scarce and higher in price. A new method of marketing these has been adopted which places sizes between 2½ inches and 6 inches in large assortments. Formerly the smaller sizes used to be sold separately, but it was explained that brush manufacturers now have to purchase the entire assortment. These contain many long bristles and other styles for which there is not the same demand all through the season as is evident for other types of bristles, and it was thought, places the manufacturer at a disadvantage.

Referring to household brushes and higher grade products of this class, it was stated that no reductions in price are anticipated. The fact that production costs have been placed on a slightly higher basis through increased sales tax, higher coal prices and other elements, was another factor brush manufacturers had to consider. Overhead had been reduced all possible, while there was no possibility of further lowering wage levels, as labor in the brush industry was not considered as too highly paid. That another three or four weeks would elapse before any decision in regard to Fall selling prices would be announced by the manufacturers was also indicated.

MERCHANT SETS A GOOD EXAMPLE FOR PAINTING

WINDSOR, ONT.—"Save the surface and you save all" is the motto not only of the paint manufacturers, but also of C. H. Smith, prominent Windsor merchant, who has suggested to the Border Cities Retail Merchants' Association that steps be taken to clean up the exterior appearances of Windsor's downtown retail stores, if the reputation of this community is to be upheld.

At the last nomination meeting of the Association, Mr. Smith pointed out that several of the stores were in an abject condition from the exterior, although the interiors of the stores were well conditioned. He advocated the more benevolent use of paint and other decorative material to "brighten up the premises." Mr. Smith declared also that lack of sufficient lights in the stores was also responsible for the seemingly unkempt condition of the stores. He made a strong appeal for store-keepers to give their establishments better lighting, for lights at night, he maintained, were illustrative of the spirit of the community, and should therefore be bright.

The suggestions of Mr. Smith were heard favorably by the board of directors, to whom the matter was referred, and a committee, as follows, has been appointed to act: George Macdonald, chairman; C. H. Smith, A. J. Veale, Jack Gelber. The committee will wait upon the several retailers and, if possible, secure the assurances of the proprietors that a "clean-up" will be made.

A GOOD PAINTING EXAMPLE IS BETTER THAN PRECEPT

Paint advocates should not neglect to set a good example by painting up the store in refreshing colors. Make this new paint covering extend both inside and outside the establishment. Even brighten up the fixtures and floors. The delivery wagons can also be used as "silent salesmen" advocating the paint and varnish principles. Many hardware merchants who own other residences than the store building itself, have adopted the idea of using the home as a demonstrative example of paint and varnish to "save the surface". "Your house or your building, can equal this in appearance at nominal cost", and "It only costs so much to paint this house from top to bottom, both inside and out", are catchy slogans for use in display bulletins and local ads.

REPORTS CANADIAN OXIDE OF IRON BEING DUMPED ON U. S. MARKET

The secretary of the U. S. treasury has announced that the customs service has found that oxide of iron imported from Qcebec, Canada, is being dumped on the American market. The secretary in his announcement says:

"After due investigation I find that the industry of manufacturing oxide of iron in the United States is being or is likely to be injured by reason of the importation into the United States of oxide of iron imported from the province of Quebec, Canada, and that such merchandise is sold or is likely to be sold in the United States at less than its fair value."

Weekly Paint Markets

Montreal

MONTREAL, Aug. 10.—An advance in linseed oil prices, following the sharp recession of last week, is the feature change in the paint markets this week. The seed market after displaying an easier tone owing to reports of very favorable crops for fall, steadied up considerably during the past week and a firmer tone is now evident. Turpentine prices are again unchanged and although an easier tendency is displayed in the south, this is not yet reflected on the local market. Demand is now seasonably light and this factor is an important one on the situation at producing centres. Local importers state that in all probability there will be transportation difficulties in the near future if an agreement in the strike situation is not reached, and although this has had no effect up to the present it may assist towards somewhat higher prices in the ensuing week. Considerably lower prices are given by some firms on shellac but no change is reported in other quarters. There is therefore a range in local prices. As in the case of practically all paints, varnishes and allied products, the movement of white lead and putty is now slower. Bookings for fall trade will in all probability be commenced around the first of next month although there is said to be little chance of much activity until the booking date is extended or until new prices are set for fall. Any announcement of this nature will likely be made shortly after September 1st.

FOUR CENT ADVANCE IN LINSEED OIL PRICES

Montreal.

Following the recession in linseed oil prices last week, this market is again featured by a price change but this time in an upward direction. Local quotations generally are advanced four cents per gallon, with a slight variation noted among distributors. Certain firms are quoting one to two cents higher than prices given below, they having not reduced quotations to the same extent last week. The seed market is said to have developed a certain amount of strength because present supplies are of only moderate proportions, and notwithstanding reports of bumper crops for fall there is little seed to take care of present requirements until the new crop is harvested. Reports from the North West indicate that with favorable weather continuing the crop will be a little easier than usual and the chances are that new seed will be on the market two weeks in advance of past seasons. One local crusher stated that nothwithstanding this, the question of seed supply should be an important one during the weeks immediately following. Revised prices are as follows:

LINSEED OIL—		
1 to 2 barrel lots, per gal ...	1 05	1 07
5 to 8 barrel ots, per gal.	1 03	1 05

TRANSPORTATION AN IMPORTANT FACTOR IN TURPENTINE MARKET

Montreal.

Current quotations on the local turpentine market are unchanged, notwithstanding a slightly easier tone in the market in the south. Recent reports from producing centres indicate that a further drop in prices would not be surprising at an early date, although a recession of only minor proportions is looked for and due to a natural trend at this season of the year. Demand has slackened considerably in the past few weeks and there is not the interest that was shown a few weeks ago. Fair sized enquiries for export are being received but none of these have resulted in sales of any consequence. Local importers state that there is a possibility of transportation difficulties from now on, and this may be an important factor in the local situation in the weeks to follow. For this reason the trend of the local market may not reflect market conditions in the South as readily as would otherwise be the case. Prevailing quotations are the following:

TURPENTINE—	Imp.	Gal.
1 barrel lots	1 63	1 65
2 to 4 barrel lots, per gal.....	1 61	1 63
Broken lots	1 73	1 75

VARIATION IN LOCAL SHELLAC QUOTATIONS

Montreal.

Although certain firms announce considerably lower prices on shellac, it is stated in other quarters that there is no change and former prices are being maintained. Primary centres describe the market as quiet and demand variable, with quotations generally considered nominal with little actual change. Demand locally is seasonably quiet with the following range in quotations given:

SHELLAC—	Pure White		Pure Orange	
In barrels	4 60	4 90	4 35	4 60
5 gallon jugs	4 75	5 10	4 50	4 75
1 gallon jugs	4 85	5 40	4 60	4 90

LITTLE ACTIVITY NOW EVIDENT IN PUTTY

Montreal.

The usual summer dullness is now apparent in the putty market, with dealers anticipating little further activity until next month at least. Many salesmen are off the road and bookings up to the present on this product are comparatively light. One local manufacturer stated that he expected sales would be small until either the booking date was extended or some announcement forthcoming with regard to prices for the fall trade. Booking prices are now given for delivery up until September 15th, 1922.

PUTTY—

Standard, per 100 lbs.	5-ton lots	1-ton lots.	Less
Bulk barrels 800 lbs.	4 00	4 50	4 75
Bulk drums, 100 lbs.	5 00	5 50	5 75
Do., or tins, loose, 25 lbs.	5 25	5 75	6 00
Drums or tins, cased, 25 lb.	6 00	6 50	6 75
5 lb. tins	9 25	9 75	10 00
1-lb. tins	11 25	11 75	12 00

Toronto

TORONTO, August 10.—The usual midsummer dullness now pervades the paint markets, the movement of paints, varnishes and sundry products being in moderate proportion. Price movements are of minor extent this week, but the trend of primary markets provides the chief interest. Flax seed prices have recovered to some extent and linseed oil quotations are consequently firmer. In addition, the by-products cake and meal are lower in price, this tendency serving to introduce higher linseed values. Although reports covering crop conditions affected seed prices, it is pointed out that this factor does not assist current supplies. Shading has been evident, due to quiet current demand.

Quotations on turpentine are unchanged, it being pointed out that supplies are somewhat difficult to secure owing to the southern rail tie-up interfering with new shipments. Local stocks are described as scarce, but this condition is not so noticeable as might otherwise be the case, the current call being of moderate extent.

Shellac prices are reaching a nominal stage, an easier undertone having developed in this market, and some lower quotations having been recorded. Trade in window glass is described as satisfactory for this season, many distributors reporting increased activity in certain directions since the general adoption of the recent discounts on the box list.

Barrett Roofings, Cements Industrial Paints etc.

DURING the next few weeks there will be a big demand for roof repair materials. For many property owners have neglected to put on new roofs this summer and now they'll have to patch up the old ones to make them last through the winter.

The two famous Barrett Specialties described below are the greatest materials on the market for making old roofs last longer.

You can recommend these products to your customers with absolute confidence that they will give complete satisfaction. Send in your order at once, and be ready for the big rush.

Everlastic Liquid Roofing Cement

One coat of Everlastic Liquid Roofing Cement makes old prepared and "rubber" roofings almost as good as new. It forms a smooth, tough, durable surface that adds years of extra service.

Mention this to your customers. They'll thank you for the money-saving suggestion. Everlastic Liquid Roofing Cement is easy to apply and comes all ready for use in packages ranging from 1-pint tins to 40-gallon barrels and steel drums containing 43 gallons.

Anyone can apply it

Plastic Elastigum Patching Cement

No wonder this famous Barrett product is called "the plastic cement of a thousand uses!" Patching leaks and holes in all kinds of roofs, repairing flashings, relining gutters and cisterns—these are a few of the uses for which it is unequalled. It's easy to apply and sticks to either a wet or dry surface. Don't be without a stock.

Relining a gutter with Plastic Elastigum

Sold in 1 lb. tins (24 to the case), 5-lb. packages (12 to the case), 25-lb. and 100-lb. packages, half barrels (about 300 lbs.) and barrels (about 600 lbs.)

TORONTO PAINT MARKETS

(Continued from page 48)

TURPENTINE SUPPLIES DIFFICULT TO OBTAIN

Toronto.

Turpentine remains somewhat scarce on the local market, this condition being attributed to the tie-up in the American transportation facilities causing considerable delay in the movement of fresh supplies from the south. Prices are again unchanged, and while the current demand is of moderate proportions and a slightly easier trend is recorded at Savannah, these factors have failed to outweigh the shortage of stocks on domestic centres. It is pointed out that unless the rail strike is settled in the near future, future supplies of turpentine will likely be more difficult to procure, as present shipments are very slow, a condition distributors expect will get worse if no settlement is reached.

The fact that there has been a slight recession in values at southern points has failed to dull the enthusiasm of producers regarding the future trend of this market. It is pointed out that the usual summer dulness in the trade is more or less responsible and in conjunction with this element is the natural reaction which usually accompanies any marked upward movement. The current demand is slightly easier, but the future strength is considered assured in view of the estimated consumptive requirements being generally equal to the volume of production.

TURPENTINE—

1 barrel lots	1 75	1 80
2 to 4 barrel lots	1 74	1 79
5 gallon lots	1 90	1 95

Less than one barrel lots, 15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Carload lots of 70 barrels, price on application.

FLAX SEED RECOVERY FIRMS UP OIL PRICE

Toronto

Recovery of linseed oil prices following the easier levels recorded on the local market last week, indicate that oil follows more or less closely the current developments in flax seed. Linseed quotations are also stronger due to the recession in prices on cake and meal, this condition serving to sustain oil prices as crushers figure current by-product values in production costs. There has been some cutting in prices on linseed oil on domestic centres due to the slack trade, a situation generally usual at this time of the year. Flax seed prices, however, have steadied up considerably and oil quotations have reflected this condition to a corresponding extent. Some variation in prices is still evident among local distributors. The seed market recovery is attributed to the fact that supplies are considered as only of moderate proportions and while recent reports covering the Fall crop have been optimistic and therefore influenced the trend of seed prices, yet in referring to later developments in this market it is pointed out that this condition does not assist supplies prior to the time that the new seed comes on the market. Average prevailing linseed oil quotations follow:

Toronto.

LINSEED OIL—	Per Gallon Raw		Per Gallon Boiled	
1 to 2 barrels	1 10	1 20	1 13	1 23
3 to 4 barrels	1 09	1 19	1 12	22
6 to 9 barrels	1 07	1 17	1 10	1 20

Less barrels, 15 cents per gallon.

MODERATED CALL FOR PAINTS AND VARNISHES

Toronto.

The seasonal call for paints and varnishes is reported by manufacturers and distributors to have moderated a little, this being attributed to the holiday season. In speaking of this condition, one manufacturer stated to Hardware & Metal that they do not look for such a big trade during the middle of the summer, but plans are being made for the anticipated Fall trade, when a marked improvement in painting activity is naturally expected. It was also pointed out that a great many dwellings and other buildings now under construction will hardly be ready for painting until later in the season, when the weather is also considered more suitable for this class of undertaking. That the total volume of trade this season, up to the present, has generally equalled expectations was also admitted. Prices are remaining at the recent revisions.

Pittsburg Markets

PITTSBURG, August 10.—Production of pig iron in July, was at ar ate only 1.6 per cent. under the rate in June. As noted in recent reports, many blast furnaces were compelled to bank or blow out in the last two or three weeks of July owing to coke shortage, due to lighter receipts of coal at by-product coking plants, resulting chiefly from the railroad shopmen's strike of July 1. This would have suggested a very considerable decrease in pig iron production in July. The decrease in the rate of production did occur, but quite a number of furnaces had blown in during the latter part of June, adding little to that month's output. Transportation conditions are improving, as the railroads make headway in overcoming the effects of the strike, which is not settled formally. The coal strike continues. Thus the prospect is that pig iron production in August will be materially below that of July.

The slight drop in pig iron production from June to July was almost entirely among merchant furnaces, the steel interests having a good output, and as the steel works may have used a somewhat larger proportion of scrap in July it is possible that their production of steel ingots increased a trifle. At any rate it cannot have decreased materially. The ingot report for July will be out in a few days.

The important point in this matter of steel production is that a fourth month has been added to the list of months in the coal strike in which there has been heavy production and this means a great deal of steel shipped. April saw a heavier production of steel than any preceding month since November, 1920. May showed a material increase over April, and June a slight increase over May, while July at any rate did not go back to any extent. The result is that steel production in the four months after April 1, when the coal strike started, has been 40 per cent. greater than in the four months preceding April 1. The average rate of production in the past four months has been about 36,000 000 tons of ingots a year. This is only 14 per cent. under the rate in the first nine months of 1920, when steel was regarded as being in exceptionally heavy demand.

Consumers Well Stocked

In the circumstances, there is a possibility that some consumers are pretty well stocked with steel. In February, March and April the common view was that a considerable part of the steel buying at that time was in anticipation of curtailment in steel production arising out of the coal strike. It must be remembered that the coal strike was universally expected and not a few people thought it likely to prove the greatest strike in the history of the industry. While there may have been little stocking of steel in a speculative way, it was the testimony of steel producers that customers were taking in steel against contracts they held and would be executing in the later months of the year, contracts for making manufactured steel products and contracts for construction work.

The reduction in steel production that has been occurring, and the further reduction that is practically certain prospect for the next few weeks, therefore, does not necessarily promise that there will be a shortage of steel. The present dullness of the market is in keeping with this analysis. There is some urgent demand for prompt shipment with delivery premiums naturally being paid, but the tonnage involved is not large. For delivery late in the year hardly any business is being done. The mills insist that they would not sell in any event, but the case does not come up to any extent, as buyers are not inquiring.

Instructions to Curtail

It is stated on excellent authority that some buyers of steel have instructed mills to curtail shipments. This may not involve much tonnage, but it is a significant development. Whether the buyers in question have accumulated extra stock, or are having their operations curtailed by coal shortage, cannot be learned precisely.

"Crown" Metal Shingles

You Can Safely Recommend them

For any and all kinds of building, for they have been scientifically constructed to adapt themselves to the most exacting roofing work. They are absolutely storm, water, fire and wind proof making the strongest metal roof in existence. Free from solder, exposed nails or anything that makes for decay, they defy the elements. Locked on all four sides they become a continuous piece.

They are easy to apply and are very attractive in design.

TINKER TOM'S TALKS

No. 371

LOTS OF BUSINESS

You bet your sweet life there'll be lots of it this fall. If you're a bit pessimistic take a day off the end of August and visit the Canadian National Exhibition at Toronto. You'll see people by the ten thousands—happy, snappy, well-dressed and freely spending money. The same people will spend just as freely for repairs to roofs, troughs, conductor pipes, furnace pipes and all the hundred and one uses of

"Premier" Galvanized Steel Sheets

Be the boy on the job—order from your jobber now and be sure of deliveries.

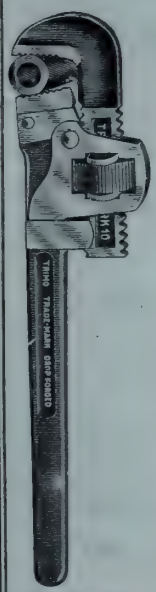
TRIMO
THE WORD TRIMO



Stands for good tools made by the Trimont Mfg. Co., which are the following:—

The Trimo Pipe Wrench
The Trimo Chain Pipe-Wrench
The Trimo Nut Wrench
The Trimo Pipe Cutter (Hand)

The four good points that make **Trimo Pipe Wrenches** superior are the **Spiral Spring** always in place—**Steel Frames** that will not break—**Nut Guards** that protect adjustment nut—and the **Inserted Jaw** in handle that can be replaced when worn.

NICKEL PLATING — ORDERS EXECUTED promptly. Prices on application. Communicate with F. W. Higginson, 173 William St., Montreal. Telephone Main 8144.

MANUFACTURERS' AGENTS

WHOLESALE JOBBER CALLING ON HARDware, garages, electricians, painters, etc. Winnipeg and suburbs, open for one or two lines. Apply Hardware and Metal, Box 203.

Valuable Manufacturing Plant for Sale

The Thompson Machinery Company, Grand Bay, N. B., located on line of Canadian Pacific Railway, and situated a few miles from St. John, N. B., is now offered for sale by Tender.

Tenders will be received up to Tuesday, the 15th of August, and must be addressed to the Thompson Machinery Company, c/o Thos. Bell, Pugsley Building, St. John, N. B.

The land west of the main highway (90 acres, more or less), together with the plant, including machine shop, foundry, out buildings and stock manufactured and unmanufactured, and houses thereon for employees, may be sold en bloc, as a going concern, or separate Tenders will be considered for the whole, or for any portion of the machinery, or stocks of materials on hand.

Separate Tenders will be received for the unsold land east of the highway, now laid out in lots for summer cottages and containing about ten acres, more or less.

The plant is complete for making Blowers, Drilling Machines, Forges, Mitre Boxes, and like goods, for which there is a ready sale.

A list of all machinery and stock can be seen by applying to office of Thos. Bell, Pugsley Building, and any other information that may be required by tenderers.

Saint John, N. B., July 31st, 1922.

No. 71 Fire Pot. List Price Each $27.20. Ask for Discount.

The Answer to Your Fire Pot Problem

Over 60 per cent. of all Burner troubles are caused by the old style sharp pointed Needle which quickly enlarges the gas orifice. No. 71 Fire Pot has **Improved Double Blunt Needle Burner** which outlasts two ordinary Burners. Upper cleans, lower regulates. It burns gasoline or kerosene, producing 300 degrees more heat and is noiseless, smokeless and odorless. Jobbers supply at factory prices. Catalogue free.

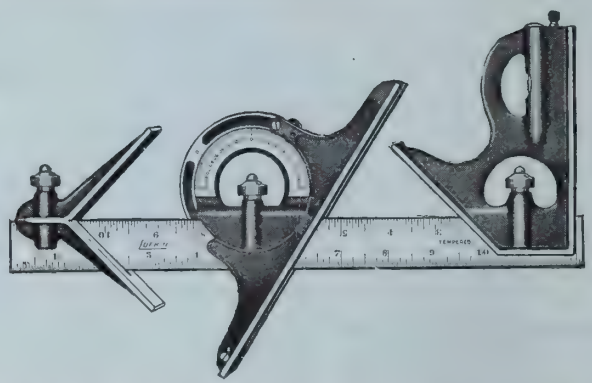
COMBINATION SQUARES



LUFKIN

BEVEL PROTRACTORS
COMBINATION SETS

JUST PUT THEM ON DISPLAY

At a glance every mechanic's eye will be caught by their nicety of design and finish, and their distinctive color.

On closer inspection he will see among other improvements that both legs of center head are exactly same length and ends formed, insuring accuracy on any circumference, large or small. That the double protractor is readily convertible into single protractor, serving perfectly for every sort of work.

When CANADIAN HARDWARE BUYERS Consult the thirty-fourth Annual Fall Buying and Directory Number During the Fall and Winter Months Will They Find Your Message There?

Read and re-read by the largest buyers of hardware in Canada. These men will purchase over $83,500,000.00 worth of goods in the next 6 months.

WHAT IS IT?

34th Annual Fall Buying and Directory Number of HARDWARE AND METAL. An Annual Buyers' Guide that is used extensively during the Fall and Winter months by buyers representing over 95% of the hardware purchasing power in Canada.

WHERE DOES IT GO?

It goes by paid invitation to every wholesale hardware company in Canada, over 90% of the hardware merchants rated in Dun's and Bradstreet's; 900 hardware sections of department or general stores.

WHEN DOES IT GO?

Date of Issue is August 19. Reaches the trade at a time when many of the most important orders for Fall and Winter trade are about to be placed.

WHO USES SPACE IN IT?

Manufacturers and wholesalers of heavy and shelf hardware, builders supplies, tools, paints and varnishes, iron and steel, guns and ammunition, stoves and furnaces, electrical goods, household labor saving devices, automobile accessories, oils and greases, cutlery, toys, and a wide range of other lines which are sold extensively by the hardware trade in Canada.

WHAT CAN YOU SAY?

You can solicit the Fall and Winter orders of the Canadian hardware trade. You can illustrate and describe lines which you have for sale to the hardware trade. You can give the names of distributors of your products in Canada. You can assist your present jobbers by featuring your products to the hardware trade, and giving a list of jobbers from whom your goods may be secured. You can feature any new lines which you have brought out during recent months. You can supply the retail clerks with useful selling points regarding your products—and the clerks will pass these points on to the buying public. You can place your house and your products before, practically, the entire hardware trade of the Dominion, thus showing Canadian hardwaremen that you desire their good-will, co-operation and business.

WHEN SHOULD YOU RESERVE SPACE?

Right Now. Write us a letter at once instructing us to reserve space for you. Last forms close August 16. Our Advertising Service Department will co-operate with you, without additional cost, in the preparation of suitable copy for the Canadian hardware trade.

We have specialized on "Publicity To the Canadian Hardware Trade for 34 Years." This is the last call for the 34th Annual Fall Buying and Directory Number. He who hesitates now, misses the most important "Hardware Buyers' Guide of the Year." Address your order, copy, and cuts to

What Can We Do To Help You?

Mr. SMP

Copyright, Canada, 1922, by The S.M.P. Co., of Canada, Limited.

Powerful advertising is creating a fine demand all over Canada for Diamond Ware and Pearl Ware. It is also broadening the market for all goods carrying the SMP Shield trade mark. If you have tied up to this campaign you have felt results in bigger turnover and larger profits in SMP goods.

If you haven't made any effort to tie up to this campaign, now is the time. Look over this list of free "dealer helps" and let us know what you need to help you.

(a) Twenty-six cuts of most popular utensils for use in your local advertising.

(b) Diamond Ware Window Trim; three back panels, twelve small cut-out figures, packed in carton.

(c) Pearl Ware Window Trim; three back panels, twelve small cut-out figures, packed in carton.

(d) Diamond Ware Window Trim, packed in carton; three back panels, eight small cards each to hold specified article.

(e) Pearl Ware Window Trim, packed in carton; three back panels, eight small cards each to hold specified article.

(f) Two Diamond Ware Window Cards.

(g) Two Pearl Ware Window Cards.

(h) Booklet: a Manual of Selling Points—"Helping You to Make More Money." Every hardware merchant should read this book.

(i) Price tags: 100 free to every merchant handling SMP Wares.

(j) Marking pencils for marking Diamond Ware or Pearl Ware.

(k) Giant ads to hang in window or store interior.

(l) Window transfers, shape of SMP shield — "SMP Quality Goods Sold Here."

Use your local paper to advertise, dress your windows frequently, and in every way possible spread the word that you handle SMP Wares. You'll find it well worth the effort.

A TIME TO THINK

Just about this time of year the matter of Lawn Mowers for next season is a problem that must be settled.

Please pause for a moment and consider that the SMART MOWERS have been giving satisfaction for over two generations in every country of the world.

It surely pays better to handle a known line of Lawn Mowers backed by a service organization such as the SMART people at Brockville maintain.

Heinisch Quality Shears and Scissors Sell Rapidly From This Plush Tray

Goods of the **best quality** are the first requirement for a profitable cutlery business — and next in importance is an attractive method of display.

For the past 100 years, Heinisch Shears and Scissors have held **first place** for perfect workmanship, durability and splendid finish — and this display tray exhibits them in a way that gets business.

This assortment (suitable for a small retailer) contains two each, of twelve leading patterns—one pair of each being mounted on the plush covered tray. These trays are detachable and can be placed in front of a customer to facilitate selection.

Write for details of our attractive proposition for dealers.

AT LAST A SEAT THAT WILL NOT BREAK

"THE EVERLASTING TOILET SEAT"

MADE IN CANADA

Our toilet seats are made of 7 pieces 1/7" veneer put up with our own waterproof cement. Each piece of veneer is full size laid cross wise to each other. This is recognized as the most modern method of building lumber when strength is necessary. It is the same as used for the motor board in the construction of aeroplanes to-day and the wooden part of our seats is fully guaranteed not to split, break nor come apart. If for any reason the seat goes wrong we will replace it free of charge.

7-PLY SEATS

Our 7-ply seats are equalling in thickness the one-inch lumber seat but are far superior in strength and are made to meet the demand of a really good seat at a low price. These seats are put up in paper bags and carefully crated.

9-PLY SEATS

Our 9-ply seat, equalling in thickness to one and a quarter inch lumber seat, is recognized as the strongest seat on the market to-day. It is surely the best value that money can buy though our prices are very moderate. The finish on these seats is of the best quality, and will favorably compare with any other seat. These seats are put up in individual boxes and crated carefully and the prices are not higher than any good seat on the market.

Easy to Handle

GARAGE DO

More Slater Garage Door Sets sold during 1922 than last year. People are becoming thoroughly sold on sliding doors for garages. The only way it will become universally good building practice is for Canadian dealers and contractors to advocate exclusive use of garage door sets, just as unquestionably as parlor doors are hung on parlor door hangers.

Announcing

two beautiful
new patterns

WE TAKE pleasure in presenting two new patterns in our well-known medium-priced flatware—Rogers 1881 brand.

The Salem and Essex patterns are worthy of being used for the best quality of flatware, representing, as they do, in the highest degree the characteristics of design most acceptable to the discriminating buyers of flatware.

There is now a very considerable sale for medium-priced flatware, especially for a quality as well-known as our "Rogers 1881" brand, and with these two new patterns, the jeweller will be in the favorable position of being able to offer an assured quality with a choice of distinctive patterns.

List prices are the same as other patterns in "1881" quality

Aero

Sash Cord

The Cordage with a Heart

is the only truly weather—rot—and stretch proof cordage made. It is superior in tensile strength and durability.

AERO Cordage is made by covering a special twisted fibre core with braided, multiple plies of cotton under high tension.

AERO Cordage is weather proofed—it is the best for sash cord, clothes lines, signal cord, tow lines, anchor cables, bell cord, whistle cord, trolley cord, awning cord, etc.

Put up in hanks and coils.

Aero Clothes Line Pulleys are made of wood—are self-lubricating and work smoothly and noiselessly.

They are weather proofed to repel moisture—they will not freeze up. The large axle and bearings make

AERO Pulleys capable of carrying heavier loads than any others—and the space between the groove and guard allows the knots to pass freely. Made in two sizes 2¾ in. and 6 in.

Order from your jobber.

A New Type Screw Driver

That Works Fast and Sells Fast

MILLERS FALLS Screw Driver No. 64 operates on the principle of a bit brace. You can drive more screws with it, in a given length of time, than you can drive with an old style screw driver.

That funny bend in the blade catches the curiosity of customers. They wonder what it's for and how the tool works. It takes just a minute to show them how to operate it with one hand by inserting the thumb in the bend of the blade. When they try it themselves, they wonder why somebody didn't get up something like it before.

No. 64 Screw Driver—a new Millers Falls tool. Electricians can use it. Any man around the house can use it. It sells on demonstration.

Here are the Specifications

Offset in shank affords firm grip in tightening screw.
Blade is securely fastened into the handle.
Length, over all, 12 inches.
Blade cabinet type. Special screw driver steel.
Polished. Handle, hardwood stained.
Weight (½ dozen) 1¾ lbs.
Packed ½ dozen in pasteboard box.

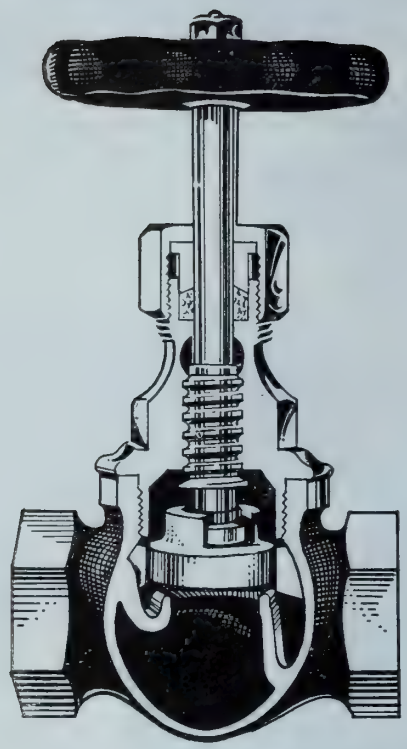
FAIRBANKS
Renewable
DISC VALVES
are money-makers



The Canadian Fairbanks-Morse Co. Limited, also supplies Pratt & Cady Valves in all sizes and types, and for all purposes. Pratt & Cady regrinding valves meet every requirement of those demanding this type of valve.

This is the product that has made the Fairbanks-Morse Co. famous as manufacturers of valves—the valve that renders efficient and economical service under all conditions. Its simplicity and strength alone are sufficient to recommend it, wherever valves from 1/8 to 3 inches are required. Note the removable, recessed brass disc but the work of a minute to replace. No nuts or washers to corrode or obstruct the flow.

All Fairbanks valves are constructed of the best brass, strong and well-proportioned, and made in globe, angle or cross designs, screwed or flanged.

Carry a full stock of these valves to meet the demands of contractors, plumbers, manufacturers. Write our nearest branch for prices and discounts.

Two New Display Features For Columbia Dealers

IN LINE with the Columbia policy of keeping dealers supplied with new and attractive advertising material, this new window trim, 52 inches long and 36 inches high, lithographed on linen in eight colors and mounted on a collapsible wooden frame, is ready for immediate shipment to you. Simply ask your jobber's salesman to have one sent to you or request it direct from us. The bras-etch sign illustrated in the lower cut is very attractive for window, counter or show case. It is made of brass, deeply etched and embossed in colors—ask us to send you one.

CANADIAN NATIONAL CARBON CO., LIMITED

MONTREAL TORONTO WINNIPEG

EVEREADY SPOTLIGHT

with the 300 foot range

1. Focusing Device.
2. Special Eveready Mazda Lamp.
3. Parabolic Reflector.
4. Shock Absorber.
5. Chamber, holds two extra Eveready Mazda Lamps.
6. End cap stamped with battery and lamp renewal number.

The Fall Sale for Eveready Flashlights and batteries is now beginning and will increase rapidly from now on—the result of the shorter days and longer evenings.

The sale of Eveready Flashlights during the Spring and Summer has shown a very healthy increase. This means that more batteries and bulbs will be required to keep these new flashlights in operation.

The Fall season offers unlimited opportunity for the dealer to increase his sales of Eveready Flashlights and Batteries. Do you know that a four times turnover on flashlight cases and a ten times turnover on batteries net you a profit of $414.66—100%?

This is something for you to consider and this rate of turnover is exceeded by many dealers.

The New Model "K"

EASY Vacuum Electric WASHER

—the achievement of 42 years' experience in building vacuum washing machines. Sales tell the story! The EASY is the Washer that saves **more** work than any other. That's why it is the machine women want **most.**

The vacuum cups gently force the soapy suds, air and water through fabrics without wearing them. The heaviest materials or daintiest laces are washed quickly, thoroughly and safely.

And now—still greater improvements!

Model K—the 100% Washer

The specially designed 3-point suspension frame has been combined with a new base support, making the EASY entirely self-draining.

The mechanism has been improved and refined, adding new smoothness of operation and quietness.

Examine the picture closely—see the switch, washer and wringer control handles—placed just where the hand most naturally rests—no leaning over to operate the EASY.

The large open tub is easy to load and unload; all smooth surfaces easiest to clean. All mechanism enclosed under the tub—out of the way.

The automatic oiling system is filled from the side, making oiling simple, and seldom to be thought of.

Notice the aluminum wringer—its beautiful lines, the extra long, polished drainboard and the convenient safety release. Equipped with ball bearings — 12-inch rolls and the smoothest operating reversing mechanism.

No wonder this is the machine women want most — **and the beauty of it all is** — the range of EASY prices enables it to compete with any washing machine on a low price basis.

Get the complete story of this highest achievement of all—the 100 per cent. washer.

Supply the Demand with Connor Products

and be Sure of Satisfactory Service

The Connor Electric Model 1

To describe this briefly; best quality extra thickness Cypress tub, mounted on a strongly braced steel frame galvanized; tilting tub for thorough drainage. Swinging wringer with best quality 12 in. rolls, reversible water board, and safety release.

The Economy Electric is designed to enable hardware merchants to meet the definite demand for moderately priced Electric Washing Machines. The Economy Electric does that and more. Consider a few of its selling points; Tub of stave-leg design mounted on four, full swivel casters; cypress tub of best quality, stationary wringer, 11 in. rolls safety release; reversible water board, simple in design.

Connor Low Pressure Water Motor Washers

For service and satisfaction this machine is without a peer. Machines of this model now in use over 12 years and show no signs of wear.

Canada First.—This reliable and effective hand power washer is still the popular cut gear machine, noted for its ease of operation. There are always many opportunities to sell a good reliable machine of this type. Display it well where your customers will see it.

We can supply you electros for your own advertising. Use them frequently, they will help you sell many machines.

When You Sell

LACO LAMPS

If in the process of reasoning out the type of lamp that you shall sell, you say to yourself: "If I sell Customer No. 1 a LACO LAMP he will not require a new lamp until that has burned for 1,500 hours, whereas Customer No. 2 to whom I sell an 'ordinary' lamp will repeat his order many days sooner." Do not be deceived! Customer No. 2 is looking for the best lamp for his money. Eventually he will buy a LACO LAMP and will have found it. You have lost his trade. On the other hand, Customer No. 1 is completely satisfied with the lamp you have sold him. He returns and repeats his order. He tells the first man he meets about LACO LAMPS and the dealer who carries them. The good news of a good product spreads and your business expands to meet it. It is the history of commercial success.

You sell a lamp that is 50% better than the average. Now with that honest fact to state, it is not difficult to interest the prospective customer. You'll always find him human enough to consider a suggestion that he gets more value for his money than he ever got before.

It is not only that when he buys a LACO LAMP he buys a better light, but that this better light burns a longer time. To be exact a LACO LAMP will give 1,500 hours of efficient light—as compared with the 1,000 hours an "ordinary" Tungsten lamp is supposed to burn.

Laco Lamps Live the Longest

Our salesman will gladly supply you with all particulars.

One Hardware Store Sold 168 Torringtons in 12 Months

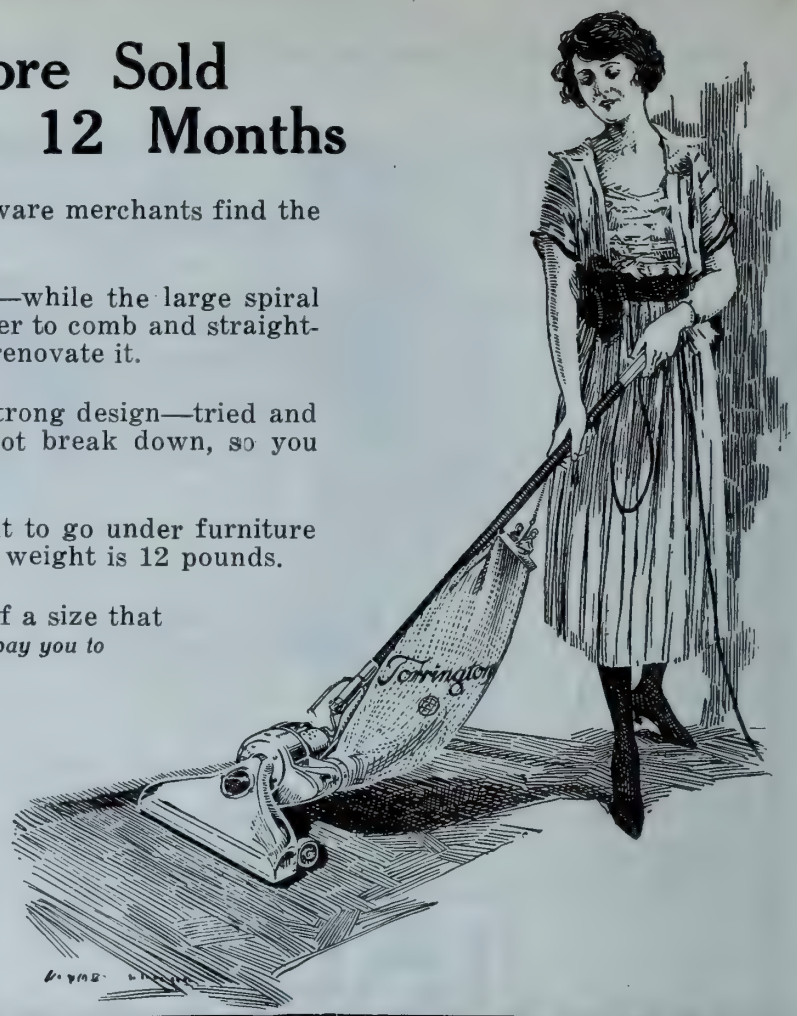
Here are some of the reasons why hardware merchants find the TORRINGTON is so easy to sell:

All the electric power is in the suction—while the large spiral brush runs naturally like a carpet sweeper to comb and straighten the nap so the suction can clean and renovate it.

The cool running motor is of a simple, strong design—tried and proven in thousands of homes it will not break down, so you have the minimum calls for service.

The illustration shows how low it is built to go under furniture —right into the corners—and the entire weight is 12 pounds.

The profits assured hardware men are of a size that exceeds most of your other lines. *It will pay you to inquire for our cost to you and other particulars.*



Manufactured by

The Torrington Company Limited

Upper Bedford, Que.

THERE ARE MANY GOOD REASONS why leading dealers throughout the country are taking up the exclusive agency for the "BlueBird" Machine.

They find it easier to sell the "BlueBird" at a popular price than to sell any other machine in competition with it.

Be a "BlueBird" dealer, and dominate the washing machine business in your community. Quality, price, appearance and our co-operation enable you to do this.

Gives you larger profits than any similar proposition.

There are still some territories open for exclusive agencies. Secure yours now and be ready for the large Fall trade that will certainly develop.

Write to-day for our selling and financing plan.

SPEED AND ACCURACY

All over the Dominion of Canada there are many purchasing agents of large industries who habitually order Butterfield Tools for their plants. They have made it a matter of routine to specify Butterfield Tools, because they know that they lower production costs by increasing each machinist's output, use less power, and require less grinding and tool-maker's attention.

The Butterfield variety includes almost every possible need, but we can assist you to specify any special requirement, because we make tools to order from working drawings or customers' samples.

Seeing

is believing

YOU KNOW that O-Cedar Products give complete satisfaction—your daily contact with hundreds of women who regularly buy these goods must have convinced you that O-Cedar is the quality Polish and the O-Cedar Polish Mop an absolute necessity in the modern home.

You have faith in O-Cedar—
How do your customers know you have?
Seeing is believing.

If they can see O-Cedar Products displayed on your counter, they will realize that you are a believer in O-Cedar — and having confidence in your judgment, they will readily buy these goods which yield so fair a profit to you.

O-Cedar Polish

One Step Further

When a woman does buy O-Cedar Polish, it is worth your while to go a step beyond merely handing it to her and taking her money.

Say to her:

1st. **Be sure to use it with water** which will ensure her using it in the one correct way to get proper results.

2nd. **It's good enough to use on your piano;** by which she will realize that O-Cedar Polish is quite as much a Polish for fine furniture as for floors. A lot of women wrongly imagine that O-Cedar is only for floors. By telling them it is for furniture—and improves even the most expensive furniture—you will help to widen the use of O-Cedar and thereby you will sell more of it

All of which we would not dream of suggesting to you, unless we were doing our part. We are doing a great deal to help you sell more O-Cedar, by advertising it consistently in a wide list of daily newspapers.

Channell Limited

extend to you and any other member of your family a very cordial invitation to make your Headquarters while at

Every Hardware Dealer Should Stock Dominion Decorative Wall Burlaps

Your best customers—Builders and Contractors, as well as householders generally, are buying Burlaps this year. If you do not carry stock they must buy elsewhere.

At present prices, (Burlaps are selling at lower prices now than for some time past), there is no more economical wall covering on the market.

Consider how easy it is to carry Decorative Wall Burlaps. They come in three shades only — White, Drab and Green—a large stock is therefore not necessary and a very small outlay only is required. Burlaps do not require much ground space—the margin of profit is generous.

Round out your Builder's Supply Department now by putting in Decorative Wall Burlaps. You will add materially to your profits.

Write us for selling helps and complete information as to prices, etc.

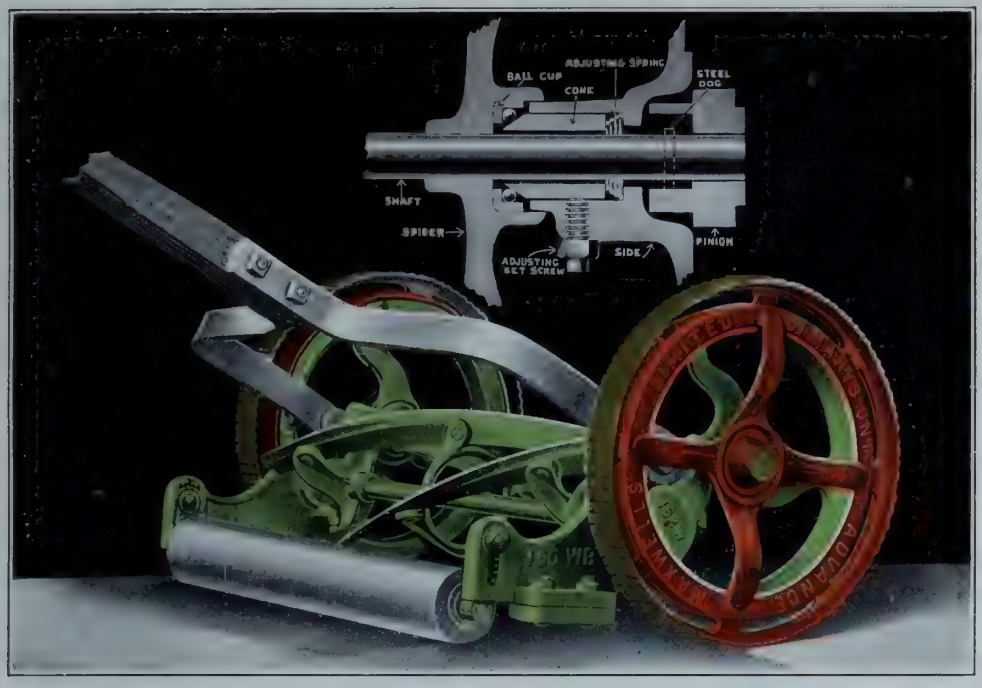
EVERY MAXWELL LINE A LEADER



MAXWELL
Lawn Mowers

Expert workmanship, approved design and well-tested materials combine to turn out these Maxwell machines, one of the most successful items in the Maxwell line of productions. Added to their mechanical reliability, is the attractiveness of their appearance as illustrated herewith, and every dealer knows that appearance carries a sale half way to completion. An order for Maxwell Lawn Mowers sent TO-DAY means increased trade and profit TO-MORROW.

ADVANCE (Ball Bearing)

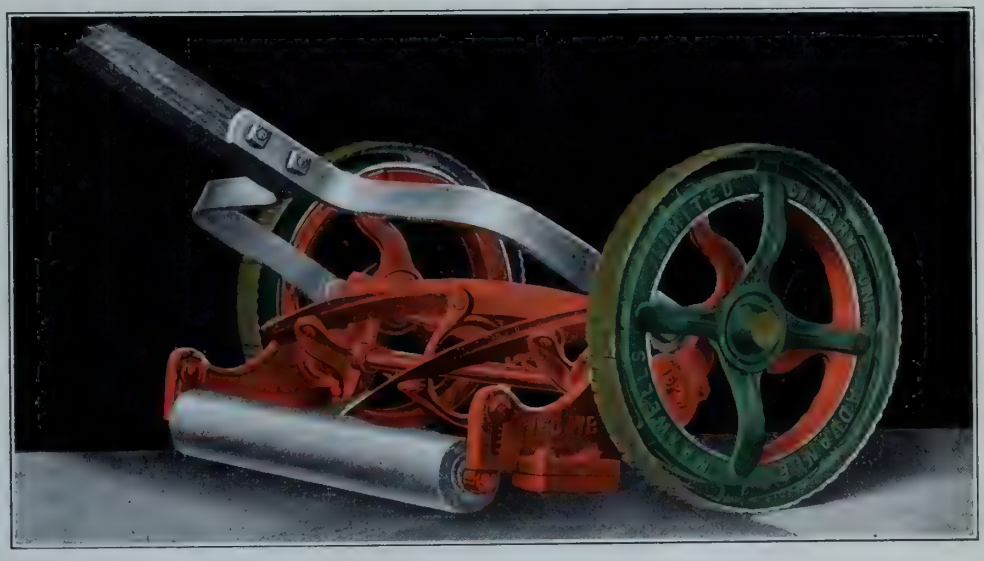
4 or 5 knives. The latest and most modern. Note improved Ball Bearings. Size of drive wheel, 10½". Best quality steel knives and cutting plate. Beautifully finished in Green, Red, Gold and Aluminum.

Sizes 14", 16", 18" and 20".

ADVANCE (Plain Bearing)

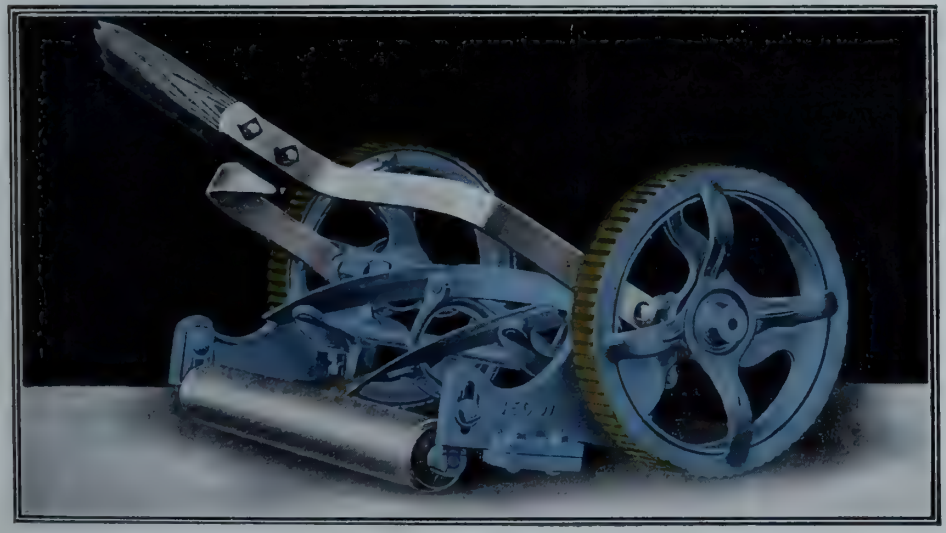
Made with 4 or 5 cutting knives. Wheel, 10½". Same in principle as the Ball Bearing. Best quality steel knives and cutting plate. Beautifully finished in Vermilion, Green, Gold and Aluminum.

Sizes 14", 16", 18" and 20".



Other Maxwell Products

If you are not familiar with the complete Maxwell line — washing machines, power machines, wringers, food choppers, wheel barrows, fruit presses, cider mills, and all farm products—write for a catalogue. Maxwell-built products are not the cheapest, but they are the best.



ADVANCE (9" Wheel)

Made in 3, 4 or 5 knives, also supplied with Ball Bearings same as 19½" Advance. Best quality steel knives and cutting plate. Beautifully finished in Blue, Gold and Aluminum.

Sizes 12", 14", 16" and 18".

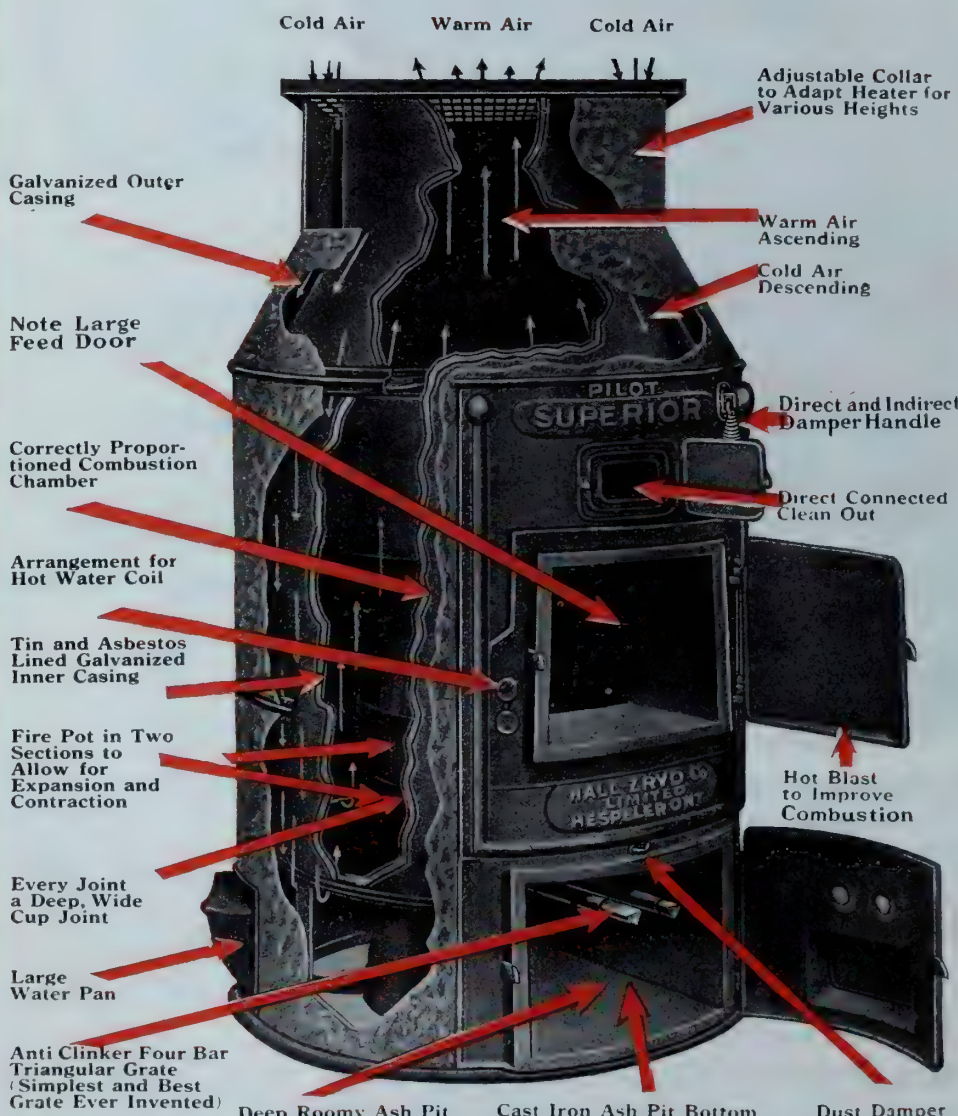
See our Exhibits at Canadian National Exhibition, Toronto
Western Fair, London. Central Fair, Ottawa.

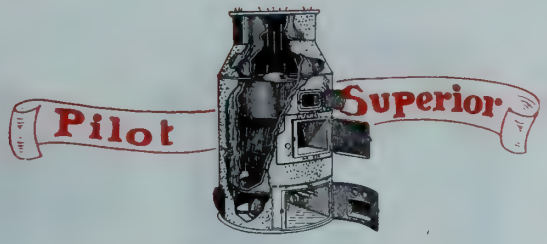
Nineteen Big Selling Superior

Examine These Selling Points



The Illustration is of our new No. 2400 Series With Cast Front and Extra Large Feed Door

Features in The Pilot Pipeless Furnace



EXAMINE the illustration on the opposite page. Note the splendid selling features of the "Pilot" Superior Pipeless Furnace.

Add to these points the fact that the "Pilot" Superior Pipeless is easy and inexpensive to install; only one opening to be cut in the floor; no network of pipes; cold air is removed from the house, not the cellar, keeping fresh, moist, warm air circulating, a protection against coughs, colds and sore throats; keeps the floors warm so that children may safely play on them, and leaves the cellar cool for storage.

The "Pilot" Superior Pipeless burns hard coal, soft coal, coke, wood or natural gas. The construction with inner and outer casings and asbestos linings insures cold kept out and warmth kept in.

The house is heated throughout with an abundance of heat; 25% of your fuel is saved.

Hundreds of new homes are nearing completion. Hundreds of old homes are being re-modeled. They are all good prospects.

We co-operate with you in order to secure the business. Write for particulars of our plan.

The Hall Zryd Foundry Co.,
Limited

Hespeler, Ontario, Canada

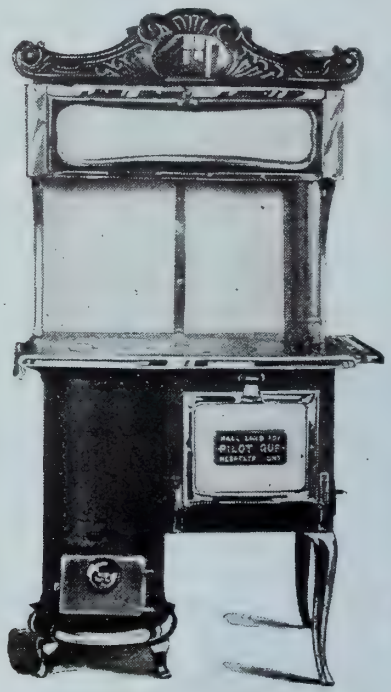
Three Great Sellers

The illustrations below will give you some idea of the handsome "Pilot" line that is creating big business and satisfied customers for hundreds of hardware firms. Every user of a "Pilot" range or heater is an advertiser for you and for us. If you have not looked into the possibilities for selling the handsome and practical line, get in touch with us now. The fall season is here, and there is big business ahead for those who sell the "Pilot" line. We work with you.

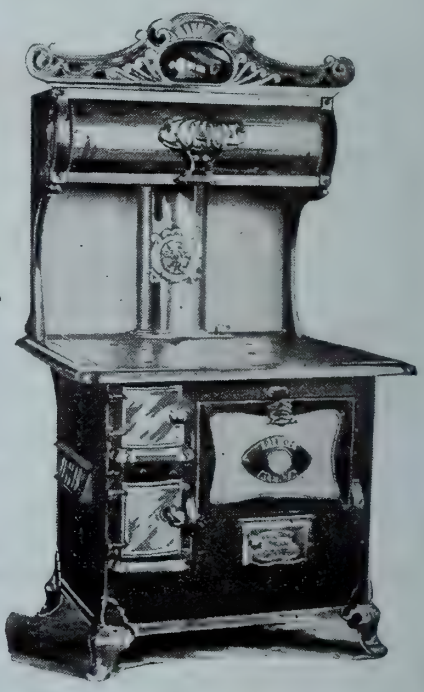


Pilot Quebec Heater

This is a particularly nice looking Quebec Heater. Very attractive in trim, having considerable nickel and white enamel about it and a decorative top with a mirror. This has a strong appeal to your customers that want a nice-looking and extremely serviceable Quebec Heater with a fine oven that bakes and roasts to perfection.

Pilot Gem

This is the useful and desirable four-hole, steel, cook-stove No. 8 or No. 9. It has a 14 x 18 inch oven. The grate is the desirable Duplex type. The top is fitted with 8 and 9-inch covers. This splendid cooker is supplied with or without high shelf; and with or without reservoir. Notice the abundance of nice, white enamel and nickel trim—this certainly makes a good first impression.



Pilot Alerta

This is made in two sizes: 16" x 20" and 20" x 20" oven so that you can offer your customers a choice in size. It is also supplied with or without reservoir. From the illustration you can easily judge the beauty of this handsome range. Note the bright, attractive, nickel trimming, the white enamel and the mirror in the decorative top.

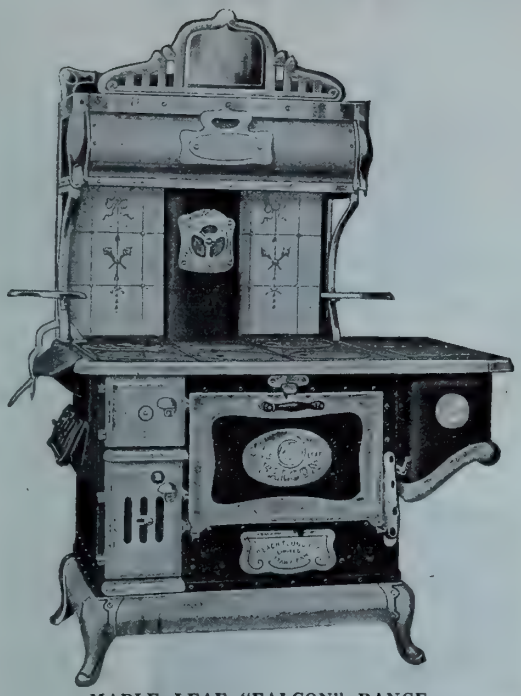
QUALITY IS ESSENTIAL



MAPLE LEAF "FALCON" RANGE
With Copper Reservoir and Special Warming Closet

The dealer who wants to hold his trade—to keep his customers always happy must be sure that the goods he sells possess "Quality."

"Quality" is the outstanding feature in the Maple Leaf Line of stoves, ranges, heaters and furnaces. "Quality" is the principal watchword and motive in our factory—and, therefore "Quality" is the outstanding feature of our entire product.

The dealer who handles the Maple Leaf Line is absolutely sure of creating customer friends who will stick by him always.

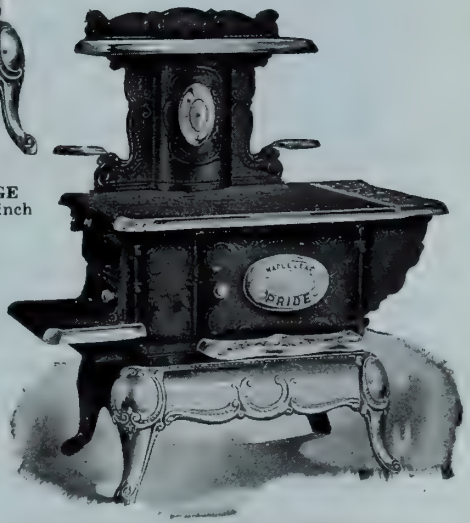
The Falcon is a steel range with all modern attachments and appliances that the house-keeper appreciates in a kitchen range. Beautiful in design and made in several different styles. The Falcon will back up any claim that you can make.

MAPLE LEAF "PRIDE" RANGE
With Tea Shelf, burns coal or 19-inch wood.

Dealers will find the Maple Leaf "Pride" a general favourite because of its efficiency and durability.

For quick, perfect baking the Maple Leaf "Pride" range provides the equal of any range manufactured and any dealer who will "bank" his stove business upon the "Pride" will not only earn substantial profits but reap the benefits of a large well satisfied clientele.

Pride ranges are compactly built, handsomely trimmed, and of standard construction. Users of the Pride range all testify to its splendid value and satisfactory performance supplied in a variety of designs.



MAPLE LEAF "PRIDE" RANGE
With High Shelf. Several Styles of closet and shelves to select from.

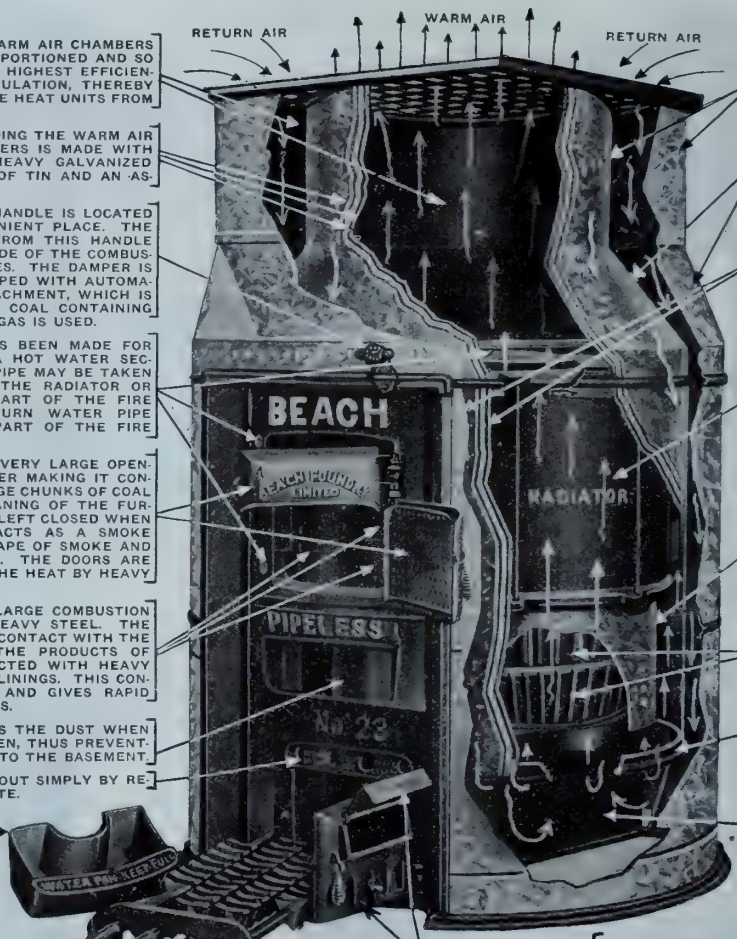
Beach Pipe and Pipeless Furnaces

On Display at Toronto and Ottawa Exhibitions



THE RETURN AIR AND WARM AIR CHAMBERS ARE SCIENTIFICALLY PROPORTIONED AND SO CONSTRUCTED THAT THE HIGHEST EFFICIENCY IS OBTAINED IN CIRCULATION, THEREBY OBTAINING ALL AVAILABLE HEAT UNITS FROM THE FUEL CONSUMED.

THE INNER CASING, DIVIDING THE WARM AIR AND RETURN AIR CHAMBERS IS MADE WITH AN OUTER LAYER OF HEAVY GALVANIZED IRON, AN INNER LAYER OF TIN AND AN ASBESTOS INTER-LINING.

DIRECT DRAFT DAMPER HANDLE IS LOCATED IN A HANDY AND CONVENIENT PLACE. THE DAMPER ROD LEADING FROM THIS HANDLE TO THE DAMPER IS OUTSIDE OF THE COMBUSTION CHAMBER AND FLUES. THE DAMPER IS OF FULL SIZE AND EQUIPPED WITH AUTOMATIC GAS EXPLOSION ATTACHMENT, WHICH IS VERY ESSENTIAL WHERE COAL CONTAINING A HIGH PERCENTAGE OF GAS IS USED.

SUITABLE PROVISION HAS BEEN MADE FOR THE INSTALLATION OF A HOT WATER SECTION. THE HOT WATER PIPE MAY BE TAKEN THROUGH THE TOP OF THE RADIATOR OR THROUGH THE UPPER PART OF THE FIRE DOOR FRAME, THE RETURN WATER PIPE THROUGH THE LOWER PART OF THE FIRE DOOR FRAME.

THE TWO DOORS GIVE A VERY LARGE OPENING TO THE FIRE CHAMBER MAKING IT CONVENIENT FOR ADDING LARGE CHUNKS OF COAL OR WOOD AND THE CLEANING OF THE FURNACE. THE TOP DOOR, IF LEFT CLOSED WHEN FIRING THE FURNACE, ACTS AS A SMOKE PLATE AGAINST THE ESCAPE OF SMOKE AND GAS WHEN ADDING FUEL. THE DOORS ARE ALSO PROTECTED FROM THE HEAT BY HEAVY METAL LININGS.

THE HOUSING FOR THE LARGE COMBUSTION CHAMBER IS MADE OF HEAVY STEEL. THE PARTS COMING IN DIRECT CONTACT WITH THE EXTREME HEAT FROM THE PRODUCTS OF COMBUSTION ARE PROTECTED WITH HEAVY CAST SHIELDS AND CAST LININGS. THIS CONSTRUCTION IS DURABLE AND GIVES RAPID RADIATION OF HEAT UNITS.

THIS DUST FLUE ARRESTS THE DUST WHEN GRATES ARE BEING SHAKEN, THUS PREVENTING IT FROM ESCAPING INTO THE BASEMENT.

THE GRATES ARE TAKEN OUT SIMPLY BY REMOVING THIS GRATE PLATE.

LARGE WATER PAN IS CONVENIENTLY LOCATED IN THE OPENING UNDER THE FIRE DOOR IN FRONT OF THE DUST FLUE AT A POINT WHERE THE HEATED CASTINGS EVAPORATE THE WATER RAPIDLY. THE HUMIDITY FROM THIS PAN GIVES MOIST WARM AIR CONDUCIVE TO GOOD HEALTH.

THE HOUSINGS FOR THE AIR CHAMBERS CAN BE ADJUSTED TO ANY BASEMENT HEIGHT.

ABSENCE OF ANGLES AND SHARP TURNS REDUCES FRICTION AND PREVENTS THE POCKETING OF AIR, THEREBY GIVING AN EASY AND FREE CIRCULATION OF AIR INTO AND OUT OF THE FURNACE.

SPECIAL LUGS WITH LONG THREADED SCREWS ARE ATTACHED TO THE INNER AND OUTER CASINGS AND SO ARRANGED THAT THE FURNACE CAN BE ASSEMBLED WITH EASE AND A GOOD TIGHT JOINT OBTAINED.

RADIATOR IS OF THE HORSE SHOE DESIGN AND OF LARGE SIZE, THE INNER PART OF WHICH FORMS THE COMBUSTION CHAMBER. IT IS OF HEAVY WEIGHT AND STRONGLY CONSTRUCTED, ALL RODS AND BOLTS BEING OUTSIDE OF COMBUSTION CHAMBER AND FLUES. THE STEEL HOUSING OF THE RADIATOR IS DRAWN TIGHTLY AGAINST HIGH CAST METAL RIBS, THEREBY MAKING A PERFECTLY GAS TIGHT JOINT.

SHIELD PREVENTING THE DIRECT HEAT OF THE FIRE POT FROM COMING IN CONTACT WITH THE LOWER PART OF THE INNER CASING PREVENTS THE FORMATION OF EDDIES OF HOT AIR AND THUS INCREASES THE FREE AND EASY FLOW OF THE HEATED AIR IN THE WARM AIR CHAMBER

HEAVILY RIBBED TWO PART FIRE POT FITTING TOGETHER WITH DEEP CUP JOINTS MAKES THEM DURABLE AND PREVENTS THE ESCAPE OF DUST OR GAS. GUARANTEED.

THE WARM CHAMBER CASING BEGINS AT THE PROPER HEIGHT FROM THE BASE AND PERMITS THE RETURN AIR AT ONCE TO COME IN CONTACT WITH THE HOT CASTINGS.

VERY LARGE ASH PIT, WHICH MAY BE CLEANED EASILY ON ACCOUNT OF THE SQUARE ENDS.

THE LARGE ASH DOOR IS EQUIPPED WITH A DROP DRAFT DOOR PROVIDED WITH CHAIN AND PULLEYS FOR CONTROLLING THE FIRE FROM THE FLOOR ABOVE. THE ASH DOOR IS ALSO PROVIDED WITH SLIDE DAMPER.

THE GRATE BARS ARE HEAVY, DURABLE AND OPERATE INDEPENDENTLY OF EACH OTHER, OR MAY BE OPERATED IN PAIRS BY THE ADDING OF GRATE BAR COGS. THEY ARE ALSO EASILY REMOVED BY TAKING OFF THE GRATE PLATE.

More Heat——Less Trouble

That is what you are guaranteeing your customers when you sell them one of the famous Beach Heat Makers. You have the double satisfaction of knowing that your customer is well satisfied and that you have made a handsome profit.

Business of this kind is nice, clean and satisfying and it is the kind that the dealer is always sure of when the goods handled are the famous Beach Maple Leaf Brand.

Get in line with this gratifying business. If you are handling Maple Leaf—push them to the limit. If you are not handling Maple Leaf—decide now to do so.

SHAKE HANDS WITH OPPORTUNITY

"The Caloric is easy to sell, at a good profit, and once sold is always sold"

A. T. ADAMS
Caloric Dealer

The Caloric simplified system of heating can easily be sold in nearly every home in your community—because it heats the entire home better—at lower cost—and pays for itself in fuel saved.

The Caloric is the product of the foremost manufacturer of warm-air furnaces in the world. Proved superior in actual service in more than 135,000 buildings, throughout Canada, the United States and European countries.

Caloric selling and installation have been reduced to a science by the Caloric organization. Caloric engineers make free blue prints for each installation—and these are so simple that two ordinary men can install the Caloric in a day's time.

The result is that thousands of dealers who never before considered it practical to sell a heating plant have gone into the rich field of selling Calorics. Right NOW is the time to cash in on the big new building market. Write to-day for details of the Caloric opportunity in your territory.

Made by Canadians in our factory at St. George, Ont.

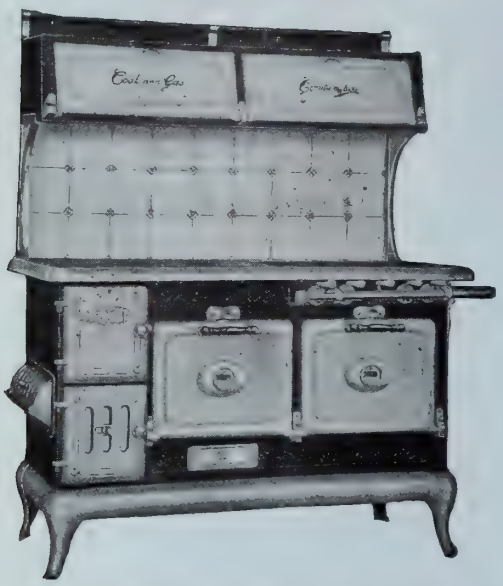
CALORIC

PIPELESS

SYSTEM OF CIRCULATING HEAT

FAWCETT

Illustrating Only Six of the Most



The New Coal and Gas Combination Range:

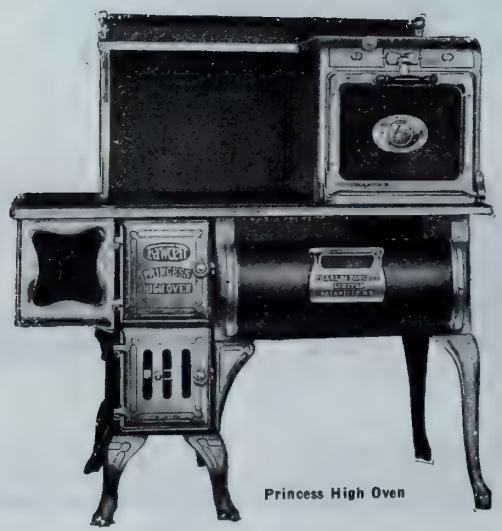
You can't compare this range to any other on the market, for there is none with which to compare it. Note its features of convenience, its novel beauty, **its two fine big ovens 16 x 18 x 12** for roasting and baking. The oven on the left is heated by the fire and the oven on the right by gas, and these ovens can be used simultaneously or individually. With only one oven going the other can be used as an additional closet to the **two** closets above. The heat is perfectly regulated, and the fire box is the large standard size, and uniform with those on the opposite page. The porcelain back is the full width, 16¼ inches high; the trimmings are smooth nickel plated, and the construction of the flue guarantees perfect efficiency. The top is 50″ x 24″—just the size of an ordinary coal range with a reservoir—and the **price is little more than a good coal range.**

Cabinet Gas Range: One of the fine conveniences of this range is the shelf that swings up out of the way to admit preserving kettles, wash boilers, etc. Then the baking oven and the broiler are at the handy standing height that appeals so much to women, and the cooking top has **four** gas burners.

The space below the cooking top is handy for dishes, etc., and crowning all these features is the fine finish, the enamel splash boards (if ordered so) and nickel fittings—making this range the best value on the market.

Princess High Oven: The ideal range for the small family; it burns any kind of fuel and the top can be fitted for four 8″ or four 9″ covers. It has all the advantages of a high oven range at the **cost of an ordinary small one.**

Its ease of operation, simplicity and handsome appearance makes it a splendid seller. Made in one size only with a 17″ oven—is the only one of its kind on the market, and can be supplied with a reservoir and enamel splash boards when desired.



Princess High Oven

Besides the "Princess High Oven" we manufacture all the other popular selling styles of gas ranges.

Our ranges have uniform fire boxes—dealers need carry only one stock of spare parts. We also use copper-bearing steel to guarantee quick, even radiation of heat.

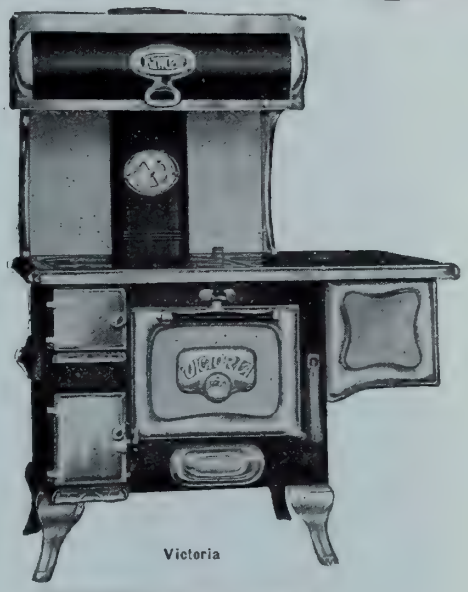
FAWCETT

Complete Line of Stoves and Ranges

Including every size and style from the heavy large Furnace Range to the smallest, lightest Range for a cabin or flat.

Victoria Steel Range:

There is always a large demand for this light steel range with its handsome lines and smooth nickel trimmings. It particularly suits the city trade for a low-priced range that takes up little space, and gives a service that is really out of proportion to its low cost. It burns any kind of fuel, fitted with 8″ or 9″ covers, and the ovens are made in three sizes 16″, 18″ and 20″. A splendid baker and cooker.



Victoria

Marvel Steel Range:

This is a general favorite not only because it is medium in price, but it is an A1 roaster and baker and gives a life long service. Note too the height of the oven and how easy it is to reach and clean the floor beneath it, the nickel plated fittings, high oven, drop brackets and its handsome appearance. Can be supplied with reservoir and white enamel trimmings.

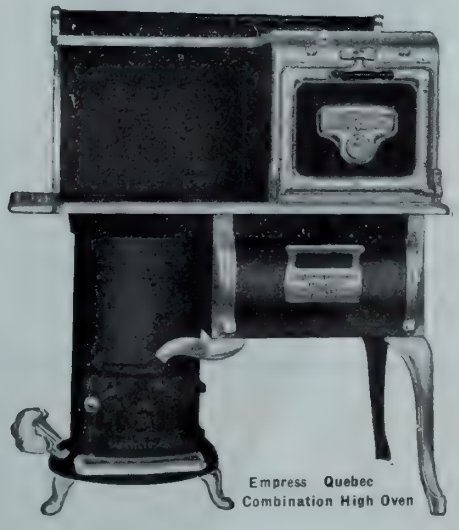
It is built with 16″, 18″ and 20″ ovens, with 8″ or 9″ covers, and the fire box is easily fitted to burn either coal or wood.

Marvel

Empress Quebec Combination High Oven:

This is the latest in a combination heating, cooking and baking stove. It is perfect, sensible, practical, and designed to appeal immediately to the buyer who wants the most value for the money. The high oven fitted with a thermometer is a special feature, at standing height and eliminates unnecessary stooping.

There are four 8″ or 9″ holes on the cooking top, and the heat is distributed evenly and perfectly controlled. A fine cooker, it will heat a small sized house, and to fully appreciate this stove you have to see it.



Empress Quebec Combination High Oven

FAWCETT

Pipe and Pipeless Furnaces

Scorcher

This is a strictly wood furnace—made in three sizes—and will take big pieces of **cordwood 36″, 40″ and 56″ long,** according to the size of our furnace used, while the ordinary upright furnace can only take sticks 18″ to 24″ or 26″ long depending on the size of its fire pot. The SCORCHER is specially designed to fill the demand for a pipeless furnace that will thoroughly heat buildings with wood as fuel. The large size feed door will admit big, rough pieces of wood, and the illustration shows how different the design is from an upright furnace. There must be a demand for a WOOD PIPELESS FURNACE in your vicinity—better write for full information.

Rival Villa

There is a demand for a furnace costing about the price of a good heating stove. Here it is! This is a small portable type of furnace that is particularly adapted for installation in small homes.

It warms **all** the home with clean warm air, while a heating stove will only radiate heat for a short distance. It is always ready for instant use, and with the RIVAL VILLA in a home there is no fuel or ashes to carry through the house to create a mess that is difficult to clean up. The low cost will suit your "closest buyer."

We invite correspondence from dealers. Write to-day for prices, etc.

The Finest Heating Systems

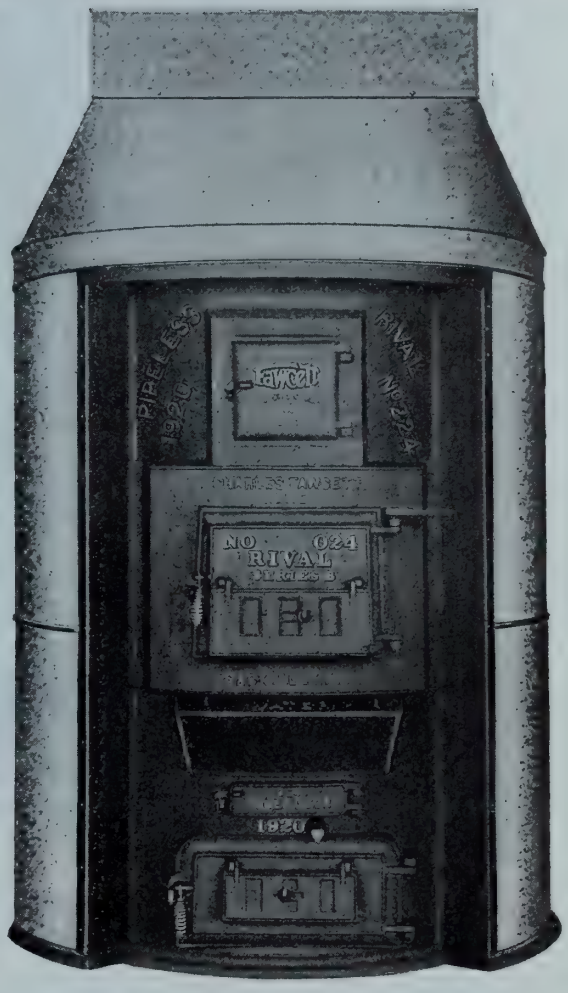
Peerless Rival

This pipeless furnace is a proven heating system that is absolutely sound in principle and has been proven so in practical use. This is the **elevated radiator** type that is recommended by furnace experts as superior to any other form of hot air furnaces for burning coal.

The PEERLESS RIVAL satisfactorily operates in residences, schools, churches, stores, etc., and will heat all parts of the buildings with clean invigorating warm air. **You** can guarantee every one because **our** guarantee is behind you. The ash pit is cast all in one piece, which effectually prevents any dust, gas, etc., escaping into the air chamber and on into the rooms above, as happens with many other furnaces.

The illustration enables you to see the permanent construction of the PEERLESS RIVAL that makes it do better work—do it more economically, and give unlimited satisfaction to the owners.

There is a big market for this furnace in your district—it is made in **five** sizes for pipeless or pipe installations.



You Not Only Buy Our Furnaces You Buy Service

Our Heating Engineers give you co-operation, advice and recommendations that assure you and your customers of correct installations.

Heaters!

Our complete line of good heaters have been built to properly heat Canadian homes.

There is one to suit every need and pocket-book of any of your customers. Every one has the durability and right appearance that satisfies customers. We have been manufacturing for over sixty years.

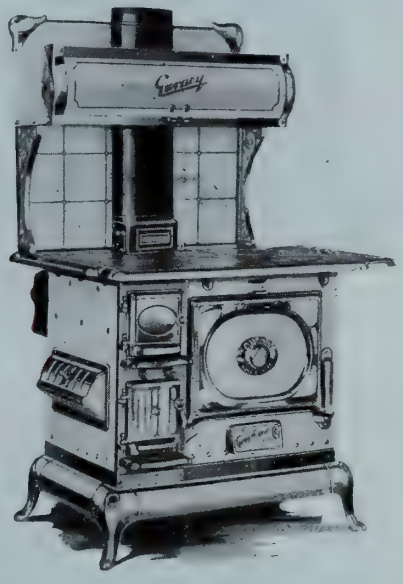
GURNEY "ARCADIA"

A handsome range at a low price has been our ambition for years, and we have accomplished this in our "ARCADIA", nothing more could reasonably be expected at the price. The only reason that we can give such value is that we expect to place a great many of these in Canadian homes this year.

Four nine-inch holes, one reducing cover, heavy cast iron fire bricks, wood extension at back. Extra heavy duplex grates, for coal or wood, deep ash pit. Large square oven with thermometer, slide and direct draft dampers, high closet, copper reservoir and can be supplied with water front if desired.

Send for our new catalog for details of this range.



GURNEY "LAURENTIC"

A new steel range, medium size, four nine-inch holes and two seven-inch covers, with or without reservoir, with or without high closet, large square oven, fire box of unusually good design, beautifully trimmed, and will be appreciated in any kitchen. This range is also made in the "D" finish like illustration. This white enamel finish sets the stove off and makes one of the cleanest and most attractive looking ranges in our line.

A lifetime Gift

Many dealers are finding a good talking point in selling Stoves and Ranges from the "gift" standpoint.

It is a common practice in many homes, at certain periods of the year, to give gifts in the form of useful household equipment and for this purpose a Davidson Range is about as satisfactory as any selection that can be made.

The Davidson Range possesses all the requirements that the gift of a lifetime should possess, and of the many lines that we make, we have selected as the gift to last a lifetime the

"Premier Marathon"

All-Steel Range

It is something by which everybody in the household will benefit. It is guaranteed by us to be the best value in any steel range on the market.

The "PREMIER MARATHON" can be supplied with white enameled panels on back and oven door, nickel plated trimmings, also a high warming chest or Persian Closet, or tea shelf. There is a heavy seven-gallon copper reservoir at back which ensures warm water all the time. The grate will give an even, thorough combustion of coal and will be found most economical, while the oven itself is well insulated and ventilated, and is quick baking. The front section conveniently lifts for toasting, broiling or adding coal.

The "PREMIER MARATHON'S" main features are Quick Baking, Correct Regulation, Durability and Economy. It comes in several sizes and styles.

Send for illustrated folder **"Davidson's Stoves and Ranges,"** free on request, featuring other Premier Stoves — **"Leader," "Argus," "Knight," "Royal," "Chieftain."**

The Furnace That Heats With Less Fuel

Your customers this fall will be keenly, vitally interested in the matter of fuel.

More than ever, "How much coal will it burn?" will be the BIG question in the mind of a prospective furnace buyer.

In the Jewel Pipeless Furnace the materials, the workmanship and the designing, particularly in the matter of air circulation, on which the heating value of a Pipeless Furnace depends, are of a distinctly superior character.

No furnace could be better designed to receive cool, returning air; to so promptly heat it and send it forth again, bringing grateful, genial warmth to every corner of the house.

The application of sound, time-tested knowledge of heating problems, plus sturdy materials and expert workmanship, makes the Jewel Pipeless A FURNACE that HEATS WITH LESS FUEL.

Any Ware"

"I wish my entire stock were Disstonized!"

THAT is the tribute paid to the Disston line by Frank V. Turner, a progressive hardware merchant. After making that statement he wrote to our company as follows:

> "—we find it is a fact that the Disston products are in demand and are much easier sold than many other lines. In this connection will say that one day last week a clerk was showing our line of saws to a prospective customer and presently handed him a Disston saw, pricing it at the standard price, and the fellow at once said: 'That is the saw I want, for I know what I am getting when I get a Disston Saw.' So it is no wonder that I was led to remark that 'I wish my entire stock were Disstonized.' You surely have my permission to use the above remark, for we positively do feel that if all lines were as well known and gave as universal satisfaction as this line, sales would be much easier and our customers well satisfied."
>
> Yours Respectfully,
>
> FRANK V. TURNER

Now study the list of tools shown on the opposite page. Only a fraction of the complete Disston line is shown, but all the tools will find a ready sale in your store ***now.***

DISSTON
SAWS TOOLS FILES

To Help You DISSTONIZE Your Stock

Here are tools that are easy and profitable to sell

(1) Disston Screw Driver. Blades of special grade of steel found to give greatest durability. Properly fitted handles of hardwood, comfortable to the hand.

(2) Disston Marking and Mortise Gauges. Varieties range from those made of plain hardwood to more expensive box and rosewoods, with plated cutting heads and stem.

(3) Disston Back Saws. Blades of Disston-made Steel evenly tempered and accurately ground to run with minimum amount of set.

(4) Disston Taper Files. These are the files for long life. Files are subjected to actual filing test before passing inspection at the factory.

(5) Disston Plastering Trowel. Our line of plastering trowels is more complete and varied than any line on the market. Tight rivets, thin blades, mountings and handles properly placed insure proper balance and ease in working.

(6) Disston Hack Saw Frames. All styles. Model shows extension frame. Very strong and rigid. Design of handle affords easy operation and control.

(7) Disston Hand Saws. The standard the world over. We are the oldest and largest manufacturers of hand saws in America.

(8) Disston Brick Trowels. Are made with careful consideration given to balance, lift and weight. Obtained by up-to-date forging and grinding facilities.

(9) Disston Saw Sets. Made on the proper principles. Have a double lever. One plunger tightly clamps saw blade on the anvil, while the other sets the tooth. Adjustable for various points of saws

(10) Disston Try Squares. Made from well-seasoned lumber to prevent warping and cracking. Blades made of spring steel accurately finished and graduated. Heavy Brass face firmly secured to the stock.

(11) Disston Compass Saws. Screws all the way through handle and blade fastened with flush nut.

(12) Disston Adjustable Plumb and Level. Quick and simple of adjustment, at same time accurate. No springs to get out of order. If level has been disturbed slight turn of a screw will set the bubble true. Complete assortment.

(13) Disston Mill Files. About 35,000 dozen files are annually consumed by our workmen in the manufacture of Disston Saws. This gives us an accurate check on the quality of our files.

(14) Disston Chromol Hack Saw Blades. They are made from special alloy steel, milled teeth and set with raker tooth to obtain greatest ease and clearance in cutting.

Disston Saws, Tools and Files are sold by leading jobbers everywhere. Write to us for information on any of the tools shown here.

Why Hardware and Metal has Such a Large Western Canada Circulation

THERE are many reasons why Hardware and Metal covers Western Canada as thoroughly as the other parts of the Dominion. Some of the outstanding reasons are:—

Hardware and Metal is the *only* hardware paper giving a weekly market service from Western Canada.

Hardware and Metal is the *only* hardware paper giving a weekly news section for Western Canada.

Hardware and Metal is the *only* hardware publication giving the trade in Western Canada a weekly market service from Montreal, Toronto, London and Pittsburgh—and Westerners are even more interested than any others in the activities in the primary markets of the East.

Hardware and Metal is the *only* publication in Canada giving the Western hardware trade a weekly service covering the activities of the hardware trade in a National way.

Hardware and Metal is the *only* hardware publication giving the Western Canada trade a weekly market service on paints, oils, varnishes, etc.

Hardware and Metal is the *only* hardware publication giving the trade any Western Canada weekly information regarding, "What Other Merchants Are Doing," Legislation, New Hardware Goods, Illustrated Articles on Display, Advertising, Etc.

Hardware and Metal during the twelve months of the year, supplies the Western Canada hardware trade with more market information, more new goods information, publishes more illustrations of window displays, store interiors, and retailers' advertisements than all the other Canadian hardware trade publications combined.

Incidentally, Hardware and Metal is the only hardware trade publication in Canada that will supply you with an Audit Bureau of Circulations statement, thus proving what it really has in the way of circulation in Western Canada.

MORAL—*If you are interested in Western Canada trade, advertise in the paper that is read by the Westerners and has gained its present dominating position in the West, as well as in other parts of Canada through 34 years of honest effort to give the trade each week the best in hardware trade newspaper service.*

Attractive Display Means Increased Sales

Keep a good stock and display it well and you will greatly assist the personal sales ability of yourself and your employees.

Attractively displayed merchandise in the best store equipment you can buy will enable you to make many sales where ordinarily you would be supplying only the existing needs of your customer. Then there is the importance of keeping everything where it is readily accessible. Cameron fixtures are built on the interchangeable unit system. All bases and sections are interchangeable, enabling you to re-arrange your stock and fixtures at any time. Cameron fixtures are adaptable to any size store.

All shelving in sections or bases, open or behind doors, is adjustable. The end panels of the sections and bases are removable and can be supplied as required.

The boxes are standard metal shelf boxes with exception of the large drawers, which are more practical in wood.

Send us rough sketch showing ground plan and dimensions of your store. We can give you valuable assistance in solving your store arrangement and equipment problems.

Write for complete Catalogue of Cameron Fixtures for Every Purpose.

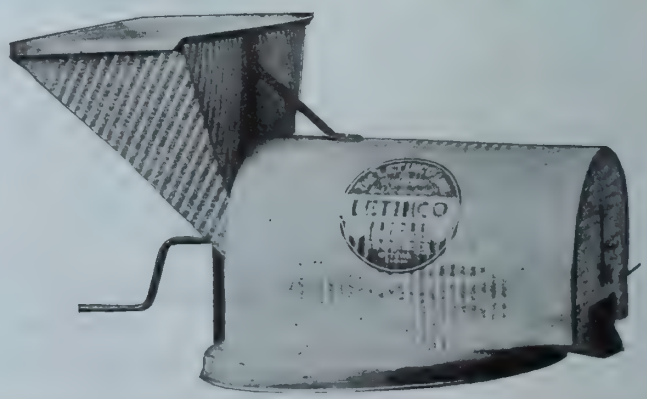
Sold by leading Wholesale Hardware Dealers. Now is the time to book your fall and winter orders.

Drop us a card and we will give you full information.



Leslie Tinware Co. Limited

114-116 SCOTT ST., OTTAWA, CANADA

QUALITY

TORONTO QUALITY ROOFINGS LOOK DIFFERENT—ON THE OUTSIDE AND ARE DIFFERENT—ON THE INSIDE

THERE IS A WORLD OF DIFFERENCE IN ROOFINGS

The paper-soled shoe may look like its cousin of solid leather—but it really is DIFFERENT, and this difference is emphasized in wet weather. It is just the same with roofing—the ordinary kind—that someone will ask you to buy because it is cheap; and that is really not made to withstand rain and sleet, scorching sun and the vicissitudes of bad weather.

BUT—TORONTO QUALITY ASPHALT ROOFINGS ARE DIFFERENT!

Every little item that enters into the manufacture of these superior products is selected by an expert, and manufactured under the "James Milne Process," which insures you TROUBLE-PROOF ROOFING.

Toronto Quality Asphalt Slates were recently selected for the roof of the Sunnyside "Merry-go-Round" Pavilion, in Toronto. These Slates were laid in mid-winter and have withstood the violent spring storms off Lake Ontario, immediately after being laid, and they present an attractive and finished appearance unobtainable in a less worthy product.

We ask you to buy them because of their inbuilt quality.

TORONTO QUALITY ASPHALT ROOFINGS MAY COST MORE BECAUSE THEY ARE WORTH MORE, BUT THEY ARE WORTH MORE THAN THEY COST

—*It's a JENKINS Rapid Action VALVE*

It isn't possible for you to give your customer a more satisfactory quick-opening valve than this genuine Jenkins Model.

Particularly adapted for laundry service these Rapid Action Valves save valuable time in filling washers. They open full with one-quarter pull of lever and stay open automatically. A slight pull on lever and they are closed tight. No leakage. No water waste.

Jenkins Rapid Action Valves are made for use in laundries, garages, creameries (for bottle washing), shower baths, steam pressing tables and wherever else a quick-opening valve is needed.

Write for prices and descriptive literature.

GTD REAMERS
CLEAN --- TRUE!

Hand Reamer

It takes years of experimenting and study to design a successful reamer that will produce uniformly smooth, straight, round holes—economically. Too much or too little rake or clearance, or incorrectly spaced teeth and the balance is lost.

There's 50 years' experience back of GTD reamers, 50 years of successful operation to their credit and almost 50 styles described in our new Small Tool Catalog, No. 46A.

Users of GTD Reamers will tell you what dependable, long service, economical tools they are—typical GTD products, from cutting edge to core. Specify GTD on your next order.

"ACME"
Shears and Scissors

A specially desirable line to sell in conjunction with high-priced cutlery. That they sell in volume is amply attested by the fact that we make 35,000 pairs of them a day. Your market is assured. These efficient scissors and shears are exceptionally good value for the low price.

The first requisite of good shears and scissors is to cut; the specially hardened sharp cutting edges of Acme Shears cut perfectly.

Acme Shears and Scissors sell especially well when effectively displayed. Write our nearest agent for information in regard to the handsome and attractive display stands of Acme Shears and Scissors. These displays work all the time—even when you're busy with other sales.

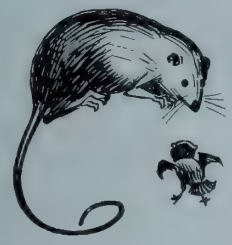
Off with the old love - on with the new.

MADE IN CANADA
TRADE Gillette MARK
KNOWN THE WORLD OVER

Says the Wise Old Owl:



To the owlet nestling in the nest,
Ere spreading forth his wing,
Dependent still on his mother's quest,
A mouse is a mighty thing. -
Comes the time when the owlet flies
Off to his own tree trunk. -
To hunt for himself and find the size
Of the mouse a good deal shrunk
And so with man when he goes abroad -
So with what meets his eyes -
If a Ford is all he can afford,
(Excuse the pun) He buys
For years will his first love hold his heart,
Together they will stay.
But one day Success will bid them part
And "Lizzie" go her way.

The Buyer of a Gillette Brownie is always your prospect for a New Improved Gillette.

The blade business keeps him in touch with you, and when he feels he can afford to own the best razor in the world, he will come to you for it—the New Improved Gillette.

Meantime, you have been profiting on your sales of blades perhaps even to a greater extent than you do on the New Improved, in that the new razor lengthens the life of every blade by several shaves.

Your shaving corner is the best corner of your store and the Gillette Safety Razor the best thing in the corner — building steadily, building solidly, building permanently—building, always building.

And the "kid brother" or whomsoever else inherits the old Brownie is a new blade customer for you and a new prospect for the New Improved.

Those Inaccessible Soldering Jobs—

The kind that make you squirm and swear until they're done—those jobs are made *easy* and *simple* with Kester Acid Core Wire Solder. All you do is to apply a touch of heat and Kester Solder and the job is finished—*quickly, economically* and *permanently.*

The reason? Kester Solder has an *acid core* that feeds the proper amount of flux as the solder is melted, and in this way eliminates the troublesome pot of acid or paste and the messy swabs, sticks and brushes; besides the job is done in half the usual time.

Kester Solder comes coiled in one-pound cartons or on one-pound spools, but for quantity users it is more economical to buy it on five and ten pound spools.

Dealers everywhere stock Kester because it is a *clean, fast seller,* and brands their store as an establishment that caters to the modern mechanic.

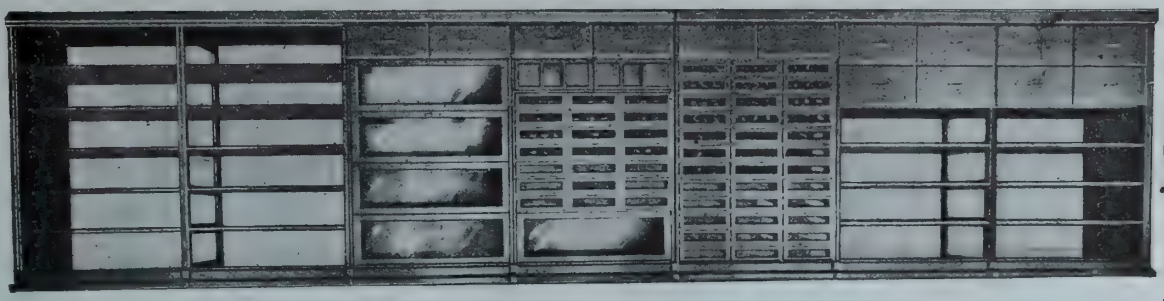
Display Snaths for Early Sales

Book your Snath stock early. Have Snaths on display in your windows to catch the earliest sales. Talk Snaths, advertise and push them right up to the season's end.
Snaths are a profitable line to sell. Keep them moving; they pay you in sales. Don't give them a chance to stay in the store. Write your jobber.

Dominion Snath Co., Limited
Waterville, Quebec



The Question ? ? ?

THERE ARE TWO QUESTIONS THAT HARDWARE MEN ARE ASKING THEMSELVES:

1. How can I meet the reduced prices that are demanded of me when so much of my essential upkeep cannot be reduced? My rent or carrying charges are not coming down and I don't want to cut wages.

2. When I have reduced prices how can I convince my buying public that they are down as far as they can go?

The first question to fit most cases might be, how can I sell more goods? How can I do with less help? How can we get same turnover in a smaller store? To all these questions the answer is:

WALKER WALL CASES, COUNTERS & SHOW CASES.

Save 25% of the space and labor for you and please your buying public by quicker service, clean goods, always on display.

Send your floor plan and ideas for catalog and prices.

TRADE MARK Red Devil Tools

What Better Brand of Glass Cutter to Sell Over the Counter?

FROM the standpoint of design and workmanship, "Red Devil" Glass Cutters lead. From the standpoint of quality, economy and popularity they excel.

Ask any glazier—the man who uses glass cutters in his everyday work, to confirm this.

Then decide whether it won't pay you to handle *the largest selling glass cutters*—"Red Devils," with hand honed steel cutting wheels.

Made in 40 popular styles, one for every need.

Send for your copy of the new "Red Devil" Glaziers' Tool Booklet—just out.

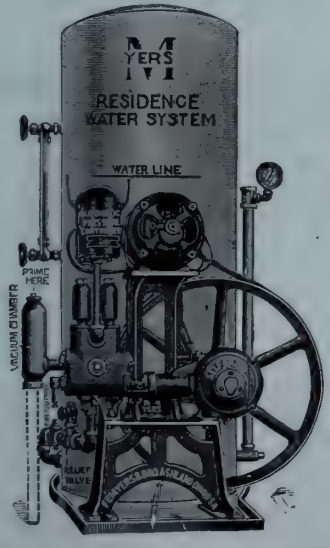
PNEUMATIC
WATER SUPPLY
SYSTEM

Gives country residents all the advantages of a city water system without the excessive cost

The wide-awake dealer will make big profits out of this system among customers who now have difficulty with their water supply. It is so simple to operate and costs practically nothing for upkeep.

The outfit consists of an air-tight steel tank which can be placed in the basement, and a "Myers" famous guaranteed pump (hand or power), suitable for pumping air or water, together with pipes and fittings. Any plumber or gas fitter can easily install it. Every outfit guaranteed to do the work for which it is designed. For small or large dwellings.



Write us for Water System Catalogue and prices. Now is the time to interest your customers.

Small Investment- Small Floor Space-Big Profits

Gold-Seal Congoleum—the fastest selling floor-covering in Canada—is making big profits for hundreds of Canadian merchants. Why not let it make profits for you.

Turnover—Four to Six Times a Year

We know from a careful survey that the average dealer sells out his Congoleum stock four to six times a year.

Big Profits—Small Investment

No need to tie up a lot of money in Congoleum. Many merchants report annual profits of from $80 to $130 from a stock costing between $50 and $60. Congoleum's rapid turnover accounts for these astonishing figures.

Powerful Advertising Keeps Congoleum Moving

Continuous, powerful advertising in leading Canadian magazines, farm papers and newspapers makes Congoleum's turnover not only fast but certain. This advertising reaches every corner of the country—big sales are assured.

No Need for Big Floor-Space

You can make a splendid display of Congoleum in amazingly small floor space. Our service department will tell you how.

Write us for information and free display material.

Why Congoleum is Such a Fast Seller

Congoleum enables you to offer housewives artistic, durable floor-coverings at a price they can easily afford. Its economy is unequalled—a fact which women quickly recognize.

Their confidence is reinforced by the Gold Seal Guarantee which reads "Satisfaction Guaranteed or Your Money Back." We live up to this pledge to the limit. No need to persuade customers that Congoleum is worth every cent it costs. They know it.

Do You Want Your Share? It's Up to You

Join the other Canadian merchants who are cashing in this fast selling floor-covering. Profits are fast and certain.

Write us for further information. We will put you in touch with jobbers who can supply you. Write to-day.

KRAEUTER PLIERS

are Nationally Advertised

THE GLOBE, TORONTO, THURSDAY, M

The One Perfect Plier

FOR EVERY PURPOSE
OF THE "HANDY MAN"

It has the characteristic grace and balance of Kraeuter design—is handsomely nickel plated—fashioned and finished with the precision of a dentist's instrument.

Its beauty is more than skin deep. It is made of special plier steel; drop forged, and so accurately tempered that the teeth will neither break from overhardness or smash down from softness, as so often happens with ordinary pliers.

The little 5½-inch size rides comfortably in the pocket and will do nearly everything its big brothers can do. Its grip and leverage will astonish you, and it won't break.

You need a plier often; have the finest in the world; absolutely guaranteed.

Test them at any store where good tools are sold.

CANADIAN NATIONAL RAILWAYS

Important Change Toronto-Winnipeg Train Service.

"The National" Restored as Daily Train

Effective Sunday, June 4, Canadian National Railways will resto... daily service ...een Toront... Winnip... ...reol and thur...

...ing art. New York, Paris and London all supplied gowns, frocks and wraps for Miss Ayres to wear as the wealthy young widow to whom money means everything. The vaudeville bill includes The Chic Supreme; Fulton and Burt; the Seven Tumbling Demons; Louis London, and the Three Belmonts.

...the famous ...ll h... it

There have been many improvements in pliers during the last twenty years—most of them made by Kraeuter—and gradually mechanics have learned that no better pliers are made, and that quality in tools *pays!*

Now we are going to *tell the world* what every mechanic knows.

There are thousands of men who own automobiles, motorboats, radio outfits—and men who are handy with tools—who would appreciate a pair of really good pliers.

Through the principal metropolitan newspapers we are going to tell our story to these customers, and the following patterns will be advertised—the more popular numbers being featured most frequently:

Number 336
Number 1973
Number 1863
Number 1903
Number 1913
Number 1305
Number 1831

In order to get the benefit of this advertising, every dealer who sells Kraeuter pliers should display them, and mention them occasionally in local advertising—of course, those patterns which are advertised should be displayed most conspicuously.

WISS SHEARS Are Advertised to 550,000 Canadian Families

IF YOU were to take a cutlery census, you would find many a pair of Wiss Shears that have been giving splendid service for two or three generations.

These goods have built up a reputation for themselves and they enjoy a tremendous sale.

Now, the Wiss Company is taking its place among strong and steady advertisers. More than 550,000 Canadians will see this advertising in the daily newspapers—and many thousands more will read it in the women's Fashion Magazines.

Publicity, backed by a really *fine product* is bound to create a lot of new business, and naturally you want your share of it.

When a Wiss Salesman calls give him a welcome and an order. *Good Goods, Good Advertising* and a *Live Wire Dealer*, are a combination that never has been beaten!

Important Problems Which Require Retailers' Earnest Consideration

EVERY branch of trade is suffering from some of the sharp reactions which have developed in the post war period of readjustment. Many of these problems have a very great influence upon retail business, prominent among which are the problems of taxation, particularly those new impositions which have recently been applied to raise much needed revenue.

WHILE recent months have shown a considerable increase in Customs duties and in the various forms of Inland Revenue, no endeavor is made to hide the fact that so great are the needs of revenue in the next few years that there is little expectation of a reduction in revenue and the possibility of further increases in taxation has been dealt with in recent issues of Hardware and Metal.

THE SITUATION in regard to the Sales, Income and other such taxes has been analyzed fully in past issues of this paper, but the increased Stamp Tax on cheques, drafts, etc., in effect since August 1, has now brought about a situation in which the retailer's position needs some definition.

A CONCERTED movement is being made by certain organizations of manufacturers and wholesalers to pass on to the retailers the cost of stamps affixed to drafts for collection of accounts from retailers. The stand taken by these branches of trade is that if the retailer pays his account by cheque he assumes the cost of the stamp tax whereas if the same account is settled by draft the drawer must pay the cost of the stamps. Under the new regulations this stamp tax assumes large proportions where a considerable number of drafts are taken into consideration. Further, this tax is likely to pyramid if the present practice of presenting drafts two or three times before acceptance, is followed. Then again the presentation of a draft for the full amount of a debt is frequently followed by the retailer subsequently sending in a cheque for part payment. This process may be repeated sevral times before the account is finally settled in full and an examination will reveal the fact that the process has involved the use of three or four times the required value of tax stamps.

FROM THESE standpoints the wholesaler and manufacturer claim that they should be protected by passing on the cost of such taxation to the retailer, probably by adding the tax to the amount of the draft. They also point out that the present principle if continued will encourage lax methods on the part of debtors who will wait until drawn on to settle accounts. If this is the outcome it is held that the amount of the tax will be so great as to be a distinct burden on the manufacturer or wholesaler.

ANSWERING these claims and setting forth the retailers' point of view, are the following facts: 1. Retailers have not an opportunity of passing this added expense on to customers as well as have manufacturers or wholesalers who can add it into the price of the goods as an overhead expense. 2. This is one of the recognized expenses of doing business known as "collection costs" and each branch of trade is subject to such expenses, in the ordinary course of trade, the retailer included. 3. Majority of drafts are used to encourage collection before the expiry date of the terms under which the order is sold, and as such the drawer of the draft is the beneficiary and should pay any expenses involved. 4. As to the charge of encouraging lax methods retailers answer that manufacturers and wholesalers have encouraged this by the prolific use of drafts. There are said to be more drafts used in proportion in Canada than in any other country. 5. There is the likelihood of error in making out drafts and as this is beyond the control of the retailer he should not bear any expense in connection with their issuance. A number of other arguments are also advanced.

THE FOREGOING gives some of the arguments on both sides of the question. It must be kept in mind, however, that factions are not solidly aligned on each side. There are a number of hardware manufacturers and wholesalers who agree that the retailer should not be saddled with this expense. There are some retailers who suggest half-way measures and there are a few who even take the stand that they should pay the tax on drafts, under certain circumstances. There is undoubtedly much to be said on both sides of the question and it is an interesting subject for consideration.

THERE is no doubt that if no radical change is made in the regulations a change will be made in practice by wholesalers and manufacturers. Probably the old plan of sending letters instead of drafts will be revived.

ONE THING is sure and must be taken into consideration in connection with all matters of taxation. That is that the tendency now is toward the raising of revenue by direct taxation in preference to Customs duties, etc., and narrowing this down it is evident that an extension of the Sales Tax, Stamp Tax, etc., is more likely than that they will be abolished.

IN FOLLOWING out this policy facilities and regulations should be made so that only Inland Revenue stamps will be used for taxation collected by stamps. In this way some accurate check will be kept on revenue raised in this manner and these forms of taxation planned intelligently on the basis of revenue raised.

President of Canadian Wholesale Hardware Ass'n Agrees the Stamp Tax Should not be Passed on by Jobbers and Mfrs. to Retailer

T. M. Birkett, president of the Canadian Wholesale Hardware Association, asked by Hardware and Metal for an expression of opinion on the subject of the new stamp taxes said: "Speaking personally, and not as president of the Canadian Wholesale Hardware Asscoiation, I have no sympathy with this movement to pass on the stamp tax to the retailers. We do, and will continue to pay all costs in connection with drafts on our retail customers, and if any manufacturers attempt to collect the amount of the stamp tax from us, we won't pay it. We have only had one case of that kind, and that was a week ago, when we received a draft from a Toronto house, which called upon us to pay the stamp tax. We simply changed the amount of the draft to make it conform with the amount we felt we were legally obliged to pay. We have not yet received any communication from that concern in regard to the matter.

"The stamp tax on drafts is something that all manufacturers and wholesalers should pay and add to overhead costs."

SINCE the new stamp taxes were put into effect August 1st, a movement has started among manufacturers and wholesalers to collect the amount of the stamp tax from the debtor where a draft has to be issued for the collection of the account. It is held by some that the policy of the manufacturer or wholesaler having to pay the stamp tax on a draft, whereas the debtor would pay the stamp tax if he paid it by cheque in the ordinary way, encourages laxity.

This, however, is not the view of all manufacturers and jobbers, nor does it for a minute command the favor and respect of the hardware retailers for a number of reasons as outlined in the following interviews:—

Paid by Party Issuing Draft

W. F. Macpherson, Secretary Ontario Retail Hardware Association, discussing the use of stamps on drafts for collection of accounts stated: "I think if the draft is made by the firm selling the goods prior to the expiry of the sale terms that the stamps on the draft should be paid for by the party issuing the draft. If settlement is deferred by retailers until the due date of the bill the retailer would necessarily forward his cheque with the stamps attached. I feel that the expenses incurred in the collection of accounts should be estimated and included in the overhead expense of the manufacturer or jobber and added into the selling price of the goods.

"With the various taxes now in effect on articles of stated re-sale values the margin of profit to the retailer has been cut very fine and the payment of additional taxation would necessarily come out of net profits which at the present time are much below normal and show very poor return for the investment, initiative and energy put into business by the average retailer."

Not Wise as General Principle

A Toronto wholesale hardware firm discussing the subject with Hardware and Metal pointed out that no steps were being taken to collect the stamp tax on drafts from retailers, and did not think it wise to do so as a general principle as it was a cost of collection which if it assumed large proportions could be added into overhead costs. It was agreed that the drawer of the draft was the one to benefit and as such should pay the tax unless the retailer asked particularly to be drawn on or the draft principle had to be adopted as a final resort to force payment.

Fifty per cent. of this wholesaler's business was said to be done now by drafts on varying terms according to established practice. Very few are returned compared with the number of drafts used. It was also pointed out that the number of requests from retailers to be drawn on since August 1 had decreased greatly. The importance of prompt payment was emphasized, it being stated that following the practice of paying accounts promptly not only allowed retailers to take their cash discounts but would enable the wholesaler to pay any such charges as tax on drafts used where necessary, and not encumber the whole trade with this charge because of the practice of a few.

Good Retailers Settle Promptly

Mr. Russill of the Russill Hardware Co., Toronto, stated to Hardware and Metal that the majority of good retailers take their discounts and settle bills without the necessity of being drawn on. It was his opinion that the draft system of collection is much abused and that some intelligent effort could greatly reduce the number used and thereby reduce the seriousness of the question of taxation on drafts.

"In our business drafts are drawn on our customers only as a last resort. Those kind of customers are watched closely and we are not at all sorry to lose them. The retailers' margin is so small to-day with various taxation that he cannot afford to do other than settle promptly and take his cash discounts," said Mr. Russill.

No Reason for Retailer Paying Tax

Discussing the subject with Hardware and Metal, J. S. Millar, Secretary The Bond Hardware Co. Ltd., wholesale and retail, Guelph, Ont., states;—

"We are glad to notice that you have taken up the feature of this tax which we had already in our own office criticized as being unfair. There is no reason why the dealer should be called upon to pay the tax on drafts any more than on the customer's cheque. Speaking in a general way, if the customer paid as he should do there would only be need for a fraction of the drafts which are used, and it is, in the majority of cases, the customer's wish that his account should be collected in that particular way.

"We think you are taking the right step when you suggest that the regulations should be so altered as to have the amount of the stamps added to the amount of the draft."

Well Repaid for Draft Expense

J. N. McGregor, hardware merchant Oakville, Ont., says:—

"The jobbers or the manufacturers are the logical people to pay for these stamps; they can pass it on to the public without a loss, better than if the retailer bears it direct. Speaking of the

---

WHAT DO YOU THINK OF THE STAMP TAX?

In this issue will be found the opinions of a number of manufacturers, wholesalers and retailers in connection with the application of the increased Stamp Taxes since August 1. The tendency on the part of certain manufacturers and wholesalers is to pass on the cost of the stamps applied on drafts, to retailers on whom the drafts are drawn.

This is one of the most important matters affecting retailers' interests which has been up for discussion for some time and any ideas which you can promote to offset such action will help the retailers' cause.

Write a letter setting forth your views to The Editor, Hardware and Metal, 153 University Ave., Toronto, Ont.

WHAT CERTAIN WHOLESALERS SAY

1. **Wholesalers will not pay stamp tax on drafts drawn on them by manufacturers and therefore have no sympathy with movement to collect stamp tax from retailer.**
2. **Stamp tax on drafts is something manufacturers and wholesalers should pay and add to overhead costs.**
3. **Unwise to establish collection of stamp tax from retailers as a general principle as it is a cost of collection which each branch of trade must take care of itself.**
4. **Drawer of draft is the one to benefit by securing prompt payment and should pay the tax unless retailer asked particularly to be drawn on.**
5. **If drafts have to be repeatedly sent to enforce payment the wholesaler is entitled to add stamp tax charges to subsequent drafts as collection costs.**
6. **Number of requests from retailers to be drawn on has declined substantially since August 1 and not now so much need for jobbers and manufacturers to collect this.**
7. **Prompt settlement of average accounts will enable wholesaler to pay tax charges on the few who don't settle promptly and not penalize everyone for the few.**

lax method of collection in reference to drafts, I feel that in the majority of cases the manufacturer or the jobber is well repaid for any expense he has in drafts by the additional promptness with which he gets in his money."

Asked for his opinion on the subject Nelson Mills, Mills Hardware Co., Hamilton, and past President of the Ontario Retail Hardware Ass'n., says; "If the retailer asks jobbers or manufacturers to draw on him, the retailer should pay the stamp tax. If however the jobber or manufacturer draws to force collection from the retailer, they should pay the tax themselves. The majority practice should govern."

That manufacturers and wholesalers should be willing to stand their extra share of taxation in connection with stamps on drafts is the opinion of F. B. Smith, Belleville, Ont., who states:—

"The draft system of collecting accounts must be a decided advantage to them in that it secures more prompt payment, therefore the extra tax should be cheerfully absorbed by manufacturer or wholesaler. The increase in Sales Tax recently put in force is automatically being paid by the retailer and this additional load of stamp tax in all fairness should not be passed on the already helpless retailer."

Charge on Renewal Drafts

R. Hawkins, Smith Falls, Ont., says:

"I think the wholesalers and manufacturers should be above asking the retailers to pay this small fractional percentage on good accounts of merchants who pay promptly. In the case of renewals of drafts I think the creditor would be fairly entitled to add the cost of such renewal to a second draft. I consider it is not good business policy for the wholesaler to endeavor to pass on to his best friends, the retailers, too many small irritating items of expense.

"I can foresee the possibility of organizing a co-operative buying plan amongst a select list of responsible retail hardware merchants and eliminating a large percentage of the jobber's business, if our jobbing friends try to put over too much on their retail friends who are already pretty well taxed in their own communities for many forms of benevolence, and bad debts, in addition to necessary business expenses."

Some important points are brought out in this discussion by W. J. Bell, Beeton, Ont., in the following;—

"It seems to me, that there is a very evident desire on the part of jobbers and manufacturers, to put over everything possible, on the retailer. 'Passing the Buck,' as it were.

"To my mind, the intention of this tax is to have each individual business bear its proper relation in respect to the tax, and not that it shall be passed on and somebody else be made to pay. This seems to be the idea of the above named concerns, e. g. make the other fellow pay.

"I think it is quite unfair that the debtor should be made to pay the tax on drafts. A very great percentage of the drafts issued, are, I believe, of the time class, and the manufacturer and jobber in making this kind of draft is really doing business on his customer's paper, that is they obtain money from their bank on the strength of their customer's acceptance of the one, two or three months draft, as the case may be, and as the drawer—not the drawee—is the sole beneficiary in the premises, he is in my opinion, justly entitled to pay the stamp tax in connection therewith, or failing this let him wait until the account is due, and then the debtor will be manly enough, as well, sufficiently patriotic, to place on his cheque, when paying the account, the necessary tax in conformity with the law.

"At one time manufacturers and jobbers in the large cities, did their own carting, but this changed, and the poor retailer is called upon to pay this item of their cost of doing business, and in addition, has to pay all such charges at his own end, and the shifting of this stamp tax is just another evidence of their desire to 'pass the buck,' by having the other fellow pay their bills.

"I am pleased at the interest taken by Hardware and Metal in this matter, in fact all matters relating to the welfare of retail hardware merchants, and I think the executive of the O. R. H. Ass'n., likewise the Retail Merchants Ass'n., should get busy on this matter and assist in frustrating the designs of the jobbers and manufacturers who would further inflict the already overburdened and overtaxed retailer."

Pass on as Overhead Cost

Henry Watters, treasurer of the Dominion Board, Retail Merchants' Association of Canada, when asked what steps were being taken to protect the retailers' interests in the matter said:—

"While we have had considerable discussion on various taxation matters at our several conventions and conferences lately, this phase of the question has not been considered. But if the agitation on the part of the manufacturers and wholesalers gains any headway, it will be vigorously opposed by the R. M. A. on behalf of all retailers.

"Our opinion is that all this taxation should be paid by the manufacturer or wholesaler and then passed on as an

(Continued on Page 134)

WHAT THE RETAILERS SAY

1. **If draft is made prior to expiry date of sale terms drawer should pay stamp tax.**
2. **If settlement is deferred by retailer until due date of bill he will pay by cheque and thus pay for stamps.**
3. **Expenses incurred in collection of accounts should be estimated and included in overhead expenses of manufacturers and jobbers and added into sale price.**
4. **Retailers' margin of profit now fine and net profits cannot stand any further inroads.**
5. **Majority of good retailers take their discounts and settle bills promptly and use of drafts on them is limited. Why should they suffer occasionally for the lax policies of a few others?**
6. **Draft system much abused and many needless drafts issued.**
7. **A question of practice. Retailers' customers pay by cheque, so why should retailer pay stamp tax on drafts drawn on him any more than he would pay for stamps on customers' cheques?**
8. **Manufacturers and jobbers using drafts are well repaid for expense in making collections in this manner.**
9. **If retailer asks to have draft drawn on him he may be responsible for tax, but if collection is forced by this means the drawer should pay.**
10. **Much of the Sales Tax has to be absorbed by retailers, who feel they cannot bear any further taxation.**
11. **In case of renewal drafts creditor might fairly add cost of such renewal to second draft, but not on the first one.**
12. **General principle of the tax is to have each business bear its proper relation in respect to taxation and retailer has his collection costs to meet the same as the manufacturer and wholesaler.**
13. **Many drafts of time class. Drawer is the beneficiary because he does business on customers' paper when drafts are accepted. Therefore he who has the advantage should pay the tax.**
14. **Retailer has no means of passing on this expense unless manufacturer or jobber include it in sale price as overhead expense.**

A Working Plan for Selling More Profits in a Re

(Written exclusively for Hardware

FOR TEN years I have been investigating the plans and methods used by successful merchants in both United States and Canada. This work has taken me into almost every large city of America as well as hundreds of small and medium sized towns.

More important than this, it took me into stores of practically every size, kind and description.

It was in those hundreds and hundreds of stores that I discovered the great value of a plan or program to the success of a business. At the same time I have a most unusual opportunity to get hold of the best features of the best plans in use.

I had a chance to study the methods of those merchants who drive ahead through sheer force of energy and personality, as well as an opportunity to observe those merchants who got along somehow without a great deal of driving power behind their businesses.

Neither of these two classes of merchants ever got very far. One was weak on plans. The other was weak in selling.

The merchant who built his business through the use both of well-laid plans and of effective selling methods was, I observed, the man who made the most money and kept it longest.

The plan as outlined in this article grew out of the experiences of hundreds of successful retail merchants who found it necessary to push sales harder and control their stocks, margins and expenses better in order to meet competition and make more money.

These men succeeded in doing what they wanted to do. Their success is your best assurance that the plan will increase your sales and make money for you.

Outline of the Plan

1. Sales Quotas.
2. Stock Limits.
3. Margins.
4. Expenses.

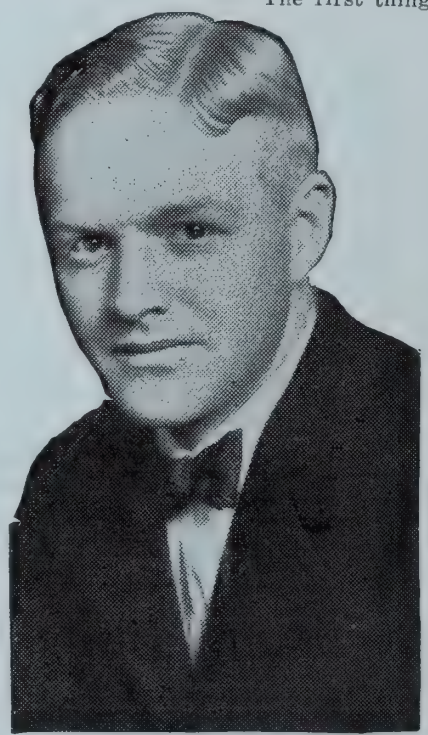
These four points are the outposts which protect your profits. Let anyone of these outposts weaken and you are sure to lose profits. Let one or more of them fall and no matter how strong the others may be all your profits may be swept away. They are like four little forts protecting the city of your profits.

In these times of keen competition no business can protect its profits without the proper equipment and use of these forts. Profits always occupy an exposed position. Your profits are a fair target for every retailer in your own town, in the stores of neighboring cities, and the mail order house miles and miles away.

You must be equipped to meet and defeat them one and all. To do this, set up these forts around your profits, one at a time, and equip each of them for the particular part it is to play in strengthening your business and in promoting its continued growth and prosperity.

The right kind of a plan for building business begins with the customer and works back toward the store. This is the Henry Ford idea and it works out in retail stores as well as it does in the sale of automobiles.

The first thing to consider in planning for business is the kind of service you are going to render your customers, for that will determine your margins, or mark-up, on your goods.



FRANK STOCKDALE

One of the foremost retail merchandising experts who is well known to Canadian retailers for his helpful advice in the past, and who goes into the problems of the retail hardware store in a very interesting and helpful manner in this article.

"How to Know the Right Mark-Up"

The right mark-up on any line or item must satisfy two people, the customer who wants the goods as low or lower than he can buy them elsewhere, and the merchant who wants a profit on the transaction.

In general, the right mark-up depends on the quality and quantity of service a merchant renders. For instance, the right mark-up for a "cash and carry" store is not the same as for a "credit and delivery" store which sells the same kind and grade of goods. Also, it is a fact that customers willingly pay some merchants more than others because they know they can get their money back if not entirely satisfied with the goods.

Why It Varies

Any superior or extra service that a merchant renders may be the reason why customers

More Goods and Making tail Hardware Store

and Metal by Frank Stockdale)

will pay more. We have in most every community stores that feature service and stores that feature price, and both are successful if they mark-up their goods on the basis of what their service costs and its value to their customers.

The right mark-up on any item is best determined by the actual cost to carry and sell the goods. If, over a period of time on a number of items, this does not meet the competition of stores which give a similar service, the trouble is in the management of the business and not in the method of mark-up—somewhere in the handling of sales, stocks or expenses is where the trouble lies.

How Stock Limits Are Fixed

It is one thing to know the right mark-up and it is often quite another matter to get the right mark-up, if for any reason your cost of doing business is too high.

The right cost of doing business results from:

1. Limiting stocks to get turnover.
2. Pushing sales to get volume.
3. Controlling expenses so that service is delivered to customers for every dollar expended.

Why Stock Limits Are Necessary

Fixing stock limits is necessary, first because turnovers are essential to low expenses and low prices, second because variety of goods is a vital consideration in getting business. Fixing stock limits, therefore, becomes a double-barreled problem.

1. Because stocks must be held down for the sake of quick turnover.
2. Because stocks must be kept up in order to meet the customer's demand for variety of sizes, kinds and prices.

The fixing of proper stock limits is the most vital thing in giving the customer the goods he wants at the price he will pay. It is the main foundation which holds up both sales and profits.

Variety the First Consideration

The first thing in fixing stock limits on any line is to know what the public demands in the way of variety. In all probability more sales are lost because of poor assortments than all other reasons combined. Investigation reveals that more people go to the mail order house and to the larger stores of larger cities in order to choose from larger assortments than for any other reason. Lack of assortments acts upon a business like the plague of a "sleeping sickness." Customers seldom complain of assortments as they do of price or the service in a store. They do not get angry as in the case of a complaint about the goods. They fail to see what they want and go elsewhere. After a series of such disappointments they quit trying to buy at all in the store that does not supply the variety of goods they want.

Fix stock limits to cover an assortment that will appeal to the people and furnish them with the prices, sizes and kinds they want to buy. Fix definite figures for high stocks and low stocks. This will depend on the kind of goods and the varieties in demand, and particularly on the distance of your store from market and frequency of buying.

What it takes to make a salable assortment no more and no less, is the key to fixing proper stock limits. Small stocks often mean small sales. On the other hand, smaller stocks make lower expenses and reduce losses from price declines.

The only rational way to increase the profits of the average store is to separate the store into lines and then carefully analyze each line—(a) fix the right margin for it, (b) fix the right stock limits for it, (c) and then set a sales quota that will make the line a money maker.

Separate Your Store Into Lines

This does not mean the separation of sales and expenses by lines as in the usual method of departmentizing. The store may be separated into as many lines as is necessary to the intelligent analysis of each line and the laying of a definite plan for making each line pay a profit. The number of these lines will depend very largely on:

1. The nature of the goods.
2. The volume of business on the line.

Goods should be grouped together in natural groupings, putting into each group goods that are similar (a) in rate of turnover (b) frequency of buying (c) margin (d) season of selling (e) ease of selling.

The lines for one hardware store were as follows:

TOOLS—
1. Mechanics
2. Machinists
3. Garden

SHELF HARDWARE—
4. General
5. Builders' Hardware
6. Bath Room Fixtures
7. Barber Supplies
8. Cutlery
9. Electrical Appliances
10. Electrical Fittings

SILVERWARE—
11. Flat
12. Hollow

SPORTING GOODS—
13. Guns and Ammunition
14. Fishing Tackle
15. Skating
16. Baseball and Tennis
17. Wagons and Sleighs

HOUSEHOLD GOODS—
18. General
19. Aluminum Ware
20. Granite Ware
21. Pirex
22. Gloves

PAINTS—
23. Paint and Varnish
24. Oil, Lead and Putty
25. Alabastine and Muresco
26. Dry Colors
27. Paint Sundries
28. Brushes

HEAVY HARDWARE—
29. Wood Handles
30. Washing Machines and Wringers
31. Valves
32. Pipe Fittings and Pumps
33. Porch Gates
34. Ladders and Washboards
35. Glass
36. Rope
37. Nails
38. Bolts and Nuts
39. Refrigerators
40. Fencing and Wall Board
41. Roofing and Sash
42. Weights, Asbestos
43. Rubber Packing
44. Heaters and Stoves
45. Stove Pipes
46. Wall Paper
47. Screen Doors
48. Wire Cloth
49. Emery Cloth

"How to Work Out Sales Quotas"

After fixing Stock Limits on each line and the right Margin on each line, the next step is to fix Sales Quotas. These should be fixed on the basis of:—

1. Size of Stock and Margin in the line.
2. What you sold last year.
3. What, under competitive conditions, you can reasonably expect to sell.

Size of Stocks and Margins on the Line

There is a definite relationship between rate of stock turnover and cost of doing business. When the turnover is slow the cost of doing business is high and when the turnover is fast the cost of doing business is low.

When the margin is low the cost of doing business must be low or there is no profit. This means that when the margin is low, quick turnovers must be had to make the sales on the line profitable.

After fixing stock limits to meet the demand of your customers with the smallest possible stocks, there is only one way left to get faster turnover, and that is to fix and maintain a sales quota large enough to give the required rate of turnover. For instance, here is a line on which the average stock to be carried is $600 and the margin is 25 per cent.

How Cost of Doing Business is Held Down

To realize 5 per cent. profit the cost of doing business on this line must be kept down to 20 per cent., no matter what the average for the store happens to be. This means a rate of turnover of not less than four times. It is figured like this:—

4 turns is one turn in 3 months	
3 months at 2% a month is (This is the carrying cost)	6%
Selling Cost (On the basis of averages)	12%
Allowance for extra rent because of choice location	2%
	20%

The Quota Necessary to Profitable Lines

The $600 stock marked up at 25 per cent. of the selling price is marked to sell at $800. To get four turns the store must sell four times $800 which is $3,200.

The sales qutoa, for the sake of a profitable rate of turnover must be $3,200 on this line.

This may mean hard work and extra effort, but it is worth it. Here is the issue:

Sell $1,600 and lose 1 per cent.	$ 16.00
Sell 2,400 and make 3 per cent.	72.00
Sell 3,200 and make 5 per cent.	160.00

It is the sales above the first $1,600 that put the extra dollars in the bank.

Quotas are a continual incentive to a merchant, urging him to be aggressive and definite in everything he does. This alone is enough to double the profits of merchants who are not applying their energy and ability to the best advantage.

"How to Make and Use an Expense Budget"

The old saying, "Cut your coat according to your cloth," is recognized as a bit of fundamental common sense wisdom. It is only a graphic expression of the fact that to make money expenses must be less than income.

All large business concerns operate on limits, quotas and budgets. Even the United States Government with its political log-rolling and pork barrel filling has recently adopted the budget plan for financing.

After you have fixed sales quotas and per cent. of margins on each line you can easily and quickly figure what your total margin in dollars will be on the total amount of your business. To make money you hold your expenses below your total margins. The purpose of your expense budget is to help you to hold expenses down by controlling each individual item.

Here is a typical expense budget showing how it applies even to a small store doing a yearly volume of $36,000.

1.	Rent	$ 420.00
2.	H. & L.	225.00
3.	Taxes	160.00
4.	Insurance	115.00
5.	Depr. F. & F.	100.00
6.	Bad Debts	150.00
7.	Delivery	500.00
8.	Interest	650.00
9.	Miscl.	250.00
10.	Help	2,080.00
11.	Self	3,000.00
12.	Advertising	1,080.00
		$8,530.00

Note.

Item 1. Rent is definitely known in advance.

Item 2. Heat and Light is fixed in accordance with last year's record for these items.

Item 3. Taxes are fixed on the basis of last year's payment and any available information about changes.

Item 4. Insurance is definitely fixed by current rates and policies to be carried.

Item 5. Depreciation of Furniture and Fixtures are according to the basis of charge-off made when the fixtures were installed.

Item 6. Bad Debts is on the basis of average over several years, and present conditions of accounts receivable.

Item 7. Delivery is figured on the basis of last year and the volume of goods to be sold.

Item 8. Interest is figured on the total investment in the business, both on money owned and money borrowed.

Item 9. Miscellaneous expenses are fixed on the basis of past experience.

Item 10, 11, 12. These three items are about three-fourths of the total expenses of the business, and they must be controlled to harmonize with the sales and margins of the business.

These expenses must be controlled with a firm hand. They are under the absolute control of the manager of the business. He is responsible for the expenditure of every penny. It is his job to see that every dollar spent produces a dollar's worth of the kind of service his customers want.

The Way to Make Money

With stock limits to control buying, with sales quotas to control selling, with a margin that makes your prices fair to your customers and to yourself, and with an expense budget that keeps your outgo less than your income you are in a position to make money.

With this kind of a plan applied to each line you sell you can tell easily and quickly where you are making money and where you are losing money. This is the foundation of successful retailing.

The plan outlined in this article will furnish the frame work to which you can nail the many splendid pointers on selling and management which come to you in "Hardware and Metal" during the year. That alone makes it well worth while. Its best recommendation, however, is the many chain, department and independent retail stores that are using it to hold up their sales and profits in the face of strong competition and a falling market.

What's in the "Save the Surface" Department

AT NO TIME in the past has there been such a prospect of big business in paint and varnish for those merchants who definitely link up with the "Save the Surface" campaign, as exists this Fall.

This campaign has been progressing rapidly, gathering momentum as it goes, and with the greatest necessity for protection of property coming in the Fall and Winter months, these next few months should see the biggest volume of paint business that has been done for many a time.

Following is a brief outline of some of the articles which appear in a section of this issue starting at page 162:—

"DISTRIBUTES 'SAVE THE SURFACE' BOOKLETS TO PROSPECTS":

Willard Hardware Co., of Chatham, distribute 5,000 booklets prepared by the store itself and designed to show every paint prospect in the community why they should believe in the "Save the Surface" campaign and how they should act on those beliefs.

"SUGGESTIVE OR GROUP SELLING OF PAINT AND VARNISH":

Mills Hardware Company, Hamilton, have made a big success of grouping lines in their "Save the Surface" department. Neat store cards with samples of the work done by certain finishes are handled by customers. Nelson Mills says grouping articles is a big aid to salesmen's effort.

"OVER $43,000,000 LOST BY CANADIAN FARMERS EACH YEAR":

This loss is due to neglect to paint adequately. Not 10 per cent. of the barns in Canada are painted. The dealer needs an active turnover of paint in the fall months. How the "Save the Surface" campaign can be used to good advantage in the Fall is told by H. E. Mihell in this article.

"IF YOU DID NOT PAINT IN THE SPRING THEN PLAN ON PAINTING THIS FALL":

A good slogan for hardwaremen to use in connection with Fall trade. A. J. Webb tells how sales of floor paint, stove pipe enamel, varnish, etc., can be stimulated in the Fall of the year to "Save the Surface" before Fall rains and Winter snows mar the woodwork.

"GREATER GALLONAGE OF PAINT SOLD SO FAR THIS YEAR THAN EVER BEFORE":

This statement by W. S. Fallis in a short article is a splendid reason why the efforts of retail hardwaremen this Fall should result in much activity in the "Save the Surface" department.

"LESS UNPRODUCTIVE LABOR IN THE PAINT INDUSTRY THAN ELSEWHERE":

This is the reason for comparatively lower costs of paint than other commodities. An advantage which retailers can cash in on and decrease their own costs by increasing turnover.

"RETAIL ADS URGE 'SAVE THE SURFACE' "

A group of representative paint ads by hardwaremen in various parts of Canada showing what effort is being made through this means of publicity to drive home the underlying principles of "Save the Surface." Some good advertising tips are contained in these ads.

"GROUP SELLING OF PAINT, VARNISH AND BRUSHES"

A Montreal merchant who has made a good success of grouping sales of paint, varnish, brushes and other kindred lines uses his window diplays to good advantage for this purpose. A sample window display showing how he sells paint by showing the effect and grouping these lines, appears in this issue.

"WHY THE BUSINESS DEPRESSION HASN'T AFFECTED PAINT AND VARNISH"

A splendid, illustrated article by R. H. Monk, showing the relation of the paint industry to national developments of recent years and a safe foundation on which to judge the immediate future.

Reasons Why Hardware Manufacturers and Wholesalers Express Optimism Concerning The Outlook for Fall and Winter Business

THE FOLLOWING brief interviews with various manufacturers and wholesalers deal with the outlook for business in the Fall and early Winter months as applying specifically to various lines of hardware. These outline conditions as regarding supplies, probable price trend and some helpful selling suggestions.

STOVE PRODUCTION IS CONSERVATIVE

W. R. Gibson, General Manager, The Gurney Foundry Co. Ltd., Toronto, states:—

"I think that most factories are being conservatively managed at the present time as far as Fall stock is concerned, because it would be most unwise to end the year with any large size stock, especially as the crisis we are just coming through has been to a great extent aggravated by excessive overproduction. We therefore believe that it is quite possible for a shortage of goods to occur in many of our stove lines, because the placing of orders usually given earlier in the year has been somewhat delayed. We think that dealers should place a good average Fall order at once, if they are to be certain of receiving these goods when wanted.

"It is unnecessary to detail the conditions that are leading up to the necessity for such action, as thinking people will readily find good reasons for such a course themselves."

GO AFTER THE FARMER

Pointing out the possibilities which exist in developing trade with the farmer, A. T. Enlow, President Dominion Sheet Metal Corporation, Ltd., Hamilton, Ont., says:—

A. T. ENLOW

"Those who have been watching economic bulletins, have noticed that the average selling price of farm products has materially advanced. There is no question now about the big crop this year. This means that the farmer will undoubtedly be in the market right along and if he uses your product you couldn't do better than go after his trade vigorously.

"We attribute our big steady business this year to the farmers' 'come back,' the low prices on galvanized sheets and the fact that Canada has kept her head and avoided the annoying and costly strikes prevailing elsewhere."

NO APPREHENSION OVER FALL BUSINESS IN DRILLS, TAPS, DIES, ETC.

L. H. Laythe, Sales Manager, Butterfield & Co., Rock Island, Que., manufacturers of twist drills, taps, dies, reamers, etc., says:—

"So far as we are now able to see, we have no reason to look on the situation in any manner other than with optimism. While the months of July and August are always rather quiet due to the fact that it is the vacation season, this year there has been the additional handicap of various strike situations throughout the country. These, we feel sure, however, will be straightened out by Fall and with every promise of bumper crops all over the country, there is positively no reason for any apprehension as to where Fall and Winter business will come from."

STEEL MILLS GETTING FURTHER BEHIND

An interesting review of the iron and steel industry particularly from the standpoint of the effect of prevailing strikes on future business is given in the following by J. G. Near, Manager Peckover's Ltd., Toronto:—

"The coal strike is having a double edged effect. The shortage of coal is setting back mill schedules in the U. S. and is having the further effect of stimulating buying, the result being that mills are getting further and further behind each week. It is now really a serious matter, and ordinary steel supplies cannot be brought on from Pittsburgh at this time, within three months.

"Take, for instance, steel sheets. You are very fortunate indeed to get an order through in three months with the situation rapidly growing worse. All users of steel in Canada are suffering equally, the result being that Canadian warehouses are being called upon, and will be more and more called upon during the next few months. We anticipate a very lively time, and are bending all our energies just now to urge the mills to give us at least a part of our old orders. In spite of anything we can do, there will be a shortage in many of the chief lines, although prices are holding fairly steady. The trend is of course upwards, and my personal view is that there will be a slow stiffening of prices for the balance of this year."

WAR STOCKS OF INGOT METALS ABSORBED

G. T. Pepall, Director Samuel & Benjamin Ltd., Toronto, gives some interesting details of the ingot metal market in the following:—

"The trend in ingot metals is towards higher prices, for the reason that the accumulated war stocks have been almost completely absorbed, and such metals as copper, lead and zinc are approaching a normal basis, which, in comparison with other commodities, means higher prices. In rolled steel the same remarks apply, and the only barrier to abounding prosperity is the lack of stabilization in foreign exchange, and until that stabilization occurs we must live in a series of chills and fevers as far as prices are concerned."

BRUSH PRICES LOWER NOW THAN NEXT SPRING

W. G. Meakins, of Meakins and Sons, Ltd., Hamilton, deals with the brush situation as follows:—

"Prospects in the brush business, we think, are very good for active Fall business. The cost of all our raw materials

declined during 1921 to such an extent that they got below the cost of production and in consequence there was a great falling off of production. The quantity of bristles which came in from China during 1921 was less than half of any former year for ten years and in consequence, there is beginning to be felt a very grave shortage and prices are all on the increase. Unless prices still go up to make it possible for them to dress the goods in China at a profit, the shortage will continue and it looks as if we are in for an advancing market, which will mean purchasing with a little more confidence. Our own opinion is that prices will be considerably lower this Fall than they will be next Spring."

BIGGEST BUSINESS IN ARCHITECTURAL METAL WORK

W. E. Ramsay, Vice-President The Pedlar People, Limited, Montreal, gives an optimistic review of the past few months trade and outlook for the Fall:—

"In contradiction to all predictions of factors who professed to forecast the conditions, for the past three months we have enjoyed the largest volume of business within our memory. In fact, we could have handled 40 per cent. more had the stock been available. Seventy-five per cent. of this business, however, has been for materials used on farm buildings and the reason for it is that for the past seven years galvanized iron has been enormously high in price and very difficult to procure.

"In consequence of this the farmers have neglected to repair their buildings and have delayed in new construction until such time as necessity demanded repairs and enlargements, and the desire to do this has spread over the province of Quebec like an epidemic. Thousands of these farmers have been unable to procure their material before haying and have delayed their program until later on in the season, and we consequently look for a very fair business for the next three months.

"If the crops in Western Canada turn out as prolific as advance information conveys, we believe that the whole country will benefit immeasurably; the Western farmer will be relieved from his present distressing condition, money will become assured and conditions in all channels of trade materially improved.

"One of the great surprises of this past season has been the cheerfulness in which the farmer has accepted the 4½ per cent. tax on his purchases, because this amount applied to the purchase price of material looks at first sight as large as a moderate profit."

ACTIVE TRADE IN GLASS

A big demand for glass from now on with market prices ruling very firm is predicted by W. Davidson, sales manager of the Hobbs Manufacturing Company:—

"Owing to the factories in Europe being closed down for such long periods," he said, "they have no large stocks on hand. The production in Belgium will not be more than fifty per cent. There is an unusually active demand in the United States for glass of all kinds. Wind shield plates are already very scarce and only a few days ago I had a long distance message from a big American firm wanting to place an order for a large quantity. With such a big volume of building under way, there will be a big demand for window glass from now on as the houses and other buildings are reaching the stage where glass will be required. The market is going to be very firm and prices steady. Stocks both of plate and window glass are in very fair shape."

GOOD PROSPECTS FOR AUTO ACCESSORIES

Pointing to the steady and rapid increase in the sales of automobiles and trucks, and also to the unmistakable tendency on the part of the car owners of Canada to buy better cars, R. G. Edgecombe, of the R. G. Edgecombe Co., London, Ont., sees wonderful business ahead for hardware merchants and others handling auto accessories.

"With more than $250,000,000 invested in autos now, and the amount increasing every day, it is obvious," he said, "that there is an enormous volume of equipment required. Every car owner is a prospect of the very best kind for accessories. Anything that will make his car more comfortable, make it run easier or that will make it better in any way he will buy. There is a tremendous field here for those handling accessories and it is constantly growing."

Mr. Edgecombe pointed out that one of the principal things for the hardware merchant and others handling accessories to guard against is stocking novelties. There is ample business in the standard and well known lines, he says, without experimenting. Some of the new things may be all right, but many of them will not last and those in the trade should be very careful to investigate carefully and handle things which are in steady demand and which they know are all right.

Business, he stated, has been excellent and he is looking for it to continue so.

NO BOOM BUT MORE CONFIDENCE

W. S. LESLIE

W. S. Leslie, president A. C. Leslie & Co., Montreal, states:—

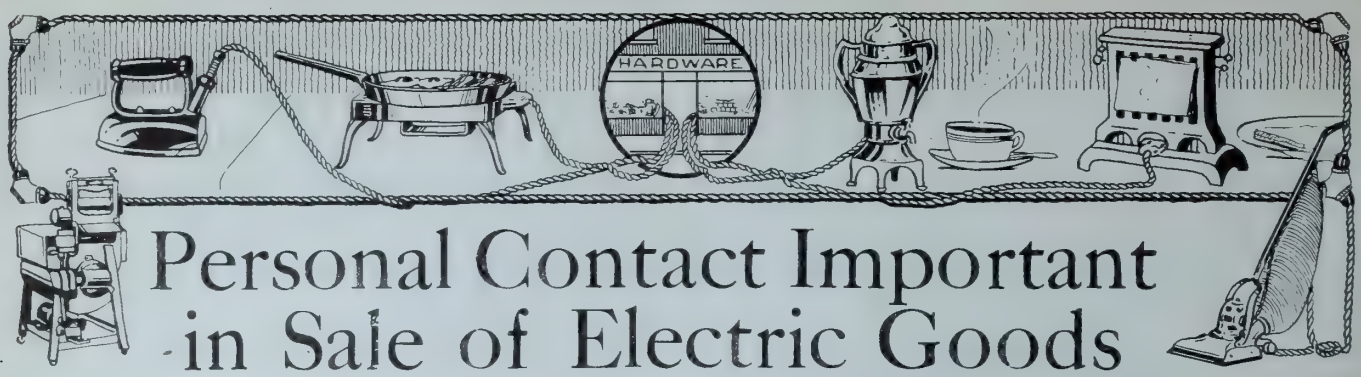
"Regarding the prospects for business during the coming Fall season, we find a gradual improvement in the demand, and more confidence on the part of buyers in booking ahead, though the general tendency is still to run stocks very close, and the market is often practically bare of standard commodities. The London Times in one of its recent trade supplements reports as follows:—

"Trade in many directions is certainly beginning to revive; enquiries are more numerous, and business is being done with greater confidence than has been the case for the past two years. We do not anticipate a boom, and we doubt very much whether a boom would in the long run prove advantageous at the present juncture. We need rather a steady confidence in the future."

"This we think practically applies to the Canadian situation, though perhaps if our crops turn out as well as expected the improvement here will be more marked, through we can hardly expect the return to normal demand this year.

"In the United States trade is naturally upset by the serious strikes in progress, and there is a temporary shortage of many lines with stiffening in prices which may not be permanent. Even allowing for that, however, good authorities consider that the trade there will continue to improve, and that there is every indication of a good, healthy demand for the coming season, so that there seems no reason why Canadian buyers should not purchase on the present market with confidence."

A very active demand for various wood products, with prices firm, is reported by W. H. Braddon, manager of the Columbia Handle Company, London, Ont. All lines of handles, hockey sticks and similar goods, he says, are in demand. The firm will not be affected in any way by coal shortages as all its equipment is operated electrically. Mr. Braddon states that there are good stocks of raw materials on hand and also of manufactured goods, but that orders are being placed freely. The firm, he says, has been very busy and he expects business to continue active. There has been a tendency in some quarters, he states, to advance prices but while the market remains very firm, no advances have been put into effect.



Personal Contact Important in Sale of Electric Goods

"Nothing Like Personal Contact to Reveal to Housewife Advantage of Electric Washers, Vacuum Cleaners and Other Appliances and to Show Simplicity of Operation"—Pays Bonus to a Householder for Demonstrations—Selling Vacuum Cleaners

THE FALL season of the year opens up many opportunities for profitable business in electrical appliances. As a matter of fact many electrical lines have their greatest usefulness in the cool weather, and have a distinctive and seasonal appeal which can be played up prominently by the merchant.

Discussing electrical sales with a hardwareman this week, Hardware and Metal was informed that the biggest sales of electrical goods are made in the fall months. This is the result of his endeavors to show prospects how they can benefit from the use of certain appliances in these months. For instance, the dark evenings of the fall and winter months, with more indoor life than in the summer, brings electric lighting fixtures, portable lamps, bulbs, shades, etc., into greater use. It is a good time to replace any fixtures which do not fulfil their purpose or which are becoming worn. Few people realize the improvement in appearance which can be made in the house interior with a few new fixtures.

Then he points out to the housewives that the heavier washings come along in the fall months when cool weather makes necessary the wearing of heavier clothing and the use of heavier bed spreads. Fall housecleaning always brings a lot of washing, so here is a distinct appeal for the sale of washers.

Floor coverings which are sometimes lifted in the summer months, and hangings which are taken down to make the house appear cooler, are replaced in the fall months, thus necessitating more cleaning. This merchant makes a separate appeal in connection with such trade, for the sale of vacuum cleaners with attachments for cleaning hangings, chesterfields, stuffed chairs, etc.

To Prepare Hot Lunches

As to the numerous small electric appliances, each has its possibilities in Fall trade. Hot lunches are required in place of the cold lunches of summer, and in the preparation of these the electric toaster, grill and percolator are very necessary. Such articles are shown by this merchant in use, preferably on a table set as for a meal. A very effective fall window can be arranged on this plan.

Then there are the September brides to be considered. From the last couple of weeks in August until the end of September there are many showers and weddings for which presents must be purchased. The trend is toward the purchase of presents of utility and what could be more desirable than some of the electrical appliances mentioned?

Discussing the selling of electric washing machines with certain hardware merchants in various parts of Canada some useful views have been received. The concensus of opinion is that the merchant who takes the machine into a home and allows it to be personally demonstrated, makes the biggest number of sales. It is found that one of the biggest difficulties is that of convincing the housekeeper of her ability to operate the machine without damaging it by her lack of skill and to convince her that it will not damage her most precious fabrics. It is the opinion that these difficulties are best overcome by actual contact with the machine. The man of the house must too be convinced that the machine is useful and that his wife can operate it successfully. He dislikes to make such an investment in machinery which might be later discarded.

An Ontario hardware dealer says: "The main point necessary to sell a washing machine is to have someone to sell it to. I have found that personal advertising by canvassing brings results. The best way to sell is to take your machine to the prospect, not wait for her to call for it. This is the way we do it.

"We load a power washer completely equipped and filled with water and clothes on our truck. A small gasoline engine is attached to it ready to start at a turn of the crank. We then make a house to house canvass of our community. Curiosity, if nothing else, will make the people want to look at it. We stop at a house, start the machine going and then get the lady of the house to operate it herself. We let her shift it into gear and run the clothes through the wringer. The simplicity and ease of operation are bound to make her want it and it is usually an easy matter to get her order."

Demonstrate in Home

Another hardware man speaks as follows:

"After I have found my prospect, either by newspaper advertising, use of our mailing list, inquiring of each customer as to their needs of a machine, etc., I carefully demonstrate the machine in the home, always bringing out the predominating advantages of the machine and naming the different people with whom my customer is acquainted who are already using the same kind of machine.

"I always keep a record of the machines sold, as I find this to be a good sales help.

"The salesman who takes the machine for its free trial must thoroughly understand the machine and explain carefully to the housewife how to operate and care for the machine, letting her do much of the actual operating herself.

"Once we have the machine in the home and have followed this plan we usually make a sale. It is much easier to send a machine out on a free trial and close the deal in the home than it is to close it in the store.

A distinctive layout of electrical appliances such as are required in the Fall months of the year is seen herewith. For the indoor months some new electrical lighting fixtures may be needed, also portable lamps. The winter makes heavier washings and cleaning of heavy rugs and hangings, hence the washer and vacuum cleaner come in for greater use. Then there is the coffee percolator, grill and toaster to prepare hot lunches. A wide range of suitable lines for Fall can be included in such a window, to good advantage.

"We have had big success in the washing machine business on this plan and never had a machine returned."

A Western dealer uses frequent community demonstrations at the home of a friend or customer. He says: "We have the lady of the house invite a dozen or more of her most intimate lady friends who may be interested in an electric washer. We find this plan not only sells a machine in the home where it is shown but also results in a number of sales among the visitors.

"A few dollars commission on each machine sold may be offered to the lady of the house as a compensation for the use of her home for the demonstration.

"Seeing is believing just as surely now as ever and it stands to reason that the most doubtful customer will be most quickly convinced of the value of a machine if she sees what it will actually do to her own clothes in her own home, especially if she has had a hand in the operating of it."

Waste of Breath

Another hardwareman points out that in his opinion there is too much breath spent on telling the customer all the mechanical details of the electric washer or vacuum cleaner when the manner in which it does the work and what it does is the most important line of argument.

"How many merchants selling vacuum cleaners, for instance, dwell on arguments in connection with offsetting the housewife's greatest household enemy, dust?" he asks. "How frequently do we point out to her that electric suction is the sanitary way to remove its dangerous particles, laden as they are with disease germs, from her home? We assume to know a great deal about cleaners, but how much do we know about dust—which is the evil the cleaner is sold to battle with?"

The air of high mountainous sections, on deserts, and on the sea, is practically free from bacteria. In large cities, on the other hand, these organisms swarm. The fine, bacteria-laden particles, when inhaled, may be the cause of any number of diseases, and it so happens that the danger is much greater indoors than out-of-doors. Bacteria are so very minute that it is hard to conceive of what they are like. Many of them are not more than 1/150,000th of an inch in diameter. They reproduce by the simple method of dividing into two parts, and under favorable conditions multiply at an enormous rate. It has been calculated that one germ, dividing once every hour, would at the end of twenty-four hours have increased to seventeen millions if nothing interfered with its food supply. Fortunately for us, nature in various ways renders such extremely rapid growth impossible, but just the same, it behooves us to avoid conditions favorable to their increase.

"Might it not be worth while to drop a word about this in the course of your next sales talk on cleaners? The housewife has no particular fondness for dust, and a scientific fact or two about its dangers makes an impression on her. Why not show her that when one employs electric suction, one does the dusting first, and then, with the cleaner and attachments, suction sweeps all the dirt from the room. The salesman who can see the devices which he handles in relation to the home knows that dust and its elimination are matters of importance not only to the housewife, but also to those of us who are selling cleaners."

Hardwareman Outsells all

Finds Electrical Lines Respond Readily to Stimulating Measures—Every Customer Regarded As a Prospect For Electrical Goods—Can Give All the Service Required

HARDWARE merchants who have been looking closely into their records of turnover in various lines of merchandise for information as to lines which can be pushed to best advantage and thus compensate for the falling off noticed in certain other lines, will be interested in the experiences of the Bernhardt Hardware of Preston, Ont.

When seen recently by Hardware and Metal, Mr. Bernhardt explained that he had been up against the difficulty of a falling trade in many lines of hardware during the depression and took steps to right this condition. An evidence of the influence which a hardware merchant can be in guiding public opinion when directed along intelligent lines is found in the fact that this firm has been able to build business from that point until one of the months of this summer was the best on record from the standpoint of merchandise sold.

In going over his stock to decide on what lines to push Mr. Bernhardt decided first on electrical goods, despite the fact that there are a number of first class electrical contractors in town, with display rooms. He realizes that it is only by going one better than his competitors that he can hope to continue to hold the big share of electrical business in Preston as he does. He does not believe in waiting till competition gets to the danger point before he takes steps to combat it. The result of this effort has been not only to stimulate business in general but to bring a greater volume of electrical business to the store than is enjoyed by all the exclusively electrical shops in town together. Paint and oil stoves have also figured largely in the stimulation of business which has attended these efforts.

Can Give All Service Needed

Raising the question of service in connection with the sale of electrical goods, Mr. Bernhardt stated that he not only sells a number of toasters, heaters, grills, iron and other such appliances, but he has a big trade in electric stoves, washers and vacuum cleaners. On these slightly more service is required but he has made a little study of the line handled and is able to replace elements, renew wiring and locate any ordinary trouble which may be encountered. This is the full extent of any service which he has been called upon for, and it is significant of the comparative unimportance of this element that Mr. Bernhardt can sell more of these lines than competing electrical stores.

In the sale of electrical stoves special wiring is often required. In such cases a local electrician is employed to make the necessary connections, but the hardware store is responsible for the stove being in working order and keeping it that way and it is able to line up to its responsibility as well as any other shop.

Getting Prospects

Mr. Bernhardt follows the plan of developing prospects, and these he secures in many ways. He is always on the lookout for new people in town and generally is able to sell them quite a bill of hardware. He also keeps a line on social developments, engagement and wedding notices, etc. By this plan he was enabled to double his sales of oil stoves this year, and to greatly increase his sales of electric washers, vacuum cleaners and smaller appliances.

Few hardware stores can boast of any better arrangement of a large stock than is evident in this view of the interior of the Bernhardt Hardware, Preston, Ont. One of the important points is the use of display tables down the centre, each bearing a card stating the lines shown thereon, each card higher than the one in front. Display racks at the rear are devoted to small household lines. With each line price marked these small tables sell a good volume of hardware.

Local Electric Stores

Local Electrician Does Any Special Wiring—Gives Extra 5 per cent. on Tires to Offset Garage Service—Price Concession Increases Sale of Paint in Gallons

With the spread of electric current and the increasing tendency to use labor saving devices Mr. Bernhardt finds it easier to sell a large volume of electric appliances to-day, and the fact that his success is largely the result of his energy in working on prospects is seen in the way in which he wins out in competition with local electric shops. The larger number of people entering his store provides a good opportunity for sounding out local news and talking up various lines. Mr. Bernhardt takes an interest in all of his customers, talking with each some affairs outside of business. His genial nature no doubt helps him greatly.

Electrical goods are featured regularly in the windows and occupy a prominent location in the store interior. Other household hardware is shown effectively on small tables down the store centre as illustrated. Allowing customers to leisurely stroll through these rows of tables and examine the lines closely, results in many sales. These tables are devoted to aluminum ware, auto accessories, bathroom equipment, graniteware, sport goods and small kitchenware. Prominent cards on each table direct the customer.

Gives Extra 5 Per Cent on Tires

This store has sold auto accessories for two years and an increasing trade has been developed. Displays appear regularly in the windows and a prominent location is given a display table devoted to accessories inside. Lines which sell best include batteries, tubes, valve-paste, lights, patches, oils, pumps, paints, top dressing. It is found that people in Preston and vicinity take much interest in fixing up their own cars, hence the greater demand for such lines as are enumerated. Here again every motor car owner who comes to the store for any hardware is looked upon as a prospect and any new auto accessory lines are drawn to his attention. In the sale of tires this firm give an extra 5 per cent. off to compensate for the fact that the garages put the tires on while the hardware store does not. The reduced price evens up any advantage the garage offers and it is found many motorists take advantage of this, putting on their own tires.

Price Concession on Gallon Cans of Paint

Paint sales have been greatly stimulated this year, particularly in gallon cans, by reason of the fact that the policy of giving a concession in prices on gallons has been made. Paint has been sold at $5.00 a gallon instead of the usual $5.50. This concession did not apply on smaller quantities. As a result a great many more gallons were sold. This has not resulted in leaving a lot of paint on people's hands which they did not want but had the result of increasing the amount of painting done. It was found that when a person has made a start on painting and has a good big can of paint waiting to be used, that they will find many surfaces which need that paint and which otherwise would have been neglected. The paint department in the interior is kept well to the front the whole year.

In arranging window displays Mr. Bernhardt finds it adds much to the effectiveness of the display to get some action in it. Thus in displaying auto accessories, a model car with wheels revolving is shown. Electric appliances on display are generally shown in operation. The same idea applies to sport lines such as bicycles, velocipedes, wagons, etc.

One of the chief reasons why the Bernhardt Hardware at Preston, Ont., sells more electrical goods than the local electrical dealers combined is seen here. A wide range of electrical appliances is shown including vacuum cleaners, washers, heating pads, grills, irons, heaters, stoves, toasters. Note that a variety of nearly all these lines is offered from which the customer may choose. Such displays bring many prospects into the store.

Some indication of how hardwaremen are advertising electrical goods is found in this reproduction of ads. by Turnbull & Cutcliffe, Ltd., of Brantford, Perry Hardware Co., of Estevan, Sask., McMurtrys, St. Thomas, Orillia Hardware Co., Orillia, Ont., Ingram & Davey, St. Thomas, Ont., Rice Lewis & Son Co., Toronto. Some attractive layouts and effective copy are seen in these ads.

PRESIDENT OF CANADIAN WHOLESALE HARDWARE

(Continued from Page 123)

item of overhead cost. We certainly will not stand for any effort to make the retailer shoulder the cost of issuing drafts. We will oppose the movement just as energetically as we oppose the imposition of the sales tax on the retailer. The manufacturer and the wholesaler should very well consider the desirability of absorbing all sales taxes and passing them along as an item of cost of manufacture and sale, just as other costs are passed on. Thus the retailer is afforded an opportunity of passing the cost on to the consumer, which he would not otherwise have."

DAMAGED SHEET CARGO TO BE AUCTIONED

Montreal.—The damaged cargo of sheets from England on the S. S. Orphea, which ran aground in the St. Lawrence a few weeks ago, has now reached this port. Upon investigation it was evident that the larger part of the consignment was damaged to some extent, although it is reported that some material has been taken into stock. There is, however, several hundred tons of galvanized iron and a smaller quantity of black sheets to be sold at a sacrifice. This portion will be sold by auction at an early date. Certain firms are said to be anxious to obtain a part providing the sheets are not too badly damaged, claiming that they can easily dispose of them if the price is not too high.

FIGURES OF PIG IRON PRODUCTION

Montreal.—The production of pig iron during the month of June showed an increase of 23 per cent. over the output of the previous month. A tonnage of 28,763 was returned for the month under review as compared with an output of 23,636 gross tons in May. The basic pig manufactured for the use of the reporting firms increased over the previous month's record by 8,449 tons. The malleable iron produced for sale also presented the substantial increase of 149.5 per cent. The production of ferro-alloys, however, decreased from 2,680 tons in May to 2,051 tons in June, or a reduction of 23 per cent.

Reports of pig iron production in the United States show that increases from the beginning of the present year have also been well maintained. The daily output during June increased by 4,292 over the record of the previous month and fifteen additional furnaces were in blast.

MARITIME BUSINESS IMPROVES

St. John, N. B.—Business in automobile accessories, sporting goods, paints, etc., continues to be very satisfactory. The jobbing houses in the Maritimes are now shipping out large quantities of ammunition to the retailers for fall shooting. The sale of guns and rifles has not been large, but the ammunition business seems to hold its own at all times.

The total cost of building permits issued by the St. John building inspector for the month of July is far in excess of the total for July 1921, according to figures given out by the building inspector. The total value of permits for the year to date is also greatly in excess of the total for the corresponding period in 1921. In July the value of new buildings was estimated at $180,000.

Selling 30 Ranges in Five Days

One Week in Year Devoted to Demonstration of Stoves —Salesmen in McArthur Store, Vancouver, B.C., Avoid Price Until Sales Talk is Delivered—Keep Stoves and Ranges on Mezzanine Floor Away From Distraction of the Store.

DISCUSSING retail selling methods which are particularly effective in moving stoves and ranges during the fall months, W. T. McArthur, Vancouver hardware merchant, stated to Hardware and Metal that while the policy is followed of pricing plainly the various lines shown in the window displays, this is not applied to stoves and ranges for the reason that other elements are talked up by the salesmen in personal conversation with the stove prospect, and also because of the fact that the prospective stove buyer is not primarily influenced by the question of price.

"We specialize in Canadian-made stoves and ranges," said Mr. McArthur. "We sell high class, high-priced ranges. In this department we have two specially trained men who understand stoves and ranges from every angle. They are posted on all the strong points on ours and all the strongest features of the competing makes.

Stove Customer Has Price in Mind

"When a customer comes in the store to buy a range, probably she has in mind the figure $75 or $65, after having been to the department stores and reading the mail order catalogues. Our salesman commences to describe the excellent features of our Canadian range. The customer asks the price. Instead of naming the price the salesman continues to pick out other improvements. Again the price is asked. The salesman affects not to have heard. By the time the demonstration is through, that customer wants our range, but her idea of its value has been going up—up till she begins to fear she cannot afford the range she wants most.

"When the salesman has canvassed all the excellencies of the range, and has summarized the various labor savings, the fuel economies, the ease with which the enamelled, and tile back and over doors can be kept clean, and the polished steel top in condition, then and not till then, does he state the price. By that time, his price seems reasonable in comparison with what she feared, although it may be twenty dollars higher than her ideas when she first came in. It may surprise the Eastern dealer to learn that we never sell a black topped range, and about 85 per cent. of the ranges sold have tiled or enamelled backs. The item of easy cleaning scores a big hit with the woman buyer. Of course, we guarantee all our ranges to give satisfaction. The ranges are all displayed on the mezzanine floor where there is less likelihood of the salesman or the customer being disturbed by other customers."

Exhibit at Fair Helped

The salient features of the merchandising methods of the McArthur store are: Specific advertising, with cuts; everything priced plainly in a manner that identifies the store; specially qualified salesmen to sell the stoves and ranges. This store was the first to show ranges in an exhibit at the exhibition. "This paid well," said Mr. McArthur, "and we have had customers come in a year later and ask to see the range that was demonstrated to them at the fair."

An Ontario merchant describing the methods by which he has worked up a business of considerable proportions having in mind the fact that he is located in a small town in close proximity to the larger cities and where mail order competition is very keen, stated: "We do not believe that any one can make much of a success in selling an article unless they firmly believe in it. We certainly believe our line to be the 'World's Greatest Range.'

Enthusiasm a Business Getter

"Enthusiasm is a business getter; we talk them; we push them; and we advertise them; until the name of our store and the range are synonymous.

"One week each year we hold our demonstration and have sold as high as thirty ranges in five days. We run our ads in the local papers two or three weeks in advance of our demonstration; and the week prior to the event we mail out several hundred invitations. These were received from the factory and our only expense is the cost of mailing.

Use Sold Cards

"We use a red 'Sold' card for every sale we make, giving the size, style of range, name and address of the purchaser, and the date of delivery. We tack these cards on the walls and when a range prospect comes in, he finds on the list many of his friends and neighbors who have bought ranges.

"We have two families with six of our ranges in each family and many more with two, three, and four in the family.

"We have sold these ranges for seven years and have never had to take one back, and in that time our sales have mounted into the hundreds.

"We figure that our responsibility does not end when we receive the check. In fact, we have spent considerable in making good some part of a range that the customer thought was not satisfactory.

"Canvassing is the best method of securing business that we know of. If we can get in the kitchen, even though we do not make the sale at that time, we can tell when they will be needing a new range by the condition of the old one, and often we get the names of some relative or friend who is in the market for a range.

"The first and most important thing to do is first to sell the complete line to yourself. Without confidence, the sale is partly lost at the best. We feel that we are giving as good a range as is manufactured.

Salesmen Examine Ranges

"The next step is to show its merits to our customer. We

An imposing store front with its double decker windows is that of W. T. McArthur Co., Ltd., hardware merchants of Vancouver, B. C. Above is shown a display of kitchen utensils revealing a wide range of lines to choose from and everything prominently price marked. In the centre window are a number of electrical appliances including heaters, irons, toasters, etc., along with a number of lines of cutlery.

feel that each salesman should speak plainly and convincingly, so any help which we have had in our own experience is told to them. We call the men together and the three of us go over the range from top to bottom, examining its construction, the weight of the castings and comparing it with ranges of various models such are sold by our competitors. After this is done I have given a demonstration of selling using the men as customers. After the men know about it, we ask them for a demonstration, so they become accustomed to showing the stove in a proper manner.

"We lead the customer by a little question such as 'Don't you think so,' or 'What do you think about it' to enter into the examination with a degree of interest that we sometimes did not expect.

"Our ranges are kept clear of other merchandise and the best ranges face the front door. They are attractive.

"We never knock another line of ranges. If our customer says something flattering about our competitor's line we pay no attention to it. If they insist on us saying something about this other stove that they have been looking at, we tell them frankly that we have reasons for not handling that particular stove and they could doubtless get a dealer who handles that stove to show it to them in detail. Often the dealer has shown them the stove but has not satisfied them. We invite comparison and when we feel that a customer is simply looking around we never try too hard to close up the deal before they look elsewhere. We do make a point of showing every convenience and point out economy on our range and then suggest to the customer that they go elsewhere—compare and assure themselves of the value and class of the range which we have shown them. We have never yet lost a customer by speaking in this way. Sometimes customers who had suggested that they wanted to look around at the other stores would decide at once that they could not do better.

Keep List of Stove Customers

"We keep a list of our customers and the date and style of stove which they purchased as well as the price paid. A list of fifty or more good representative people using our stoves looks good to the average customer. We never have to show them the whole list but they usually see the name of some friend, and we always assure them that we can get letters of recommendation from every owner.

"We never let a customer be dissatisfied with a range. If they have any complains, we get in the car and go out to see just what the trouble may be. We have had very few of these complaints and the trouble in nearly every case has been a defective chimney. As soon as the chimney was fixed the stove would operate satisfactorily. One time we found a stove brush in the back flue of the range. This had evidently been dropped in at the factory, and as soon as we took this out the stove had a good draught.

"We have taken but one range back and this was not because of any defect in the range. Our customer told us that he was not satisfied because our range had no small poker door in front. (This model did not happen to have one.) He objected because he could not light the fire so easily in the morning. He said that in his old stove they would pile all the kindling, etc., in the stove, put on wood and then light it from the front. They simply would not have bought our stove if they had noticed this door lacking.

" I said, 'Bert, bring that range back to us. We don't want you dissatisfied, because some neighbor is going to ask you some day just how you like that stove.'

"Bert said, 'That's all right, but there is nothing wrong with the stove. I simply don't like it and besides its second-hand now and it would cost me too much to turn it in.'

Above is shown a window including a number of lines which will be in demand in the fall months of the year including ranges, fire screens, tools, toys, etc. Note that price tickets are used throughout. In the upper windows are shown washing day requirements and some of the larger toys such as tricycles. The windows form a prominent selling medium for stoves and ranges in this store though prices are never shown on stock displayed in this fashion.

"My reply was, 'Bert bring it in. We will allow you the amount you paid and if you want anything for your trouble just let us know.'

"Well, this farmer brought the stove in and seemed very reluctant to take all of the money that he had paid for it.

Came Back for Another

"About two weeks later, he came in and ordered a range from catalogue and said some nice things about us. It was so much more than he expected that he told the entire neigborhood what we had done for him. Result—when people from that vicinity want new ranges they think of us and our line.

"We make a point of setting up every range that we possibly can as soon as they are delivered. By doing this we know that the stove is level and that the pipe fits correctly. It also gives us an opportunity to show the housewife how to operate the drafts, how to keep the nickel clean and the polished top bright. We take an interest in the stove after it is sold, just as we did before it was sold.

"When a range owner calls us up and wants a new section of a fire-back or a new water-back we don't have to worry them with the complete trade name, etc., as we have it in our record. This pleases them, as they feel that we have not forgotten that range that they bought five years ago.

"One of the most important points in our selling plan is our prospective range sales book. When we hear of anyone who will soon have to buy a range, we put the name down and immediately start sending literature. Sometimes we ask the factory to forward it direct. We try to educate the customer to wanting our kind and style of ranges. If the customer does not come to the store within the time they have spoken of buying, we drive out and see them in their own homes."

THINK BRITISH TRADE SHOULD HAVE BETTER REPRESENTATION

Toronto, Ont.—The Federation of British Industries, with a membership of 20,000, and a combined capitalization of five hundred million pounds sterling, has interested itself in the erection of a British or British Empire building at the Canadian National Exhibition.

G. H. Locock, assistant director of the Federation and J. M. Mackenzie, head of the Empire section, were guests of managing director John G. Kent in an inspection of the grounds and buildings at the Great Fair recently, and later expressed strong views on the inadequate representation which British trade has had at the Exhibition.

NEW SHIPPING COMPANY

Montreal.—Of interest to manufacturers shipping goods to the West Indies and Central and South America is the recent formation of the Canadian Industries, Ltd., a transportation company organized for the purpose of distributing Canadian products in the American West Indies, Columbia, Venezuela, Panama, Central America and Mexico. The company will not only act as export agents but will carry on their line of steamships any goods which may be consigned to ports in the territories mentioned. They have appointed agents in all these countries to look after the sale and distribution of Canadian goods.

The first sailing was made from Montreal early in June with a full cargo of cement, carbide, wheat, paint, barbed wire, galvanized wire, wire nails, wrapping paper, carbonic gas and fish. The early results of this venture are very promising, the first boat being more than booked up. Manufacturers are taking the advantage of shipping via Montreal, thus avoiding the cost of the rail haul to New York on which freight charges are almost prohibitive, especially in the heavier class of goods.

Problems in Stove and Range Selling

Delivery An Important Factor in Selling of Stoves and Ranges —Some Merchants Make Allowances for Long Hauls to Country Customers—Stoves Feature in House Furnishing Department—Selling for Cash or on Instalment Plan—Cooking Ability First Appearance Second

"WILL YOU deliver and set up the stove?"

"We always do that, madam. This week we drove out to a neighbor of yours with a cooking range. It has been our policy for years."

"All right, we will take this one at seventy-five dollars, but we are not living on our old farm now. We have sold the homestead and moved three miles farther up the road. I hope you can have it out to us by to-morrow as we now have no means of cooking, because we sold our other one to the party buying the farm."

The above conversation was overheard by a representative of Hardware and Metal in a hardware store not long ago. The sale had been made and the merchant was to deliver the stove twelve miles in the country. Cash was paid for the purchase, and the man and wife were assured that the range would be ready for use on the following day. After the buyers had left the store the question was asked of the merchant: "Can you afford the time and expense of delivering that stove such a distance, surely it will require your truck and two men nearly a half day to set it up?"

"We are not going to make our legitimate profit on this deal I'll admit, but still there will be some left for us," was the reply.

It was then explained that an allowance was always made for expenses in this direction. The quotation marked on the stove was the regular purchase price, and the margin of profit permitted delivery within a reasonable distance of the store. However, if this farmer after asking if the stove would be placed for use, had said he would take it home in his waggon and set it up himself, a price of ten per cent. less would have been given, for cash of course. Part payment and balance in instalments would not have been taken, the merchant said. Even after making the sale, he would not have considered it a difficult task, if the money was not forthcoming, to explain that he would only deliver the stove for cash at that price.

"How about your town customers?"

"We give them ten per cent. off for cash," was the brief reply.

Retailing stoves and heaters has always been an interesting question for discussion among hardware merchants. To some the line has proven a very profitable one, to others as a money maker it has been questionable, while a certain percentage have not established this branch of the trade as a store commodity. Reasons given by the last mentioned dealers may differ. Store space may not allow a proper display, the line is left for the house furnisher or the exclusive tin-shop and stove store, or too much money is tied up in a complete array which is considered necessary. While the above may be given individually or as a whole as a reason or reasons, it is safe to say that the question of delivering and setting up absorbing a good percentage of the profit is one of the chief obstacles expressed by many who do not stock a line of heating stoves and cooking ranges. While criticism may be thrown at the method adopted by the merchant in the above conversation, because the rural customer who delivers his own stove is asked to pay the same amount as the purchaser in the town who has his stove placed ready for use, it is one way of overcoming the difficulty and apparently works out to the satisfaction of this dealer.

From the many merchants who have found that stoves form a well-paying line in the store, information is gained that success lies in the ability to increase the turnover. Selling ten or twenty stoves a year, and delivering them, may or may not show an appreciable amount of profit, but selling fifty or a hundred, or even more, most assuredly does. It is to this end, then, that most merchants devote their attention. In many stores the success has been so marked that the stove department occupies one of the choicest localities in the store, being considered the leading line.

Features House Furnishing Department

A Montreal merchant specializes on furnishing homes, and features heating and cooking stoves in a department set aside for this purpose. This section of the store occupies one half of the ground floor space, with one large display window at the front and two at the side. On entering the main entrance the customer is confronted on the left by the shelf hardware and paint department and on the right by the stoves and other requirements of those commencing house-keeping or customers desiring to refurnish. Sales in this department have shown an encouraging increase year after year and in a recent conversation with the proprietor, Hardware and Metal was informed that a good percentage of business is obtained from newly married people commencing to build up a home. One of the first needs that comes to the minds of these customers is the cooking range, they doubtless realizing that their future existence requires this article before all else.

When they come to purchase they enter a store which can supply them with many other lines which they will have to buy, and a stove sale usually means that the delivery truck will be laden with a full load of household necessities. "This is the class of trade we are now catering to, and in recent years we have made such headway that our store is now known for many miles around as the first stopping place for the bride and groom," he said.

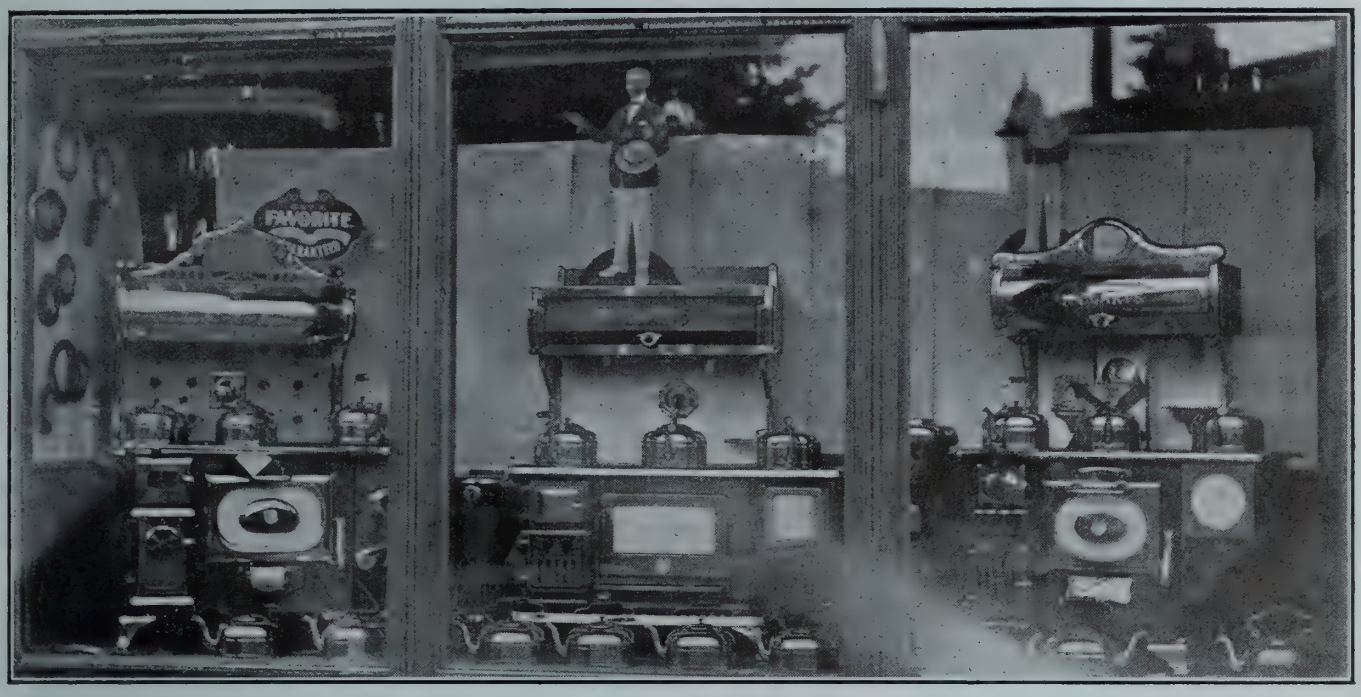
"Do you sell for cash only?"

"No, we have a system whereby these people can purchase on the instalment plan. They pay not less than one-half down, and the balance in monthly payments. However it is surprising the number who want to take advantage of the discount we offer for cash. We have found that by getting them in our store first we can often encourage them to pay for the goods on the spot. They have saved up for the occasion, and we always try to get there first," he concluded.

Oven First, Appearance Second

Another factor in retailing stoves has often been outlined, and this is no doubt all important when selling to the older

Shows Kitchen Utensils With Ranges



For the purpose of advocating the complete replacement of kitchen requirements before the cold weather sets in, E. M. Lapierre, hardware merchant, of Buckingham, Quebec, shows a group of kitchen utensils along with ranges in his window displays. Here is a sample Fall display in this store showing ranges highly polished, kettles and other utensils, heaters, stove boards, etc.

housewife. The salesman must know everything there is to know about the stove he is selling. A lady customer, especially one experienced by years of cooking, looks to the oven first, and the appearance of the stove, as a secondary consideration. Of course, the outward appearance of the kitchen ornament will go a long way in assisting the sale, but, will the stove cook well? A merchant in a small Ontario town when asked the question, used to reply with a smile on his face; "Yes, this stove will cook with the oven door open." Needless to say the reply in itself carried little weight with the customer. It would in all probability bring forth a smile, and allow the best of an opening to get the prospective purchaser interested.

The real sales effort followed. It was up to him to show the lady that the stove would meet all requirements in the line of cooking and he would set out to do just that. With sleeves rolled up he would remove the lids off the fire box and over the oven, point out the direction of draft, the effects of each damper, and explain why each one should be closed or open. The direct draft in the chimney and height of the fire in the fire box were also important, the amount of heat shown on the oven thermometer should be watched. The flue at the bottom of the oven must not be forgotten. There was nothing left to be explained when he finished, and all through the sales effort the appearance of the stove was not taken up. This would be pointed out after the customer was assured that nothing more could be desired from a cooking standpoint.

Although proprietor of the store, he could very often be found with a soiled shirt, and perhaps his face had also come in contact with the blacking of the stove. However, it was generally found that the sale would be closed before the customer left the store. "Let me attend to a stove prospect, and if I cannot sell I can at least make it easier for my competitor who will follow me in showing his stove," the dealer used to say.

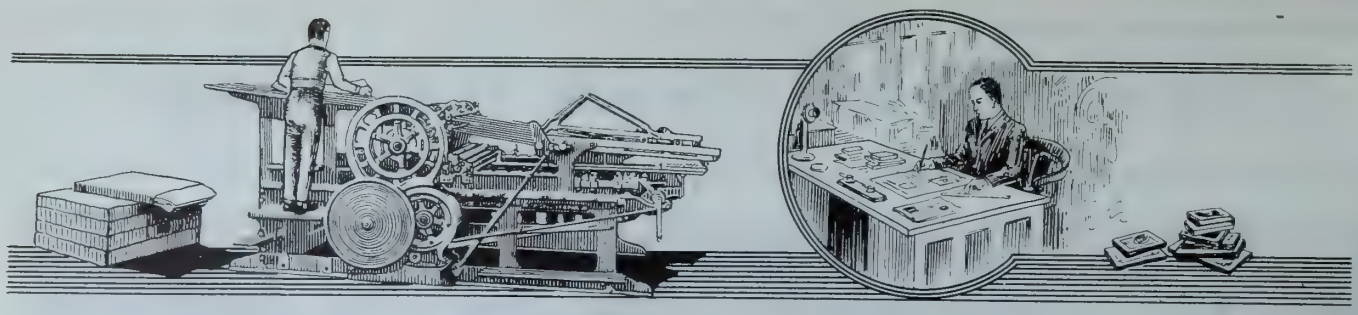
A Broader Range

Stores selling stoves have found that almost each year brings something new to the department. In the pioneer days a stove was a stove, burning wood, and heating and cooking at the same time. From wood to coal, from coal to gas

(Continued on page 149)

Important Points Made By Retailers For Successful Stove Selling

1. **Don't emphasize prices on stoves and ranges. Make the customer want it and tell them the price last.**
2. **Easy cleaning is big argument in selling women customers.**
3. **Place stove department where salesmen and customers have no distraction.**
4. **Exhibits at fairs have pulled stove business a year after.**
5. **Enthusiasm combined with thorough knowledge is best basis for stove selling.**
6. **A demonstration at set period with plenty of advance notice will sell stoves.**
7. **Put "sold" cards prominently on all stoves or ranges sold with addresses and names of purchasers.**
8. **Don't consider that your responsibility ends when stove is sold.**
9. **Canvassing will bring business. Get into the kitchen and see the stove now in use.**
10. **Have salesmen study the stock and carry out sample demonstration.**
11. **Get the customer interested in the examination by a leading question.**
12. **Don't knock another line of ranges. Invite comparison. Don't press customer too hard if "only looking."**
13. **Keep list of customers with date and style of stove purchased and price paid.**
14. **Customer list helps sell others and facilitates any replacements which may have to be made.**
15. **Satisfied customers do much valuable advertising for the merchant.**
16. **Establish "prospective range sales book" and work hard on prospects.**



Preparing Effective Advertisements

Many Retailers' Ads Could Be Greatly Improved in Style and Effectiveness by Employing Some Simple Rules—Most Effective Work Now Required of Ads Makes Necessary Some Study of the Question—A Weak Ad is Revised

We are just paying our advertising account to a local paper and we wonder if we get the results. We are thinking of buying a multigraph for circular advertising. What do you think of this plan? We would also like your comments on our style of advertising as per enclosed.

Porteous Hardware Co., Grande Prairie, Alta.

IF THE LOCAL paper reaches the prospects of the store economically it should be used. A store which serves a restricted district in a large town or city may find it wasteful to pay the high rates for reaching a very large territory only a part of which is likely to contain prospects for their store. In such cases the advertising problem is to find means to send the retailer's message to as many individuals as possible in the territory he actually serves. Circular letters to a good mailing list are a good means of doing this. The mailing list should be kept clean; that is, free of names of persons who have died or moved away, etc. If possible a card index with the names on the mailing list should be kept. When one of these customers purchases something a note of the article and amount of sale should be entered on his card. This will help to check results.

It should be remembered that some of the most valuable results of advertising, either in local papers, by circular letters, by word of mouth in conversations in the store, by show cards, by window displays, by moving picture slides in the local "movie show," cannot be traced, yet nevertheless, the merchant is receiving value for the money invested in advertising.

In all forms of advertising for the retail store good copy is important. "Stunts" do not gain much. "Reminding Copy" such as "Buy Midnight Cigars" has only a limited and incomplete value. The copy should do several things to be complete, either in a letter or a newspaper advertisement.

It matters not what classification you give any particular advertisement, it has an object in view. How that object can best be achieved is the ever-present problem of the merchant, or whosoever it may be, who decides to contract for space in a newspaper, magazine, periodical or any one of the other varieties of media which may be at his disposal. If advertising were an exact science the problem would be easily solved. It is not an exact science and probably never will be—that is, so far as text matter, illustrating and method of typographical display are concerned, which happen to be the subjects under consideration now, and was occasioned by a solicitation for criticism of the advertisement shown here as Fig. 1. This is a two column newspaper advertisement. The merchant who submitted it for criticism is anxious to secure the best possible returns for the money he invests in newspaper space, and asks if an improvement could be made in the pulling power of the message both from a copy and display point of view.

There are very few advertisements, no matter how strong their appeal, that cannot in some way be improved. Some are open to a vast improvement. This particular one no doubt could be improved to a considerable extent. Our idea of a stronger appeal is shown as Fig. 2.

We have said that advertising is not an exact science. In other words, no set of rules can be established to cover all cases. Yet, a number of broad principles governing advertising have been almost universally adopted.

If an advertisement is to successfully fulfill its purpose the accepted broad principles of advertising should be adhered to. An advertisement must (1) attract attention; (2) invite reading and be easily read; (3) carry conviction, or, as one eminent man has said, that to have your advertising successful, you must get people to see it, read it, understand it, and believe it.

Value of Attractive Layout

It is conceded that the appearance of an advertisement determines to a great extent whether or not it will be noticed and read. Then it must arrest attention first of all. Many advertisers fail to grasp the fact that it is largely the layout which decides this. The finest of copy material may be entirely wasted through lack of attractive display.

An attractive layout is usually secured by:

- Pleasing balance and contrast.
- Brief headings, easily grasped.
- Text matter set in readable type.
- Having each unit separate and distinctive.
- Proper proportions of white space.
- Display lines in relative type faces.
- Type set to conform to shape of ad.
- A neat border that matches the type, and holds the units together without claiming too much attention, to the detriment of the message.
- The use of an illustration (if possible.)

A good layout, in a nutshell, means a clean-cut, readable and coherent arrangement which carries a "punch." A good heading helps to give it the necessary punch—and it is not necessary that the heading be in billboard type, which too often promotes clumsiness. But the chief method employed today to give an advertisement the desired effectivness, is found in the use of an appropriate illustration.

Then to make an advertisement easily read, the parts must be separated by white space. To make it carry conviction there must be an interesting story to tell. It must be told clearly, and in most cases briefly and to the point.

The realm of advertising is just about as complicated as the realm of law. A problem is presented with each case. This being so, we can hardly hope to treat in detail the complex ramifications of the principles enunciated here. However, by keeping the few broad principles of good advertising in mind, the casual copy writer has something definite to aim at; experience and practice will then gradually unfold and prove their value.

Now, how does it so happen that there is so much hit-or-miss affecting the presentation of advertisements in newspapers throughout the country? This may be readily explained. Consider, for instance, the advertisement shown in Fig. 1. Evidently the author is not a technically trained ad writer, which is certainly no reflection upon his ability, pertaining to his legitimate calling. Consequently, the advertisement is not written to the best possible advantage. The salient feature, which happens to be "heaters, at new and lower prices," is not played up, to use a newspaper expression. Then in the second place, the compositor, or printer, who constructed the type arrangement, "slipped up" to some extent in his part of the work, inasmuch as he failed to make good the deficiencies of the copy writer.

The printer is not always to blame if an advertisement lacks selling qualities. He is often obliged to conform to the dic tation of the ad writer, and if the ad writer is not technically trained, indifferent results follow.

Bring Out Vital Features First

It is the contention of the writer, based on several years' experience, that the advertisement of the Porteous Hardware Company would be more productive of results by boldly displaying the subject of the message at the commencement, along with the selling points, "at new and lower prices," as shown in Fig. 2. The message is almost sure to catch the eye of every reader of the paper, and anyone who is thinkng of buying a heater will not likely pass it over. The Porteous Hardware Company will be remembered more readily, too, by those who are not concerned about buying heaters today, but who may be ready to purchase some time in the future.

We believe that our re-set, Fig. 2, presents the message with more telling effect than the original, Fig. 1, but the former likewise is open to improvement. How much more effective it would have been to have included prices! Of course, it is appreciated that the Porteous Hardware Company may not care to give vital business tips to their competitors. Nevertheless, the backbone of the message, we believe, has been sacrificed by this omission.

You Get Your Money's Worth

WHEN YOU SELECT A HEATER FROM OUR COMPLETE STOCK

WE HAVE HEATERS—EITHER COAL OR WOOD—in all sizes, and every Stove is marked at the new and lower prices. Get yours now while the stock is complete and be prepared for the cold weather.

"We Sell Stove Satisfaction"

LET US SOLVE "YOUR" HEATING PROBLEMS

PORTEOUS HARDWARE CO.
LIMITED
GRANDE PRAIRIE ALTA.

Fig. 1 Original 2 column ad. as submitted by Porteous Hardware Co., Grand Prairie, Alta., for comment and suggested improvements. It would have been stronger to have quoted prices. Other improvements are mentioned in the article.

HEATERS
At New and Lower Prices

HEATERS in all sizes, either coal or wood, every one of which is marked at a new and lower price. Get yours now while the stock is complete and you will be prepared for the cold weather. Remember we sell stove satisfaction.

Let us solve your heating problems

PORTEOUS HARDWARE CO.
LIMITED
GRANDE PRAIRIE, ALTA.

Fig. 2. Revised layout of two column ad submitted by Porteous Hardware Co. as shown in Fig. 1. In our opinion this ad is much stronger than the other in that it emphasizes the name of the article about which the ad is written and the second emphasis is placed on the selling points.

Modern Method of Preparing Copy

It is a fact worthy of note that the city dailies carry more effective, sales-pulling advertisements than the country weeklies. Two reasons may be pointed to for this. Nearly all city newspaper advertising is written by trained ad writers, and the city printer, generally speaking, is a more highly trained display compositor. The business of advertising is conducted something after this fashion in the cities. The ad writer prepares his copy and layout with pen or pencil. The layout indicates pretty closely what the ad writer has in mind. In many cases it is almost an exact re-production of the advertisement; the headings, sub-headings, prices, name and address, etc., are all carefully allocated, with marginal notes indicating the type to be used. The places for the text matter are shown on the layout by drawn lines very often, and the matter is usually carried on a separate type-written sheet. The text-matter then finds its proper place by the use of corresponding numbers. The most approved method is to typewrite the complete advertisement separately, including everything in the layout. Thus the chance of getting any of the text in the wrong place is minimized.

If there is a good understanding between advertiser and publisher this painstaking and rather time-consuming method is not necessary in all its details. A rough pencil layout and type-written copy is all that is necessary. The publisher and his staff have learned from experience the requirements of the case. That is, the kind of border and type preferred by the advertiser; bold or conservative display; an abundance of white space, or a limited amount, and other

(Continued on Page 151)

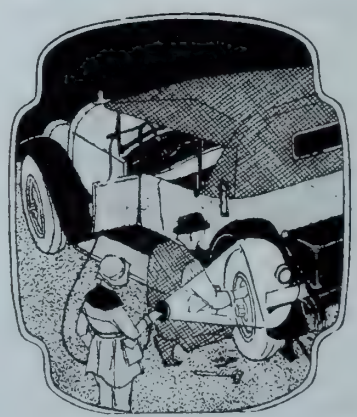
Moves Accessories to Larger Quarters

Big Growth of Automobile Accessory Business Necessitates More Spacious Department —Electric Headlights and Bulbs Connected Up—Special Tire Holder—Stand for Bumpers—Goes Easy on Novelty Accessories—Compiling a Catalog

THE automobile accessory department of W. H. Thorne & Co., Ltd., St. John, N. B., during the past few years has grown to such an extent that the small department used on the lower floor has been found to be far too small to accommodate the increased stock, and larger quarters had to be found elsewhere. Even with the small department it was found necessary to have a special stock room, with a man in charge, who by the way is an experienced man, and knows the automobile accessory business from start to finish. Messrs. Thorne's accessory department is now located on the second floor, and a large portion of their spacious sporting department is devoted to this end of the business. Two large silent salesmen are used for the displaying of small goods, and two modern wall fixtures are used for retail stock and the displaying of samples, all behind glass, and mounted on a red plush background, lighted at night by electric lamps. A special display is made of headlights, spotlights, side and rear lamps. These are all wired up to the electric light main, and through a transformer the salesman is able to show the customer the light burning. This is a fine aid to sales, and completely satisfies the customers, who as a rule like to see the lamp they are going to purchase actually tried out. A transformer is also used for the testing of light bulbs, and these are always tested in the sight of the customer, and shown to be in perfect order when leaving the store. This has been found to be very necessary as when a customer takes out an untried lamp, the merchant has no come-back should the lamp be returned as faulty, although the customer may have himself burned it out. This method of testing lamps has been found to be a money saver, and enables lamps to be sold profitably, which is an impossibility should there be many returned, and once the lamp has been seen by the customer to burn perfectly, should he damage it himself, he will never consider bringing it back.

Another special feature of the new automobile department is the accommodation made for tires. A large tire holder has been installed, capable of accommodating every size of tire stocked. These tires hang in two rows, and can be placed on the hooks with one hand. This method has been found to be far ahead of having them reared up in a corner, or piled on the floor. All sizes can be examined as they hang on the rack, and can be easily taken off should the customer so wish.

A special fixture has been installed to display jacks, luggage carriers and shock absorbers. Garage equipment is also shown here, such as electric drills and grinders. A good business has been done in air compressors, in fact this has been a record year, more sales having been made of air compressors this year than the total of the four former years' sales of this class of garage equipment. This may be accounted for because of the fact that a special salesman has been spending a large amount of time calling on garages, in fact he makes it a practice to see as many as he can every day, as their needs crop up in the night, and a repair man who did not require any parts the day before may find that a job has come in in which he needs several articles. This constant service is much appreciated by the garage owners and repair men, many of whom look each day for the coming of the salesman. This city salesman, A. Doherty, told Hardware and Metal that several of the repairmen asked him on his first visit why he had not called before, and that it was a great convenience to be able to have their needs supplied without having to lose any time going down to the store in order to pick out their requirements. Mr. Doherty, by the way, has undergone a special training in automobile work, having taken a course of lessons during the time vocational training was in vogue in St. John. He has found this to be very helpful, and enables him to talk with experience to repair men, who appreciate a man who knows his business.



Auto Accessory Catalog

The Thorne automobile accessory catalog is worthy of special mention, embracing as it does practically every need of the car owner, garage and repair shop. This catalog was compiled by the salesman in charge of the stock room, J. McGillvery, who as before stated is a practical garage man. This latest issue is the fourth number, and contains no less than two hundred pages, profusely illustrated, and every item described in detail. Mr. McGillvery has shown a remarkable aptitude for this class of work, and has introduced several new ideas in catalog compiling. One of the special features is the indexing. No matter how many names an article may be commonly known by, it is indexed under each name, enabling the customer to locate with ease the goods for which he is looking. This has made it extremely easy to find any article, and no sales are lost to out-of-town customers because they have been unable to locate what they want in the catalog.

Another special feature is the classification. For instance, all articles connected with tires, such as cements, patches, valves, repair outfits, etc., are all shown in the same section of the

(Continued on Page 146)

Realizing that many people have yet to be educated to the fact that the hardware merchant can supply their requirements in automobile accessories and that a wide range of such equipment can be secured in the hardware store, W. H. Thorne & Co., St. John, N. B., use frequent window displays for accessories. Here is a recent window suggesting lines required in the Fall of the year such as new tires, spotlights, spark plugs, brake lining for wet and icy streets, carbon remover, gaskets, jacks, tools, etc., for the motorist who overhauls his car in the Fall.

Links Auto Equipment and Curb Pump

How to Select the Auto Accessory Stock With Due Attention to Local Requirements—Takes More Digging To-day for Business Than Most Merchants Realize—Making Demonstrations Effective—Following Up Prospect Brought $25 Paint Order

A CURB gasoline pump has helped develop trade in automobile accessories among motorists for Elliott's Hardware, Brantford, Ont. In a recent conversation, Mr. Elliott stated to Hardware and Metal that the pump is a great convenience to motorist customers and helps bring to their mind the fact that they can secure their requirements in automotive equipment at the hardware store.

In order for a hardware store to get the full benefit of bringing motorists into close contact it is necessary that a large number of cars be not parked in front of the store. For a long time Mr. Elliott suffered from this handicap and both gasoline trade and general store trade declined as a result. It was necessary to have a change made in parking regulations and a considerable improvement is now noticed. Evidence of the fact that the window displays pull business in auto accessories as well as in other lines of hardware is seen in the fact that while cars were allowed to block the roadway in front of the store sales of accessories and gasoline fell off considerably but since motorists are again brought to the store front by the gasoline pump, sales of accessories have been increased. Automotive equipment is frequently shown in the display window nearest to the pump.

Selecting the Stock

Mr. Elliott's advice to the hardwareman just embarking on the sale of auto accessories is to take particular care in the selection of stock. He points out that some merchants have become more or less dissatisfied with the line due solely to the fact that they have not taken the care they should in selecting stock with due attention to local requirements. A great many specialties are placed on the market which may have a good sale in one district but not in another and if care is not taken the hardware merchant is found with shelves loaded with stock which has little call and which represents a tie-up of capital which eventually will represent a loss even though sold.

Exploiting Unemployment

Industrial operations in Brantford have been slack for some time due principally to the fact that local industries are of such a nature that they do not get under way until after the majority of other branches of manufacture. For this reason hardware merchants in that city have had to do some tall thinking to keep up the volume of business. In this connection Mr. Elliott points out that the merchant in order to stimulate business to-day must do some unusual thing. People he says can no longer be aroused by the same old line of effort which the merchant may have been making year in and year out. He is of the opinion that it takes a good deal more digging to secure business to-day than many people realize, and this is the reason why some aggressive merchant in one locality reports business active while others in just as progressive a district say business is poor. The "spotty" character of business is attributed largely to the individual's aggressiveness.

Demonstrations Made Effective

Speaking of unusual ideas Mr. Elliott mentions that demonstrations in the retail store are not nearly as effective alone as when some special inducement is offered to attract people. He found that a recent demonstration of paint was much more effective when an alum-

inum saucepan was given away with each quart of paint purchased. The stipulation was made that only one saucepan was given to a customer purchasing a minimum of one quart of paint.

"This was one of the best sales stimulators we ever had," said Mr. Elliott, "and we have found that while people will come no distance to the store for information, they will come if partially interested in the line to be demonstrated and knowing that a useful utensil is to be given free. These people may have been contemplating the purchase of the line to be demonstrated for some time past, but the announcement brings the matter to a head and when once they are convinced their purchase is definitely linked with our store by means of the free offer."

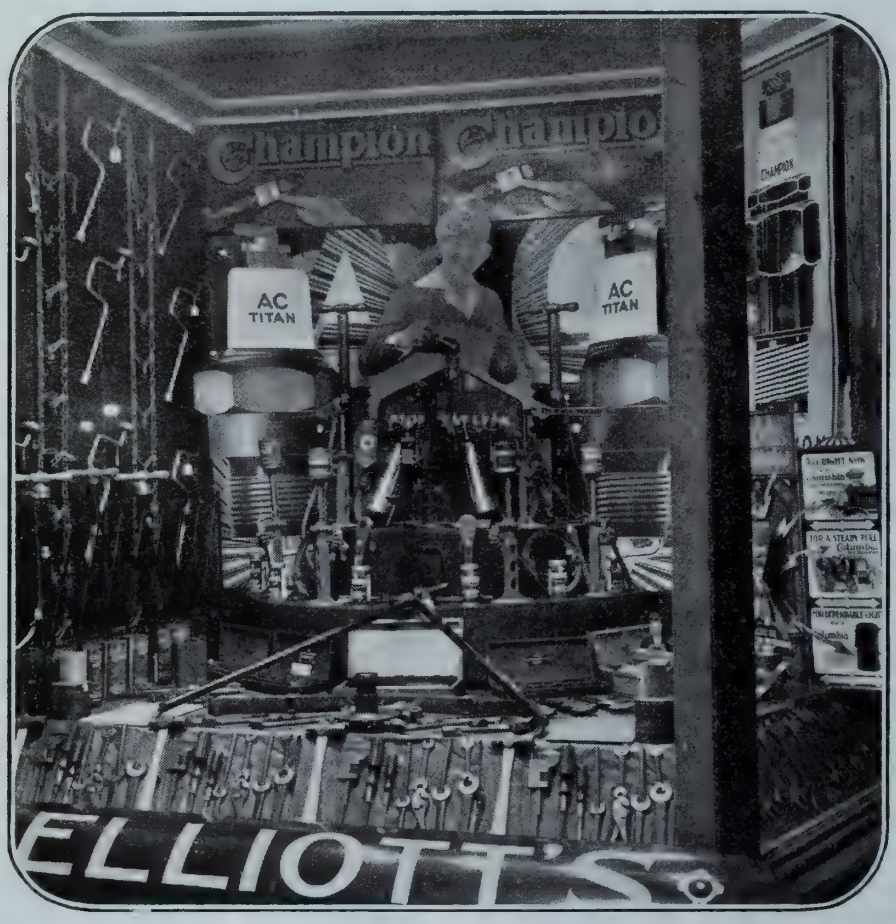
Close following up of prospects is one of the other unusual policies by which this firm is keeping business active. Mr. Elliott points out that it is necessary for the merchant to make a particular study of his local conditions in order to decide on the best plan to adopt locally, and that only general policies can be outlined as applicable to all cases. "There are no new ideas on salesmanship, the old fundamental of 'work' is the only solution," said Mr. Elliott.

The idea of following up prospects is very productive in this store. Building permits are watched for leads giving names of prospects for builders' hardware and paints, and one man in the store employs a bicycle to go out and personally get in touch with all such prospects. Every customer is given a color card or other paint literature dealing with the finishing of various parts of the home or other buildings according to the season. Thus in the Fall these will deal with the importance of protecting the buildings against the ravages of winter, they will deal with the re-finishing of veranda and house floors to protect against the wet weather of Fall, and with the general renovation of the home interior for the indoor months. From handling this literature and briefly discussing paint needs, a number of prospects are secured each day. These in turn are followed up. The day on which this conversation took place one of Mr. Elliott's salesmen closed an order for $25 worth of paint for a customer who was looked upon as but a lukewarm prospect. Aggressive following up and education soon made him an enthusiast. Mr. Elliott points to the fact that while the time expended might not seem profitable judging by the size of some of the orders secured, yet the important thing is that connections are being made which are more or less permanent and in future the customers will think of the store which showed that they appreciated their business, when they require more paint. He finds the average paint customer requires much information regarding this commodity.

Advertising

His newspaper advertising is productive of good business according to Mr. Elliott, particularly when linked up with window displays. A good sized ad is run every Friday night and two smaller ads are run at other periods each week. Unemployment has made some slight difference in the nature of business though little complaint is now reported in regard to hardware prices being too high. Persons temporarily out of employment have turned their hand to fixing up their premises and this is pointed to as partially responsible for the sales of house paint, tools, etc., which have been active this season. Mr. Elliott points out that the recent stiffening of prices on some hardware lines has had a tendency to stimulate business in those lines. There are said to be many people who have postponed necessary purchases anticipating some further reduction in prices and when they see prices on the upward move they delay no longer. This tendency is likely to be reflected throughout other hardware lines during the Fall months.

Brantford Motorists Know Where To Buy Their Automobile Accessories



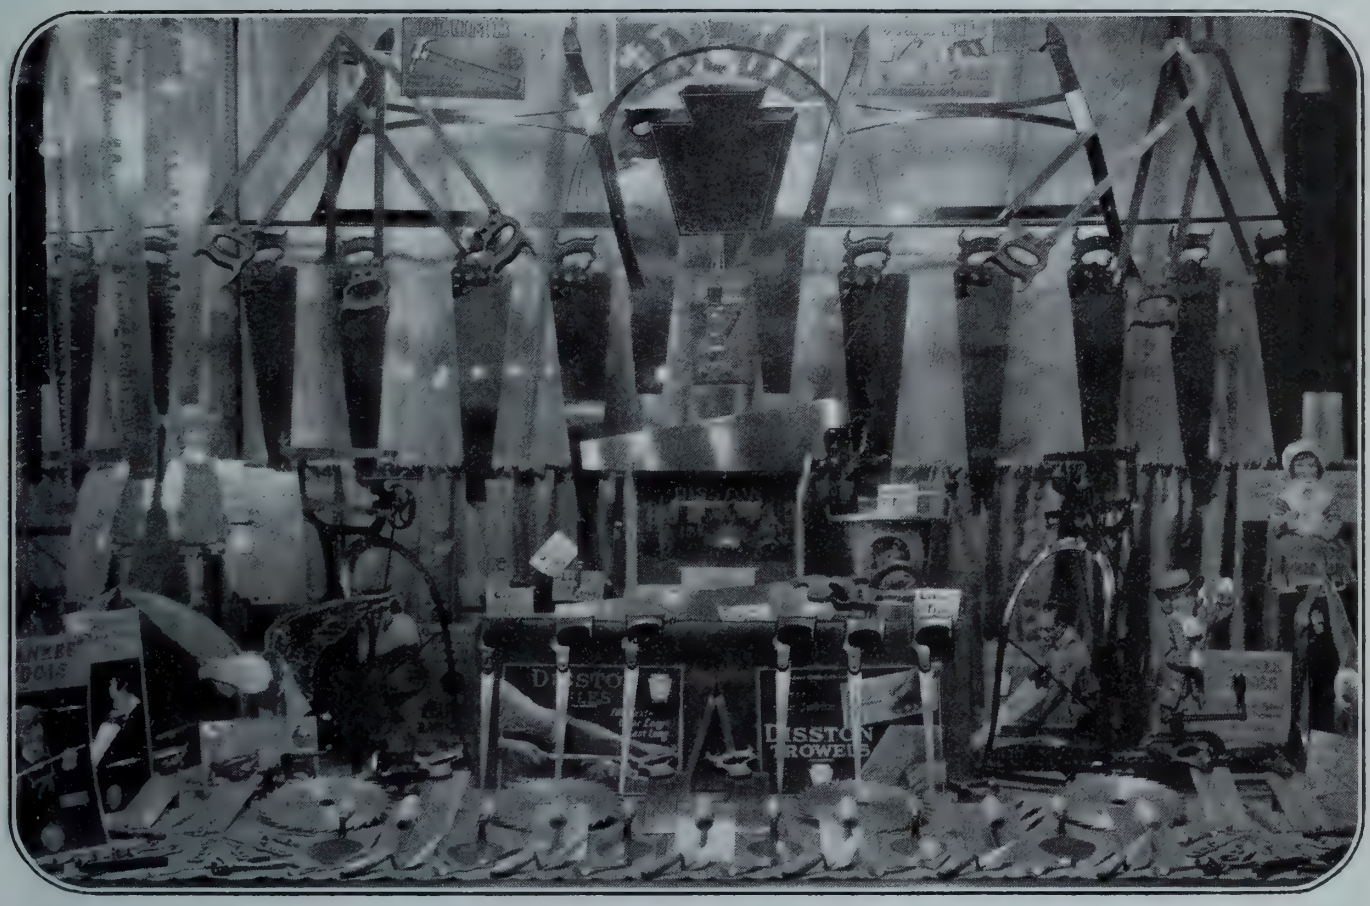
A somewhat unusual range of accessories is included in this window display by Elliott's Hardware, Brantford. The windows of this store are frequently used for automobile accessories throughout the year to link up directly with motorists who draw up for gasoline at the curb pump. This display is built with a centre pyramid and includes a number of lines which are specially applicable to local trade such for instance as luggage carriers for tourists, tools for those who fix their own car, piston heads, rings, hubs, support rods, springs, jacks, pumps, repair kits, batteries, and other specialties. The motorists around Brantford know where their accessory requirements can be filled.

NOVEL IDEA FOR HOLIDAY

Moffats, Limited, of Weston, Ontario, have adopted a new method of solving the holiday problem. Moffats, Limited, are solving this problem by closing down their plant for ten days to give everybody a holiday at once. Those employees who have been with the firm five years and upwards are to get a special bonus with their holiday.

A Contest Aroused Interest In Tools

Guessing Contest As To Number of Saw Teeth in Window Display Attracts Much Attention—Displaying Tools Effectively Without Allowing Them to Become Shopworn and Rusted by Handling—Suggested Layout for Tool Dept.



INDICATION *that the merchant himself appreciates the importance of keeping tools in good condition, is one of the important factors in developing trade in mechanics' and carpenters' tools with the best class of buyers. Attractive display is possible with tools, as indicated by the above outlay arranged by Sumner Co. of Moncton, N. B.*

Special interest centered in this display because it was in the form of a contest, the idea being for passers by to make a guess at the number of saw teeth in the window. The prizes to be given were shown consisting of: First gent's prize, a saw; second gent's prize, a plane; and third gent's prize, a hammer. The ladies: First ladies' prize, a bread mixer; second ladies' prize, a set of irons; and third ladies' prize, a meat knife and fork. Much interest was aroused in the display by the contest and many of those who took part were brought face to face with the need for replacing some of their various tools.

When the prospect is brought into the store by such a display some hardware merchants follow the plan of placing cards in prominent locations directing the prospect to the department in which he is interested. Here he or she will find samples of the lines shown in the window in showcases and on wall cabinets where they can be closely examined. A favorite plan is to show samples on a green baize covered door behind which are numerous drawers containing the stock of those lines sampled. In some stores this board which sometimes is 2 x 4 ft. does not swing on regular butts but swings on double hinges so as to be considerably nearer the customer when opened out and still parallel with the wall. In some cases certain sections of these boards are detachable and can be laid on the showcase for closer examination. Below each of the sample items is a tag bearing the drawer number, tool number, size, cost in code and selling price. This makes it possible for a salesman to serve a number of customers hurriedly. The samples being securely fastened prevents any thieving, and a merchant who uses boards on double hinges such as described finds that his samples are kept in much better condition and prevented from the usual rusting which often makes high grade tools unsaleable due to perspiration from people's hands.

An effective arrangement of a department is described as follows Fine mechanic's tools first, then coarser tools such a snips, punches, pliers, etc. all shown in similar fashion. As a link connecting the mechanics' and carpenters' tools section is a display board devoted to screw drivers. From there on the display deals with carpenters' tools ending with shelves for wood screws, cabinet clamps and such lines which are hard to sample.

Attractive displays with some element to draw special attention and make the prospect appreciate high grade tools, combined with adequate sampling in such an effective manner as to encourage sales, are the factors which this firm and many others have employed to successfully develop tool trade at all seasons of the year.

MINE ACCESSORIES IN LARGER QUARTERS

(Continued on Page 142)

catalog, and one does not have to look all over the book to find goods of the same nature. This idea is carried out all through, and makes the catalog very easy to use, both by customers and clerks. This has also been a good year for bumpers.

A special stand supplied by the manufacturers is used for the displaying of bumpers for every type of car, and the customer can see how the bumper will look on his car before he makes his purchase. W. H. Thorne & Co., Ltd., have found that there are many articles in their sporting department that connect very well with the automobile accessory business. For instance, lunch kits, camping outfits, fishing tackle, etc., as in nearly every case the motorist has need for some of these goods when going on a holiday or a trip. The manager of the sporting department, W. O. Bagnell, states that the addition of automobile accessories has made his a busy department, and that there is something doing all the time, and his assistants have had to move fast in order to get well acquainted with the automobile goods, and he thinks it was well that they had some knowledge of automobiles and accessories from personal experience with cars.

Window for Auto Accessories

One of the nine windows of the Thorne store is always used for automobile accessories, and the newspaper advertising is run to comply with the display made in the window. The firm's window trimmer, W. J. McIntyre, works in conjunction with H. Taylor, the advertising manager, and together they are able to always have advertising matter and window trims agreeing with each other. From experience it has been found that more sales result from advertising when the goods advertised are shown at the same time in the windows. The salesmen follow the advertisements as they appear in the newspapers, and are able to at once follow up the work done by the papers. It is realized that the work of the window trimmer and the advertising manager is to bring the public into the store, and ceases there. The salesmen must do the rest.

By a careful study of the needs of the motorists, Messrs. Thorne have got their automobile accessory department to a state near perfection, and very little dead stock is the result. They are very wary of new fangled ideas, and untried equipment and attachments. There are so many new things cropping up in automobile accessories, that an unwary merchant might easily find himself loaded up with goods that were very hard to dispose of. It has been found that the best sales result from articles that are more or less standard equipment for cars, and that novelties are dangerous things to handle, unless there is a craze for a certain attachment.

He Says "I'll Tell The World" But Can He Do It?

The Kind of Advertising That is Most Effective for Your Purpose—Some Unusual Mediums Which Are Often Neglected

Written for Hardware and Metal by MAJOR L. L. ANTHES, Managing Director Anthes Foundry Company, Toronto

WHAT is advertising?

If this simple question could be put to every person and each individual sent in a reply there is no doubt that an interesting variety of answers would be assembled. In the main most of them would probably be similar in meaning but quite different in expression.

"I'll tell the world," is a slang expression used by many, but if you asked the user of the phrase how he was "going to put it over," the probability is he could not tell you.

Ideal advertising according to some experts is "Saying what you want to say to the greatest number in the most effective way." Truly there is much to be said in favor of this "bon mot."

Then again others in the know contend that "Telling your story by the shortest and quickest route to the class you want to reach," is the essence of good advertising. There is also wisdom in this viewpoint—the first might be called "indiscriminative" advertising, and the second "discriminative" advertising.

But then again there is the "opportune" system of advertising, that is, **the ability to take advantage of simple methods of publicity** whenever opportunity offers, and which may be quite inexpensive but nevertheless effective.

Everybody knows what advertising by mail means, but if you were asked if you ever advertised by freight or express you would either reply in the negative or wonder what your interrogator was driving at.

Most of us have to use thousands of shipping tags a year, but do we make any further use of them than merely address-slips?

A shipping tag can be made attractive and carry some message regarding our business at no very great cost over the ordinary plain manilla tag.

Have you not, while waiting for a train at some wayside station, looked over the packages which lie on a station platform and out of mere idle curiosity examined the shipping tags to see who was the shipper or consignee?

I have; so have you.

And furthermore if these shipping tags were attractive and had some information to convey regarding the shipper's business, would we not be a little more interested?

Of course we would.

Now this is one method of "opportune" advertising. Your store-front window is another, your delivery wagon still another—your envelopes and stationery generally—sometimes the side of your building, your "shingle," your packing-cases, your horse-blankets—in fact, everything pertaining to your business which will arrest the eye of the running, walking or traveling public.

All of these methods of "opportune" advertising are in practice to-day, but it is not everybody who is taking advantage of them.

There is no gainsaying the fact that **advertising stimulates buying.** Though at times it seems to be merely a 2% stimulant, nevertheless it is having an effect, or "registering," as the movie directors say.

Keep your name before the buying public and some of them at least will eventually ask for your wares. Numbers of these buyers if asked why they inquired for a certain maker's goods, could give no better answer than, "Oh, I saw the name somewhere." That is the point—parade your name and make it stick!

Once in the early days when automobiles were not so common as they are now, I was attending a trade convention. An out-of-town man whom I had met several times but who could not recall having ever met me was again introduced by a mutual acquaintance. I made up my mind that this last introduction would stick and suggested a motor ride, which in those days was rarely refused.

-I'll Tell the World

So away we went. I demonstrated how a corner could be taken on two wheels — how to turn a car "right-about" on a slippery pavement, and other interesting "stunts," which usually suggest themselves to light-headed youth, and all performed in "quick time."

When the ordeal was over and my much relieved passengers again put their feet on "terra firma," heartily thankful that they were still alive though somewhat weak in the knees, I could not help humming the good old refrain, "Then You'll Remember Me."

"Show'em How" is the Way to Sell Radio

Personal experience combined with demonstration facilities proves valuable.

Employing an expert and making connections in store gains prospect's interest.

DEMONSTRATION has proved to be the keynote in the successful sale of radio supplies in the experiences of C. D. Cutts, hardware merchant, 2978 Dundas St. W., Toronto.

"The majority of radio enthusiasts will come in and ask to see a receiving set, or an amplifier, vacuum tube, or crystal detector, or whatever it is they have in mind," said C. D. Cutts, Sr., to Hardware and Metal, "but their attention is trebled, their appetite for delving into this mystic realm of voices and music 'plucked from seemingly nowhere' is rendered even more keen, and their satisfaction is practically assured when we can demonstrate to them just exactly what their purchases will do.

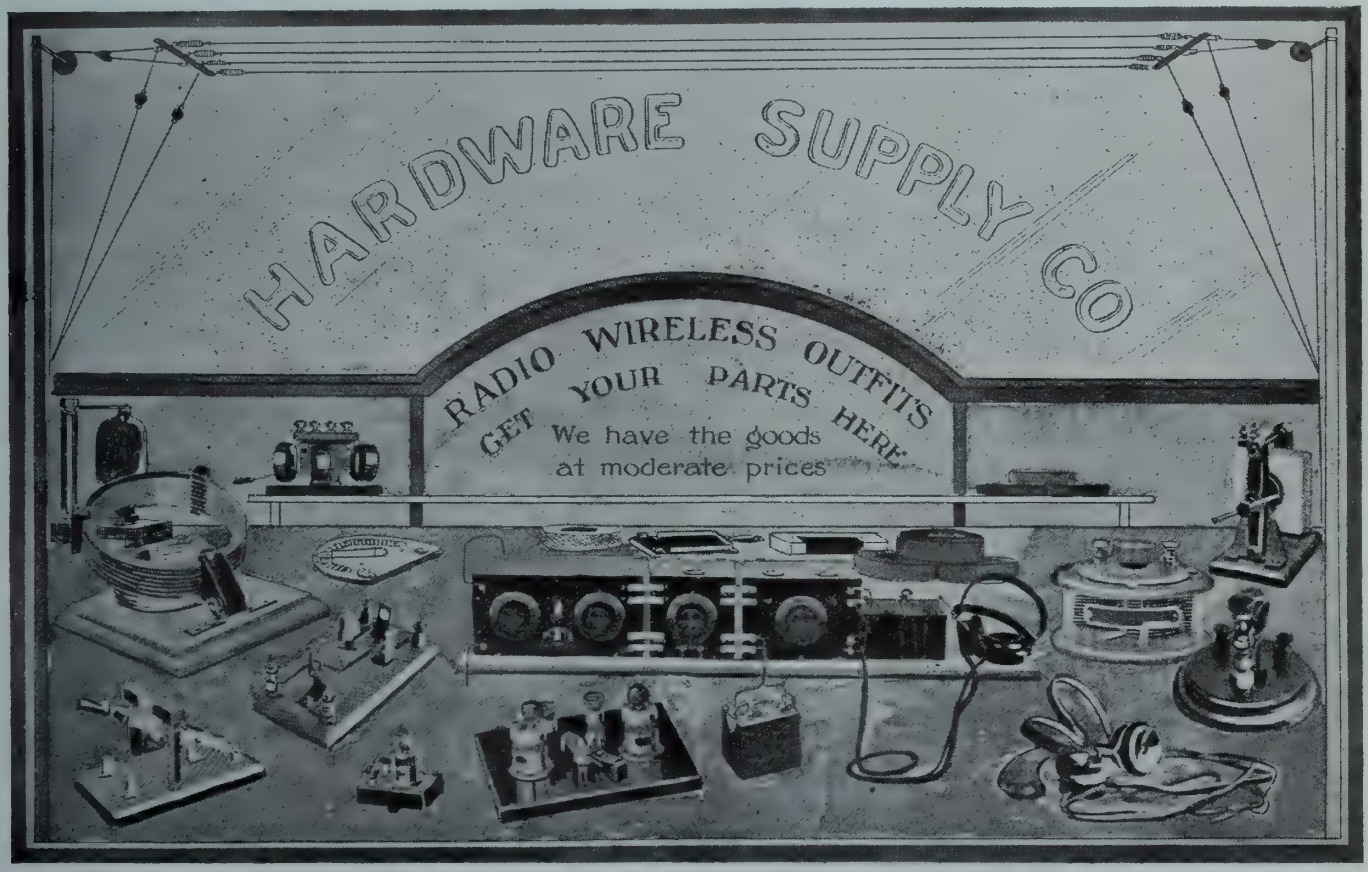
"Therefore, to do that, we found it necessary to install a most up-to-date receiving station in our store, and a set that will compare very favorably with any on the market. Its purpose is twofold, and the results are manifold. The fact that we have this set, does much in creating public interest and attracting the prospective customer to the store

to hear the evening news events and concerts which are daily received from the various broadcasting stations. Then, when the radio enthusiast reaches the stage where personal possession of a similar set becomes the objective, our apparatus occupies the unique position of an illustrator of the possible attainments of the present day class of radio equipment."

Thus the problem of reaching out and gathering in the "harvest of hardware dollars in the air," has been successfully solved by the Cutts Hardware Co., in the short space of a few months since the department has become a feature in the store. While the largest call is for various parts from which the amateur can "build" an experimental set, yet both small crystal sets and complete receiving apparatus on a large scale, as well as a comprehensive assortment of accessories, are found in stock.

"Another factor contributing largely towards our decision to handle radio supplies is the fact that we have an expert radio operator in charge thereof. He has had several years experience in both wireless telegraphy and telephony as an amateur, and is keenly aware of what parts are necessary in the construction of either small or large sets, as well as how to obtain the maximum results from the equipment installed," said Mr. Cutts.

That a merchant should not attempt to merchandise radio unless having either personal experience in radio, or else placing a radio enthusiast in charge



Suggestive window display of radio telephone equipment such as can be used by hardware merchants. This window includes a number of the more important and most needed parts which should form the basis of the stock, as outlined in the article herewith. A window such as this will attract many radio enthusiasts to the store for various pieces of equipment and accessories.

who is well known in the locality, is the opinion of Mr. Cutts. While little electrical knowledge is necessary, yet certain information regarding the principles of wireless operation, how to achieve the best results under variable circumstances, method of "hook-ups" and numerous other items, is undoubtedly desired in order to be in a position to answer the inquiries of customers. The erection of a set in the store itself, is also conducive to success, it being considered that no satisfactory clientele could be developed without this aid for demonstration purposes.

Headquarters for Radio Fans

"By having a powerful receiving set here," pointed out Mr. Cutts, "and giving daily news and concerts to large crowds through the aid of the magnavox, we have become the local headquarters for wireless enthusiasts.

"In this way, also, the supplies of parts and accessories can be stocked with skill and discretion, which cannot be the case where a merchant goes into the retailing of radio, somewhat blindly. We are able to test out the various kinds of equipment offered on the market, and we are only buying what we find to be good."

It was pointed out that there is undoubtedly a quantity of useless apparatus flooding the market under the guise of "radio," which is practically worthless from the viewpoint of producing required results.

"No one knows these facts better than the keen students of the game, who, from building their own local sets, have expanded into the construction of more complicated apparatus with a formidable range. A merchant who has been caught unawares with a collection of supplies in this class would most likely experience considerable difficulty in turning over the same, and it could only be done at the expense of the radio 'fan,' who would most likely become disappointed and quit, instead of being keenly alive to follow up the possibilities in continually improving his set."

While very few large sets had been sold in that district, it was explained that parts for powerful sets sold very well, but these again should be tested out by salesmen to illustrate just what results can be obtained and what should reasonably be expected.

What Will The Set Do?

According to Mr. Cutts, the average customer states:—"I want a radio set, but what will it do?" "They usually don't want to spend a large sum of money without first knowing to some extent what the returns will be. And as we cannot guarantee the sets or parts as far as results are concerned, so demonstration in our own store is the next best method."

The experience of the Cutts Hardware is that the average "fans" delight in putting up their own sets. This usually applies to both large and small receivers, although an extra charge for installation is made where direct requests are received of this nature. The amount varies according to the capacity of the outfit. As charts are supplied with each set by the manufacturer showing how to "hook up" and the rudimentary elements of operation, no expert knowledge is required, and when this simple fact is

(Continued on Page 152)

Retail Hardware Salesman Provides Congregation With Sermon and Song

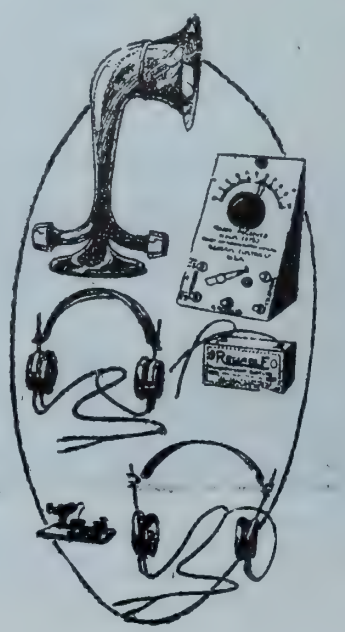
"Charlie" Hunter of Cowan Hardware, London, is An Enthusiastic Radio "Fan"—In Absence of Minister, Due to Illness, He Brings Sermon and Song By Radio From Distant City—Demonstrations Important in Selling Radio Equipment

"CHARLIE" Hunter, manager of the Radio Department in the Cowan Hardware store, London, Ont., recently went out on a trip to the country over the week end and to further the cause of radio-telephony and give the natives a treat he connected up his apparatus with a barb wire fence and was busy giving a demonstration when word came that the pastor of the church nearby was ill and would be unable to take the service.

More quickly than it takes to tell it Mr. Hunter had gathered up his equipment and got a bicycle and headed for the church. On arrival he found those in charge wondering what they had better do, the majority being of the opinion that it would be best to send the people home as they came.

Mr. Hunter suggested that they give him a chance to see what he could do and willing to try anything in their difficulty the men agreed. In the meantime the church people from all around the country were straggling in and were rather surprised to find a youth with some queer-looking apparatus in the church. To the most of them, especially the older people, "radio" meant little or nothing. They had heard of it or read of it but didn't believe in it especially.

They were more than surprised when Mr. Hunter announced that there would be a service and surprise turned to real wonder and then to keen delight when just as clearly as they could have heard their own pastor, they listened to a really splendid sermon by one of the most famous pastors in a big Detroit church 120 miles away. Not a word was missed and then came the singing by the Detroit choir.



Splendid Advertising

Naturally everybody in the church talked, in fact they are talking yet and being talked about in the right way Mr. Hunter says is the very best kind of advertising any person can get. It was not long before he began to cash in on the sales in that district and his friends there are still advertising him and radio and there is no telling just where the sales possibilities are going to stop.

"Demonstrations give the merchandise a chance to sell itself," says Mr Hunter. "There are mighty few people to whom radio doesn't appeal. There is something about it that you cannot get away from. It is weird and uncanny and its possibilities are immense. It appeals to the boy and the old man and I believe it is going to be one of the biggest propositions that has ever developed. The fact that it is new and wil be improved does not interfere with its present sales possibilities. Anyone can get results now with the equipment that has been perfected and very satisfactory results, and for people in the districts remote from the larger centers

it offers at a small cost advantages that are inestimable."

How He Sells It

In addition to giving demonstrations on every possible occasion Mr. Hunter uses as his next best selling force window displays and newspaper advertising. Ever since he took over the radio department, he has in conformity with the Cowan Company's general policy of persistent advertising, been letting the people of London and vicinity know that Cowans was headquarters for radio equipment and supplies. Backing the newspaper advertising by attractive window and store displays he has been building up a splendid trade.

Behind all this there has been another and a very important foundation stone, in the shape of service. If a lad came in and wanted information and advice about some equipment Mr. Hunter was there to advise him and see that he got it. He keeps in mind always the fact that the lad of today with only a few dollars to spare for equipment may be the Marconi of tomorrow who will lead in radio development. If as has also happened a "radio fan" who had bought a high priced set in Detroit or some other city was having difficulty because he did not understand the adjustment or handling of his set, Mr. Hunter advised him about it and did it in such a thoroughly competent manner that the party felt he would be glad to return again any time he wanted help. Such parties incidentally always return again too when they need supplies or when a friend is going to get an outfit and the ultimate result in the upbuilding of good will and future business.

Looks After Them All

Very frequently Mr. Hunter finds that he has a combination to deal with consisting of father and son. Son is one of those keen wide-awake lads who is so intensely interested in radio that he has enthused his father. As a matter of fact the lad usually knows more about the matter, from an equipment standpoint, than the man, but both are anxious to get busy with a set. Here is where it is not so much a question of salesmanship as of good judgment. The boy and the man are "sold" already as far as radio goes but it is a question of giving them the best for the amount they are prepared to spend. More than one lad and his father who are today among the boosters for Cowan's Radio department thank Mr. Hunter for advice and service, which resulted in his getting equipment which was in keeping with his pocket book and serviceable rather than unloading on him some high priced novelty just because he thought he might like it.

Is Essential

"One of the first things to do," said Mr. Hunter, "is to find out how much the prospective buyer knows about radio sets. If he is a beginner he must be handled in an altogether different manner from a party who has had some experience. Many a lad will often know a good deal more about sets than men. The man of course usually has more money and it is advisable to find out what he wants to do and how much he wants to spend. There are young men with plenty of money and men too who want a set to experiment with. There are farmers who want it for the entertainment they are going to get. One has to explain to each customer the difference in the sets, their range, what they will do and so on. The best plan is to tell the exact truth regarding each set. It is far better to tell a man or boy that a certain set will only give him a ten mile range than to let him pay his money believing he has something that he can listen in with for 100 miles, only to find out later that he is mistaken. There is no better advertisement than a satisfied customer and no worse ad than one who is either disappointed or misled.

"There are very few buyers yet who do not appreciate all the help and pointers you can give them and I believe it is good business all round to assist them in every way possible. It costs nothing to give friendly advice and information about the sets and equipment and how to handle them and the results are far reaching."

One of the problems from the retailer's standpoint, says Mr. Hunter, is to steer clear of novelties and goods which are not standard. The radio game is so new and has grown so rapidly that there has been little time yet for standardization, but this he believes is coming soon. Until then he says the hardware merchant and others handling equipment should select his stock with care and save trouble for himself and his customers.

Novelty Ideas In Radio Dept.

The Radio Department of the Cowan Hardware Co., London, Ont., showing Chas. Hunter, manager of the department. Radio supplies are shown in the window display and a novelty idea is carried out to attract prospects.

PROBLEMS IN STOVE AND RANGE SELLING

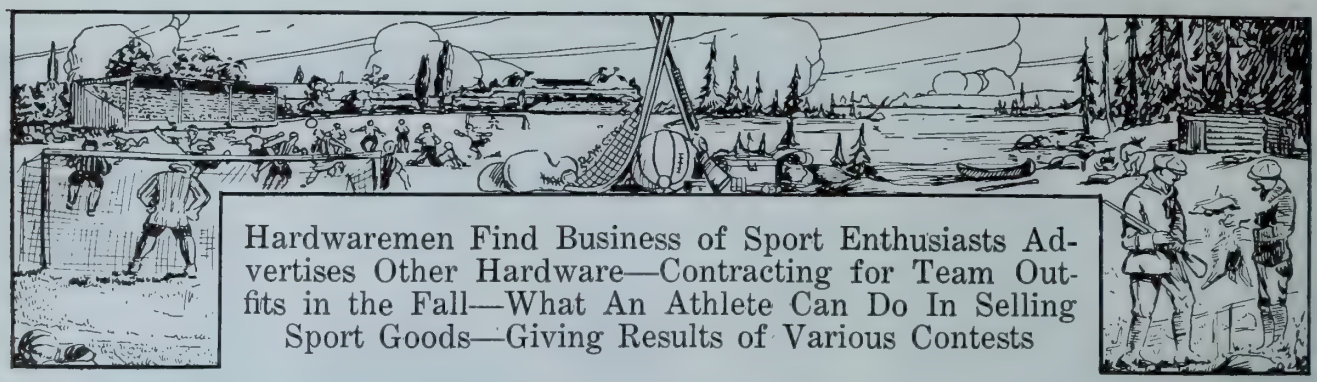
(Continued from page 139)

and from gas to electricity is a rough outline of the progress in stove making down through more recent years to the present time. Although the city store is more affected by this revolutionizing than the store in the rural district, the merchant in the smaller town has the advantage of improvements in the coal and wood stove, which have been many. Rather than a slow moving, cumbersome, and dull appearing department in the store, many merchants in both city and town have brought this branch of their store to a well paying, attractive line, and one in which it is a pleasure to serve.

ACTIVITY OF SYDNEY MILL

The billet and blooming mills at the Sydney steel plant are now working double shift, according to a statement issued by the British Empire Steel headquarters. This new activity will increase the force to over 2,300 men. For the first time in the twenty-two years of its history the plant has successfully entered the foreign market for finished steel products. Orders are on hand for nails, barbed wire and galvanized wire for Buenos Aires, South Africa, New Zealand, Costa Rica, Colombia, India and British West Indies.

Group Selling of Sporting Goods



Hardwaremen Find Business of Sport Enthusiasts Advertises Other Hardware—Contracting for Team Outfits in the Fall—What An Athlete Can Do In Selling Sport Goods—Giving Results of Various Contests

WIDE is the field and generous are the opportunities for enlarging the turnover in the sporting goods department at this period of the year, and emphasizing the importance of this phase of hardware in the public viewpoint. Fall and early winter sport activities are so numerous and are indulged in upon such an extensive scale, that practically every district, whether in town or country, can boast of its own particular club or organization where favorite pastimes hold full sway.

Catering to the needs of sportsmen and athletes generally has proven a profitable venture for many hardware merchants, and goods in this class have frequently comprised one of the most important departments of the store. By this method, not only have many dealers succeeded in building up a profitable circle of customers, but the popularity gained thereby serves to advertise the merchant when household goods or other hardware commodities are required.

The local hardware store is in many cases looked upon as the headquarters for sporting goods of all kinds, and the natural trend of sportsmen is towards the store where drinking cups, flasks, hatchets and jack-knives can be purchased in conjunction with hunting outfits; where pocket flash lamps, thermos bottles, tape measures, and similar accessories can be obtained with fall pastime supplies, and where tools and other necessities can be secured for fitting up indoor sport appliances.

The appeal of this nature is extremely varied at this season, but can be conveniently divided into two classes or groups, one for the sportsman, and the other as applying more specifically to the athlete. The hunter and fisherman will be more keenly interested in rods, fishing tackle, rifles, shotguns, hunting outfits, shooting jackets, wading boots game baskets, cartridges, shells and blanks, sleeping bags, camp supplies, and articles of this nature. While the gymnast, rugby or football enthusiast and the player of other fall games will be more distinctly attracted towards uniforms, helmets, shinguards, ankle supports, basketballs and volleyballs, gym outfits, boxing gloves, Indian clubs, roller skating, alley bowling, indoor baseball, punch bags, medicine balls, liniment, and golf requisites.

In addition to all these different fall sporting ventures, there is the preparation for early winter games such as hockey, curling and ski-ing. With the passing of warm weather, the athlete naturally descends upon the gymnasium determined to get into condition once again for another swing at the gridiron battle, the whirl of the steel blades, the pep of the basketball conflict or the excitement of the leather-pushers' tournament.

This conditioning period provides a real opportunity for hardware merchants who stock a generous supply of sporting equipment and who display these requirements early in the season. Contracting for team and club outfits in such games as rugby, is usually the achievement of the "early bird." A reputation for dependability in this direction is a first-class asset for any hardwareman, as repeat business frequently follows in future seasons. Golf is a sport which is more and more becoming an all-season and all-weather pastime, and to feature these supplies in the fall, is to attract the summer "converts" of the game to the store, as well as stimulate a real volume of renewal business in clubs and balls, and also the conventional golf attire.

The fall is also the season when hockey organizations prepare for the winter schedule, and estimates as to their probable requirements frequently offer a goodly turnover of sport appliances in the nature of skates, boots, sticks, sweaters, uniforms, pucks, goal nets, gauntlets and personal items. Roller skating appeals to a large group of youngsters both girls and boys, while alley bowling, basketball, and similar indoor games contain a distinct appeal to individuals, teams and followers alike.

At this season, however, the fisherman and hunter come into their own legitimate sphere. Operations in wood and stream have been more or less restricted for many months, and it is with a new-born sense of freedom and an impatient zest that the hunter dons pack and gun to enter once more upon the trail. Game laws and other legitimate efforts to preserve the various specimens of bird and animal life for future years, are lifted for a brief season and the degree of the hunter's skill and the ability to find the location of the hunted, are the only obstacles between the attraction of the annual outing and the results of the chase.

"Fisherman's luck," is no mere empty phrase for the skilled exponent of line or reel, while the lure of the "big ones" is a factor which the store can "cash in" on by featuring fishing tackle, flys, rods and similar equipment in a suitable manner.

It must also be remembered that in addition to the actual players, all fall pastimes have a large following of supporters who are just as enthusiastic and well-versed regarding the requirements of the sport, the source of supply, and the degree of satisfaction and service engendered by the merchant, as the actual participant could be. Therefore, the business transaction with one individual or one team in the realm of sport, are usually known and advertised to an invisible but nevertheless comprehensive audience.

"Where did you get the swell outfit, Jimmy?" "Oh, over at Smith's Hardware" or "How did the Bisons manage to get those classy sweaters for their team?" "Jones, the hardware man, supplied them when he contracted for the club's requirements"—are common items of gossip in athletic circles, which either reflect credit or otherwise upon the successful caterer to sport requirements.

Having an athlete in the store also acts as a prominent advertising medium. The policy of employing a well-known sportsman behind the counter has brought a good volume of trade in this class to hardware stores in both city and country. Other merchants have found that personal participation in a healthy pastime brings the desired results from a publicity viewpoint, as well as bringing the exponent into direct contact with other realms of sport. The introduction of the real sporting spirit into the department, gives it an atmosphere desirable to the athlete in general and cultivates a new perspective born of actual experience.

Several wide-awake hardware sport departments have adopted the practice of giving daily results of prominent athletic events. This bulletin service attracts specific attention to the store from many angles, as well as gaining prominence among the sporting fraternity of the locality, and serves to maintain direct interest in the merchant's window displays and trade efforts generally. The underlying hint of ability to give service and follow up the interests of the sportsman after the purchase of sporting equipment has been made, is perhaps psychological in effect but usually practical in results.

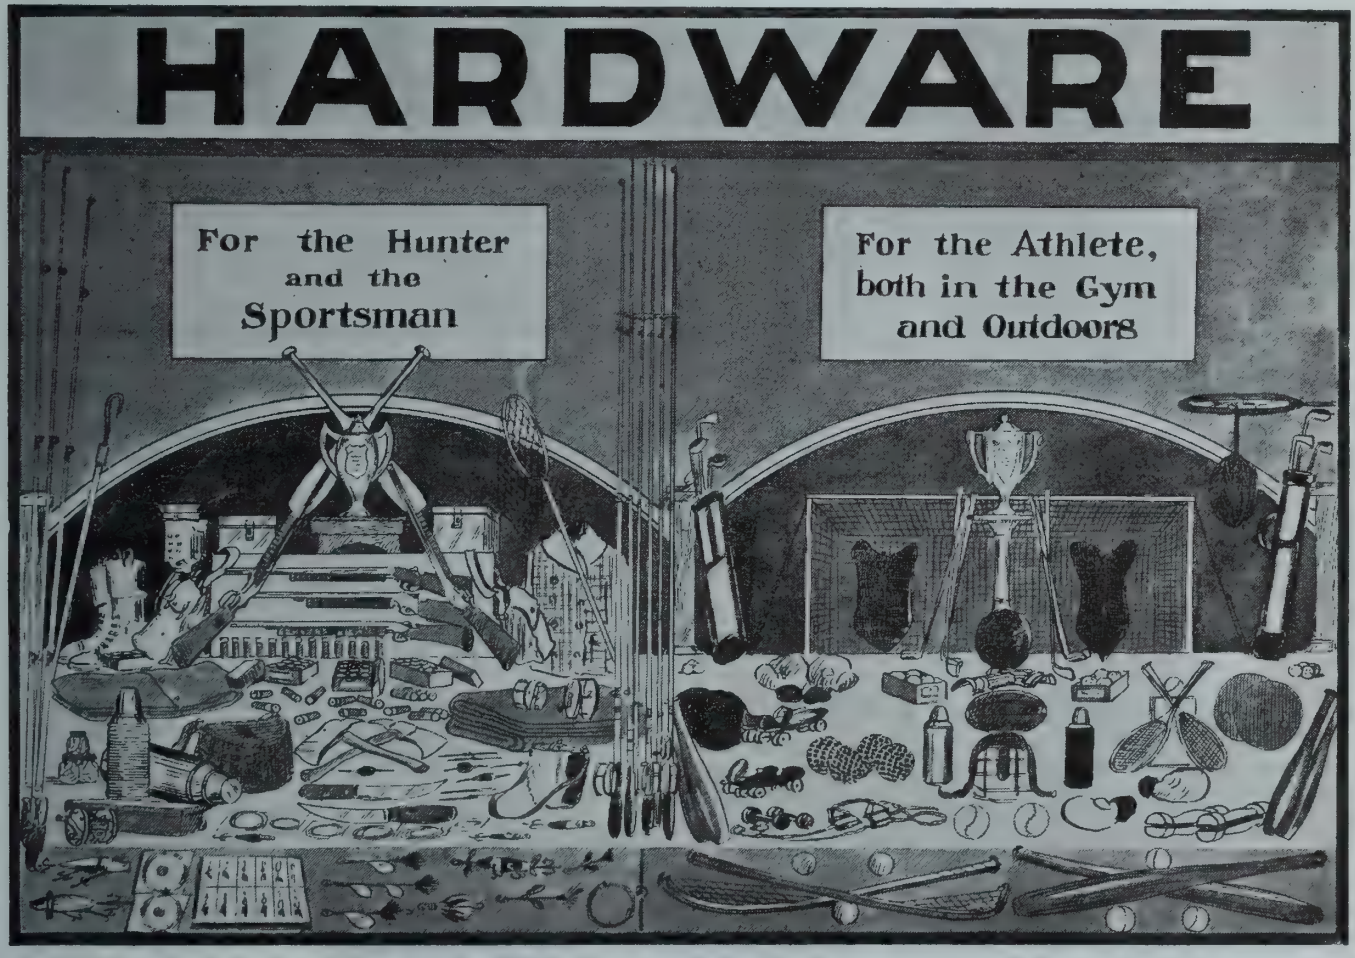
PREPARING EFFECTIVE ADVERTISEMENTS

(Continued from page 141)

peculiarities. Of course, a carefully planned layout will always indicate these points, but the hurriedly-planned layout leaves much to the compositors' judgment.

Example is better than precept. Thousands of essays and books have been written to teach the science of advertising. Universities have established laboratories for the analysis of publicity. Special schools have been founded to teach its principles. An amazingly large number of men and women are engaged in the work of preparing and printing and posting announcements of commodities or service for sale. Indeed, so great is the wealth of detail already gathered and classified bearing upon this important branch of commerce that it is practically impossible for any one individual to acquire thorough mastery of the immense data thus made available. Out of this synthesis, however, certain primary things can be utilized by the busy man without going through the long and arduous processes which were necessary in building up the complete science of advertising. One of these primary things is that an announcement of goods for sale, in order to be effective, must have news interest to its readers. That is to say, it must be a story specific and direct, and not a statement of generalities.

It is logical to suppose that under efficient methods of merchandising, a big enough column of business can be done to grant modest reductions of price as compared with the amounts asked for goods by more backward and less highly organized stores. The positive advantages of these features of the advertisement are strengthened into conclusive persuasion and confidence by a clean-cut quotation of prices upon every article mentioned. No matter what theorists may say to the contrary about quality being more important than the announcement of prices, the fact is that the average customer wants to know what the thing costs before he can be interested in buying. This advertisement ranks high in the essentials of gainful publicity.



The sport enthusiast starts early in the selection of his equipment for the coming season's activities. Hence it pays the hardwareman to be a leader of thought in this connection. Here is a window of suitable Fall lines which will be of much interest to the sport whether he be a hunter, angler, golfer, or whether he partakes in the indoor sports of the gymnasium. Some trophies excite the interest of the sport. Some other lines of hardware work in well with such displays such for instance as knives, axes, utensils, flashlights, etc., which add to the comfort of the hunting expedition.

"SHOW 'EM HOW"

(Continued from page 148)

pointed out to the purchaser, the experience gained in personal erection is usually considered sufficient reward.

It was pointed out by Barney Kellam, the clerk in charge of Cutts' radio department, that during the summer months certain static air disturbances detract somewhat from the efficiency of results in long distance receiving. However, as a test for Hardware and Metal, the set was switched on and the daily stock market reports broadcasted from Wall Street, New York, were heard quite distinctly.

The receiving apparatus in the Cutts store, including the magnavox, represents an investment of several hundred dollars, for which, however, adequate returns are expected in the coming winter months, when the general enthusiasm surrounding radio-telephony is greatest. In preparation for this winter seasonal activity, plans are already being made for expanding the radio department, and with the steady development in the industry generally, coupled with the larger number of broadcasting stations, better results on a uniformly greater scale are naturally expected.

Discussing the condition of radio stocks and the methods of procuring requirements, it was pointed out that purchases were usually being made direct from manufacturing sources, although it was considered quite feasible to distribute through jobbing channels, as has already been done in the U. S. market. Supplies of parts and sets, however, continue to dribble in, it still being difficult to obtain stocks in quantities. At present efforts were being made on the part of both manufacturers and distributors to build up stocks to meet the anticipated heavier requirements of the winter season.

Window displays of radio equipment have proved to big business attractions, and Mr. Cutts further advised that such supplies would be on display in one of the four windows of the store every two or three weeks. The daily news features and concerts reproduced in the evening, always attracted considerable crowds, which frequently resulted in the sale of numerous other hardware lines. This feature, also brought about a much quicker turnover of the supplies on hand. It was pointed out that weekly advertisements in the district paper, coupled with the window displays and concert program, created sufficient enthusiasm to crowd the store almost to the point where regular customers seeking other goods are forced to come back later on when the radio "bugs" had departed.

The miscellaneous requirements of customers who were engaged in the pastime of building their own sets also produced a call for numerous other hardware commodities, which again emphasized the hardware store as the legitimate channel for the distribution of radio equipment.

Hardwaremen's Booth At Fall Fair A Knock-Out to Mail Order Patronizers

They Shop From Mail Order House Because They Are Not Sure the Retailer Has What They Want—Show Them—Analyze Selling Points and Then Play Them Up Prominently.

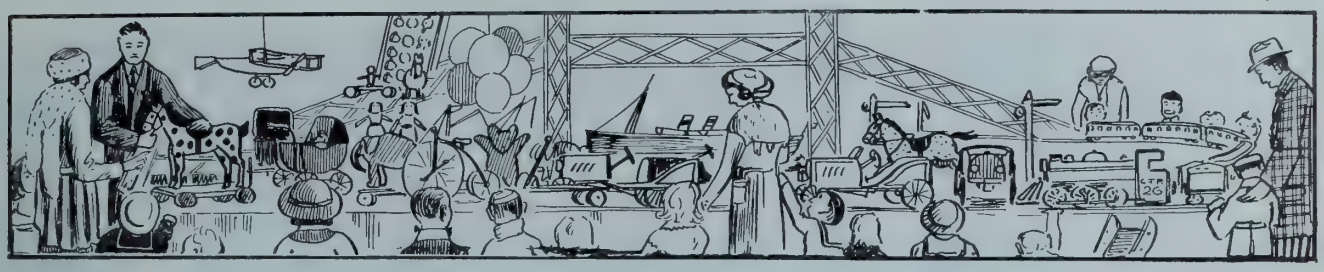
Written for Hardware and Metal by G. V. WHITE

AS AN advertising man I certainly believe that exhibits at fairs pay. I also believe that exhibits should not be left in charge of a boy or junior clerk but that the proprietor or manager should give it his personal attention. The purpose of all advertising is to bring your goods to the attention of the greatest number of possible purchasers in the most convincing manner. There are few methods that I know of whereby this can be so well accomplished. It is following out the principle of the show window only it reaches more people. People who come to town but seldom, people who always do their trading at some other store and but seldom enter or perhaps even pass yours. This is your golden opportunity to display goods that they never knew you carried or had no idea you sold so cheaply. It puts you in a position to come in contact with those people who do their shopping from a mail order house catalog because they know these people have what they require while they are not sure that you have or not. Here is your chance to let them know that you have.

A great deal of the success of your exhibit depends on the spirit with which you tackle it. If you "just send something up because you feel that you should patronize the fair and fill up the space which you have been persuaded to take," you might as well stay out, but if you see in it an opportunity to make new customers and to strengthen your standing with your present ones, you will not be disappointed. First make your booth attractive to the eye, it will take time but not much money. In this you will find the ladies of your family a great help, their taste in such matters is unusually good. Select the lines of goods you are going to exhibit carefully and with a definite reason; for instance if you feel that you have a better washing machine than your competitor give it a prominent place where you can demonstrate its particular advantage. If it is the cheapness of the machine that forms its strongest bid for popularity see that it is marked plainly so that all can see. If you are not selling as much roofing as you feel you should that is the time to bring both the quality and the price before the people of your community; the same applies to harness, churns, auto accessories, etc. Use lots of electric lights, light always attracts, and if possible have something in motion, an electric washing machine with clothes in it, tissue paper or ribbon streamers on an electric fan, or an auto wheel and tire hung so that it can be revolved, will hold people's attention. Do not neglect to place chairs where sightseers may rest, for doing a fair is tiresome work especially for women and children. Have a table with lots of literature on your leading lines for free distribution. A guessing contest well advertised will draw people to your booth for taking a chance is always a popular pastime at a time like that. If you are showing refrigerators have one sealed the opening day and announce the amount of ice put in and offer small prizes to those guessing the nearest amount of ice left when the seal is broken, say in two or three days, or the number of teeth in a coil of butcher saw blades, not giving out the length or the number of teeth to the inch, or the attendance at the fair during the time it runs. If possible send out personal letters to as many people in your territory as you can inviting them to make your booth their headquarters, to make appointments to meet their friends there or to go and sit quietly and eat their lunch, assuring them that they will be welcome. Follow the same lines in your advertisements in the local papers; then see that you are there to give them the glad hand, and you will find that the personal contact will more than repay you and that business talk under those conditions will certainly bear fruit.

Don't overlook your local fair as an attractive booth cannot fail to bring results even if the direct sales made at the time do not seem very satisfactory, people have good memories in matters that touch their pockets.

Converts One-Half of Hardware Store Into Toyland at all Festive Seasons



Toys Draw Younger Element to Store, Which Paves Way for Business of To-Morrow—Quebec Merchants Devote Great Attention to Toy Department at Christmas Time— Wide Assortment Essential, But Quantities Need Not Be Large—Cheap Toys Prove Unprofitable

TOYLAND in a hardware store means attaining a closer connection with the younger folk, those in whom every hardware merchant should take a personal interest, according to a Montreal dealer who has specialized in a toy department. They are the buying force of tomorrow and even if a little patience is required in serving them at times, it will pay in the years to come when their needs are more extensive. To have the kiddies interested in the store at Christmas time or the period when sporting goods are on display draws them to a hardware store, a place where little attention would be attracted if they were not catered to in these lines.

Plans for securing this class of trade have been extensively laid by many merchants and much success has been gained. While the season for selling the wide range of toys is in the Christmas holiday period there are stores who retain a toy section all the year round. It is here that an effort is made to have seasonable array on shelves and display tables. At Christmas time every conceivable toy will sell, but in the later winter months many of them are almost unsaleable and to allow space for wheeled goods, kiddies' sporting goods and other lines for the summer period, smaller toys such as dolls, house games, spring-driven toys, etc., are packed away until the following Fall. However, there are plenty of lines to permit an interesting showing for children in all months of the year.

Very often store space is at a premium and the toy display commences around December first, when a general shifting of goods is found necessary. After the first of the year those which have not been disposed of find their way into packing cases hence to the storage room until the following year. In these cases the selling of toys lasts only over a period of from a month to six weeks. During this time, however, the success has been sufficient to warrant the trouble and extra labour, and the effort is increased each succeeding year to make hay at this time of year.

Children Write In For Toys

A Quebec merchant who follows the latter plan commences in early December of each year to prepare for the holiday season. By converting almost one-half of the store, which is usually occupied by stoves and other household effects up until this time, a large and complete Toyland is arranged. By the use of tables down the centre of the floor a good amount of display space is obtained. Arches are formed at either end of both tables which are well laden with bunting, flags and smaller toys, made more attractive by illuminating at night. In arranging the gifts much prominence is given to toys which will please the children, but the older folk are not forgotten and a present for mother and father can be chosen.

To further assure success Santa Claus arrives by train two or three days ahead and comes to the store where he inspects the outlay and listens to the wants of the kiddies. His coming is widely advertised in the local papers and in these advertisements children are invited to write in their wants so that Santa Claus can get the letters as soon as he arrives.

Heaps of letters are received and on the special day crowds of the younger people flock to the store. Toy and Christmas gift sales have increased year after year in this store, and at the present time they enjoy the reputation of having Santa Claus headquarters.

Windows Play Important Part

Another Montreal hardware merchant has a separate toy department all the year round and by keeping it clean and attractive looking the custom of boys and girls is always maintained. At the Christmas drive a window featuring toys is displayed early in December. The background is a painted winter scene extending across the entire back wall. It is a very elaborate sign and required an outlay of a considerable sum of money. In dressing the window a very complete line of toys is placed, fully representing the stock on the inside. This dealer claims that children "window shop" long before the parents do and it is up to him to show them just what he can supply. Each article is priced and by Christmas eve the father or mother is informed as to what they wish Santa Claus would bring, the price and where it was seen. It is then only reasonable that the parent will come to this store to purchase.

Broken Toys a Drawback

Handling toys has been scored because of breakages through being on display. Children enter the department and it is only natural that they should want to handle the many attractive articles in which they are very much interested. If the average boy sees a toy automobile, train or any contrivance whereby action is gained by a spring he will in all probability pick it up and commence winding. To partly overcome this it is suggested that in purchasing care be taken in buying the better quality. Cheap toys do not pay, and only cause dissatisfaction when the child gets them home.

The quality of toys has improved in recent years, due it is said to competition now existing between Canadian, American, Japanese and German manufacturers. During the war years the standard of quality fell somewhat, Germany being recognized as the best source of supply but importation impossible. When this condition arose American and Japanese markets were looked to to supply what Canadian firms could not do, but it was found that toys lacked both appearance and workmanship. Improvement both at home and abroad however now makes it possible to buy the better grade, and many stores are leaving the cheaper and inferior quality entirely alone. Although prices are higher it is found that people are willing to pay more, realizing that they are not getting value in the cheaper goods.

Assortment, But in Small Quantities

A wide assortment is essential in toys. The interest of kiddies can only be held when they see a very complete array of their favourite playthings. They will pass a window which has a rather scanty appearance for the one which is full of their Christmas joys. For this reason many merchants buy a large assortment but in very small quantities. Again, the season is a comparatively short one and a heavy carry-over almost means disaster to the season's business. "It is our endeavour to clear our shelves to the greatest possible extent by Christmas eve. After that toy sales are limited, and there is little use in having the profit lying in a packing case in our warehouse," said a Montreal merchant.

---

75 PER CENT. OF BARNS BURNED ARE SET AFIRE BY LIGHTNING

Ottawa.—"Electricity and Lightning Rods," was the subject of a concise and instructive address delivered by Prof. W. H. Day, late Professor of Physics, Ontario Agricultural College, Guelph, at a meeting of the Ottawa Kiwanis Club. Illustrating his points by simple experiments in electricity, Prof. Day outlined the history of the study of this branch of physical science and dealt particularly with the defective effects of lightning and methods of combatting them. With small models of a house and barn, he showed the course of lightning upon striking a building and illustrated the destructive effects by placing a small gasoline-soaked rag in the course of the lightning bolt. The experiment was a convincing demonstration of the ease with which lightning can set fire to a building not properly protected. By placing miniature lightning rods upon the building models, Prof. Day showed how the course of the lightning was diverted and its effects rendered practically negligible.

Lightning, he said, was responsible for the burning of three-quarters of all the barns, and twenty-five per cent. of all the houses destroyed by fire annually. Lightning rods, he claimed, were now next to perfect protection. Insurance companies recognized this and gave preference in favor of rodded buildings ranging from ten to twenty-five per cent. on their rates.

MAY AFFECT GERMAN HARDWARE IN CANADA

Ottawa.—Great Britain has taken action to prevent the dumping of certain classes of German goods. A cable received by the Department of Trade and Commerce from Harrison Watson, Canadian Trade Commissioner in London, reads: "Government orders import duty 33-1/3 per cent. on German domestic hollow-ware, aluminum and enamelled; domestic glassware, including pressed illuminated glassware; fabric gloves, safeguarding of Industries Act, Part II., subject to confirmation by parliament."

The action taken by the British government is of special interest to Canada in view of the changes made to the Customs Act last session in regard to imports from countries with depreciated currencies, such as Germany. By virtue of these changes, it is provided that the value for duty of importations from countries with depreciated currencies "shall not be less than the value that would be placed on similar goods produced in the United Kingdom and imported from that country if such similar goods are produced there."

A Favorite Haunt for Toy-Hunting Children

"Toys Galore" is the best term applied to this toy department of a Maritime retail hardware firm. This extensive stock is kept in a prominent location throughout the year and at special toy selling seasons the store is simply swamped with buyers.

Urge The Buying of Better Class Toys

J. S. Neill & Sons, Ltd., of Fredericton, N.B., in the Toy Business for Four Years Have Greatly Increased Trade in Better Class Toys—Selling Plans Which Guarantee a Future for This Business

ONE OF THE *many hardware stores in Canada which have developed a successfull all year trade in toys is James S. Neill & Sons, Ltd., of Fredericton, N. B. In a recent interview with Mr. Neill, Hardware and Metal was told that in the four years during which this firm has sold toys, a greatly increased trade in better class of toys has been developed and this year the firm have decided to go into toys more extensively than ever before. This is not as a seasonable but as an all year line.*

"Our department is a centre of great attraction for old and young alike," said Mr. Neill, "and we have endeavored to educate the people to the educational and other higher grade toys with the idea of guaranteeing steady growth in this line of business."

The Toy department in this store, under the personal supervision of the vice-president, J. S. Neill, is an extensive one with a wide range of merchandise to choose from. A glance through the department as illustrated herewith shows a mighty interesting corner in the big Neill store. The shelving down the left hand side shows a complete stock in reserve while in and on the showcases down both sides of the store are a wide range of toys to gladden the hearts of the kiddies. Educational toys in the form of erectors, sewing baskets, blocks, painting outfits, etc., show up prominently throughout the display. It is realized that parents wish to combine both pleasure and learning in the articles which they select for their children and these lines are receiving increasing trade. Velocipedes, tricycles, toy automobiles, sleighs, etc., are shown in the foreground where children may handle them.

Throughout the year this toy department is busy. It has been found that educational toys are playing an increasing part in the development of the child and such toys are constantly being replaced throughout the year. When toys were for amusement only the business was largely seasonable, with the big demand at Christmas time but this is no longer the case, due in large part to the efforts of such firms as this to emphasize the true value of toys to the child. At Christmas time of course a special effort is made and much enthusiastic buying takes place n this department. Santa Claus' personal visits, letters from kiddies, etc., play an important part in awakening the Christmas spirit for the buying of toys for gifts. Toys as gifts for birthdays are a permanent feature throughout the year and over a period of months bring in considerable business.

Owing to the fact that toy advertising generally is accompanied by prices and illustrations, many sales are made over the telephone, without the customer ever seeing the goods. There is also a fair amount of business done through the mails, with customers living in the surrounding country districts who read the advertising and ofttimes these buyers will cut out of the newspapers the pictures of the articles they require and attach them to their order so that no possible mistake can be made.

"The pre-Christmas season offers splendid opportunities for developing many valuable connections through the medium of the toy department. While the sale of toys in hardware stores is no longer regarded as a strictly Christmas feature, it is nevertheless a fact, that it is much easier to stimulate trade in this line under the urge of Santa Claus traditions. It should be kept in mind that connections established with the children of to-day mean many lasting connections throughout many years in which their requirements will be many and varied," says an Ontario hardware merchant.

To Hold Courses For Retail Salesmen

Speaker at Gathering of Montreal Business Men Declares That Success or Failure of Present-Day Business Rests to a Great Extent on the Retail Salesmen—Americans Behind Europeans in Salesmanship

By Staff Correspondent Hardware and Metal

MONTREAL.—The importance of the retail salesman in the retail merchandising world of to-day was outlined by C. H. Mackintosh, president of the Associated Advertising Clubs of the World, during an address before a large gathering of Montreal business men. Upon the retail salesman depended the success or failure of a national advertising campaign. If the retail clerk was ignorant of, and untrained in modern business methods, the wheel of trade progress could not continue on its smooth perpetual revolutions because one of the cogs of the driving gear was missing. "The real leak in the pipe line is at the tap—the retail clerk, call him salesman if you like. Fifty-five per cent. of sales are killed by lack of knowledge on the part of that individual," said Mr. Mackintosh.

The Big Factor In Merchandising.

It may be that the average retail hardware salesman has not stopped to consider his true standing in modern business. He knows that his employer depends on him to show good results from month to month, both from a sales point of view and in the general upkeep of the store. When customers are not occupying his time he knows there are other duties, such as arranging stock, replacing unseasonable lines for timely displays, window trimming, and the many other jobs that present themselves each week in the hardware store. He has realized in the past that the eyes of his employer have been upon him, but has he thought the business world, from the manufacturer down, considered him the big factor in merchandising to-day?

Mr. Mackintosh's address dealt with advertising, a national campaign on a certain line, or perhaps a special article, also with the advertising carried on throughout retail stores in their present-day business methods. To direct attention then to the man behind the counter to further the ends of all advertisers alike, is indeed a "boost" to the retail clerk. Efficient advertising and selling were essential on the part of the individual, and the speaker advocated, as the simplest remedy, special courses for retail clerks to improve their ability. It was announced that such courses would shortly be organized through the Montreal Publicity Association.

With these courses adopted by the local Association, and perhaps followed by a similar system in their centres, a step in the right direction will have been taken. If there is a "leak in the tap" through inefficiency on the selling staff of the hardware store, it is certain that salesmen will, with very few exceptions, be only too willing to improve their selling ability by the assistance given through these or any other channels.

ADJUSTING CARTAGE RATES

Montreal.—Manufacturers and jobbing houses in the city are now discussing cartage rates for the Island of Montreal and nearby towns. Deliveries are now being made free by many houses to points that are considered altogether too far distant, and in many cases entail a direct loss on the sale of goods. At a recent meeting of those interested two propositions were made as follows:

(1) North: to Cremazie Blvd. and town of St. Laurent.

South: to South Shore of the Island.

East: to Canadian Vickers plant.

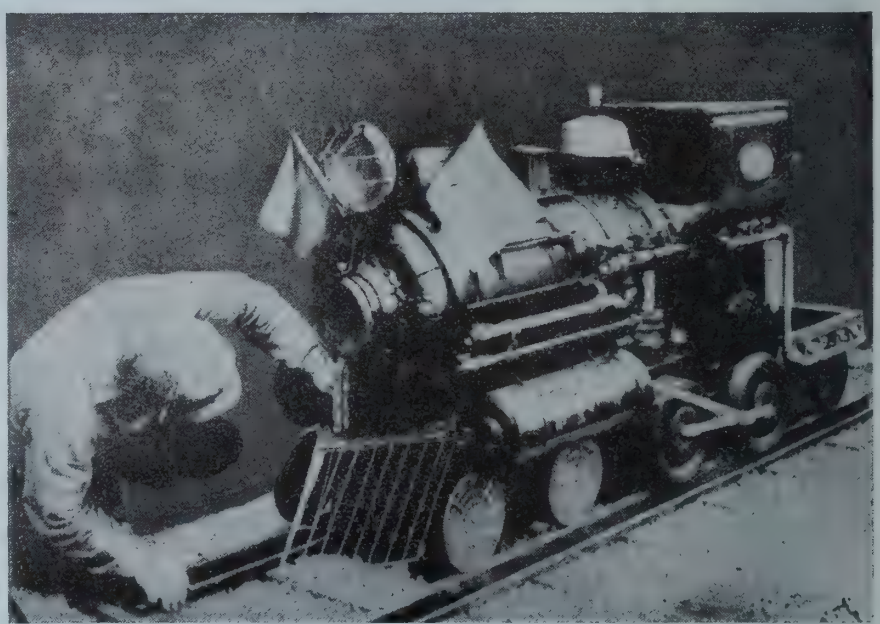
West: to Montreal West.

Full cartage to be paid for everything outside of above limits.

(2) That all goods shall be sold F. O.B. warehouse, with a charge of 1 per cent. for cartage within the above zones.

At a further meeting the above two propositions were fully considered, and voted on, and while a majority were in favor of the former, it could not be unanimously agreed upon. It was then decided that the question should be passed on to the various local associations for further discussion, with the hope that some definite action be taken in the matter in the near future.

Making a Locomotive of Hardware

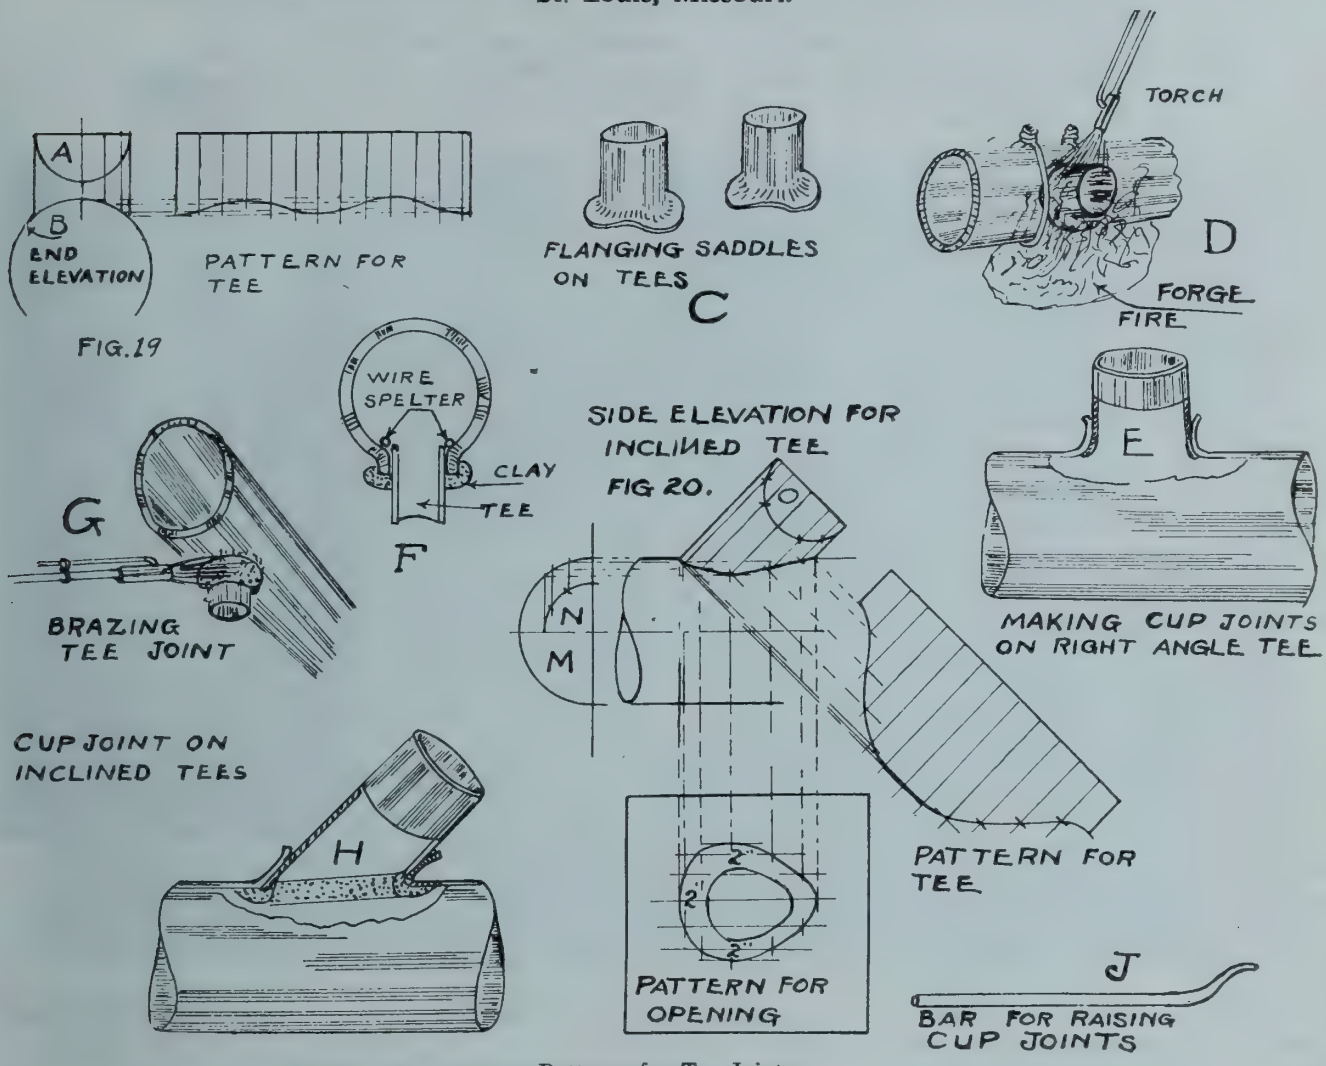


VERY OFTEN Hardware and Metal receives requests for illustrations of novelties which could be used for displays. An illustration of a battleship and of an aeroplane appeared some little time ago and have been copied on numerous occasions by hardwaremen especially in connection with certain local features such as fair time when many inquisitive people are around. Such novelties are unsurpassed for attracting attention on such occasions.

The above illustration shows a locomotive constructed entirely of hardware, the rear end consisting of a gas stove. The cylinders are represented by a gas water heater, the wheels by the rings in the heater and gas stove, the fender by the wire shelves in the oven, the headlight by a portable electric heater, the boiler of the engine is a round heater with a frying pan covering the smoke vent at the front. The other parts are represented with piping.

Tinsmiths' Patterns For Tee Joints

By O. W. Kothe, Principal St. Louis Technical Institute,
St. Louis, Missouri.



Patterns for Tee Joints.

TEE JOINT patterns are not so particular in coppersmithing as in straight pipes, because the workmen generally do considerable trimming and these pipes are trimmed to the miter often from tubing and, if made up, they are first considered as straight pipes and then trimmed afterwards.

Of course, here and there, there is a mechanic who takes more pains and lays out his work, so at figure 19, we show how to lay out a right angle tee on a main pipe larger in diameter.

The branch pipe A shows how far it sets over the main pipe, so the semi-circle A is divided in equal parts and these parts are also used as a girth line.

Then where these lines intersected a large circle, they are squared over to intersect similar lines in stretchout and that gives the pattern.

To this, suitable stock must be added for flanging when a saddle joint as at C and D are made.

A suitable flange must be worked out on these tees so a good surface is provided for brazing.

After which, wires are wrapped around to catch hold of the saddle of tee as in sketch D.

It is then washed and treated with borax and then brazed, by using a forge fire on the lower side and a torch on the upper side.

Without a torch, it is very difficult to make a good brazed joint, because the fire must be so hot on the underside so it burns the tee before the upper side gets hot enough to melt the spelter, and then, too, by having the underside so very hot, the spelter will run down into the fire.

To overcome this, cup joints are generally made and enable brazing with less effort.

A cup joint is shown as at E where the upper edge is turned out to form a ledge for holding the spelter.

Other times a tee is placed on the bottom of a pipe and in that case, it can be brazed as at F, where wire spelter is circled around the edge on the inside.

By wrapping clay around the lower edge and with the aid of a gas torch or two, a good hot flame is produced, and that will melt the wire spelter and cause it to flow in the seam, while the clay prevents it from running away.

The sketch G shows another view of this. After the joint is thoroughly brazed and cooled off, the clay is knocked off and the edges are trimmed up by filing off the rough edges.

Where inclined tees are met with as in figure 20, they can first be laid out by describing the semi-circle as at M for the main pipe and a quarter circle for the branch pipe as at N and O.

By projecting lines in the manner shown, the miter line is developed. Then by picking the girth from section O and set off at right angles to elevation, the pattern can be projected as shown.

If desired, the pattern for the opening can also be projected as shown, but on the inside of the line of penetration between the tee and the main pipe, at least a 2-inch edge should be allowed to make the cup joint.

A curved bar as at J is generally used for bringing up the cup joints.

By inspecting sketch H we see the

throat of cup joint will not require so much material as the heel owing to the sharper bend.

This is a thing for the workman to observe how much he should allow in order to have his lines straight and not run every way in his work.

If in brazing it is fonud that the spelter runs through, a ledge of clay can be pasted along the inside edge as shown, which is not always necessary, but at times it is very serviceable.

The matter of putting in these tees and making suitable brazed joints is not an easy task, because it takes quite a bit of experience to know how to work the metal, and especially what must be observed and what must be avoided while brazing.

This is especially required so not to over-heat parts of the pipe when brazing, as that will make a brittle joint.

Most of this is knowledge that can be learned only by actual practice, and for that matter, it is no more or less than people working in factories learn how to do piece work, and do a neat and good job in suitable time.

New Mileage Bill In U.S.A. Will Benefit Travelling Salesmen

Washington.—That the Interchangeable Mileage Bill recently passed by Congress, will effect substantial savings in railroad travel for more than 600,000 people is stated by the National Council of Traveling Salesmen's Association. Not only will traveling salesmen benefit by this measure, but so will buyers in their trips to market, base-ball clubs, government officials and others who travel to any extent.

"The bill directs the Interstate Commerce Commission to require the issuance of an Interchangeable Mileage Book, good on all roads," said A. M. Loeb, president of the National Council, commenting on the successful conclusion of the council's fight for the bill.

"Heretofore the Interstate Commerce Commission indicated, when appeals were made for a moderation of rates, that it was not vested with the power, constitutionally, to authorize a general lowering of rates. Now the constitutional authority has been given, and it is expected and hoped that immediately following the signing of the bill by President Harding, the Interstate Commerce Commission will act without delay. One of the outstanding features of the new book, when issued, is that the traveler will not be required to carry a number of different books, inasmuch as the one form of book will be universally used and accepted.

First Stove Foundry in Canada Will Be Commemorated

THE Canadian National Parks Branch of the Department of the Interior has decided to mark, as an historic site worthy of preservation, the old St. Maurice Forges, which constituted the only important Canadian industry during the French regime and lasted through the English period up to the year 1880. The St. Maurice Forges, situated on the St. Maurice River about seven miles from Three Rivers, were founded in 1730 by Poulin de Francheville. Here the first Canadian stoves were manufactured, and for many generations the Canadian people were supplied with porridge pots, axes, nails, hammers, spades and shovels from the forges of St. Maurice. There remain now but a few crumbled ruins of the furnaces and of the once substantial "habitation" of the managers, together with a chimney of the forge, which still stands in lonely dignity in the bed of a wooded valley. Around the site of the old forge there are now a few modern houses where once a village of 400 to 500 residents existed with industrial and commercial activities which constituted real community life.

Old chimney at St. Maurice Forges

Only Chimney Remains

The history of the forges has been set forth by Dr. Benjamin Sulte, F.R.S.C., as the sixth volume of the Melanges Historiques, recently published by G. Ducharme, Montreal. The story of the old forges will thus be preserved in literary form, and the monument to be erected by the Parks Branch will be a visible reminder for all time of an interesting chapter in the romance of Canadian industry.

Writing recently on the forges Dr. Sulte reflects rather sadly: "And now nothing remains to recall these memories but a high chimney—mais non, tout est oublie."

Industry Was Retarded

Yet the industrial inspiration of these old Canadian forges surely remains and the aspirations of its founders are still alive. In Toronto there are many foundries for the manufacture of Canadian stoves and there are others in thirty-eight other cities of Canada. The first founders of the St. Maurice Forges had great trouble to obtain permission from France to found a colonial industry. Under the old French regime, says Dr. Sulte, an order of things existed—as in the colonies of England, Spain and Holland—based upon the principle "all for the Mother Country." Nothing must be done by the colonies which would affect the trade monopolies of the merchant companies of France. These wanted nothing from Canada but furs, and they wished to pay with their own goods.

Eventually, however, permission was given to one Poulin de Francheville to establish a foundry at St. Maurice, and even some financial aid was sent from France. Dr. Sulte looks at this incident with an ironic twinkle. For a long time, he says, he could not understand it, but at last light came. Possibly cannon, bullets and war apparatus generally could be made cheaper in Canada than in France, and, therefore, permission was given to manufacture iron.

The monument to be erected by the Canadian National Parks will take the form of a cairn composed of stones from the ruins of the old St. Maurice Forges. A bronze tablet will be placed upon the monument containing the inscription in French and English: "These forges, established in 1730, by Poulin de Francheville, were the foremost industry under the French regime and continued in operation until 1880."

St. John, N. B.—T. S. Simms & Co., Ltd., celebrated their 50th birthday by the holding of a dinner at one of the leading restaurants, attended by upwards of 130 employees. An address was given by W. L. Simms, the president of the company, and in addition to the address by Mr. Simms, two of the employees who had been with the company for forty-eight years, told of the early days in the industry when the making of brooms and brushes was all done by hand.

Pointers on Sale of Floor Coverings

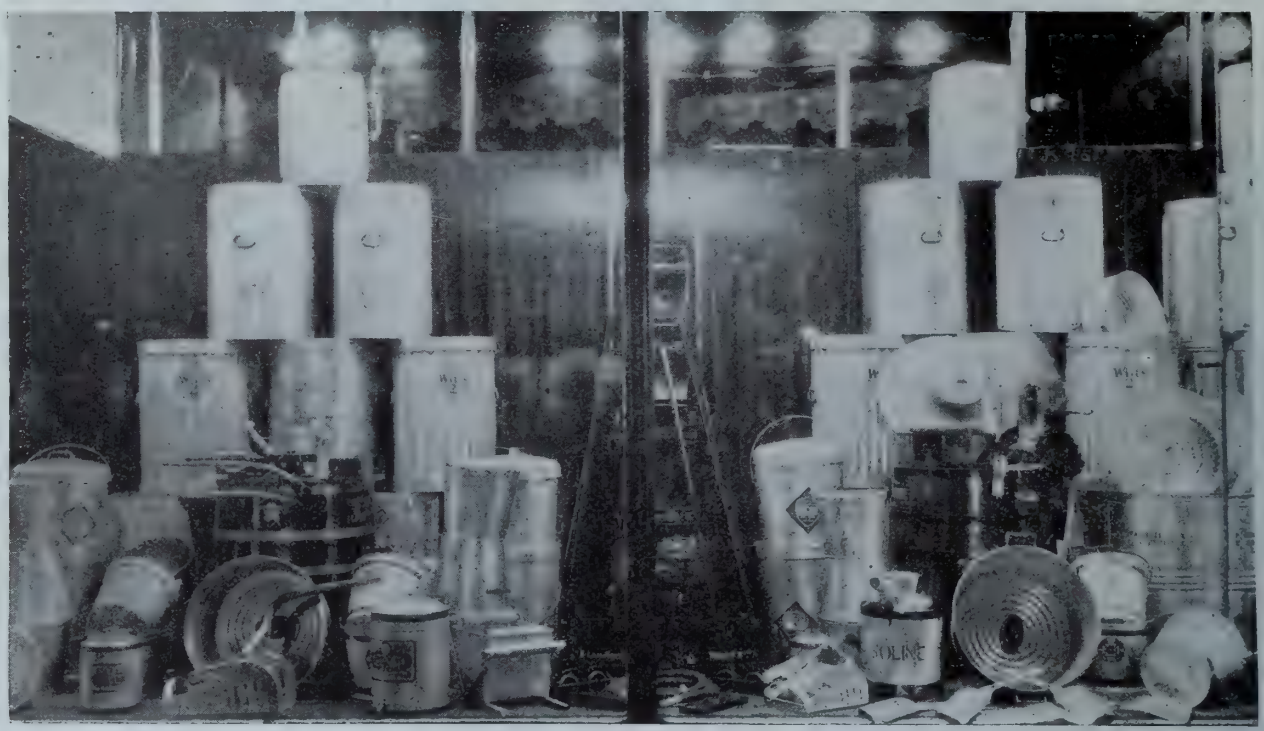
Hardwaremen Stimulate Business in Floor Coverings. Each Year's Business Shows Substantial Increase—Need Ample Floor Space for Display—Fall Months Bring Active Trade—Need Much Advertising

"OUR EXPERIENCE *in retailing floor oilcloth and linoleum has extended over a period of two years, and in that time we have found it a line that sells well. Our sales this spring show a substantial increase over last year. We are convinced, however, that a hardware store must first of all have ample floor space for displaying purposes. With few exceptions, customers for floor coverings are women, and a neat and attractive display appeals to the fair sex, whereas a man would purchase regardless of the appearance of the section of the store where he is led to make the purchase. A year ago last Spring when we decided to stock this line, we cleared a space immediately behind the front window in our household department, and arranged a separate section, with rolls of oilcloth and linoleum forming the walls on all sides. At all times we keep this clean and attractive looking, with the stock arranged according to price, and with the various coloring effects also considered," said Mr. Fabien of Fabien Limited, 1177 Wellington Street, Verdun.*

To acquaint the people that the hardware store carries a full line of these goods, a good amount of advertising is considered necessary, especially when it is a new venture. The women have been in the habit of buying their requirements from other stores. This season, Mr. Fabien used almost his entire store front during part of April, May and early June for display purposes. The fall is also a good time to push this line. Above the windows and extending across the one section of the front were two good sized oil cloth rugs. These were used as signs, such as many stores have above their windows. From the bottom of the windows to the pavement were samples of material carried, about two feet square, each sample being priced in large black figures. Added to this were rolls of oilcloth on either side of the entrance, each also priced in plain figures. On passing, people were made acquainted with the fact that Fabien Ltd. specialized in floor coverings.

Mr. Fabien said he could never understand why linoleum and oilcloth coverings were considered as anything else than a hardware commodity. Wall-paper and paint were purchased through the hardware store for walls and ceilings. Paint and varnish were bought for woodwork and floors. Why should not the hardware store complete the arrangement by selling a covering for the floor? Certainly the hardware store suppled most materials for decorating purposes, and there was no reason why oilcloth and linoleums should be excluded.

Making the Windows do Their Share



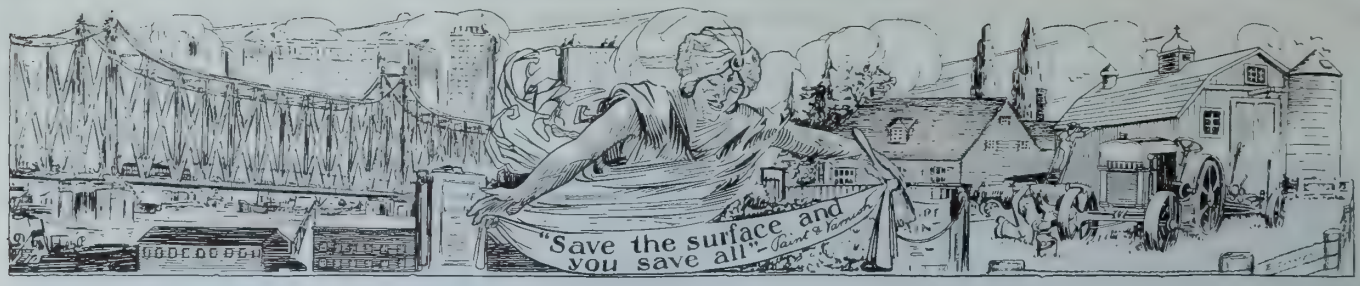
Furnaces and stoves will soon be started. Before this time comes however the hardware merchant has a good opportunity to "cash in" by advising prospects of the importance of replacing ash cans, garbage cans. Carpet sweepers will be needed for Fall housecleaning and other utensils such as mop wringers, brushes, washers, pails, etc. Here is a group of such lines which can be used shortly to good advantage.

September is the next best month in the year for weddings. June of this year exceeded records in marriages and September should therefore also be an active month. For the showers and wedding gifts the hardware merchant has many suitable lines. A window such as this will bring much business in gift lines.

in Developing Fall Hardware Trade

The real dyed-in-the-wool sports are those who go after game in the Fall months of the year. A wide range of hardware lines including flashlights, axes, ammunition, guns, and other hunters' equipment, can be shown to advantage in the windows at this time, preferably with some such natural setting as is shown here.

Some fast selling Fall lines of hardware are shown in this display. Early reports indicate that there is a big field for stove and range business this Fall, and some active work on the merchant's part to show prospects the folly of continually repairing when replacement should be made, should develop much business.



Sends Booklets to Paint Prospects

Willard Hardware Co., Chatham, Ont., Distribute 5,000 Booklets Dealing Largely With the "Save the Surface" Campaign—Intimate Contact Between Dealer and Customer Necessary to Success of This Principle of Business

BELIEVING that the successful merchandising of paint depends largely on the extent of the personal contact with prospects, the Willard Hardware Co., Chatham, Ont., have adopted some novel means for ensuring that every paint prospect in the community will be well acquainted with the fact that Willards can supply their paint requirements and give them expert advice as to meeting their difficulties. The underlying principles of the Save the Surface campaign are also given wide attention in the efforts of this firm's paint salesmen who believe a bigger volume of paint business can be done when customers are sold on the preservative value of paint.

One of the most interesting of the means adopted by this firm in such promotion work is the publication of a 32 page booklet 6 inches wide and 9 inches long. This booklet is published monthly and about 5,000 are sent out to prospects on mailing lists. The first issue of this booklet was published in April of this year, this being a "Save the Surface" edition which contains some interesting reading.

On the inside front cover is an illustration showing paint and varnish being applied and an editorial dealing with the use of paint and varnish to brighten up. The first page of the reading matter is devoted to "Foreword" which after introducing the new booklet and outlining its purpose states "Back of this is an earnest desire to become acquainted with our different readers in so far as it is possible through the medium of the printed page. We feel that if you like our book you will like us and some day we will become better acquainted by meeting in our store.

"We're proud of this store of ours and welcome you any time you care to call. Hardware and everything a hardware store usually handles, is our business. In fact we handle some things that many other hardwares do not."

Sell Service As Well as Paint

The first editorial matter devoted to any particular line in the book, deals

Paint displays are an important means used by Willard Hardware Co., Chatham, Ont., for bringing prospects for paints, varnishes, brushes, etc., into the store. A wide range of articles are shown in the window including floor paint, automobile finishes, varnish, wall finish, furniture polish, wax, etc. A window card states "Prepare your home for the long winter months. Comfort, ease and a cheery home mean happiness." Other signs advocating "Save the Surface" also appear.

Paint department of the Willard Hardware Co., Chatham, Ont., revealing a complete stock, well kept and generally attractive in appearance. Every effort is made to encourage prospects to visit this department and it is realized that when there, the prospect must not be disappointed in the appearance of the department or the service rendered. A prominent sign suspended from the ceiling shows the department for "paints, brushes and varnishes" and once there the customer will have all needs attended to with courtesy and intelligent understanding of their problems.

with the paint department. Under an illustration of the paint department as shown elsewhere appears the following, "This illustration shows the section of our store devoted to prepared paints, varnishes, stains, enamels and every necessity under the head of painting. Coupled with our high quality line of goods is our sales service. We are always ready and willing to explain the method of applying any of our paint products. It is to our interests as well as your satisfaction that you have not only the best paints but also the best results from their usage."

Dealing primarily with the Save the Surface campaign the editorial states "this slogan is teaching the world that proper paint protection means the conservation of millions of dollars yearly in property value. Everybody wants their home to look attractive and beautiful because the personality of a well painted home expresses the delightful hospitality to be found within its walls."

Dealing with paint in general the editorial states "Paint suggests itself at this time of year and we plumb our knowledge of paint, read the ads. and finally turn to the paint dealer with our paint troubles. It is his business to help the one with a paint problem. It's up to him to know the proper kind for every purpose and the method of applying it. He not only sells paint but service and part of his service includes advice about the goods he handles.

Manufacturers Assist

"Back of the dealer stands the manufacturer and never before were paint manufacturers more interested in helping advance thought along the lines of brightening up and preserving with paint. True, it may be argued that their desire is to sell paint. Granted that it is, the publicity of the Save the Surface campaign makes it imperative that they sell service as well as paint.

"Paint dealers in 1921 experienced increased trade in paints. Coupled with that was an easier feeling in price. Oils for instance fell off about four times in price. It came to where people felt they could buy with saving. Some claimed it was down as far as it would go and a slight tendency upward at the end of the year may substantiate this claim. At present paint prices compare with any other commodity. There should be no hesitation in buying as any easing of price is unlikely, rather the reverse may ensue and prices increase judging from the uneasiness of the raw material market.

"Another argument in favor of the Save the Surface campaign is that paint really saves the surface. Paint not only brightens but preserves. The surface that is unpainted wears or weathers unhappily and the one who values property also values paint."

On the next two pages appears a write-up of the firm itself stating that eleven years ago in March marked the entry of this firm into the hardware business. In that time many improvements have been made to the business. When the business was purchased from the Westman Brothers in 1911 the store started out as the Willard Hardware Co. having H. B. Willard, father of the present manager at the head of the firm. Later Mr. Willard, senior, stepped down and left his sons, George and Alfred, in sole guidance.

Electrical Goods

Dealing with electrical goods the editorial states "These days of electrical power facilities justify us in giving attention to this line of equipment. Electric washers, irons and sweepers are among the labor saving devices to be found on our floors."

Under the heading "Women are heavy paint buyers" an editorial in the booklet states, "Women are among the greatest purchasers of indoor house paint." This may be from the fact that the house is woman's realm and its decoration and care a matter of her concern. Or it may be that man willingly shirks the responsibility and leaves it to her.

(Continued on Page 168)

Suggestive Selling

Grouping of Paints, Varnishes and Kindred Hardware Products Greatly Increases Total Volume of Business in Mills Hardware Co. Store

ONE of the most successful of a number of merchandising ideas recently introduced into the Mills Hardware Co. store in Hamilton, Ont., is that of suggestive or group selling. Nelson Mills has always been an exponent of group selling of hardware and has introduced the plan in a broad way in this store. Its application in the "Save the Surface" department is particularly interesting and effective.

Recognizing that the retail salesman was called upon for more information in connection with the application of paint and varnish than with possibly any other line of merchandise sold in the store, steps were taken to see that the salesmen were provided with sufficient knowledge that they could give intelligent advice on customers' paint problems. Carrying the point a step further it was realized that if paint and varnish customers were forced to depend largely on the retailers' advice, that such customers would know little about their other paint requirements or the means to cary out the advice given them. Hence the idea evolved of gouping the lines necessary to making satisfactory application of paint and of suggesting a number of other finishes which might be used to advantage in conjunction with the line being purchased. The results have been very satisfactory, many sales having been increased from a matter of a few cents up to dollars, and the customer gratified that the suggestions were made because they were saved a trip back to the store. Discussing the subject with Hardware and Metal, Nelson Mills pointed out that the other lines sold in such groups are absolutely necessary to each other and if the customer has not them already on hand they must be bought somewhere. Hence if his salesmen do not make the suggestion and the customer forgets until he gets home, he will then go to the nearest store to make the purchase.

Aids Salesmen's Efforts

Not depending upon the salesmen's suggestions, a number of very effective cards have been prepared, as illustrated in this article. These cards bear a message and show a sample of the line dealt with. These cards stand as constant reminders to customers of other lines they may be requiring and they have produced many enquiries which have turned into actual business. Particularly effective are these cards when applied to some line with which the public is little acquainted. Some of these group selling ideas will be outlined herewith.

On one card is a sample of linoleum unvarnished and after varnishing. A can of the varnish is showing through the card. On another card is a piece of wire screen painted—pointing out that it is easier to paint than repair. A sample brush and can of paint also appears. On another appears an advertisement of enamel for use on refrigerators. An illustration of a refrigerator appears, also a piece of galvanized iron, one half bare, the other half enamelled. The card states that this enamel dries hard and is odorless.

The group selling of lines required for automobile renovation is done by means of grouping the actual articles on a display table, bearing a large card listing the articles including sand paper, brush, top dressing, cleaner and polish, engine paint. These articles were grouped at a price of $4.45. This plan makes it easier for the salesman and acts as a good reminder to customers.

Finish for Window Blinds

Another demonstration card is used in connection with a finish for window blinds. On this is a sample of a window blind material showing half of it finished and the other half unfinished. It points out that this product makes a durable and beautiful finish and can be procured in sixteen shades. The blind can also be painted a different color on each side. Mr. Mills pointed out that

The way in which the suggestive selling idea is applied to paint in the Mills Hardware Co. store in Hamilton, Ont., is shown in this view of the "Save the Surface" department. Cards with a sample of the line dealt with appear on all counters. Note the sectional brush department on the right where customers may handle brushes at will. The counter at the rear is reserved for demonstrations one of which was in progress when the photo was taken. Here is found a complete paint stock, placed where it is easy of access and combined with intelligent service on the part of salesmen, an active business is done throughout the year.

Stimulates Paint Business

Customers Appreciate Suggestions Which Prevent An Unnecessary Return Trip—Sells Paint By Covering Capacity Per Square Foot

sold in this way according to Mr. Mills, the window half finished with this product, indicating the improvement which can be made in the appearance of blinds.

Drawing attention to the extensive display of brushes arranged in sections according to size and quality and each price marked plainly, Nelson Mills stated that his experience had been that people wanted to handle brushes. There is no sample stock kept, the stock for sale acts as sample and in this way the brushes are moved out quickly without any chance of becoming shopworn. Mr. Mills estimates that half of the painting jobs spoiled to-day are due to the use of poor and unsuitable brushes. He emphasizes the necessity of salesmen impressing upon paint buyers this fact.

Demonstrations are used frequently to good advantage. In the spring and fall of the year when floors are being refinished, graining demonstrations are found to be particularly productive as many people are unaware that this operation is as simple as it is now.

In connection with the group selling of hardware and kindred products Mr. Mills pointed out that when a customer comes in to purchase hinges, screws or other lines which indicate that he is going to do some renovating or new construction, the salesman invariably suggests paint and varnish.

Speaking of the Save the Surface campaign Mr. Mills pointed out that he links up with this in every possible way, showing actual evidence of the surface saving qualities of paint. "Save the Surface" is a splendid slogan. It represents a sound principle and it will greatly increase the volume of the retailer's sales. If he does not link up actively with it the retailer is proving himself to be the missing link in what would otherwise be a splendid help to him," said Mr. Mills.

This firm adopt the policy of selling paint by covering capacity rather than by the pint or quart. Paint and varnish looks cheaper when sold by the square foot and the customer has a better appreciation of its true value when sold in this way according to Mr. Mills, who stated that this suggestion was secured from an article which appeared in the paint department of Hardware and Metal.

LOWER OCEAN FREIGHTS

According to information received by the agents in Toronto of a transatlantic steamship line, freight rates on upward of 75 commodities have been reduced, effective July 24 last. Among the principal commodities affected are: aluminum rods, tubes and wire, black lead, brass, copper, gun metal and lead scrap, chain cables, cream separators, lavatory basins, fertilizers, floor cloths, glue (dry), horse hair, iron and steel bars, billets and blooms; constructional ironwork, angles, channels, joists, beams, girders; scrap iron, oilman's stores, earth paints, ochre, raw earths, zinc oxide, rattans, wire rope, shellac; dry and green, paper toys, turpentine; brass, copper and lead wire.

An item appearing in the July 1 issue of Hardware and Metal drew attention to a new catalog issued by C. Drew & Company. The address was merely given as Kingston, and some confusion has resulted through this being construed as Kingston, Ontario. The correct address is Kingston, Massachusetts, U.S.A., to which address enquiries should be forwarded.

Knowing that much educational work has to be done at all times in order that customers of the "Save the Surface" department may become more intelligent users of paint and varnish, Mills Hardware Co., Hamilton, frequently have demonstrations, to which prospects are invited through the medium of such window displays as this. Note the cards with samples of various lines shown in the window. These are the same cards as are used on the counters when no window display is in. A brush is advertised to be given free. A display board is devoted to graining tools, and sample boards before and after graining appear to show how easy is the operation. Note the old door on the right showing its original condition, after the first coat of prime color and the finishing coat.

Over $43,000,000 Lost by Canadian Farmers Each Year by Neglecting Necessary Painting

Ten Per Cent. of the Barns in the Country Are Painted—Best Opportunities for Making This Fall the Best for Paint and Varnish Sales Lay in Developing Farm Business—Turnover Should Be 2½ to 3 Times the Investment in Paint

Written for Hardware and Metal by H. E. MIHELL, Imperial Varnish & Color Co., Toronto

SINCE the advent of the "buyers' strike," the "readjustment period," the "war aftermath," "post-war depression" or whatever you have a mind to call it, we have not been burdened with even the faintest cry of too much business.

This lack of "too much business" may or may not be ascribed to several and sundry causes. We'll leave their deduction to the wiseacres and business philosophers who delight in such post-mortems and statistics.

What concerns the average man today is where to get his share of the business and try to keep it somewhere near the level of the rollicking good years just prior to and following the Armistice.

It is quite true that in many instances and with many lines, it is not there to be had. This cannot be said of the paint and varnish business. This industry never has, nor anywhere yet approaches a market that is crowded because of lack of opportunity for sales or selling development.

Let us analyze this statement for a minute.

It has been stated, and this statement is altogether likely an underestimate rather than an overestimate, that the loss to Canadian property owners on urban property, farm property, and farm implements is upwards of seventy million dollars annually through lack of paint and varnish.

Of this amount, upwards of forty-three million dollars is being lost by the farmers of Canada every year. Why? Because the farmers' market for paints and varnishes is as yet undeveloped.

Not 10% of Barns Painted

The statement has been made that not ten per cent. of the barns of the country are painted. This can be easily confirmed by an hour or so observation when passing in any direction up or down our country roads.

This doesn't look as though the paint trade faced a glutted market of painted property in the rural communities.

Any paint man will admit, in fact the majority recognize the possibility of four times the use of paint and varnish that has ever been used before in any one year. Here is an opportunity!

The trade slogan of "Make 1922 the greatest paint and varnish year— as the first step towards doubling the industry by 1926," is at once an objective and an open admission of shortcoming.

It is an admission of the trade's shortcoming by reason of the fact that they recognize that it can be doubled. From its objective aspect it is worthy of being placed before the trade as a goal of achievement.

The writer has talked with many paint men, both manufacturers and retailers, who will admit the above statements from their own observations,— yet when suggested they crawl into their shells like the turtle.

Extending Paint Season in Fall

Another condition prevails that argues for the extending of the paint season into the fall. In many of the smaller towns depending on the farm community, we find that the local painter has absolutely more than he can handle in the spring of the year. He is so busy that many of his would-be customers have to be put off till finally they become engaged in summer pursuits and put the matter off altogether. The establishment of the fall painting idea would carry this business over into the fall when he could handle it more comfortably. These painters are so busy in the town that they don't care to move their equipment out to the farm in the spring. In the fall he has more opportunity and is a little more willing to go to his country friends and do their work for them if they can be made to see that fall painting is just as good a time as spring, in fact gives them better results from a protective standpoint.

All paint men know these facts, they admit these conditions, they recognize these opportunities, now what are we going to do about it? Are we going to let this knowledge breed some action or are we going to let precedent stifle our initiative?

It is not the purpose of this article to recite the paint and varnish manufacturer's problem of endeavoring to serve everybody properly during the spring rush. He could serve his customers much better if business were spread out more evenly over the course of the year.

And his problem is not altogether unlike the problem of the retail paint department. Let us take an average instance of a retail paint department.

Turnover to Justify Investment

This department's share of capital investment is let us say $2,000. Shelf space and equipment are based on this amount of investment. In the spring of the year the demand and amount of business done would justify investment and equipment on the basis of say $3,000. It would also justify keeping the paint department right up at the front of the store and the window trimmed with paints once in every six weeks.

Then along comes the fall of the year, demand and business do not justify perhaps even an investment and equipment of $1,000. If it were not too much trouble, the whole paint department would go to the rear and the window too frequently goes without the grace of a display of paints and varnishes.

The development of the farm market and the fall painting idea would not only ensure more even all-year business, but it would justify the permanency of the original $2,000 and perhaps more. It would earn a rightful and

Discussing paint requirements with the farmer.

profitable place for everyone's paint department at the front of the store and it would justify the use of the window more frequently.

Snow shovels, screens and screen doors, and refrigerators have their limited seasons, which perhaps cannot be overcome. But paint and varnish sales have a wider season than they have ever experienced. Their greatest limitation has been attachment to prejudice in the minds of the trade and the consumer.

This prejudice in the mind of the seller has no excuse. He has been shown that there are good sound reasons for fall painting and that there is money in it for him if he will go after it. The consumer perhaps will be somewhat slower in grasping the idea but if the dealer will exercise his personal contact and advertising on him, he too can be made to change his ideas and a lot of his habits in regard to paint and varnish.

Should Turn Stock Three Times

Taken by and large it is doubtful if the average turnover of the paint and varnish dealers throughout Canada amounts to more than one-and-a-half times their investment. From a merchandising standpoint and in view of the existing possibilities, the average turnover should be from two-and-a-half to three times the capital investment.

The paint and varnish dealer who is making an earnest effort to establish a paint department on a sound merchandising basis, will face this fact, take into consideration these possibilities and welcome fall painting and the development of the farm market as real solutions to his problem.

After all is said and done, there are many men to whom these arguments have been presented who have thrown up their hands with an expression of "it can't be done." Of course it cannot be done if they do not start in to do it. The man who wraps himself in this cloak of precedent and will not let his initiative get into action is licked without even going into the battle.

Mention has been made of the conversion of the consumer to the fall painting idea. It cannot be expected that he will come into it of his own volition. He must be told about it, he must be shown, he must be educated.

FACTS WHICH JUSTIFY THE DEALER CONCENTRATING ON FARM PAINT BUSINESS

Not 10 per cent. of the barns in Canada are painted.

On the basis of depreciation established through neglect to paint, farmers of Canada are losing $43,000,000 annually.

Bumper crop prospects this year will provide many farmers with the means to carry out necessary improvements.

H. E. MIHELL

Imperial Varnish and Color Co., who tells some interesting facts about the opportunities for developing farm paint business this fall.

The retail merchant cannot escape any share of his responsibility in this direction. His own personal effort and his advertising must be brought into play.

Furthermore, he should get into action right away. It is an open secret that there has been begun an earnest effort on the part of the manufacturers and others to overcome this uneven distribution of business throughout the year. They have recognized the conditions cited above for considerable time. They have been seeking ways and means of overcoming it, and it is understood that the "Save the Surface" Campaign is to be enlisted to aid in this direction.

The Save the Surface Campaign

Every paint and varnish dealer recognizes the tremendous influence that the "Save the Surface" campaign has had in increasing the sale of paints and varnishes during the past three or four years.

The campaign has surely fulfilled one of its expectations held when it was launched and that was to ensure a continuance of business during the periods of anticipated depression.

The years 1920 and especially 1921 gave it the acid test of these expectations. To what successful extent it has come through those trying years every paint dealer can testify. The painting habit through its instrumentality has become more thoroughly established than ever before.

But this is not the only mission that the "Save the Surface" campaign has to fulfill. It has opened up to the eyes of the trade the tremendous possibilities that have been neglected and which still exist. It is now up to the campaign to use its weight of influence towards making these possibilities an actuality in dollars and cents for the paint and varnish trade.

The committee in charge recognizing the importance of both the "Fall Painting" idea and the necessity of developing more adequate painting of farm property, have decided this fall to train their whole facilities onto these two problems. Their plan of campaign has been designed to attract the attention of the farmers and the rural communities to the necessity of adequate paint and varnish protection.

But this campaign cannot do it alone. Their effort must be supplemented by the tremendous power of the retail trade in taking an active interest in these directions.

It is to be frankly admitted that this is not a matter of merely rolling off the log. It will require pioneer work, patience, resourcefulness and initiative. These two ideas will not be thoroughly put into force this year, or next year or the year after. It will take time, but it will be time well spent. But for the sake of heaven if they are worth time, and money can be made of them, don't throw up your hands because it has never been done before.

The paint trade as it stands to-day was not established in a year. It has taken years to place it in its present position and not a few distributors recognize that it has enabled them to establish one of the strongest departments in their store.

Dealer needs active turnover of paint in fall months to get his required quota of business.

The Save the Surface campaign is ready to help the merchant convince customers of the need of painting before the winter.

High cost of lumber and other building materials makes it more necessary to protect buildings on the farm and elsewhere.

In the language of the street "it is up to you," the retailers of the Dominion of Canada, to take hold of these ideas and utilize your retail merchandising opportunities to make them strong features in extending the service of your paint departments; and incidentally to make them stronger profit producers for yourselves.

Reasons for Fall Painting

The basic benefits to be gained by the consuming property owner through "Fall Painting" have been given in Hardware and Metal a number of times, but it will not be amiss to give them again.

There are five strong reasons which may be readily turned into good selling talk for the retailer.

1. In the fall, the surface is thoroughly dry. During the spring, a surface which needs repainting is sure to contain moisture and dampness or frost,

and it cannot be successfully painted until it has thoroughly dried out.

2. When the wood is dry, it absorbs more of the paint. The paint penetrates deeper into the wood, therefore getting a firmer hold on it, giving the paint coating greater tenacity or holding qualities.

3. Paint cannot be applied as successfully in damp, cloudy or unsettled weather as in warm, sunny weather; in the fall the weather is more settled and uniform and is warmer, therefore it is an excellent time for painting.

4. A house needs its protecting coat of paint more in the winter months than at any other time. A house in need of repainting should never be allowed to go over the winter without this protection.

5. It is easier to keep moisture and dampness out by applying a coat of paint when the surface is dry than it is to get moisture or dampness out of the wood when you want to apply paint.

The matter of developing farm painting presents a few problems that will require solution, especially in connection with barns. The fact that barn painting has not been nearly as general as it might be requires that the farmers must be educated into the paintnig habit or perhaps the habit of having the painting done.

It is to be frankly admitted that the equipment necessary for barn painting must be a little more elaborate and the knowledge of how the work should be done economically must become more thorough.

This is by no means an admission that it cannot be done, for it has been done.

The cultivation of a farm is the farmers' business, and must be done in season which coincides very largely with the painting season.

He can scarcely afford to carry equipment for the painting of his barn alone. The problem pretty much resolves itself into that of having it done by regular painters with the brush or with the spray gun.

Farmer Tells Why He Paints

That the farmer recognizes the necessity of painting is shown by the reply of a western farmer to a paint salesman who asked him why he had painted his own barn.

"I'll tell you son," said the farmer, "lumber hauled in from British Columbia and laid down at $110 per thousand makes it necessary for me to keep that barn working as long as I can."

Admitting that the solution of having the work done by someone else is the best, then it is up to the retail paint distributor to work in close conjunction with the local painters as much as possible. Aggressive selling of barn paint will enable him to put the painters onto barn painting jobs in the off seasons.

The best solution is the use of the spray gun equipment. The spray gun is quick, efficient and economical and will enable the wide awake painter to obtain a great many jobs that otherwise he could not hope to handle both on account of time and price.

HARDWARE AND METAL GAVE A HELPFUL PAINT SELLING IDEA

Discussing paint business with Nelson Mills, of the Mills Hardware Co., Hamilton, Ont., Hardware and Metal was advised that the plan of selling paint by covering capacity rather than by quantity as outlined in a recent issue of this paper had been adopted by the paint salesmen of this firm to good advantage.

"You have certainly pushed your paint editorial department well in the last couple of years," said Mr. Mills. "You have many splendid articles on paint selling. Every one of our salesmen get Hardware and Metal and read it closely every week, and they apply every helpful selling idea which is given."

In some localities there has been established what is known as "community painting;" that is people in a certain community club together to have their painting done at a certain time. This enables the painter to apply his first coat on one building, proceed to the next and apply the first coat there and then return to the first job for the second coat. This reduces the time of moving equipment to a minimum.

The aggressive paint and varnish retailer can, if he will, make himself the hub of such organization and form an outlet for his goods.

Spray equipment of proven worth can now be obtained which can be mounted on a small motor truck and carried with other accessories readily from place to place.

Such equipment has reached a point that it can be as easily used for house painting as well.

Hardware and Metal will be very glad to furnish the names of reliable firms who will furnish these outfits to those who are interested.

It is not out of place to say that within less than ten years the paint trade will both see and enjoy tremendous strides in the development of barn painting. It has already started in many localities. Dealers and painters throughout the country are already beginning to enquire into the matter to see how it can be carried out. When the melon is properly cut it is going to be one of the juiciest ones that they have ever put their teeth into.

Like all other forward movements, the man who takes the initiative and gets in on the ground floor is the fellow that is going to get all the chocolate off the cake.

While it may seem more or less of a problem, it is not at all incapable of solution. The rosy features about it are that it has tremendous possibilities. These possibilities are easily within the reach of those dealers in towns depending on the rural population. When these possibilities have been tapped it will become a permanent business and it is quite within the range of possibility that your paint department will have established a source of outlet fully equal to and quite as profitable as your present volume of business.

As was said a while back, "it is up to you" to function as a merchandiser of goods, to use all of your personal contact with your trade, a fair share of your advertising and a reasonable amount of enterprise to tap this gold mine.

Keep thinking them over for this fall: "Fall Painting" and "Barn Painting."

SEND BOOKLETS TO PAINT PROSPECTS

(Continued from Page 163)

"Be that as it may, more women than men purchase the paint that is used on the floors of their homes. And many of them do the painting too. We do not believe that it is because they have to but because they like to. Painting is fascinating. Many people will sacrifice a perfectly restful evening for the delight of chasing brushfuls of paint back and forth across a kitchen floor."

Other features of the booklet include paragraphs explaining the process of treating various surfaces; a boys' and girls' picture title contest for which prizes of $5 first, $3 second, and $2 third were given; a note to call the service department for a representative to go and explain how to re-finish woodwork, furniture or floors. A number of suitable jokes, descriptions of various paint products handled, and a story of how a hardwareman learned something of paint prospects from his wife also appear in the issue which is brightened by many illustrations throughout.

The issuing of this booklet to 5,000 prospects helped greatly in the education of people as to the preservative value of paint and the result has been to increase the volume of paint trade by bringing customers into a new appreciation of the value of the product and of applying it adequately.

MANUFACTURE ASBESTOS

Sherbrooke, Que.—Manufacture of finished asbestos products is no longer to be confined to the United States and European countries for it is expected that Canadian asbestos will actually be manufactured in the Dominion very shortly.

Plans have been completed by the Johns Manville Company, Limited, for the erection of a plant at Asbestos, Que., where it is expected to be able to take care of Canadian requirements. The plant and equipment will entail an expenditure in excess of one million dollars and the work will be commenced immediately.

The plant will be completed in about six months time and the initial operations will necessitate nearly three hundred employees with an increase in number as the developments progress.

"If You Did Not Paint in the Spring Then Plan on Painting This Fall"

A. J. WEBB

Every Reason Advanced For Spring Painting Can Be Applied to the Fall—Varnish, Floor Paint, Stove Pipe Enamel, etc., Can Be Featured As Applying to Fall Needs

Written for Hardware and Metal by A. J. WEBB

EACH YEAR as May-time comes around the property owner is bombarded with literature of various sorts, all pointing out to him the necessity of painting up his property—the considerable saving effected by so doing, and the general all around economy embodied in this work; all of which of course, is excellent good sense, and is in the interests of the conservation of property in general. Is there any reason, however, that the dealer's efforts should slow down, or gradually peter out just because the fall is approaching? Absolutely none!

For every reason advanced that the property owner should paint up in the spring, the dealer can advance just as valuable a reason that property should be painted in the fall.

It is now generally recognized that the first and essential value of a good coat of paint is its protectiveness, saving as it does the valuable property of Canada from the attacks of wind, sun, rain, storm, and all the extreme climatic conditions that obtain in this great Dominion.

Protection Before the Winter

In the spring your property is attacked by heavy rains and storms, later on by the intense heat of summer, and consequently it is highly desirable, and the sheerest good sense to paint up at this particular time. But, what of the heavy attacks of winter upon the unpainted building? In the winter time we have the intense cold, the sleet, snow storms and the bitter piercing north winds, all of which will rapidly effect a very considerable deterioration on the unpainted dwelling, and it behoves, therefore, the property owner to think well before allowing his property to go through the winter in its unprotected condition.

As a matter of fact in the early fall, say during the month of September, conditions for painting are, in some cases, actually better than in the spring. First there is an almost entire absence of heavy rains, which are so in evidence in the spring, and which oft-times spoil what would otherwise have been an excellent job. Another reason is that the lumber is free from frost, thus affording a perfect painting surface. There is also an entire absence of the many insects that are so prevalent in the spring-time, and which, adhering to the new coat of paint, somewhat spoil the appearance of the job. The greatest of all, however, is the wonderful protection it is going to afford your house when facing the long Canadian winter, and the storms and stress of the elements which are so violent at that time.

Requires Equal Protection

Just as it is necessary for the individual to adequately clothe himself with warm clothing to withstand the rigors of the Canadian winter, so is it equally necessary to protect his property by the application of a good coat of paint from the attacks of the elements, which are so severe on the buildings erected in the Dominion.

If ever your house needs protection, surely it does against the severe and long sustaining attacks of the Canadian winter. Let the dealer, therefore, not be satisfied just because he has bestirred himself during the usual time of spring cleaning and spring painting, but let him go after the considerable amount of painting that can be done in the fall.

There is a further side to this question, and that is, that in the fall is the time to get after the interior decorating of the home. Then, is the time when the family is faced with a long period when they are more or less confined to the home. Is it not desirable therefore that it should be made as spic and span as possible, as bright and attractive as it can be made, and in short, a home that it is a pleasure to live in? This is the time when the dealer can push the sale of his varnishes, his floor paints, and all the numerous lines that are put out by the manufacturer for interior decorating and especially made to beautify the home.

Time Spent in the Home

There is a great field open for the dealer who is not content to have merely shot his bolt during the usual activities of spring painting, but who feels as we do, that a great deal can be done by suggesting to the householder just what improvements can be made in the interior of the home during the early fall, thus making it an attractive place in which to spend the long winter months. In the summer most people are out of doors, and glad to be so, but during the long winter months a greater portion of the family's time is of necessity spent in the home.

Let us work together, therefore, to stimulate in the householders' minds and in the property owners' minds the great benefits to be derived by brightening up and freshening up the interior of our homes. Let the dealer take advantage of any visit made to his store by suggesting that this be done, and we feel sure that he will find his sales of these interior lines go up amazingly. They have never been pushed to the extent they should have been, and we would suggest in all sincerity that the dealer endeavor not only to point out the wonderful preservative effect of paint for the exterior of property, but also not to forget what can be accomplished in the interior of the home by the expending of a little money on varnishes, floor paints, flat wall, and so forth, all of which can be applied during the late fall, or the winter, to the great enhancement of the home, and a source of pride and pleasure to the family in general.

There is always some product of the paint manufacturer that can be used whether it is fall, winter or summer, but it is up to the dealer to suggest to his customers just what particular lines can be used, and we feel sure that if he will interest himself in this proposition that his paint sales will not cease or slow down very appreciably just because it happens to be September instead of "Spring Cleaning" May.

WESTERN ONTARIO NOTES

The roof is now on the new four-storey building of the Cowan Hardware Co., at London, Ont., and workmen are making rapid progress on the interior. The firm expects to take over the premises in October.

Carswell Bros., of Elora, Ont., who recently purchased the Reith Hardware at Grand Valley, have taken over the business. Charles Adams is associated with them.

Retailers' Sales of Paint Greatest Ever

Net Reduction on Standard House Paint in Last Year is Forty Cents a Gallon—A "Bread-and-Butter" Line for Hardwaremen Recently

Written for Hardware and Metal by W. S. FALLIS Vice-President and Managing Director Sherwin-Williams Co. of Canada, Ltd.

DOMINION-WIDE conditions indicate now, as they have for some time, that the broad swing of business is distinctly upwards and that Canada, as always, is among the first countries of the world to recover from trade depression. This tendency to react quickly is, in my opinion, the result of the inherent soundness of her commercial activities. Boards of Trade, business associations, and investigators who have their fingers on the business pulse of the country, report a steady improvement in conditions generally. The crop, so important in a country largely agricultural, promises well over the average; a good crop this year will give a great impetus to the upward swing in business, particularly in Western Canada.

Costs Vary

Conditions in our industry are good. Costs have varied somewhat, being reduced in the early part of the year and becoming a little firmer now, but the net reduction on standard house paints since this time last year has been 40 cents per gallon and on other lines accordingly. Gallonage in paints and varnishes sold through the retailer to the consumer has been greater than ever before and this remarkable record, maintained through the last "lean" period, will undoubtedly be bettered still more as the business horizon continues to grow brighter.

A Bread and Butter Line

Paints and varnishes have been one of the "bread and butter" lines for the dealer of late months. They have brought him a good volume of business and a good profit while other lines have been quiet. Normally, the paint and varnish department can be made one of the most profitable in the retailer's business. Work, of course, counts; he should get behind his line of paints and varnishes with all the selling helps that the manufacturer gives him, and also with his own local advertising and selling plans. He should be alert to the possibilities of the "Save the Surface" Campaign, and should identify his store with its activities. A year or so ago some dealers doubted the value of this campaign, but practically all paint and varnish men are now in favor of the "Save the Surface" idea, and are giving it whole-hearted support. They find that it pays.

Less Unproductive Labor In Paint Industry

Unproductive Labor the Big Problem To-day—Paint Manufacturers' Overhead Expenses Lowered—Prospects Depend on Agricultural Development

Written for Hardware and Metal by J. H. CONOVER, General Manager Martin-Senour Co., Ltd., Montreal

EVERY industrious citizen and investor in Canada is doing something in his individual way, aiming to do his part in bringing trade and commerce back to near normal conditions, which of course, carries us back to 1913 and 1914, previous to declaration of war. But, after making a mental survey of the world's financial condition, I firmly believe that we will be accomplishing a lot if we come even near to that objective. Canadian thrift and prosperity has already enabled this country to overcome our greatest obstacle—the depreciated value of the Canadian dollar—to-day it has almost entirely recuperated and in a majority of business transactions is accepted at par value. Who knows how many dollars it has cost Canada during this period of depreciation? I am sure I don't, but I do know the prime factor which was largely responsible in reinstating the value of our Canadian currency and securities, namely—supporting home industries, both factory and farm—and although this practice was far from being broadcastly uniform, still a sufficient percentage of man and womanhood of Canada accomplished a wonderful feat.

J. H. CONOVER

Let us not lose sight of this object lesson and effort which served us so well in time of need, but rather spread this economical propaganda from ocean to ocean, even broadcasting our daily responsibilities through radio wireless stations, namely continue supporting home industries and farm products. Ask for them. Let your desire to purchase Canada products become more manifest. We are a Canadian nation, let us feel and assume the full responsibilities of this present generation.

Depend on Agriculture

The opportunities for exporting manufactured goods are limited owing to increased tariffs, while agricultural products appear to be less restricted, consequently our hope and prospects depend largely upon the sons of the soil. And the present crop reports from all points in Canada, from the extreme east to west, assure us that we will be well involved with prosperity during the next two years, and during that period, no doubt, national exchange of business between all countries will have automatically improved.

I consider that Canadians are better off right now than any other country under the sun. During the next twelve months, no doubt we will reach our maximum output. This, of course, depends on European conditions, which appear to be marking time, but during this period, Canada can continue to expand if we continue to insist on being served with Canada made merchandise. Unproductive labor is the real problem and the most difficult obstacle standing as an obstruction to thrift and prosperity, this is being gradually overcome, and I believe can be entirely overcome if organizations are formed embodying a policy of labor affinity. My reasons for confirming this are that I have taken the paint and varnish industries of this country as an example; who have almost entirely solved it. To-day these industries have less unproductive labor units than during our biggest year's output, thereby lowering our general overhead expenses, which enables us to sell our goods to the public for considerably less money, all because labor in all departments has become more productive. And this economical improvement has enriched the Canadian consumers to the extent of hundreds of thousands of dollars. This is thrift, caused through labor affiliating with capital, thereby enabling the employe to avoid a reduction in salary. This accomplishment is possible and within reach of every industry in Canada. Our future prosperity, as I see it, rests chiefly in supporting Made in Canada and Empire Goods and continually reducing unproductive units in every business activity of life. Support Canadian production, the press and the pioneer.

Returning Prosperity Aids Paint Business

Improvement in Agriculture, Lumbering, Mining and Fishing Reflects in Requirements of Paint and Varnish—Property Owners Measure Value of Paint by New Standards

Written for Hardware and Metal by W. W. INGERSOLL, Vice-President Dougall Varnish Co., Montreal

HOW IS business? What is the outlook? These are common-place questions, and business people are being called upon to answer them every day.

As far as these questions are related to the paint and varnish industry, undoubtedly it can be truthfully said that business has been steadily on the mend during recent months and at the present time is very much improved.

Having in mind the conditions we have been called upon to face, and the experiences through which we have passed during the last few years, one hesitates to make predictions for the future, but there is abundant reason to feel that the outlook is very promising for continued and increased business improvement. Confidence in this is resting on the practical assurance of splendid crops which are now reaching maturity throughout all Canada.

Even in those parts of the country where agricultural pursuit is not the leading vocation, but where lumbering, mining and fishing form the basis of prosperity, here too will be found evidences of improved outlook all giving just cause for a cheery optimism.

The truth has been impressed on us that prosperity for the manufacturing industries and merchants in Canada is largely contingent on good times with the agriculturist, the lumberman, the miner and the fisherman. Therefore with evidence on every hand of returning prosperity to the people engaged in these vocations, it is reasonable to expect its reflection will be found in manufacturing and mercantile industry, with the paint and varnish branch reaping its share.

Of encouragement to the paint and varnish business is the fact that property owners are measuring their valuation of paints, varnishes, etc., by a new standard. These products are no longer looked upon as non-essentials or luxuries. They are appreciated for their genuine worth as great conservers of valuable property. Not merely as superficial beautifiers but actually "surface savers" whose generous use indicates the practice of real economy.

The path of returning prosperity should not be impeded by any obstacle which lies within our power to remove, and we should carefully avoid the creation of any new hindrances.

Do we all realize what measure of influence we ourselves exercise in making future business as good as we would have it be?

Product of Good Work By All

'Good times for all can only be the product of good work by all." If we can just place the broadest interpretation and most sincere application of that motto in our thoughts and actions we need have little fear for the happiness and prosperity of the future.

We all have our part to play in making prosperity doubly assured. Depression of the past should not be cause for retarding our effort of the present. Let us fasten our thoughts on the numerous, indisputable causes which promise and foretell prosperity the like of which we have not yet known.

The Save the Surface educational campaign and other publicity has favorably inclined the buying public towards paints and varnishes. Improved business in these lines can be best encouraged by manufacturers and dealers giving the consumer the best possible quality and quantity value for the least possible profit in keeping with business stability.

Business improvement will not be hurried by apathetic buying or buying

(Continued on page 174)

Group Selling of Paint, Varnish and Brushes

A number of effective suggestions for displaying paint, varnish and brushes are found in this arrangement by a Montreal firm. Note the use of panels to show the finished effect of certain products. Attractive window cards tell of a special premium offer.

Why the Business Depression Hasn't Affected Paint and Varnish Trade

Written for Hardware and Metal by R. H. MONK, Vice-President McArthur-Irwin, Ltd.

TRADE conditions are yet far from being in the condition they were in prior to 1920. If the tonnage carried by ocean freighters has any bearing on the value of money in circulation there is yet a considerable backwardness in our national trade conditions. The sale and consumption of every article that is not indispensable to the community is suffering. Many things freely bought before and regarded as being among the semi-necessities are now listed as luxuries. We have been growing to this idea so that to-day it is a common thought and there is no object in repeating it except as an introduction to the idea that during all the time this need for economy has been seizing upon the mind of the people it has never once been suggested that paint and paint products should be included in the list of those things that the community can, without national loss, afford to forget.

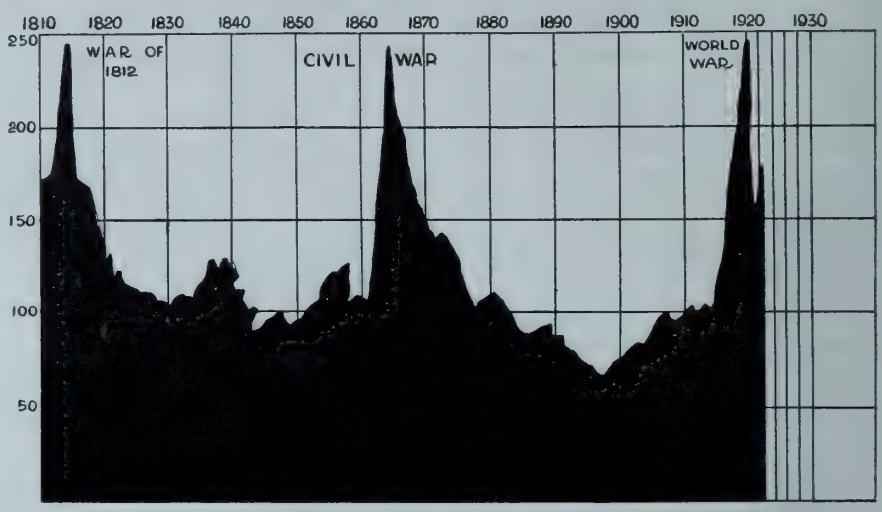


Chart showing wide variation of commodity prices.

It is true that, in common with every other industry, paint manufacturers lost severely in the universal decline in raw material prices, which occurred two years after the cessation of the war. This was a world condition that affected the producer of every article in common use. The sales of paint, however, have continued to grow from year to year. Some of the products needed especially for the war added materially to the output of the factories at that time, but when the demand for these specialties ceased, the steadily growing requirements of the people was so much in evidence that the works were glad to be relieved of this ephemeral trade.

Part of Essential Activities

To a great extent this steady increase in sales must be accredited to the influence of the "Save the Surface" campaign. It has had its part in arousing interest, in awakening the pride of the community, and in calling attention to the fact that paint is necessary to the preservation of property values. On the other hand, as we have said, the use of paint is recognized by the people as part of the essential activities of a progressive country, and it is because of this fact that while every other industry has had its factories idle, the factories of the paint industry have been fully occupied in supplying the demand for its products.

The first call upon the wealth of the community is for those articles that are essential to its preservation. The hypnotic influence of the advertisement is powerless if the goods it would persuade the public to buy are not necessities, or if there is not a surplus of wealth that can be applied to their purchase.

If sales of all the products of the paint and varnish factories continued to grow when the spending power of the nation had contracted to the limits of the purchase of necessities only, it is sufficient proof that the need of these products was not brought into being by advertisement, but because it applied to articles that were basic necessities for the country's welfare.

Another reason that the paint business holds its place so well among the national trade activities is that the manufacturer's policy is to deal in the fairest way with the consumer. Paint prices have always been strictly in keeping with their cost of production, and the consumer has always received full advantage of price reductions at the earliest moment.

Study the past and present position of paint prices with respect to other commodities, and it immediately becomes evident that they occupy a most enviable place, during the period of 1915 to 1920, when continual increases in the cost of raw materials were taking place, and also in the period from 1920 to 1922, when the reaction set in, and prices fell with such alarming rapidity.

No industry showed a smaller percentage of advance and a quicker return to a level in accordance with reduced costs than the paint industry. This policy has gone far to establish the confidence of the people in values offered. Sales marked by the absence of spasmodic fluctuations have been the result.

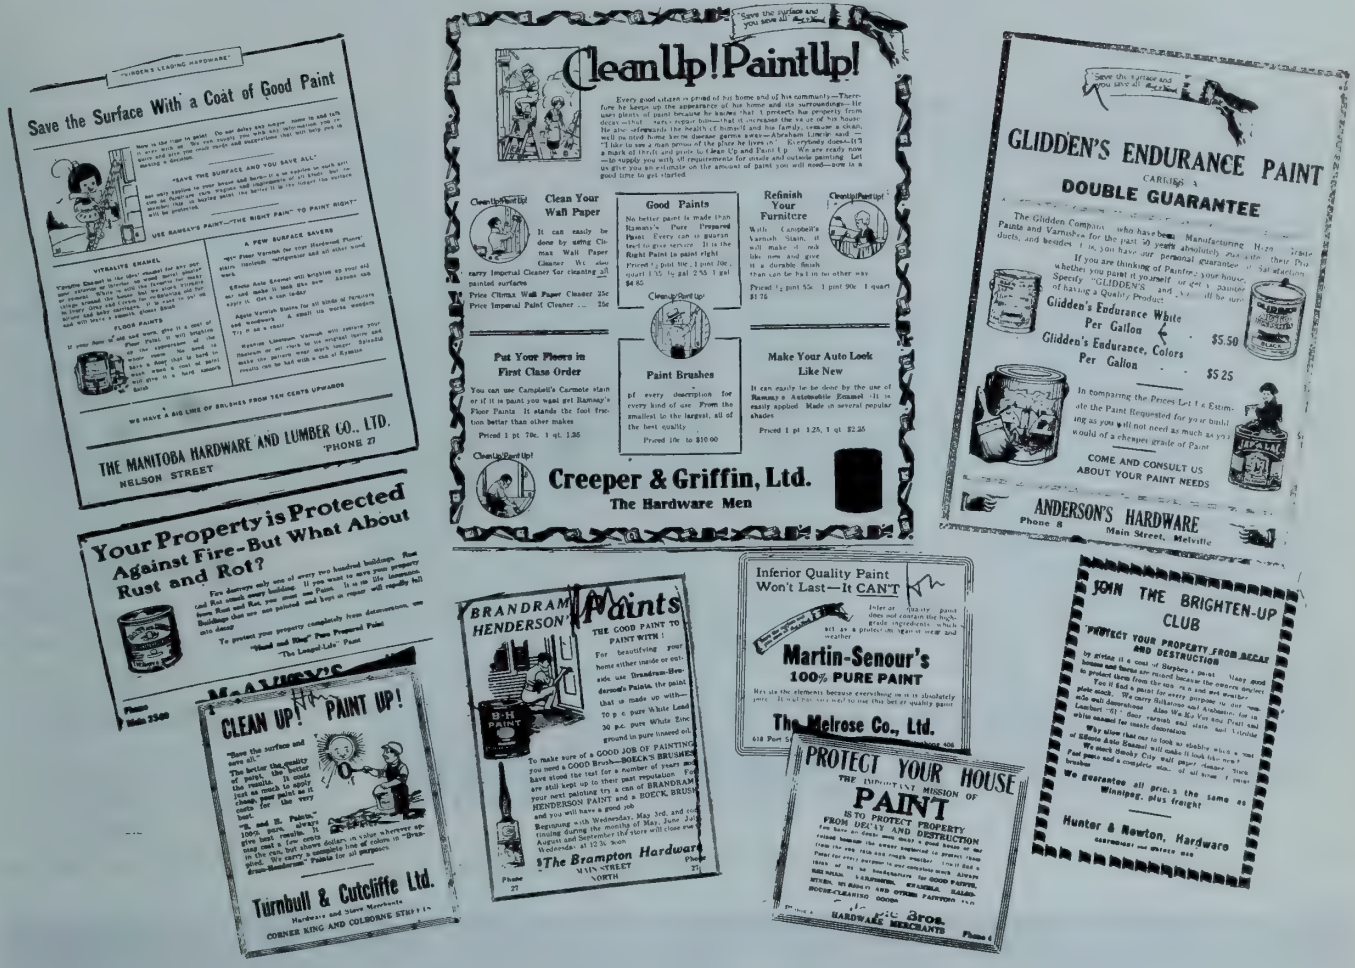
Contrast the present prices of paint with the cost of raw materials. The present values came into effect when the lowest point in the raw material market had been reached. The average general increase in the cost of raw materials, which enter into the manufacture of paint, has been 17%. Had prices of finished products advanced in keeping with these prices all ready mixed paint would be 70c per gal. higher than it is.

The anticipation that prices will be yet lower in the near future is unwarranted. The well proven theory of opposite and equal reactions teaches us that a depression such as we have recently come through must have an opposite reaction in an upward trend of prices. The experience of the past shows that when the causes of the inflation of commodities ceases a complete generation must elapse before the intricate machinery of civilization can adjust itself to the new condition. The economic chaos, which would have inevitably followed the immediate resumption of the price levels of 1914, would have ended in revolution and upheaval. The steep descent of prices which developed in 1920 had, therefore, undoubtedly to come to an end very soon after its inception, to be followed by a recovery which would restore the average decline in values to its normal course. This is illustrated by the sketch appended to this article.

The prices of commodities are here shown as at 1914 and at 1920, the sharp decline of 1920 to 1921 being also illustrated. Had this decline continued the price at 1914 would have been reached within two years. In other words 50% of the advance was eliminated at one stroke. If it takes a generation for

(Continued on page 174)

Retail Ads Urge "Save the Surface"



HERE are some representative advertisements of hardware retailers in various parts of Canada. It will be noted that practically each one of them deals with the importance of painting from a preservative standpoint and most of them make use of the "Save the Surface" slogan. A distinct change has come over the retail advertising of paints recently in view of the progress of this campaign and to-day it is realized that the paint ad which shows the prospects that his neglect to paint is costing him dollars and cents continually has the most effect.

Herewith are shown a group of retailers' ads recently appearing in local newspapers. The ad by **Manitoba Hardware and Lumber Co., Virden, Man.** says "Save the Surface with a coat of good paint. Now is the time to paint. Do not delay it any longer, come in and talk it over with us. We can supply you with any information you require and give you color cards and suggestions that will help you in making a decision.

"'Save the Surface and you save all' not only applies to your house and barn—it also applies to such articles as furniture, cars, wagons and implements of all kinds; but remember that in buying paint the better it is the longer the surface will be protected."

The ad goes on to outline certain enamels and floor paints and then lists a number of "Surface Savers" including linoleum varnish, varnish stains, auto enamels and floor varnish.

Proud of Homes

Making use of the "Save the Surface" slogan, **Creeper and Griffin Ltd., Owen Sound, Ont.**, urges local people to paint up their properties. The ad states "Every good citizen is proud of his home and of his community. Therefore he keeps up the appearance of his home and its surroundings. He uses plenty of paint because he knows that it protects his property from decay—that saves repair bills—that it increases the value of his house. He also safeguards the health of himself and his family because a clean well painted home keeps disease germs away. Abraham Lincoln said; 'I like to see a man proud of the place he lives in.' Every body does, it is a mark of thrift and pride to paint your property. Let us give you an estimate on your needs." The ad then deals with furniture, auto, floor finishes.

Under the Save the Surface slogan **Anderson's Hardware, Melville, Sask.**, deal with a number of paints, pointing out that in comparing prices an estimate should be made by the hardwareman on the paint required as less paint of a high quality is needed than of a cheaper grade.

"Your property is protected against Fire—but what about rust and rot?" Under this startling heading an ad by **McAvity's, St. John, N. B.**, says: "Fire destroys only one of every two hundred buildings. Rust and Rot attack every building. If you want to save your property from Rust and Rot you must paint. It is its life insurance. Buildings that are not painted and kept in repair will rapidly fall into decay."

Inferior Paint Doesn't Last

Under the heading "Inferior Quality paint won't last—it can't," an ad by **Melrose Co. Ltd., Victoria, B. C.**, using the "Save the Surface" slogan states

(Continuer on page 174)

WHY THE BUSINESS DEPRESSION HAS'NT AFFECTED PAINT AND VARNISH TRADE

(Continued from page 172)

prices to reach normal again, it will be seen how much lower than the average decrease the prices of 1921 were. Therefore, after an initial depression of such a severe character prices must again advance until at the end of a stated period, say, of 10 years, there is no more than 30 to 35% decrease in the cost of all commodities. If, therefore, manufacturers are able to hold their present prices in the face of growing taxation and the necessity of decreasing overhead they will be sacrificing profit for the sake of stabilizing business and restoring normal conditions.

What is now necessary is for the merchant to have a greater belief in the essential nature of the paint line he handles, and by disseminating the idea of staple prices and values to build up that confidence which is so vital a factor in creating a national well being.

RETURNING PROSPERITY AIDS PAINT BUSINESS

(Continued from page 171)

strikes. Small or restricted business is a great cost increasing factor. Volume of business provides the most ready price relief.

Market conditions are very firm as related to most raw materials entering into the production of paints and varnishes, giving a stability to present prices, which should encourage the dealers to anticipate fall requirements by buying their full needs.

Viewing the whole situation there is every encouragement to confidently look forward to a big paint and varnish year ahead.

RETAIL ADS URGE "SAVE THE SURFACE"

(Continued from page 173)

"Inferior quality paint does not contain the high grade ingredients which act as a protection against wear and weather. Our pure paint resists the elements because everything in it is absolutely pure."

"Protect your House. The important mission of paint is to protect property from decay and destruction" is the heading on an ad by **Gillespie Bros., Orangeville, Ont.**, which says: "You have no doubt seen many a good house or car ruined because the owner neglected to protect from the sun, rain and rough weather. You'll find a paint for every purpose in our complete stock."

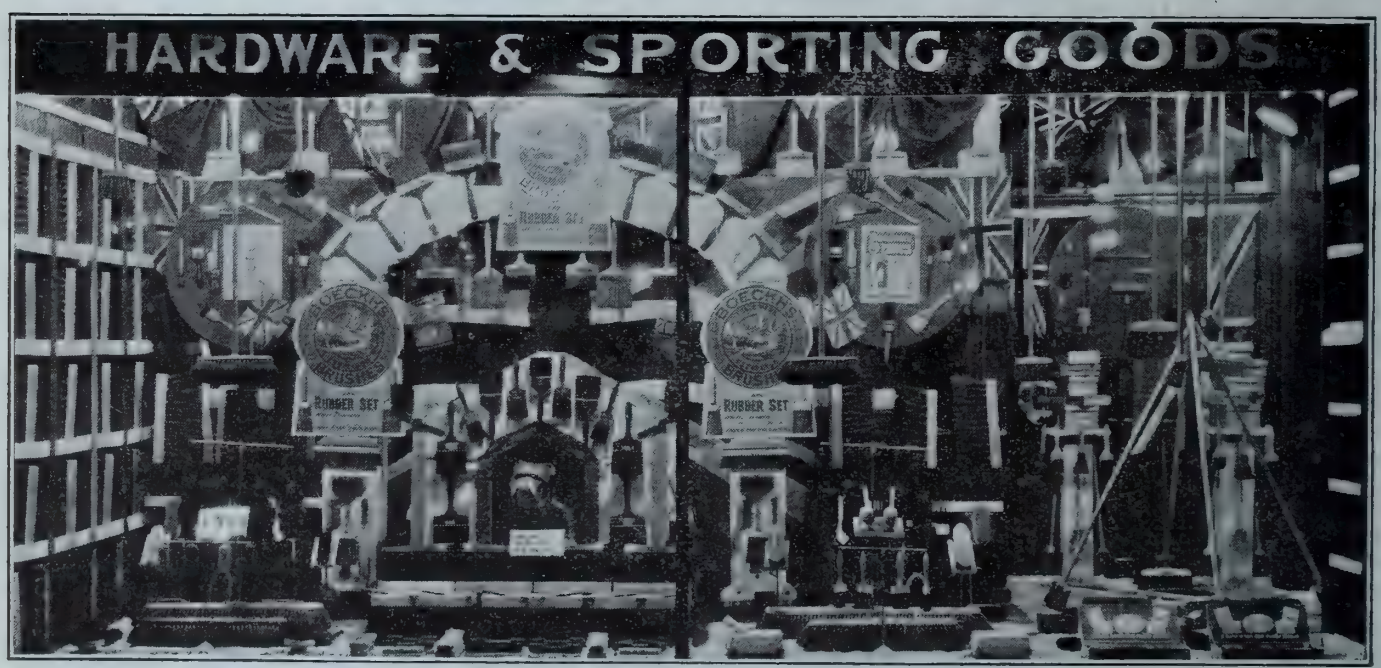
Under the heading "Join the Brighten-up Club" the ad by **Hunter and Newton Hardware, Cartwright, Man.**, says; "Protect your property from decay and destruction by giving it a coat of paint. Many good houses and barns are ruined because the owners neglect to protect them from the sun, rain and wet weather. Why allow your car to look so shabby when a coat of enamel will make it look like new?"

Under the heading "Save the Surface and you save all" **Turnbull and Cutliffe Ltd., Brantford, Ont.**, state "the better the quality of paint the better the results. It costs just as much to apply cheap poor paint as it costs for the very best. Our paint may cost a few cents in the can but shows dollars in value wherever applied."

Advertising paint and brushes together **Brampton Hardware Co., Brampton, Ont.**, state; "for beautifying your home either inside or out, use — paints and to make sure of a good job of painting you need a good brush.—Brushes have stood the test for a number of years and are still kept up to their past reputation."

Share Bros., one of the Vancouver downtown hardware firms, has bought the retail store of the Wallace Hardware Co. on Commercial Drive and is now operating it.

Showing Comprehensive Range of Brushes



A window display which did much to convince passers-by that a wide range of brushes has been provided to lighten labor and increase the efficiency of work is that shown here by W. J. Burr, of T. J. Trapp & Co. of New Westminster, B. C. Many original ideas for displaying brushes are evident. Note the bull dog in front of which is a card stating "who says the bristles will come out." The display is well built up with floor brushes, scrub brushes, wax brushes, etc., on the floor and neat stands pyramiding nail, sink and shaving brushes up to banister brushes. Whitewash brushes are arranged in a semi-circle at the top of the display and one or two circular boards show the various sizes of paint brushes.

Brushes for the Fall Housecleaning

Great Possibilities for Brush Sales in Fall Months With Much Painting and Housecleaning Being Done—Specializing on a Brush Department—Some Window Display Suggestions

Written for Hardware and Metal by C. M. FARRINGER

ALL kinds of paint brushes are required during the fall, as well as all kinds of housecleaning brushes. Most people are beginning to realize that one of the best times for outdoor painting is in the fall. There is a good reason for this and every hardware dealer should use it as an argument for more fall business in paint and brushes.

It is not hard to convince the house-owner that after the long dry summer season, after the baking sun has had its innings on the outer wood surfaces, that said woodwork is in no condition to withstand the ravages of the fall rains and the winter storms. Paint protection is more necessary at this time of the year than at any other season and it is, therefore sound economy to get busy right away.

Then there is the housewife who is in just the right humor to have the interior of the home brightened up. The living room must be painted so as to be attractive, cosy and comfortable for the indoor season.

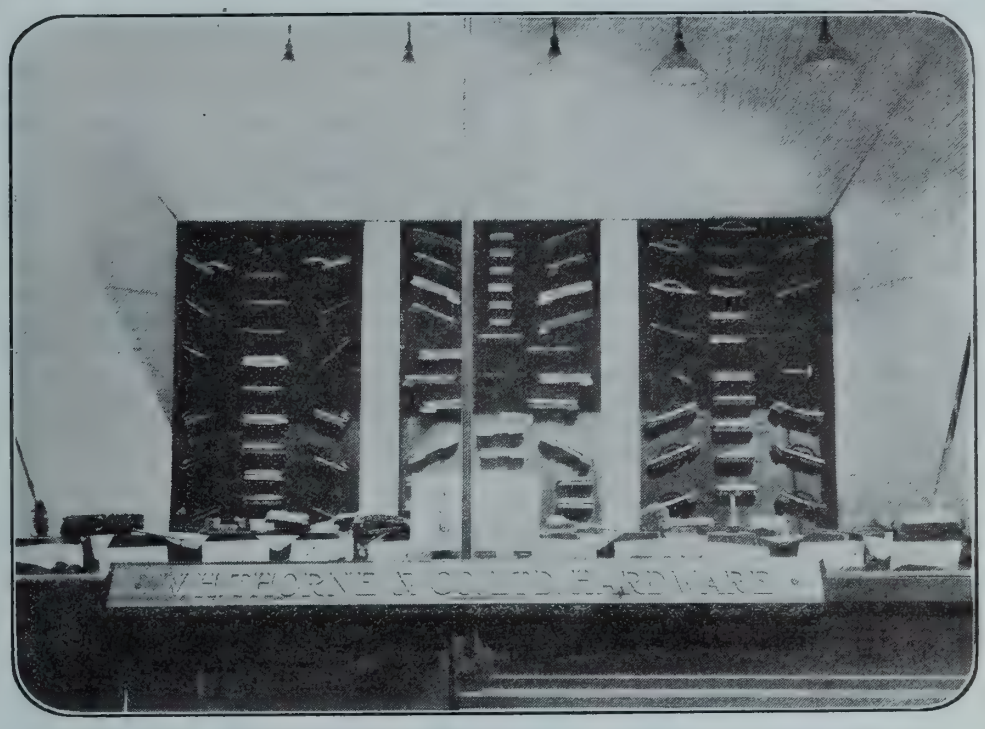
Brighten the Home

Then come the sleeping apartments. Painted or tinted walls are becoming increasingly popular—they are attractive and sanitary. Dealers should not miss any opportunity to strike home on this subject.

Following the painting will come the opportunity for household brushes, floor brooms, waxing brushes, etc., necessary to keep everything spick and span. Brushes, brushes and then more brushes will be the sure result if the stock is right and your plans are properly carried out.

The fall season is the chance to create a greater paint and brush demand and the profits on both are worth while.

A great many dealers are finding it profitable to specialize on a brush department. This line can best be sampled on attractive display boards which are supplied free by some manufacturers. Window displays are also strong reminders. The use of manufacturers' display or show cards is another important feature, and advertising in the local paper is a further strong selling method. These are only a few suggestions for keeping this class of goods prominently before the buying public. Plan your fall campaign now. The results will surely surprise you.



An unique brush display showing at a glance the comprehensive range of household brushes available in this arrangement by W. H. Thorne & Co., St. John, N. B. An attractive effect is produced by showing up a display board in the rear with various brush samples affixed. On the floor are samples and cards dealing with brushes for the furnace, milk bottle, shoes, sinks, duster, laundry, sanitary, stove, radiator, bath-tub, and wax floor polisher. The card in the centre states "The brushes named in this display are of special design with a view to lightening the work of the housewife. How many have you?"

Use of "Save The Surface" Slogan

TO ENCOURAGE a still wider use of the "Save the Surface" slogan by all firms and corporations in the paint and varnish industry, the advisory board of the Save the Surface Campaign publishes its policy and lays down the following conditions under which the use of the slogan is permitted so that there will be no excuse for its misuse, innocently or deliberately by anyone.

1. In order to protect the public interest and the integrity of the paint and varnish industry, the Save the Surface Campaign must assume no responsibility for the quality of any paint or varnish product. In order that no one individual, firm or corporation may appropriate a benefit which is intended to be enjoyed by the entire industry, the use of the Save the Surface slogan (words or design)in any form—partial, complete, paraphrased or imitated—on a container, package or label, used in merchandising any paint or varnish product; or when used in advertising copy as a part of or in conjunction with a privately owned trade mark, in such a way as to appear to be a part of such trade mark, is unethical, illegal and strictly prohibited.

2. In advertising or sales promotion copy, the words "Save the Surface and you Save All—Paint and Varnish" without the design, may be used in standard form in whole, in part, or paraphrased as caption or as text, so long as the user or paraphraser gains no unfair advantage by the manner of use. When the slogan words are used entire, they must be set in quotes. If used in part, the part quoted may or may not be set in quotes. They may be set in any type or hand lettered.

3. The slogan, where used complete, embracing wording, brush mark and hand, must always be in its standard form, with no change in wording. No additional words may be included within the design (sweep of brush). No inflexible rules concerning proportions and design are set up so long as there is no departure in spirit from the standard form.

Hardware Declines 12 per Cent in Past Year

AN average reduction of twelve per cent. in hardware prices during the past twelve months is noticeable when comparison between existing and earlier quotations is made. As pointed out elsewhere in this issue, a slightly greater decline was evident, however, during April and May of the current year. Since then, the average prices have shown a decided tendency to rise, this being principally due to the developments in the iron and steel industry, such basic materials supplying the foundation of numerous hardware lines and reflecting more or less directly in the trend of prices.

In another table reproduced in this section, the quotations in effect during the first week in August of each year on fifty staple hardawre lines, are presented from 1914 to 1922. Such a list affords interesting comparison and is calculated as representative of average hardware commodities.

Compared with pre-war levels, current hardware prices in general are around eighty-five per cent. higher than in 1914; although many individual lines show price declines in greater proportion and existing levels compare more favorably with earlier standards. Other commodities, again have failed to recede to the average extent, due to primary causes, thus keeping the composite level much higher than might otherwise be the case.

When present price levels are compared with the peak of 1920, however, a most substantial reduction is evident, quotations having receded on the average approximately thirty-one per cent. It must be remembered, however, that in figuring the amount of decline the highest level forms the basis, whereas in estimating the relative amount of increase, the lower level is used for comparison. Therefore, the decline of 31 per cent., is equal to an increase of 83 per cent., or in other words, the existing reduction since October, 1920, is just as great as an advance of eighty-three per cent. on the current prices.

According to the same method of computation the recession of twelve per cent. during the past 12 months, cuts off twenty-five points from the previous index figure. In explanation, it would take an increase of 25 per cent. on present levels to bring prices up again to the higher figures prevailing one year ago. A simple rule for basing percentages of reduction and advances is to figure that a fifty per cent. increase on One Dollar brings the cost up to $1.50. But it only takes a reduction of 33 1-3

(Continued on page 182)

What Caused Steel Prices to Rise

THAT the rise and fall of the base prices on bar iron and steel is frequently an accurate indication of the general trend in hardware quotations can be readily observed from a study of the steel market during the past twelve months. At this period last year, prices generally were on the downward grade, many recessions being announced not only on bar products, but also on many finished articles. This trend corresponded to the movement in the steel markets at that time. It is interesting to note that twelve months ago the average base price on bar iron was $3.40, and this level continued to recede during the early months of the present year until in March and April the low mark of $2.65 was reached.

From then on a marked improvement was noted throughout the steel industry and quotations commenced to climb upward. Many manufactured lines also registered increases which have been more or less attributed to the higher costs of the raw materials in the shape of steel. During the past four months, bar iron base prices have risen approximately sixty cents per cwt., or an advance of twenty-three per cent.

This rise has been attributed to a combination of elements, chief among which have been the coal miners' and railroad shopmen's strikes. The fact that seasonal improvement in the general demand for steel was coupled with the low condition of stocks in the hands of both jobbers and manufacturing interests, were other causes contributing towards increased interest in the market. The scarcity of stocks in warehouses and at mills recorded at the commencement of the season, indicated that the market had been thoroughly liquidated, while the quiet demand had forced mills to curtail operations.

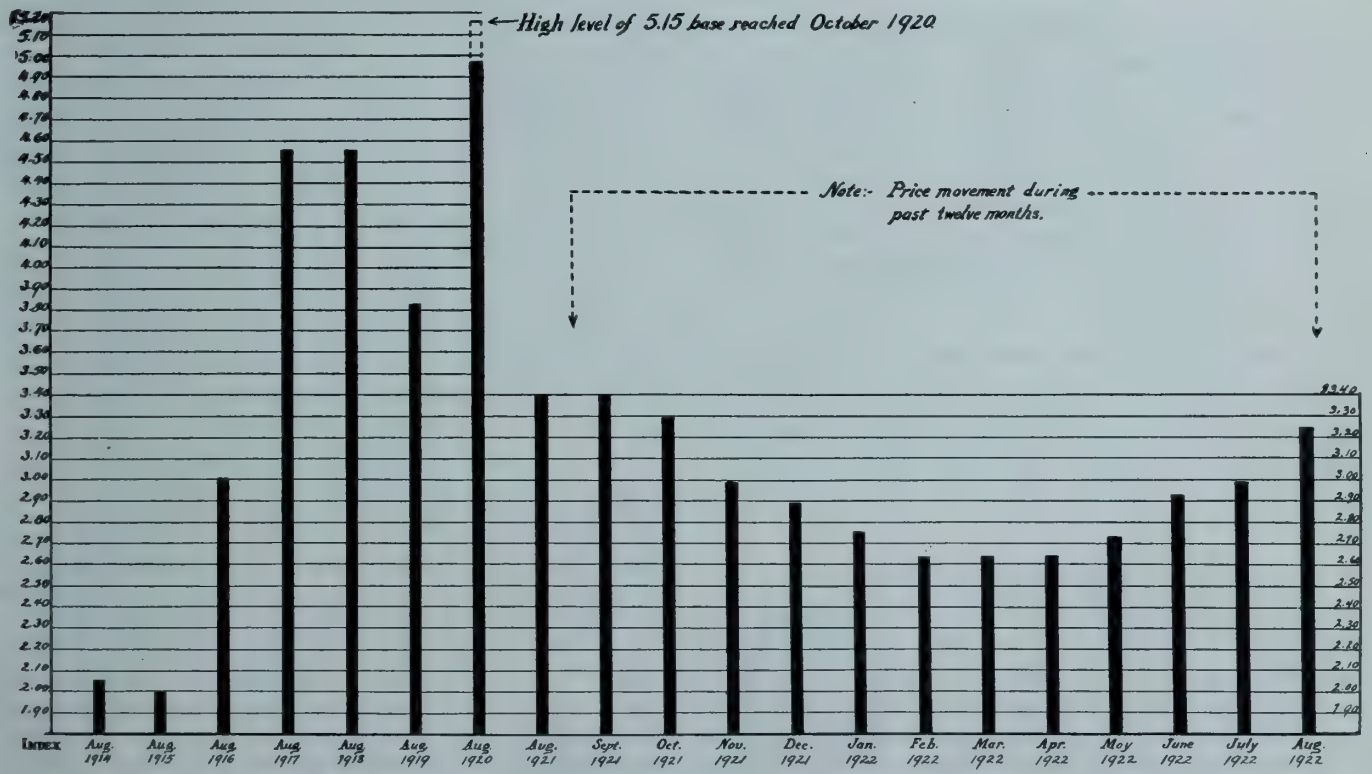
That the rail strike resulted in a greater relative upset in the steel industry than the coal miners' walk-out, is indicated in the general trend of production. During the months of May and June, output recorded a marked increase, in the face of the coal strike. But the difficulties in rail transportation which commenced on July 1, had the combined effect of delaying shipments of coal through restricted train schedules in mill territories and also causing a shortage of cars for loading purposes at mine centres. The tying up in the supply of coal from southern fields to steel producers had the effect during the latter part of July in restricting steel production and caused the banking of several furnaces.

The base quotations on bar iron of $3.25 is again in effect, a level which was recorded last October. The movement since that date has been of a see-saw style, with the present market trend indicating a general firming up to even higher figures in the near future, if current conditions remain unchanged.

All other manufacturing elements being equal therefore, the varying prices on bar iron is a more or less direct indication of the price trend on finished hardware products. Any deviation from this is usually accounted for by the movements of other cost factors, such as labor, transportation, overhead, ratio of production, seasonal demand, and the competitive or monopolistic nature of the market.

The wooden building of the Westminster Iron Works, New Westminster, was destroyed by fire, the loss being estimated at $20,000.

Bar Iron Base Price Again on Upward Climb



Above chart shows the variation in the base price on bar iron during the past twelve months and also the relative levels on August 1, for the past eight years. The levels of 1914 can be compared with the high peak in October, 1920, as well as indicating the current market tendency.

Out For an Advantage

A REVIEW of taxation methods made applicable by the government in the past few years indicates that the tendency is definitely toward the extension of principles of direct taxation, involving the use of the Sales Tax, Stamp Tax, etc., as the chief source of revenue compared with Customs Duties.

With this in view retail merchants are well advised to make a study of the application of such forms of direct taxation as are now applying and be prepared to assist in the securing of regulations designed to protect their interests as a class. Questions of policy in regard to the Sales Tax must be considered so that retailers in future will not be burdened with absorbing a tax which may be much bigger than it is to-day. The same applies to the endeavors being made to collect the Stamp Tax in certain cases from retailers. With so many regulations being issued it requires constant attention to see that other branches of trade do not raise their voice higher than we do and get any unfair advantage.

Markets an Interesting Study

THE HARDWARE markets present an interesting study and one which proves valuable in dollars and cents for those merchants who make themselves thoroughly acquainted with its tendencies. Reaching their highest peak just after the war, hardware prices have undergone a continuous depression until they "scraped the bottom" a few months ago. Since that time a feeling of more confidence among buyers, engendered by the liquidation of high priced stocks, the establishing of more efficient production and lower transportation costs have combined to provide an incentive for better business and a realignment of prices having a fairer relation to costs of production have resulted.

Practically each week sees fluctuations in both directions on various hardware commodities. Having in mind recent increases, hardware has undergone an average reduction of twelve per cent. in the past year. They are still eighty-five per cent. above 1914 levels. Such data as this enables a hardwareman to intelligently summarize market conditions for himself.

Canadian Roads Get the Business

THE RAILWAY workers' strike in the United States has had the effect of diverting considerable business to Canadian railroads. Canadian railways have been carrying large shipments of automobiles to Atlantic ports for export from United States factories and many shiploads of grain from the Canadian Northwest which ordinarily go through the lakes to Buffalo and trans-ship by U. S. railroads are coming to Canadian ports on the Great Lakes and being trans-shipped by Canadian railways. The necessity of routing such trade through new channels at the present time might lead to a portion of such business being continually done in this manner. The only unfortunate thing is that Canadian railways are suffering from a shortage of cars due to many being tied up in the United States and the large number sent to the West to handle the grain, and are unable to give this new business as much attention as would otherwise be possible.

Many Pitfalls For Unwary Retailers

THERE NEVER was a time in the history of retail merchandising when retailers were confronted with as many problems of vital importance as face them to-day. The greatly increased costs of conducting business, the problem of securing efficient help, the highly competitive state of retail trade and the constant branching out into other lines of retail trades which in the past have confined their efforts pretty much to one line, have all helped create new problems for retail merchants.

The advent of chain store systems, co-operative buying and advertising, have also been factors which have developed in other trades to a greater extent than in the hardware trade but which, judging from recent developments in the United States, are extending to retail hardware circles. Added to these and many other problems are various governmental regulations and taxation, each of which have added to the burden of the retail hardware merchant and in most cases have tended to cut down to a very great extent his margin of gross profit.

Hardware and Metal is constantly co-operating with retail hardwaremen of Canada to arrive at solutions of the many vexing problems with which they are faced and this applies to-day probably more so than at any time in the past.

Brings Retail Business Out of Dark Into the Light

TO ASSIST merchants to a closer understanding of their business an article appears in this issue by Frank Stockdale, retail merchandising expert, whose assistance has been highly valued by Canadian hardware retailers in the past. In this article he deals with the value of a plan or program, and outlines in detail a plan divided into four parts: 1. Sales Quotas; 2. Stock Limits; 3. Margins, and 4. Expenses. These four points are referred to as the outposts which protect profits. It is shown how the class of business determines the percentage of mark up and why this percentage varies in different cases. How to limit stocks and yet retain sufficient variety is a problem dealt with. How to group the various hardware lines in relation to their respective turnovers, frequency of buying, margin, season of selling and ease of selling.

Briefly the system provides the retailer with a constant record of stock on hand and of sales of each respective line. A percentage of mark up is established for each line of goods having in mind the number of turns of stock to be expected in a year. The records of stock movements and the percentage of mark up secured are kept each day and entered in the Merchandise Record book. A close watch on these records will indicate where selling effort needs to be applied. The system also enables the retailer to bring percentage of mark up and turnover to such a relation that bigger profits can be made. As one prominent retailer states, this system "puts the light on retail business." It is worth a close study.

Editorials in Brief

THIS IS the thirty-fourth Annual Fall Number of Hardware and Metal. Thirty-four years is a long time and there have been many changes in methods of doing business and stocks handled during that period. This issue has been particularly designed to meet the requirements of the trade at this season and it is crammed full of practical suggestions for keen hardware buyers. It justifies a close study and continual reference during the Fall months.

THE CANADIAN National Exhibition commencing this year on August 26 and continuing for two weeks, is an annual event of both social and educational value to retail hardwaremen. Retailers are well advised to take an occasional holiday from their business and go to new localities and see how other people do things. The exhibition provides a good opportunity of combining business with pleasure in examining the latest articles offered for sale and in learning of new developments which are applicable to their business.

For the Man Behind the Counter

How Much Time To Wait On Each Customer?

You May Be Wasting Employer's Time By Trying Too Long to Induce Customer to Make a Purchase —Customers Pay More Attention to Salesmen Than the Latter Sometimes Appreciate

Written for Hardware and Metal by A. G. KEENEY

CONTRARY to the opinion held by many merchants and salesmen, the man with money to spend for merchandise is not so absorbed in examining that merchandise as to ignore the salesman with whom he is dealing. Purchasers want their money's worth, and in many stores salesmen are rapidly being convinced that the average purchaser takes many things into consideration while deciding whether he will make the purchase he originally considered making.

Customers entering a store for the first time frequently are seen to glance critically over the salesmen in that store. Almost invariably a customer is seen to "take stock" quickly of the salesmen within view and then approach the salesman who seems to have struck his fancy. If that salesman measures up to the customer's expectations, he probably will continue to enjoy that customer's trade indefinitely.

Observe Many Peculiarities

In "taking stock" of salesmen customers frequently observe faults that are not apparent to the salesmen themselves or to their employers.

Recently I visited a store to make several purchases. My car was due in a few minutes and I was particularly desirous of being "waited on" as quickly as possible. It was near the store's closing hour and all the salesmen were busy. Several customers, probably in my position, were waiting to be served as I entered.

The salesman nearest me wasted more than ten minutes trying to sell an irascible old gentleman merchandise on which the store's profit probably was not more than ten cents. The old gentleman finally made the purchase and the salesman turned to "wait on" me.

Wasting Employer's Time

It was evident from his attitude that the salesman considered this sale his crowning achievement of the day. Although he must have been weary as the result of a long day's work, he stepped forward with commendable alacrity, evidently willing to render me his best service. The average observer might have listed this salesman as one of the best in the store, yet it occurred to me that he unquestionably had been wasting his employer's time.

While he was haggling with the old gentleman to make a profit of ten cents for his employer, this salesman could easily have sold merchandise to me that would have netted the store two dollars' profit. Because my car was due I could make only a small portion of the purchases I originally had planned to make. I found it more convenient next day to complete my list of purchases at another store.

The salesman who had worked ten minutes for ten cents had wasted his employer's time. Not only would he have sold me a handsome bill of merchandise, but he probably could have made several additional dollars for his employer had he assisted the old gentleman in making a prompt selection, attended to my wants and served several other customers instead of trying to induce the old gentleman to purchase something no more expensive than the irascible customer had attempted to buy before being dissuaded.

How Much Time Per Customer

Had he been taken to task about this, the salesman probably would have argued that "a bird in the hand is worth two in the bush." Or he might have contended that it was his duty to send the old gentleman away satisfied that he had received attentive service.

An impression I gained from this incident was that a salesman should possess good judgment in order to determine *how much time should be given each customer.*

For instance, a customer who expects to purchase a large quantity of merchdise warrants a salesman according him more time and attention than does the customer who is spending only a few cents. The customer who is about to invest dollars in merchandise needs —and deserves—more time in which to examine goods and make his decisions than does the "small" customer.

When Business is Quiet

When business is "quiet," a salesman is justified in devoting all the time he can spare to serving the "small" customer. He may be able to impress the customer so favorably that the next purchase made by this visitor will be far larger and far more profitable for the store. By tactful suggestions he may be able to induce the "small" customer to inspect other merchandise resulting, eventually, in that customer returning to the store or in his becoming a permanent customer.

Certainly good judgment will enable a salesman to determine whether he is wasting his employer's time. Alacrity, plus efficiency, will enable a good salesman to serve all customers, whether "large" or "small," in a fashion commensurate with the purchase they make.

To Be Continued

REPAIRS FOR MARLIN, HOPKINS AND ALLEN, DAVENPORT AND FOREHAND AND WADSWORTH FIREARMS

The Marlin Firearms Corporation, New Haven, Connecticut, which recently purchased the business of the former Hopkins and Allen Arms Company of Norwich, Connecticut, has completed the removal of the Hopkins and Allen machinery, equipment and organization to the enlarged Marlin plant at New Haven, where the Marlin Company will in the future manufacture the Hopkins and Allen lines of single and double guns, rifles, revolvers and target pistols, to supplement the famous Marlin repeating rifles and shotguns. By this purchase The Marlin Firearms Corporation has become the successor of the Forehand and Wadsworth Arms Company, the W. H. Davenport Fire Arms Company and their predecessors, running back to revolutionary days.

WESTERN CANADA NOTES

Darmody Hardware Co. has commenced business at Darmody, Sask.

Hafford Hardware Co. has commenced business at Hafford, Sask.

J. W. Streit Hardware, Amisk, Alta., has been succeeded by W. B. Larue & Son.

Events in the Trade

BUSINESS CHANGES

St. Thomas, Ont.—A. E. Campbell hardware has sold to F. N. Barrett.

NEW FIRMS

H. R. Dunne has opened a hardware store at 175 Roncesvalles Avenue, Toronto.

OPEN NEW STORE

Corras & Bridgewater are now in their new store at 391 Keele Street, Toronto.

OBITUARY

H. O. Martineau of the wholesale hardware firm of Martineau & Co., Quebec, is dead.

INCORPORATION

Fancher & Fils, Ltd., hardware, Montreal, have obtained charter.

St. Clair Electric and Hardware Ltd., head office, Toronto, capital $40,000 to manufacture and deal in hardware, electric appliances, radio supplies, etc.

Wireless Vacuum Cleaner Co., Ltd., has been incorporated in Ontario with capital of $150,000 and head office in Chatham, Ont., to manufacture vacuum cleaners, etc.

Fredericton, N.B.—Sutherlands, Ltd., has been incorporated with head office Moncton, N. B., and capital stock of seventy-five thousand dollars. The company is authorized to take over the business now conducted under the name of Sutherland Brothers, and to carry on a general business as wholesale and retail plumbers, hardware and other lines. Those incorporated are R. H. Sutherland, D. H. Sutherland and George A. Robertson.

PERSONAL

R. C. Chown has taken a position with Stewart & Wood of Toronto and will call upon the hardware trade in the Niagara district.

Richard Allthorpe, for many years manager of the wire netting department of Messrs. Boulton & Paul, Ltd., Norwich, England, has been obliged through serious ill-health, to resign his position.

Mr. Allthorpe has occupied the position of vice-chairman of the Wire Netting Manufacturers' Association since its formation in 1906. For a period of over 44 years Mr. Allthorpe has devoted his energies to the wire netting industry. His successor as head of the department is Walter Murray, who has been connected with the wire netting business for a number of years.

George Hardy of the Purdom Hardware, London, Ont., has returned after spending his holidays by motoring to Montreal, and from there taking boat trips.

Russell Buttrey of the Ingram & Davey Hardware, St. Thomas, has returned after spending his holidays motoring in the Niagara Falls district.

H. Lendon of Leamington, Ont., is in London this week as a member of the championship team of bowlers to defend the Minto Cup which Leamington won a year ago.

Col. T. S. Hobbs, of the Hobbs Hardware, London, who has not been at his office for some weeks owing to illness, is reported somewhat improved.

Frank Woodward, of the Ingram and Davey Hardware, St. Thomas, is holidaying in Detroit and Chicago and Bert Seeley of the same firm is spending his vacation in Montreal.

J. G. Tweddle and Miss Helen Tweddle, of Fergus, Ont., are holidaying at Wasaga Beach.

E. A. Davey, of the Ingram and Davey Hardware, St. Thomas, has returned after spending a very enjoyable vacation in Muskoka.

HARDWAREMAN APPOINTED JUDGE OF JUVENILE COURT

Ottawa, Ont.—J. F. McKinley, secretary-treasurer of the Ottawa firm of McKinley & Northwood, hardware merchants and plumbers, has been appointed judge of the juvenile court in Ottawa.

Col. Robt. Starke, president of Starke Seybold Ltd., and Alex Gibb are among the members of the Montreal Board of Trade who will make a trip across Canada to the Pacific coast, commencing from here on September 1st.

In connection with the appointment of H. R. Harrison to the management of the Montreal branch of Pilkington Bros. Ltd., as outlined in last week's issue, Hardware and Metal is advised that F. J. Kerr, former manager of that branch, has been transferred to the firm's Canadian central office at St. Catharines to undertake special duties.

Geo. W. Eckhardt has been appointed vice president in charge of sales for the Miller Lock Co., Philadelphia. Mr. Eckhardt comes to this work peculiarly fitted by experience. He has had several years' experience in the wholesale hardware field, together with a long association with Henry Disston and Sons, Inc., as a salesman and Assistant Manager of Sales.

An engagement notice of interest is that of Chester Clarence Crawford, eldest son of the late J. B. Crawford, founder of the hardware firm of that name at Dutton, Ont., to Hilda Castleman, B. A., of Dutton. The business referred to was established by the late J. B. Crawford in 1899 and was carried on by him until his death seven years ago, since which time it has been under the general supervision of his son, C. C. Crawford.

HARDWAREMEN ON A DAY'S OUTING TO OSHAWA

Merchants belonging to the Danforth Business Men's Association, Toronto, are planning on a little outing of their own on Wednesday, August 23. A number of hardwaremen are prominent in this association. They will journey to Oshawa where a day's fun, bowling and other sports will be engaged in.

DOMINION GLASS TO BUILD MILLION-DOLLAR PLANT?

Montreal.—It is being intimated that the Dominion Glass Co., Limited, will shortly undertake the construction of a large modern $1,000,000 plant in the vicinity of Montreal. At the present time the company is operating two smaller plants here. These will be scrapped when the new structure is ready for operation.

Besides the Montreal plants, the company has one at Radcliffe, Alta., near Medicine Hat, one at Hamilton, Ontario, one at Wallaceburg, and two at Toronto.

DANFORTH RETAILERS' PICNIC

In the neighborhood of 30,000 people attended the picnic of Danforth merchants, Toronto, Messrs. J. C. McFadden, Mathewson, Rossiter, Pritchard, Breeze, Bowes and other hardwaremen located on Danforth avenue were prominent in connection with the affair, the first named being vice-president of the association. Mr. McFadden arranged a hammer and nail race, donating prizes himself. Mr. Pritchard arranged a mechanics' race giving the prizes from his hardware stock.

HARDWAREMEN WILL HAVE BIG FLOAT IN LABOR DAY PARADE

While little is being said yet, Hardware and Metal learns from good authority that one of the best floats in the forthcoming Labor Day parade in Toronto will be that representing the Danforth Business Men's Association. A considerable sum of money has been donated by the hardware and other merchants in that district, and a definite effort will be made to show the rest of the city just how proud these merchants are of their community.

ALEX. McARTHUR & CO. SELL ROOFING AND PAPER MILLS

Montreal.—The old established business of Alex McArthur & Co., Ltd., has been acquired by the Barrett Company, which is controlled by the Allied Chemical Company with headquarters in New York.

The firm of Alex McArthur & Co. has had a successful career since its organization forty years ago by the late Alexander McArthur. After his death it was carried on by the late Lieut.-Col. Colin McArthur, who incorporated the present company in 1903 and at his death was succeeded as president and manager by D. J. Munn. The latter has disposed of his interests together with the other shareholders, and has resigned from office.

Besides the plant in Montreal, the firm operates a paper mill in Joliette. It was one of the pioneers in Canada in the manufacture of tarred felt roofing, building paper and sundry other related lines, and its annual output is considerable.

The Barrett Co. Ltd. is the successor of the former Paterson Mfg. Co., with warehouses throughout Canada. H. C. Bonney, vice-president and general manager of the Barrett Co. has now become the controlling officer of the McArthur Co. The two companies will be conducted separately as heretofore each retaining its own identity and separate organizations except certain changes in production to lower costs.

PICNIC

On Wednesday of this week the St. Clair Business Men's Association held a monster picnic to Grimsby Beach. Those in charge of the arangements were: M. A. Brillinger, W. M. Maltby, O. M. Johnson, H. V. Tomlin and George W. S. Shipman. Merchants in the St. Clair district and wholesale firms donated prizes of a combined value of over $500, to be awarded in a long list of athletic events and games. Jules Brazil was in charge of the entertainment on the boat going to Grimsby and returning.

Group of officials of the Dominion Board, Retail Merchants Association attending the annual convention at Halifax, N. S. E. M. Trowern, secretary, is on the left; J. A. Banfield, re-elected president, is in the centre; Henry Watters, treasurer, is second from the right in the front row, and Jack Wood, Swift Current, second vice-president, is on the extreme right; W. C. Miller, Ontario secretary, W. J. McCully and J. H. Curle, Winnipeg, are also seen in the group.

Western Canada Notes

C. C. Craig, of the C. C. Craig Company, Ltd., Winnipeg, is on a business trip to Port Arthur and Fort William.

F. W. McGuire, sales manager of Wood-Vallance Company, Ltd., Winnipeg, has returned from an enjoyable vacation.

D. Ackland, president of D. Ackland & Son, Ltd., with head office in Winnipeg, made a short visit to the Calgary branch of this firm.

The Hewer Hardware Co., Vancouver, will open a retail store on Twelfth Avenue, West, as soon as the building now under construction is completed.

H. R. McKim, of the Auto Specialties Mfg. Co., of Canada, Windsor, Ontario, spent a few days in Winnipeg with the Western representatives, Cadman & Co.

B. C.—Provincial registrations this week include the name of the Tiger Tire and Rubber Co., a $2,000,000 concern of Toronto. The provincial head office will be in Vancouver.

Geo. M. Christie, while on a fishing trip recently, had the misfortune to break some small bones of the ankle, which will keep him confined to bed for a week or ten days.

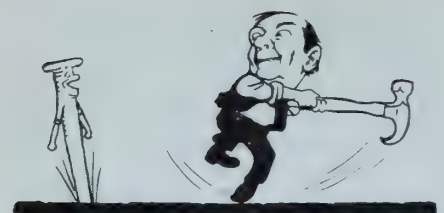
Dave Burnet of the J. H. Ashdown Hardware Company, Ltd., Winnipeg, who has been ill for several weeks having undergone a very serious operation, is back again at business.

Jas. Blue, Toronto representative of the Canada Paint Co., Ltd., is spending a holiday in Calgary. Mr. Blue is an old resident and filled responsible positions in both the retail and wholesale hardware field in Calgary over a period of years. He reports an enjoyable time renewing old hardware acquaintances.

Alderman W. R. Owen of Owen & McCallum, Main Street hardware dealers, Vancouver, was elected fourth vice-president of the Union of Canadian Municipalities at the annual convention in Winnipeg. Ald. Owen takes a keen interest in civic affairs and is chairman of the finance committee.

C. H. S. Bamford, sales manager of The J. H. Ashdown Hardware Co., Ltd., Winnipeg, gave an address on the subject of service, at a meeting of the Western publishers which was held at the Agricultural College recently in connection with their annual short course.

At the weekly luncheon of the Electric Club in Vancouver, C. C. Nash of Bradstreet's gave an address on the importance of propaganda in business. He deprecated the statement that business failures ran in periods of seven years and intimated that merchants were inclined to follow this system whether warranted or not, with the result that trade depression followed. J. Muirhead, provincial electrical inspector, spoke of his recent trip east, pointing out that the West had little to learn from the electrical methods of the east.



Hardware Hits

ONE FROM A TRAVELLER

A hardware traveller overheard this amusing dialogue in a small town the other day.

"Beg pardon, sir, but could you tell me if there is a man living in this hotel with one eye named John Hardy?"

"Maybe I could help you out. Do you know the name of his other eye?"

A CATCH SOMEWHERE

A retail hardwareman gives the following conversation which occurred between himself and a prospective employee:

Applicant: "And if I take the job, I am to get a raise in salary every year?"

Employer: "Yes, provided your work is satisfactory."

Applicant: "I thought there was some sort of a catch somewhere."

ONLY A PATROLMAN

A retailer whose love for courthouse romance is very strong tells the following occurrence in his home city.

Judge: "What had the defendant been drinking when you arrested him?"

Cop: "Whiskey, I think, Your Honor."

Judge: "You think? You think? Aren't you a judge?"

Cop: "No, Your Honor, only a patrolman."

A young fellow wrote to an Ontario firm who were selling razors at 50 cents each. This is the letter:

"Please send one of your razors, for which I enclose P. O. order for 50 cents.

"P. S.—I have forgotten to enclose the 50 cents, but no doubt a firm of your standing will send one."

The hardwareman was right on the job. Here's what he wrote:

"We beg to acknowledge your esteemed order, and have pleasure in sending the razor, which we trust you will like.

"P. S.—We have forgotten to enclose the razor, but no doubt a fellow with your cheek won't need one."

MISPLACED SYMPATHY

A wholesale hardwareman just returned from a trip abroad tells this one:—

A young lady was crossing the ocean and having been ill herself, started to sympathize with an Irishman in the second cabin, who apparently was having a very active time.

Laying her hand on the Irishman's shoulder she gently said:

"I am very sorry you are so ill, my good man. Your stomach is only weak, that's all."

"Wake stummick nawthin," answered the Irishman. "Oi'm throwin' it as fur as any man on this side of the ship, mum."

HARDWARE DECLINES 12 PER CENT,

(Continued from page 176)

per cent. to restore the former level of $1.00 in effect.

The firming up of quotations on bar iron and steel, sheets, plates and similar primary elements, has served as the foundation for strengthening current prices on many hardware products, and has also reflected advanced levels on other manufactured steel lines. The trend of quotations on many hardware goods follows more or less closely the developments in the steel industry, and this market is often used as a barometer of conditions in general.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

PALMETO PACKING

The Fraser Hardware Co., Ltd., Galt, Ont. —Can you give us the address of the makers of Palmeto packing?

Answer—Messrs. Greene, Tweed & Co., 109 Duane Street, New York City, U. S. A. The Canadian distributors are the Canadian Fairbanks-Morse Co., Toronto and Montreal.

SHOW CARD WRITING

Messrs. Dakin Bros., Digby, N. S.—Kindly advise us where we can obtain a book on show card writing and signs.

Answer—We discontinued the technical book dept. of our paper some time ago. There is a book called "Modern Show Card Lettering," published by the Thompson School of Lettering, Pontiac, Michigan, U. S. A.

RAYO LAMP GLASSES

W. Hanna & Co., Port Carling, Ont.—Will you advise us the manufacturers of the Rayo junior lamp glasses?

Answer—Messrs. Bradley & Hubbard, Meridan, Conn., U.S.A.

PRIMUS OIL STOVE

Prairie Hardwares, Ltd., Imperial, Sask. —Would you kindly advise us where we can procure repairs for Primus oil stoves?

Answer—Messrs. A. E. Lovett Co., 63 Park Place, New York City, U. S. A.

BREAD SLICERS

Edwin Chown & Son, wholesale hardware, Kingston, Ont.—Can you give us the name of any concern who manufactures a machine for slicing bread?

Answer—The International Business Machines Co. Ltd. Toronto; The Brantford Computing Scale Co., Brantford, Ont.; The Canada Scale & Slicer, Ltd., Brantford, Ont.; The Fletcher Mfg. Co., Toronto.

MONITOR SAD IRONS

Messrs. Fleurie Bros., Eganville, Ont.—Please let us know where we can get repairs for the Monitor gasoline sad iron.

Answer—E. W. Cadman, 245 McDermot Ave., Winnipeg, Man., is the special representative in Canada for the Monitor Sad Iron Co., of Big Prairie, Ohio.

STEEL SHAFT SPLICES

Messrs. J. F. Henderson, jobbers, Vancouver, B. C.—Can you supply us with the name of the manufacturer of steel shaft splices for repairing ends of broken buggy shafts?

Answer—The Brewer Kitchener Corporation of Cortland, New York, U. S. A.

GASOLINE COOK STOVES

A. E. Wrigglesworth, Shelbourne, Ont.—Please advise us the names of makers of gasoline cook stoves.

Answer—The Sheet Metal Products Co., of Canada, Ltd., River St., Toronto; The Thos. Davidson Mfg. Co., Montreal; The McClary Mfg. Co., London, Ont.; The Perfection Stove Co., Sarnia, Ont.

FOOTBALLS

Martin, Finlayson & Mather, Ltd., wholesale hardware, Vancouver, B. C.—Will you kindly give us the names of Canadian football manufacturers?

Answer—The A. J. Reach Co., Brantford, Ont.; The Western Leather Goods Co., Toronto, Ont.; Messrs. Winnett & Wellinger, Ltd., Toronto, Ont.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

CATALOGUES AND BOOKLETS

Channell, Limited, Toronto, have issued a folder inviting merchants to visit their booth at the Canadian National Exhibition in the Industrial Building.

Twenty Years Ago

Following items are reproduced from Hardware and Metal of August 2, 1902:

Saturday, July 26, was a red letter day with the employes of the Canada Paint Co., Montreal. Seven carloads of merry-seekers pulled out of Bonaventure Station bound for Otterburn Park at St. Hilaire. The managing director, Robert Munro, was unable to accompany the excursionists, The St. Gabriel Independent Brass Band was engaged for the day. J. Campbell, of The Acme Can Works, acted as umpiro for the baseball match. H. W. Aird, treasurer of the company, also assisted as umpire.

No setlement of the coal strike in Pennsylvania and the Virginias yet appears in sight and the situation is showing increasing seriousness. In Canada the situation is scarcely less serious than it is in the U. S. Pig iron production is being curtailed and all industries using iron are feeling the shortage.

Jas. A. Stovel, one of the leading hardware merchants of Edmonton, Alta., states that the Edmonton district is filling up very rapidly with a splendid class of settlers and real estate values have increased materially.

F. S. Murdoch, representing Canada Paint Co. in the Lower Provinces, had the misfortune to meet with an accident, fracturing his leg a short time ago. He is once more "on deck" for business.

Jas. Carthern, well known wholesale hardwareman of Montreal, is a candidate for reappointment as representative of the Board of Trade on the Harbor Commission.

Work on the plant of the London Rolling Mills Co., London. Ont., has commenced and the new industry is expected to be in operation by November.

Emil C. Boeckh, of United Factories Ltd., has returned from a trip through Manitoba and the Northwest and reports prospects good.

The Toronto Branch of the Retail Merchants' Assn. held their annual moonlight excursion on August 13 on the Chippewa.

Lewis Bros. & Co. will shortly have the new entrance to their warehouse completed.

Markets at a Glance

CURRENT price changes on hardware goods continue to include both reductions and increases. This week easier levels appear on wood and felt weather strip, turpentine, the Shurley make of hand saws, certain medium-priced grades of ready roofing, the smaller models of Liquid Veneer mops, a general downward revision of approximately five per cent. on various lines of Yale products, including night latches, padlocks and list prices on mortise locks and trims, while cement is quoted slightly lower in carload lots only. Reduced window glass prices are noted on eastern markets, a decline of approximately six per cent. being announced for Fall glass trade. A discount of list less twenty is now quoted, but this change has not yet been generally adopted. Western centres also record a decline on heavy tee and heavy strap hinges, also screw hook and strap hinges. Copper wire in spools has been lowered in price.

The strength of the galvanized sheet market is marked by further increases in the middle west, while English imported sheets again register higher levels. Bar iron now reflects the higher production costs at primary markets, and domestic prices are advanced another ten cents per cwt., in most quarters. Linseed oil also firms up again this week, owing to the recovery in flax seed prices.

As outlined in Hardware and Metal a few weeks ago, the coal miners in Nova Scotia went on strike August 15, a factor which adds to the seriousness of the coal supply situation, especially from the viewpoint of industry in general and for hardware and steel producers in particular. Hopes of an early settlement in soft coal areas are considerably brighter, however, and the varied interests in hard coal fields are also discussing terms of settlement. The railway troubles are apparently on the increase, this condition serving to delay shipments from the south of imported products such as turpentine and other goods.

Recent upward price changes seem to have strengthened the confidence of the buyer to some extent, both manufacturers and distributors reporting that trade has shown no signs of slackening off owing to higher costs, but on the contrary current business is described as on the mend. Orders for Fall delivery are arriving in satisfactory proportion, while the volume of present turnover is good for this time of the year.

Montreal. Que.

MONTREAL, August 17th.—The outstanding price revision in the hardware markets this week is the reduction announced by certain manufacturers on asphalt roofing and shingles. The various weights of roofing in rolls are reduced fifteen cents per roll while shingles are twenty cents per square lower. Tarred felt prices show a decline of twenty-five cents per hundred lbs. Price revisions in a downward direction are also noted on the Universal line of bread mixers, and coal oil is lowered one cent per gallon. Higher prices are again quoted on all gauges of galvanized sheets, both in Queen's Head and other brands. The sheet markets remain very firm and the recent stronger tendency has brought a more uniform price basis among the various distributors. There is also a firm tone in bar iron and steel products and a further revision in prices in the near future would not be surprising.

STEADY TONE NOTED IN COMPRESSION GOODS

Montreal.

Current quotations on the various lines of valves and bibbs remain at unchanged discounts with the undertone of the market described as fairly firm owing to the steady tone of copper on primary metal markets. It is also noted that quotations on the finished products are on a steadier basis during recent weeks. A seasonal volume of business is being done, and future trade may have a deciding effect on the trend of these goods in later weeks, according to one manufacturer. The firmer tendency because of higher production costs may be offset to an extent when business becomes a little quieter. Prevailing discounts are the following:

Compression work, standard	45%
Fuller work, standard	30%
Quick opening compression bibbs	43%
Bath cocks, compression	41%
Bath cocks, quick opening	41%
Basin cocks, compression	34%
Basin cocks, quick opening	46%
Flatway stop and waste cocks, standard	54%
Roundway stop and waste cocks, standard	46%
Brass steam cocks, standard	50%
Radiator valves, standard	58%
Do., removable discs	58%
Globe, angle and check valves, standard	25%
Gate or straightway	25%
Emco globe valves	33%
Emco check valves	33%
Jenkins globe, angle, check and swing check	19%
Jenkins gate or straightway	25%
Jenkins iron body, globe and angle	15%
Jenkins iron body, gate	33%
N. P. "P" and "S" traps	40%

QUIETER PERIOD RECORDED IN SCRAP MATERIALS

Montreal.

Little change is recorded in scrap metals, a quieter period now becoming more evident from week to week. Although business among scrap dealers

usually shows a slackening during midsummer months, it has been fairly well maintained up until the beginning of the present month. Quotations on the various lines are nominally unchanged, with the tone of the market continuing fairly firm notwithstanding reduced activity. While it is stated by dealers that the effect of the coal strike has not been felt to any extent in the movement of scrap metals, it is recognized that this condition is assisting towards a stronger attitude in the market. Following are dealers' average buying prices:

WASTE MATERIALS—	
Automobile tires	0 50
Rubber shoes	0 02
Yellow brass	0 05 to 0 06
Red brass	0 08¾
Light brass	0 04
Scrap zinc	0 03½
Lead, heavy	0 04½
Lead, tea	0 03
Light copper	0 08½ to 0 09
Heavy copper	0 11
Wrought iron R. rd., No. 1, per gr. ton	10 00
Malleable scrap (ton)	9 00 10 00
Pipe scrap (ton)	7 00
Heavy melting steel	9 50 to 10 00
No. 2 busheling	3 00
Boiler plate	8 00 9 00
No. 1 machinery cast	20 00 to 21 00

FIRM SITUATION CONTINUES IN WROUGHT PIPE

Montreal.

Manufacturers of wrought piping state that notwithstanding the firm tone in the steel industry generally, which is further strengthened by production difficulties through the coal and rail strike situation, no revision in prices is yet in sight. The undertone of this market is undoubtedly strong, but as pointed out by one manufacturer the coal situation has not yet seriously affected domestic production, and the attitude of waiting for further developments is taken. There is every reason to hope for an early settlement in the strike conditions in the south, and this will undoubtedly determine the trend of the market for future. Reports from American mills at present indicate that while demand for wrought pipe is not as active as in previous months, producers are still well supplied with orders and with a possibility of a curtailment in production, if an agreement is not reached, there is a stiffening tendency in the market. Domestic quotations are still contained in list No. 54.

FURTHER ADVANCE ON GALVANIZED SHEETS

Montreal.

Galvanized sheets continue on an upward trend, quotations being further advanced twenty-five cents per 100 lbs. on all gauges. This revision is announced by practically all distributors and the range in local prices is now considerably less. The English market for these products recently advanced and importers increased their price levels accordingly. It is stated that production costs have increased, one of the chief reasons being higher ruling prices of coal because of exports to this side.

An early improvement in the situation in the South is hoped for, but it is considered doubtful whether this will materially affect the local market while the more active demand for sheets is in evidence. Deliveries have been so far delayed that immediate increased production would still mean some time before shipments could reach this market in any quantity. The movement of galvanized sheets is a little slower and following are revised quotations:

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80
18—20 gauge	4 55	5 05
22—24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35
GALVANIZED SHEETS—		
Queens Head—		
28 gauge	7 25	7 50
26 gauge	7 00	7 25
24 gauge	6 40	6 65
22 gauge	6 05	6 30
18—20 gauge	5 35	5 60
Other Brands—		
10¾ oz.	7 00	7 25
28 U. S. gauge	6 60	6 85
26 U. S. gauge	6 30	6 55
24 gauge	6 15	6 40
22 gauge	6 15	6 40
18—20 gauge	6 00	6 25
16 gauge	6 85	6 10

These prices are for full bundles, an extra charge of from 25c. to 35c. is made for broken lots. Extra for sheets 3 ft. wide, 28 gauge and 10¾ oz., 20 cts. per 100 lbs. Further extra for sheets 4 ft. wide, according to gauge.

TIN PLATE—Coke	
20 x 28 x 100 lb. basis	12 50
20 x 28 IC, 112s	13 00
20 x 28 IX, 112s	15 00
20 x 28 IXX, 56s	9 00
20 x 28 IXXX, 56s	9 75
TERNE PLATE—	
20 x 28 IC, 112s	14 00
CANADA PLATE—	
Half bright 52s	5 00
Half bright 60s	5 10
Blued, 52s	5 25
Blued 60s	5 35
Welsh, polished, 52s	7 00
Welsh, polished, 60s	7 25
Galvanized, 52s	7 25
Galvanized, 60s	7 75

New Lower Prices Announced on Roofing

Certain Well Known Brands Reduced Fifteen Cents Per Roll—Slate Surfaced Shingles Twenty Cents Per Square Less—Steady to Firm Market Now Anticipated for Fall Trade

FOLLOWING a considerable amount of speculation regarding the probable trend of roofing prices for fall trade is the announcement by certain manufacturers that from August 15th reduced prices will be in effect. The reduction amounts to fifteen cents on all weights of roofing in rolls, and asphalt shingles are twenty cents per square lower. While in future these revised quotations will be quoted by some manufacturers, other producers state that up to the present no change has been made. Considering the trend of raw materials and present productive costs it is here claimed that lower prices are by no means warranted and there is every reason to believe that new prices will be only temporary.

Other manufacturers admit that the present revision is made in face of a firm undertone in the market. Apart from the present firm tendency in felt prices, there is also the increased cost of production through higher prices of fuel, which is further aggravated by the strike situation. As pointed out in a recent issue of Hardware and Metal, however, the increased efficiency of labor, allowing higher production, has played a prominent part in the industry and is considered the only factor allowing lower price levels at the present time.

In view of the above situation, and considering the attitude of some producers, it would appear that the market will present a firm attitude during the fall months. "We are taking the same action as we did at the close of last year, and in doing so we are convinced that roofing prices will remain steady to firm during the ensuing months," said a large manufacturer. Following are revised quotations of the Barrett line:

ROOFING—	Per roll
Ready roofing, 2 ply	1 70
Do., 3 ply	2 05
Everlastic, 1 ply	1 55
Do., 2 ply	1 90
Do., 3 ply	2 25
Panamoid, 1 ply	1 35
Do., 2 ply	1 70
Do., 3 ply	2 05
Tomahawk, 1 ply	1 25
Do., 2 ply	1 50
Do., 3 ply	1 85
Everlastic, red or green, mineral surface, 36 in wide, per sq.	2 65
Do., 18 in., wide	3 10
Everlastic Multi-Shingles, 4 shingles in one, per sq.	5 80

—F.O.B. Montreal.

ONE CENT REDUCTION IN COAL OIL PRICES

Montreal.

Following the recent reduction in gasoline prices, the quotation on coal oil is reduced one cent per Imperial gallon and is now quoted at 21 cents.

EASIER PRICE LEVELS ON UNIVERSAL BREAD MIXERS

Montreal.

A reduction of from eight to ten per cent is made on the Universal line of bread mixers. The No. 24 is now quoted at $3.00 each, and the No. 8 at $4.00 each.

LOWER PRICE GIVEN ON TARRED FELT

Montreal.

Tarred felt in all weights records a price decline of 25 cents per 100 lbs., and the quotation on 7, 10 and 16 oz. felt is $3.20 per 100 lbs.

HARVESTING STIMULATES ROPE AND BINDER TWINE SALES

Montreal.

An active movement of binder twine and a seasonal trade in rope lend a more encouraging aspect in the rope and cordage industry. Manufacturers state that binder twine demand throughout the country this season is even beyond earlier expectations and they are

still very busy meeting requirements. Crop conditions, with few exceptions, are excellent and this not only reflects in binder twine but has greatly stimulated rope sales. The more active season for the latter product is now well over, but with business assuming much greater proportions than last year, there is reason to believe that a good fall trade will be in evidence in later weeks. Dealer stocks are still reported at a low level because purchases, for the most part, were only made for spring and early summer needs. The general undertone of the market is said to be steady since the recent revision in both rope and hemp.

DEMAND FOR CORRUGATED SHEETS NOW SLACKENS

Montreal.

The call for corrugated sheets, although fair, is not as brisk as was experienced in previous weeks. Trade has been exceptionally good all season, in fact the continuation of a brisk demand after the warm weather set in was more or less of a surprise to many dealers. The prediction is now made by these same distributors that the present slackening will in all probability be of a temporary nature and the earlier fall trade will soon be in evidence. Quotations are unchanged, and prices are fairly steady with the exception of on heavier gauges where a certain amount of price shading is still being carried out. A repetition of the condition a few weeks ago however when the market generally became unsettled, can hardly be expected, it is claimed, in view of the present firmer position of flat galvanized sheets.

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

"WAIT AND SEE" ATTITUDE AMONG STEEL TRADE

Montreal.

With no general settlement reached in the coal strike, there is still the firm tendency in iron and steel products, with production in the industry handicapped. Domestic producers are considering future coal supply and meanwhile quantities of Welsh coal are reported as having reached this port. From present indications a further advance in bar prices seems altogether likely, it being pointed out that other western domestic markets recorded higher prices two weeks ago while up to the present no corresponding revision has been made locally.

In discussing the situation from a buyer's point of view it is stated that distribution is continuing quite favorably, the demand beng seasonably quiet. Distributors also appear satisfied to await further developments as production is quite ample to meet present requirements. Although a higher market seems likely, action on the part of buyers to get under cover has been, and is now slow. Present quotations are the following:

IRON AND STEEL—	
Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single reeled machinery steel	5 25
Band steel	3 50
Spring steel	4 75
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

FIRM SITUATION IN LEAD AND ZINC GOODS

Montreal.

Current quotations on lead and zinc products are unchanged since the recent revision in lead sheets. Manufacturers state that while metals on primary markets, for the most part, have recently shown a tendency to slacken from their former upward trend, there is no indication of weakness in the market, and a fair amount of strength is still contributed to the undertone of finished products. Trade is now said to be seasonal, reflecting the usual summer dullness. Unchanged price levels are as follows:

LEAD AND ZINC PRODUCTS—	
Lead pipe, per 100 lbs., up to 2"	13 00
Do., 2" to 8"	14 00
Do., 8" and over	15 00
Lead waste, per 100 lbs.	14 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	15%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs. sq. ft., lb.	0 10½
Lead sheets, 3 to 3½ lbs. sq. ft. lb.	0 10¼
Do., 4 to 8 lbs. sq. ft., lb.	0 9½

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 26½
Do., strictly, lb.	0 24½
Do., commercial, lb.	0 21½
Do., wiping, lb.	0 22½
Do., wire, lb.	0 35
Zinc sheets, casks	0 11
Do., broken lots	0 11½

ASBESTOS MARKET RECORDS STEADIER SITUATION

Montreal.

No change is made in quotations on the various asbestos products, and the market is reported as steady to firm. The call for these lines continues in proportion to the brisk seasonal demand for building materials generally, and this factor also assists in maintaining a firmer market tone. Discount levels are as follows:

ASBESTOS PRODUCTS—	Off list prices
2 ply pipe covering	67½%
3 ply pipe covering	65%
4 ply pipe covering	60%
85% magnesia	45%
Boiler covering	$1.50 per bag
Asbestos sheathing	7 50 per 100 lbs.

SLIGHTLY FIRMER TONE IN PIPE FITTINGS

Montreal.

Quotations on pipe fittings are unchanged with the undertone of the market said to be a little firmer, the stiffening tendency in the steel industry generally being reflected on these products to an extent. Current demand is quite seasonable, supplies being required for construction work. Following are present discounts:

PIPE FITTINGS—	
Cast iron fittings	30%
Plugs, cast iron	30%
Do., solid	30%
Do., countersink	30%
Bushings, small	32%
Bushings, cast	32%
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%
Flanged unions	30%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Niples, black and galvd. ⅛ to 4 in., close and short	60%
Do., 4½ in. and larger	50%
Do, long, ⅛ in. to 4 in.	65%
Do., 4½ inch and larger	55%
Do., running thread	40%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—

Price list effective June 1st, 1922. Discount 70-5 per cent.

QUIETER PERIOD IN INGOT METAL MARKETS

Montreal.

Ingot metals have been rather dull during the past week, the buying demand somewhat less no doubt owing to immediate needs having been covered. This is not unusual at this season of the year and if labour conditions improve in the U. S. A., and Europe is able to tide over the present crisis, a general improvement is looked for.

TIN.—This market is quiet with the undertone firm and buyers appear chary about selling for forward delivery. While statistics hardly warrant any great advance there is a feeling that an effort is being made to boost prices. Demand continues only fair with stocks quite sufficient. Local price is slightly higher at 36½ cents.

COPPER.—Copper shows little change with prices about the same and demand fairly good. Export business remains at a good level and Germany thus far seems to have been able to finance her copper purchases. If the coal strike is settled soon it is considered probable that higher prices will be seen. The local market is quiet at 17¾ cents for electro and 16¾ cents for casting.

SPELTER—As usual after a sharp rise, the market has eased off and the future trend is said to depend on how much production is increased. July statistics do not show as big a decrease in stocks as expected. If England should start buying on this side it wo" doubtless mean higher prices but this at the moment seems uncertain. Locally the market is quiet at 8¾ cents

LEAD.—This metal is unchanged in the U. S. A. although London is slightly lower. Supplies are still none too great and higher prices ruling later in the month would not be surprising. Quotation is unchanged at 7 cents.

ANTIMONY.—Little or no change is recorded in this metal and Chinese is still quoted at 6½ cents, high grade English at 7½ cents.

ALUMINUM.—A dull market continues on aluminum with no new features in the undertone. Quotation remains at 24 cents.

Toronto, Ont.

TORONTO, August 17.—Developments on the current hardware markets continue to offer a variety of price changes, including both advances and declines. This week reductions are recorded on some lines of Yale night latches and certain numbers of padlocks, while there has been a recession on certain medium-priced grades of ready roofings. The smaller models of Liquid Veneer mops are lower in price, and quotations on cement in carload lots appear with a small reduction. On the other hand, bar iron records another advance of ten cents per cwt., as outlined in recent issues, and an upward tendency is also registered on canvas and cotton gloves. A revision is made in Canada plate prices for Fall trade, and owing to the developments in steel production circles, boiler tubes now appear with a stronger primary tone. Domestic quotations on these products, however, remain nominal. It is reported that there is a scarcity of raw material for piping, and quotations are relatively stronger, although no changes are announced. There have been fractional declines in prices on ingot metals in primary markets, but local levels remain steady.

READY ROOFINGS DECLINE TEN CENTS PER SQUARE

Toronto.

There has been a reduction of ten cents per square on medium priced grades of ready roofing. The best qualities have not yet been changed. New quotations on Comet and Waverley brands follow:

COMET—
1-ply, $1.30; 2-ply, $1.70; 3-ply, $2.10.
WAVERLEY—
1-ply, $1.55; 2-ply, $2.00; 3-ply, $2.40.

HIGHER PRICE LEVELS ON COTTON GLOVES

Toronto.

Canvas and jersey cotton gloves are now somewhat higher in price. In gross lots, the new quotation is $15.00, while in dozen lots the revised level is $1.30 doz. No. 92K, knitted wrists is priced at $1.55 doz., and No. 77K, at $2.40 per dozen.

LIQUID VENEER MOPS AT REDUCED PRICES

Toronto.

A reduction has been made in prices on the "Victory" type of Liquid Veneer mops, the new lower quotation being $10.00 per dozen. No change is announced with regard to the larger model, known at the "Champion."

BAR IRON PRODUCTS FIRM UP TEN CENTS

Toronto.

As outlined in recent reports covering the local steel market, bar iron prices have now firmed up another ten cents per cwt., thus bringing the ruling base to $3.25. Bars, angles, tees and hoops are all registered at advanced levels, the movement to higher quotations being generally attributed to developments in primary steel markets, where mills have announced a further increase consequent upon the effects of the rail and coal strikes. These unsettled labor conditions are reported to be exercising a strangle hold upon the steel industry in certain quarters, due to the difficulty of transporting fuel, as well as the products of the mills, and the consequent shut down on numerous furnaces. Under the prevailing situation, a strong market is anticipated for the ensuing weeks, it being pointed out that even with the early settlement of the coal strike, conditions in primary centres could not be materially improved for several weeks. It is confidently stated in certain distributing channels that this move to higher prices on bar products would probably have developed previously but for the usual quiet mid-summer period. Following are average local quotations:

IRON AND STEEL—

Mi'd steel bars, base	3 25
Mild steel bands 3-16 in. base	3 75
Bar iron, base	3 25
Angle iron, base	3 35
Horse shoe iron	3 85
Tire steel	3 45
Spring steel	7 00 8 00
Sleigh shoe steel	3 25
Cold drawn steel	4 50
Hoop steel	4 50
Norway iron	12 50
Toe cau'k iron	4 10
Crucible cast sheet steel	28 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

NEW LIST PRICES ON YALE LOCK PRODUCTS

Toronto.

The Yale and Towne Manufacturing Co. have announced various changes in the list prices on certain of their products in locks and similar lines. The discounts applying to these revised prices remain unchanged. The new quotations have been made effectiive, from August 1, showing an average reduction of five per cent. A general revision has been made in list prices on builders' locks and trims, while padlocks, night rim latches and dead locks all have new levels. Some revisions have also been made on certain numbers of mortise night latches and dead locks.

CEMENT FIVE CENTS LOWER IN CAR LOTS

Toronto.

A slight reduction in cement prices is now in effect locally, the extent of the decline being five cents per barrel in car load lots. This change brings the current price to $3.70. No recession has been announced on less car lots, the previous levels remaining unchanged. Current trade is described as fair for this season of the year, purchases being mainly in smaller quantities. Following are local quotations:

CEMENT—Carload Lots—

Per barrel	3 70
Less Carload Lots—	
Per barrel, f.o.b. yard	4 40
Per barrel, delivered	4 60

Single bags, $1.15 each; 4 bags to barrel.
Extra charge of $1.50 per load on less than 24 bag lots.
Rebate of 20 cents for empty bags.

NEW CANADA PLATE PRICES FOR FALL

Toronto.

Some slight changes have been announced in quotations on Canada plates. This revision places these products on a more uniform level for the new season's business and a steady market is recorded. Bookings for fall delivery are described as coming along nicely and a brisk demand is generally anticipated, the canning industry being especially active. Following are current local quotations:

PLATES, CANADA—	
Ordinary, 52 sheets	4 90
Do., 60 sheets	5 00
Blued and oi ed, boxes, 52's	5 20
Do., Do., 60's	5 30

IX, 20 x 28, 56 sheets	8 50
PLATES, CHARCOAL TIN—	
IX, 20 x 28, 56 sheets	10 00
IXX, 20 x 28, 56 sheets	12 00
PLATES, TERNE—	
IC, 14 x 20, 112 sheets	12 00

SCARCITY OF RAW MATERIAL FOR PIPING

Toronto.

The market situation in wrought piping is attracting special attention in view of the effects of the southern strike conditions on the supply of raw material. With pig iron and other basic elements higher in price and more difficult to procure, there has developed a scarcity in some smaller sizes of pipe in certain quarters. Manufacturers state that the domestic situation has been well provided for, mills having been operating to capacity for some time past, thus providing stocks for the present requirements. A brisk demand for piping is still evident and the undertone is described as healthy, additional strength being noted through the speculation regarding the duration of the southern coal and rail labor difficulties. Primary centres record an upward tendency, with a shortage destined to gradually become more acute on both southern and domestic markets unless a settlement of the two strikes is reached in the near future. Current prices remain unchanged at list No. 54.

MARKET STRENGTH NOTED IN CORRUGATED SHEETS

Toronto.

Due to the brisk call for flat galvanized sheets and the combined effects of southern rail and coal strike condi-

tions, a marked degree of strength is evident in the primary market for corrugated sheets. No change in quotations has been announced, but it is stated that the prices on the lighter gauges are considerably firmer, while the effects of this improvement is also noted on heavier gauges, but not to the same extent as the call for the latter products is moderate. Compared with previous records, it is pointed out that the current degree of activity in corrugated sheets is very satisfactory. With building activities continuing well into the Fall season, a correspondingly brisk movement is looked for.

CORRUGATED SHEETS—

	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 26 U. S. gauge	8 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50
Less 10 per cent.	

Lighter than 24 gauge and wider than 27 ins 75 cents per sq. extra.

STEADIER PRICE LEVEL ON PIPE FITTINGS

Toronto.

A much steadier level is evident in the market for pipe fittings, these products reflecting to some extent the strength of the steel supply situation, combined with a seasonable demand. Trade in pipe fittings is generally described as registering a gradual improvement, with current business at a brisk stage owing to the heavy requirements of the varied construction activities. Distributors state that stocks are moving well, with the uncertainty regarding the raw materials, reflecting additional strength to the undertone. Following are prevailing quotations:

PIPE FITTINGS—

Cast iron fittings	30%
Plugs, cast iron	30%
Do. solid	30%
Do., countersink	30%
Bushings, mall.	32%
Bushings, cast	32%

Do., 4½ inch and larger	55%
Do., running thread	40%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—

New piece list, adopted June 1, 1922. Discounts 70 and 5 per cent.

UPWARD TENDENCY IN BOILER TUBE PRICES

Toronto.

The latent strength of the steel industry is now being reflected in boiler tubes, and as pointed out in recent market reports, prices on these tubular goods are now on a noticeably firmer basis. Boiler tube quotations have been advanced on primary centres to the extent of approximately five per cent., this change affecting both seamless and lapweld. It is expected that this revision will be reflected on domestic levels in the near future, but up to the present, local warehouses have not followed this advance, the appended list represents the average prices in effect on the current market:

BOILER TUBES—

	Seamless	Lapweld
1 inch	19 00	....
1¼ inch	20 00	....
1½ inch	20 00	....
1¾ inch	21 50	....
2 inch	20 00	16 00
2¼ inch	22 00	19 00
2½ inch	23 00	20 00
3 inch	27 00	24 00
3¼ inch	32 00	28 00
4 inch	41 00	35 00

LEAD GOODS REFLECT FIRM PRIMARY MARKET

Toronto.

The firmer tone evident in products closely related to the primary markets is still noted especially in lead and zinc goods, quotations remaining at a firm level in view of the upward trend in virgin metals. No further price developments have been recorded, but the recent higher basis on lead sheets, traps and bonds and lead pipe has been confirmed by the later improvement in primary centres. Current trade is reported good, at the following quotations:

LEAD AND ZINC GOODS—

Lead pipe, list per lb.		0 13
Lead Waste, pipe, list, per lb.		0 14
Do., over 8 in., list per lb.		0 15

Do., guaranteed, lb.		0 24
Do., commercial, lb.		0 21
Zinc sheets, per lb.	0 09	0 10

GOOD SEASON FOR SOIL PIPE AND FITTINGS

Toronto.

Quotations on soil pipe and fittings continue at the revised levels recently effective, and current business in these products is described as exceptionally brisk. The good demand experienced during the season for soil pipe shows signs of keeping up in fairly satisfactory proportion, owing to the requirements of building interests. Distributors state that the present season has been far ahead of last year, while manufacturers point to the fact that the rising cost of raw materials resulting in higher quotations on the finished goods has renewed confidence in this market. Following are prevailing discounts:

SOIL PIPE—

2 inch	Less 33 1-3 per cent.
3 inch	Less 33 1-3 per cent.
4-inch	Less 33 1-3 per cent.
5 and 6 inch	Less 33 1-3 per cent.
8 inch	net

FITTINGS—

2 to 6 inch fittings	Less 45 per cent.
8 inch fittings	net

BETTER TRADE EVIDENT IN COMPRESSION GOODS

Toronto.

Trade in brass compression goods is gaining in volume as the building season progresses. Many dwellings and other construction work are now at the stage where these products are required. and both manufacturers and distributors report that a marked improvement is evident in the volume of sales. Prices are generally unchanged, a steadier tone having developed in the primary materials, with this trend being more or less reflected in quotations on the finished goods. Following are current discounts:

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard ¼ in. to 2 in.	50%
Do., 2½ in. to 3 in.	43%

Quick opening, No. 3633	50%
No. 3623, plain or index handle	34%

STRONG MARKET FOR GALVANIZED SHEETS

Toronto.

The brisk call for galvanized sheets experienced throughout the season and particularly during recent weeks is still reported from local warehouses. The current call for black sheets, however, is described as dull. Quotations on galvanized are unchanged, but the market remains strong with existing price levels firm. Some premiums are stated to have been paid for early delivery, shipments from the south being considerably delayed and domestic sheet producers experiencing a heavy call for the galvanized products. Following are current price levels:

BLUE ANNEALED SHEETS—

10 gauge, base	4 00
12 gauge	4 05
14 gauge	4 10
16 gauge	4 15

BLACK SHEETS—

18-20 gauge	4 80
22-24 gauge	4 85
26 gauge	4 90
28 gauge	5 00

A charge of 25c per 100 lbs. is made for **less than case lots. An extra 10c per 100 lbs. is also charged on sheets 26 in. wide.**

GALVANIZED—

	Queen's Hd.
28 gauge	7 50
26 gauge	7 25
24 gauge	6 65
22 gauge	6 30
18 and 20 gauge	6 10

	Premier	Apollo

22 and 24	5 90	6 45
18 and 20	5 75	6 30
16	5 60	6 15
12 and 14	5 45	6 00

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown is 20c. per 100 pounds.

DEMAND FOR TROUGH AND PIPE KEEPING UP

Toronto.

An exceptional brisk demand for eavestrough and conductor pipe for this time of the year is generally reported by manufacturers and distributors. It is pointed out that the call for these

products usually subsides during the mid-summer period to recover heavier proportions again during the fall session. This season, however, the movement has kept up remarkably well, this being attributed to the steady requirements of building interests. Quotations remain unchanged, with the firm undertone outlined in recent market reports still being apparent. Galvanized prices are considered strong, and the developments in the primary steel centres reflect to a greater or less extent on the market strength of practically all finished products. Unchanged quotations follow:

TROUGH (Eave)—
O. G. SQUARE BEAD—

Per 100 ft.		Per. 100 ft.
8 inch $15 90	15 inch.....$28 80

Less 60 per cent.

EXPECTED REACTION IN SOME INGOT METALS

COPPER.—There is fair buying of copper by domestic consumers and the tone of the market remains firm. Primary centres also record trade as satisfactory and a steady tone is evident. It is reported that manufacturers of copper and brass goods have been in the market. Local quotations continue at the recent higher level of 17½ cents.

TIN.—The local tin market is described as in an idle condition, but prices have not changed materially. Primary centres are slightly easier in tone, London having declined. In view of the lack of trading, a reaction was more or less looked for. Local prices continue to hover between 36 and 36½ cents.

LEAD.—This market remains strong and active, with white lead interests having been large buyers, and other lines such as ammunition, cable and storage battery, are also showing activity. The strikes have had less effect on the current demand for lead than on other metals in the non-ferrous group. The local quotation remains at the recent higher level of $7.50.

SPELTER.—The current demand for zinc is slackening, the market being somewhat dull and the undertone easier. With the serious curtailment of operations at many of the steel mills owing to fuel shortage, the falling off in spelter requirements is not surprising, in spite of the hopeful views of an early adjustment and the estimated good outlook for fall consumption of this metal. Local prices are steady at $8.25.

London, Ont.

LONDON, August 17.—Current reports indicate that the hardware business in this district is seasonably good and compares very favorably with the records of this time last year. Merchants are cleaning out summer lines, and fall goods are now being displayed. The number of price changes is again light this week, chiefly affecting weather strip and the Shurley make of hand saws.

TEN PER CENT. DECLINE ON WEATHER STRIP

London, Ont.

Quotations on wood and felt weather strip are now around ten per cent. lower for fall business. Following are revised levels.

WEATHER STRIP—
List— No. 60, 5c. ft. No. 61, 5 cts. ft. No. 61½, 7 cts. ft. No. 64, 10 cts. ft.
Less 50, 5 per cent.

LOWER PRICES ON SHURLEY HAND SAWS

London, Ont.

New prices are now in effect on the T. F. Shurley make of hand saws, these revised quotations showing a reduction of approximately twenty per cent. New prices on one of the best selling lines follow:

SHURLEY HAND SAWS—
No. 3 x 18", $19.00 doz. No. 3 x 20", $21.00 doz. No. 3 x 22", 23.00 doz. No. 3 x 24" $25.00 doz. No. 3 x 26", $26.90 doz.

STRONGER FLAX SEED MARKET AFFECTS OIL

London, Ont.

Linseed oil is enjoying a good seasonal sale at present. The flax seed market has strengthened again and local prices remain unchanged at the following levels:

LINSEED OIL—	Raw	Boiled
1 to 2 bbls., per gal	1 20	1 23
3 to 5 bbls., per gal.	1 19	1 22
6 to 9 bbls., per gal.	1 17	1 20

Less barrels, add 15 cents gal.

FAIR SEASONAL SALE NOTED IN TURPENTINE

London, Ont.

There is a fair sale at present for turpentine, but stocks continue in a fairly low state and no change has been made in current quotations. The prevailing prices follow:

TURPENTINE—	Imp. Gal.
1 bbl. lots ... ...$	1 80
2 to 4 bbl. lots	1 79
5 gal. lots	1 95

MODERATE CALL FOR SCREEN WIRE CLOTH

London, Ont.

A fair sale is at present recorded for screen doors and windows, and also screen wire cloth. The season's quotations on these goods remain unchanged.

SCREEN WIRE CLOTH—
Painted Black $3.00 per 100 sq. feet.
Galvanized, $3.60 per 100 sq. ft.
Bronze $10.00 per 100 sq. ft.

IMPROVED CONDITION IN WINDOW GLASS MARKET

London, Ont.

A better movement of window glass is now generally reported at the new lower levels which were announced last week.

WINDOW GLASS—
Single and Double Diamond up to 25 cases, list less 10 per cent; over 25 cases, list less 15 per cent.

APPLE PARERS RECORD SEASONAL MOVEMENT

London, Ont.

Apple parers are also experiencing a good seasonal movement. The Hudson line is selling at the recently revised level of $14.85 per dozen.

SEASONAL CALL FOR POTATO BASKETS

London, Ont.

Dealers report that baskets for potatoes, roots, etc., are now experiencing a fair seasonal sale. Current quotations on these goods follow:

BASKETS—
Iron Bound Splint—
1 bushel, $8.00 doz.; 1½ bushel, $9.50 doz.
Wire—
½ bushel, $12.90 doz; 1 bushel, $16.00 doz.; 1½ bushel, $24.00 doz.

GOOD MOVEMENT OF WHITE LEAD IN OIL

London, Ont.

There is a good movement of white lead in oil, the seasonal activity in this product continuing. Prices are firm and unchanged at the levels which were recently made effective.

SPRAYERS NOW POPULAR

London, Ont.

There has also been a good movement of sprayers during the last few weeks. Quotations on these products follow:

EUREKA SPRAYERS—
No. 112, Tin, $5.50 doz.; No. 113, Glass Jar, $8.00 doz.; No. 114, Glass Jar, $9.00 doz.; No. 115, Tin Continuous, $10.00 doz.; No. 116, Galvd. Continuous, $10.50 doz.; No. 110 Galvd Compressed Air, $7.00 each; No. 111 Brass, Compressed Air, $10.00 each.

BOOKING PRICES ON HAND SLEIGHS FOR FALL

London, Ont.

Booking prices announced on hand sleighs for fall shipment are the same as prevailed last season. The Canadian Buffalo Sled line remains at list less 35 per cent.

NOW TAKING FALL ORDERS FOR SNOW SHOVELS

London, Ont.

Orders for fall delivery of snow shovels are now being taken. Prices on these products are at the following levels:

SNOW SHOVELS—
Prince Long Handle or No. 20, $5.75 doz.; Prince D Handle or No. 20, $7.00 doz.; King D Handle or No. 40, $7.80 doz.; Moose D Handle or No. 50, $9.60 doz.
Furnace Scoops, Long and D Handle, $5.75 doz.

GOOD SALE NOTED FOR HARVEST TOOLS

London, Ont.

This has been a good season for the sale of hay forks, hoes, scythes, snaths and harvest tools generally. Prices continue unchanged at list less 60 per cent.

Winnipeg, Man.

WINNIPEG, August 17.—Cutting is now general throughout the Prairie Provinces and it is expected that the crop, in many districts, will exceed that of 1915. Conditions in the hardware trade at present indicate that buying remains on a hand to mouth basis. In spite of the resumption of building activities due to the favorable crop conditions, wholesalers report that there is a strong tendency to withhold from placing orders. It is estimated that this factor will likely cause a certain amount of congestion, unless estimated Fall requirements rapidly increase in the near future.

DECLINE IN HEAVY STRAP AND TEE HINGES

Winnipeg.

There has been a decline in prices on heavy tee and and heavy strap hinges as well as screw hook and strap hinges. New quotations are as follows:

Heavy Tee Hinges in Cartons—4 in., $2.30; 5 in. $2.70; 6 in., $3.20; 8 in., $3.70; 10 in., $6.35; 12 in. $9.10.

Heavy Strap Hinges in Cartons—6 in, $335; 8 in., $4.85.

Heavy Strap Hinges bulk—4 in., $1.68; 5 in., $2.24; 6 in., $2.48; 8 in., $3.30; 10 in., $5.85; 12 in, $714 14 in., $8.30.

WIRE NAILS CONTINUE IN GOOD DEMAND

Winnipeg.

There is a good demand for wire nails at the base of $4.60 as the increased building activity is causing a better demand for this line. Cut nails are quoted at $6.75 but there are very few selling as the West show more favor for wire nails.

DISSTON SAWS NOW AT REDUCED PRICES

Winnipeg.

New quotations are given on the Henry Disston line of hand saws. The new quotation is approximately a reduction of 20 to 25 per cent. on the various sizes and grades. Following are present net prices on some of the best selling lines:

DISSTON SAWS—

D 8 x 18, $24.85 per doz. D, 8 x 20, $27.40—D 8 x22 $29.40. D 8 x 24, $31.50. D 8 x 26R, $32.80.

No. 12 x 20, $33.70 per doz. No. 12 x 26, $42.000 per doz. No. 12 x 26 R, $46.60.

SEASONABLE DEMAND FOR CEMENT PRICES UNCHANGED

Winnipeg.

Current quotations are unchanged on cement with trade continuing in seasonable proportions. With the activity shown in building dealers anticipate a good movement during the fall months.

COPPER WIRE ON SPOOLS DECLINES IN PRICE

Winnipeg.

There has been a decline of two cents per spool on copper wire. No. 8 to 10 is quoted at 28 cents. 10 to 14—29 cents, No. 16—30 cents and No. 18—31 cents.

MARKED PRICE ADVANCE ON GALVANIZED SHEETS

Winnipeg.

An advance of thirty cents per hundred pounds is recorded on galvanized sheets. These products now are in good demand and the curtailment in production has caused a scarcity of these products. New quotations are as follows:

GALVANIZED SHEETS—

16 gauge, $6.70; 18 gauge, $6.90; 20 gauge, $6.90; 22 Gauge, $7.05, 24 Gauge, $7.05; 26 Gauge, $7.20; 28 Gauge, $7.50 to $7.80; 10¾ oz. x 30, $7.90; 10¾ oz. x 36, $8.20.

GOOD BOOKING OF RANGES AND HEATING STOVES

Winnipeg.

With range and stove season near at hand retailers are booking more freely for these lines. Indications point to an active trade for this line as with the returns from the harvest, consumers who have been doing without many of these necessities will be buying more of these lines.

CANADA PLATE AT HIGHER PRICE LEVELS

Winnipeg.

Canada plates have advanced 25 cents per box and new quotations are as follows:

18 x 21, per box blued, $6.50; 18 x 24, $6.50; 20 x 28, $6.50.

NO CHANGE RECORDED ON COMPRESSION GOODS

Winnipeg.

With the undertone of the market for various lines of brass valves and bibbs continuing firm there is no change made in local prices. Due to the activity in building circles business is reported good for these lines.

REVISED PRICES ON PUTTY

Winnipeg.

There has been an advance in putty prices. One and one and a half pound tins are quoted at 16 cents per lb. Hundred pound irons is quoted at $6.00.

LINSEED OIL PRICE AGAIN FLUCTUATES

Winnipeg.

Southern markets have shown an easier undertone and consequently there has been a decline in local prices. Raw linseed oil is quoted at $1.16 per gallon with boiled at $1.19.

SPIRITS OF TURPENTINE STILL RULING STEADY

Winnipeg.

The southern markets are reported steady under a seasonable demand. Locally the movement is reported fair with quotations of $1.85 per gallon unchanged.

IMPROVED DEMAND FOR AMMUNITION AND GUNS

Winnipeg.

The fall duck shooting season is rapidly advancing and an improvement for guns and ammunition is reported by the trade.

THRESHER SUPPLIES MEET WITH SEASONABLE DEMAND

Winnipeg.

The bountiful harvest has caused a heavy demand for harvest supplies such as oils, greases, grease cups, oilers, fittings, belting, packing, leather lacing, waste and other sundry lines. Wholesalers' stocks of these lines are in small compass and retailers are getting their orders in early as further requirements are needed.

Vancouver, B.C.

Builders' Hardware Advanced 20 Per Cent: Big Outward Movement of Zinc and Lead.

VANCOUVER, B. C.—With the end of August approaching, dealers in hardware lines, particularly in the interior of the province, are beginning to make enquiries as to heating appliances for the fall and winter trade. Business on the coast is of average proportions for the season of the year but the trade is fairly optimistic as to the future. Money is coming in perhaps a little better than usual, although the four weeks' horse racing at Brighouse and Hastings Park is being blamed for some tardiness in collections. The camping season is also on but with the end of the month, good business is anticipated. One of the main reasons for optimism is due to the fact that building is keeping up both in Vancouver and surrounding districts and there is a steady influx of people from the east. Comparatively few houses are vacant. The building programme has meant good business for the retailer in all lines of household hardware.

Logging Operations Increase

Rain during the last couple of days has resulted in the dying out of many forest fires with the result that logging hands will now be free to carry on their operations which in turn, will mean business for the distributors. It is the first rain, with the exception of a slight drizzle last Sunday, which Vancouver and the coast district has had for seventy-five days.

The trade has been advised by American manufacturers that several lines of building hardware have been listed up twenty per cent.

As above noted, the stove trade is opening up a little and sales are being put on. For instance a combination gas and coal range is being offered this week at $185 in place of the usual $225 figure while another is made a special at $72.50. Other ranges are going at $59.50 and $62.50 for the sixteen and eighteen inch oven, respectively. A gas range is $10 cheaper at $52.50 and a high oven coal range is marked down from $149.50 to $119.50. An electric range is selling at $95 instead of the usual $125. Other bargains include an electric washing machine at $110, a reduction of $15 from the usual list, and refrigerators which are off about thirty per cent.

Movement of Zinc and Lead

One of the outstanding features of the metal trade is the outward movement of zinc and lead which has developed during the last year to surprising proportions so that the demand at present is almost greater than the supply. At the end of the war, provincial government officials estimated a tonnage of 20,000 lead and zinc for which there was no market owing to price conditions based upon irregular foreign currency rates. About a year ago Japan commenced to buy and after that country had begun taking these metals in good quantities, Europe again entered the market. The result is that nearly every Oriental boat takes a shipment, the total of which is about 1,200 tons a month. About a third of this amount goes to Europe in addition. The production at the Trail Smelter is 90 tons of zinc and 150 tons of lead daily, but the home consumption is large.

Calgary,

CALGARY, Alta.—Alberta has been favored with a week of splendid crop weather. Some showers; bright sunshine, and an absence of hot winds have made ideal conditions for filling and ripening, and will be beneficial to both the average and the grade. The Dominion Government estimate of July 31st for Alberta was 70,000,000 bushels of wheat as against a yield of 53,000,000 bushels for 1921. Corresponding increases are noted in the other cereals. The estimates are nearly always conservative, and this, with the splendid conditions prevailing since the report was compiled should indicate a final yield that will go far towards bringing conditions back to normal. The increase is all from Calgary south to the border with the Lethbridge district probably the most favored.

A settlement has not yet been reached in the local coal strike. There has been very little coal brought to the surface since April 1st and supplies are non-existent, and the condition one that demands instant action. It is reported the provincial government have become a party to the negotiations and a good deal of confidence is felt in their ability to effect a compromise. Several thousand miners in receipt of full time pay roll throughout the fall and winter months will make for a needed increase in business in the coal centres and will be reflected throughout the province.

Auto Accessories Moving Well

Automobile accessory houses report a nice increase in business since August 1st. Deferred needs due in part to disinclination to buy are now in evidence. Tractors have to be put into shape; the holiday season brings its demands, and the shooting season, when the automobile is almost as necessary as the gun, is just ahead of us.

Jobbers are now shipping booked orders for loaded shells. This province is a big consumer of shot gun ammunition and this line will take the leading place in displays and advertising for the opening of the shooting season on September 1st. Stocks carried over by the retailer are small, and the booked orders very satisfactory, but show evidence of careful buying and an inclination to sort as the season advances. Prices are still very much over pre-war levels and the feeling is that any revision must be downward and the merchant is not taking many chances on carrying stock over.

Reduction in Linseed Oil

The most important items noticed in the changes seem to bear out rumors of advances in the heavier commodities due to shortage of coal and coke. The buying public are a bit touchy on this matter of advancing prices. The experience of the war years is still very vivid in memory and anything like a general soaring of prices is very liable to postpone a much to be desired period of freer buying.

A further reduction in linseed oil is in effect this week, and quotations now are $1.20 for raw and $1.23 for boiled. This represents a rather unexpected decline of seven cents a gallon. Oil for present needs is fairly active but buyers show no disposition to speculate.

Jobbers have received advanced quotations on soil pipe and fittings and an adjustment in price to new levels approximately ten per cent. higher is due any day. Advances that go to make higher building costs are very noticeably not in favor, and it is to be hoped that manufacturing conditions will return to normal before a large list of building materials is affected.

Galvanized Sheets Advance

After a steady market for some months local quotations show an advance on galvanized sheets of 30 cents per 100 lbs. The trade report the demand quite active for small amounts and stocks generally low. Present prices Calgary, Edmonton and Lethbridge follow:

10¾ oz., 8.90; 28 ga, 8.50; 26 ga, 8.20; 24 ga, 8.05; 22 ga, 8.05; 20 ga, 7.90; 18 ga, 7.90; 16 ga, 7.75.

Canada plate is quoted 25 cents per box higher than last week and blued is now 7.65 for 18 x 21 and 18 x 24 and 7.90 for 20 x 28 at Calgary, Edmonton and Lethbridge.

The manufacturers' decline on Disston saws is now in effect with local jobbers and show a reduction from recent high levels. D120 x 26 are now 58.10 per doz. D12 x 26, 42.70. D8 x 26, 33.50.

Reductions to following levels are noted on differential blocks. ½ ton, 12.30. 1 ton, 16.85. 1½ ton, 23.30. 2 ton, 36.25.

Sleigh Bells Lower

Prices are out for sleigh bells for the winter trade and a casual check of open bells show declines of about 20 per cent.

Slight changes are noted in local prices on Crescent wrenches: a late quotation reading as follows: 4 in., 8.55; 6 in., 8.60; 8 in., 10.75; 10 in., 13.50; 12 in., 20.35.

Conditions in the boiler and radiation business seem to reflect a certain unsettled state. Reports are that prices are being shaded depending upon the job and that contracts are getting the benefit of the unrest. The condition is local and a return to market prices can be expected any time.

Hamilton, Ont.

HAMILTON, August 17. — The movement of hardware in this territory is doing more than holding its own, if comparison is made with the month of July, and also last year's record. The trade is apparently keeping close watch on the railroad and coal labor situations, possibly with a view of determining the proper time to cover future hardware requirements in the event of these problems not being settled satisfactorily in the near future

There is little that has an exceptionally strong demand in the wholesale hardware field this month, it being noted that buying is mainly of a pick-up or fill-in nature. However, it is generally reported that there is considerable future business being placed for fall delivery. One wholesaler points out that the spring season was comparatively late in getting started and the demand was consequently spread out over more than the usual amount of time, which has kept up the good volume of sales beyond the customary quiet period

Things are apparently moving along in a more satisfactory manner in the window glass market. Incoming orders for fall delivery have been in good proportion, and jobbing salesmen report that the impression they get while on the road is that retail stocks, generally speaking, are badly broken, this condi-

tion being attributed to the larger requirements of the building trade which have been evident this season.

Building in this and surrounding districts is continuing strong and this has had a good effect upon sales of building hardware and interior finishings. There are considered to be many definite signs of improving conditions throughout the trade and an active degree of fall business in seasonal hardware commodities should be experienced providing the combined effect of the coal and railway strikes is not too serious.

Construction activity also reflects on numerous hardware lines including builders' hardware, tools, cement, eavestrough, conductor pipe, metal lath, corrugated sheets, soil pipe and similar goods. A steady call has been experienced throughout the current season, with prospects for an active period still ahead.

The steel industry is feeling the greater pressure of strike conditions in primary centres. Galvanized sheets are still on a very firm price basis, while it is expected that bar iron quotations will likely firm up to higher levels under the existing pressure, the general trend of prices still being in an upward direction. The steel industry as a whole is awaiting developments in strike conditions, but meanwhile continues to function in spite of these handicaps. A new impulse is said to be needed to re-awaken buying interest during the quiet summer period, chief attention at present attaching to when a settlement of coal and rail troubles will be effected.

St. John, N.B.

Business Barometers Reveal Recent Increase In Trade In Maritimes; Some Price Revisions

ST. JOHN, N. B.—One of the best business barometers is considered to be the telephone and telegraph, and if this is the case, the last month shows a considerable increase in business throughout the Maritime Provinces. The local telephone and telegraph offices show an encouraging increase in the number of calls and messages, over and above the number during the same period of 1921, and also a substantial increase over the number during the month of June of this year. The city chamberlain reports that this has been a record year so far as the payment of taxes is concerned, and that more money has been paid in this year during the discount period than ever before, which would indicate that the citizens had more ready cash, and puts to flight any suggestion of hard times. This may be accounted for by the fact that there are very few unemployed in the city at the present time, and even a shortage of labor in some classes of work.

Chief Justice McKeown has called attention to a change in the law regarding bankruptcy, whereby fees heretofore payable to the registrar are now to be paid by the affixing of stamps of the supreme court, as provided for in the tariff of fees. In failure to comply with the new method regarding stamps, any proceedings are nullified, as unstamped documents could not be considered in any court. Mayor H. R. McLellan of St. John has placed before the citizens a recommendation that the city purchase the power company as it stands as a going concern. There is likely to be a great deal of campaigning over the question, as the citizens are not united on the proposition, the price being one of the main factors.

One of the large mills in St. John, The Stetson Cutler and Co., has started operations. This mill has not been in full operation for some years. About ninety men will be employed.

Changes in price during the past week in hardware lines are as follows:

There has been a very substantial reduction in Blocks this week. Prices are now quoted as follows:—

Common Single, japanned sheaves—3—.55, 4—.65, 5—.70, 6—.85, 7—1.00, 8—1.65, 9—1.40, 10—2.10, 11—3.40, 12—3.40.

Common Double, japanned sheaves—3—1.00, 4—1.20, 5—1.35, 6—1.55, 7—1.85, 8—2.20, 9—2.60, 10—3.45, 11—5.70, 12—5.70.

Patent Single, galvanized sheaves—3—.95, 4—1.00, 5—1.10, 6—1.30, 7—1.45, 8—1.90, 9—2.15, 10—3.00, 11—4.50, 12—4.50.

Patent Double, galvanized sheaves.—3—1.70, 4—1.90, 5—2.00, 6—2.45, 7—2.85, 8—3.55, 9—4.00, 10—5.10, 11—7.85, 12—7.85.

Disston Hand Saws have been reduced to the following prices—No. 12, 18"—33.10, 20"—36.10, 22"—39.40, 24"—42.20, 26"—45.00.

No. 120—18"—48.60, 20"—51.80, 22"—55.00, 24"—58.25, 26"—61.55.

No. 7—18"—23.65, 20"—25.55, 22"—28.15, 24"—29.55, 26"—30.95.

No. 107—18"—20.10, 20—21.40, 22"—23.10, 24"—24.40, 26"—25.30.

No. D28—18"—26.60, 20"—29.35, 22"—31.50, 24"—33.75; 26"—35.15.

Stove pipe elbows, square, 5"—3.75, 6"—4.40, 7—4.65.

Methylated Spirits, Bbls., 1.30, less than bbls., 1.50.

Pittsburg,

THE monthly report of the American Iron and Steel Institute, giving the steel ingot production of 30 steel companies in July, indicates that the steel industry, as a whole, produced steel ingots in July at a rate of about 36,000,000 gross tons a year, this comparing with rates of 36,600,000 tons in June and 36,400,000 tons in May.

The average rate in July quite misrepresents the rate of production, however. Production increased in the latter part of June, while about the middle of July there began a sharp decline in production, this decline continuing to date and promising to go considerably farther in the next two or three weeks if not for a longer time.

Considering the circumstances, it may be taken that the rate of production to July 1, was about 37,000,000 tons, the rate dropping to say, 34,000,000 tons by the end of July, and to somewhere in the neighborhood of 30,000,000 tons at the present time.

The influence of the combination of the coal strike and the railroad strike has become very serious. The steel industry got along very well during the first three months of the coal strike, which began April 1, increasing its rate of production by fully 5 per cent. Large stocks of coal had been accumulated, and there were heavy drafts upon non-union coal fields, particularly in West Virginia and Kentucky. The unusually heavy movement of coal from those districts began to congest the railroads involved by the middle of June, and when the railroad shopmen's strike began July 1, the condition was greatly accentuated. According to railroad officials the strike has been waning, but the receipts of coal are light as the congestion is not cleared. With these light receipts, and with stocks of coal at steel mills and by-product coking plants playing out at one point after another, production of pig iron and steel goes down. No conceivable settlement of the coal strike would restore the coal movement to the iron and steel industry except after the lapse of several weeks as it takes time to get shipments moving smoothly, and for a time precedence must be given to various consumers. and, in particular, the movement up the lakes to the northwest must be taken care of.

Consumption Restricted

Appearances are that steel has grown scarcer, but appearances are sometimes deceptive, particularly when one is dealing with the human element. The shortage of coal cuts down consumption of steel, but by how much no one is in position to estimate. Some steel consumers have notified mills to curtail or discontinue shipments of steel, on account of impaired consuming ability, but there may be many who wish to pile up steel so as to be safe in case they get supplies of coal sooner than the steel mills can increase production. Steel buyers are very human, and as a rule when they think steel is scarce they are anxious to get more.

Many customers of mills are urging heavier shipments, as they see production falling off. Some consumers are in the market to buy prompt lots, at the delivery premiums that generally have to be paid, say $2 to $5 a ton as a general statement. The tonnage involved in this prompt demand is not large, relatively. The premiums are insignificant compared with those paid in 1920 on large tonnages.

Two months ago the policy was largely in vogue among steel mills, although there were some exceptions, of holding steel prices down, the idea being that a

(Continued on page 193)

Weekly Paint Markets

Montreal

MONTREAL, August 17.—The feature of the paint markets this week is a reduction in window glass quotations, list prices less twenty per cent now being quoted. The trend of the linseed oil market is again upward, local prices being generally advanced seven cents per gallon. There is said to be an active interest on the part of seed buyers recently, and considering that available surplus of flax seed is none too ample to meet requirements from now until the new crop, a firm tendency in the market is looked for. A revision in the opposite direction is recorded on turpentine, local prices receding eight cents per gallon. An easier tendency continues in the market for this product at producing centres where demand has fallen off considerably during recent weeks. Although transportation difficulties are expected to have a direct bearing on domestic markets in the future if an improvement in the American strike situation is not forthcoming, this factor has not affected the local situation to any extent as yet because of the present light demand and very few shipments arriving from the south. Shellac prices are unchanged since the revision announced by certain firms last week, with a little easier tone in the market reported at primary centres. White lead in oil and putty remain quiet, the movement recording the usual summer dullness for these products. Manufacturers anticipate a general improvement in paint products next month, present indications pointing to an active fall season.

ANOTHER ADVANCE IN LINSEED OIL PRICES

Montreal.

As intimated in recent market reports the trend of the linseed oil market is upward, and a stronger tendency from now until the new crop reaches the crushers is generally expected. Local quotations are further advanced seven cents per gallon in most quarters this week, while certain firms are quoting a few cents less than price levels given below. Reported marketable flax seed available from now until the latter part of next month is dwindling and this condition coupled with a remarkable demand for spot seed for this season of the year should hold the market in a firm position. Revised quotations are the following:

LINSEED OIL—		
1 to 2 barrel lots, per gal.....	1 12	1 14
5 to 8 barrel lots, per gal.....	1 10	1 12

Less quantities, add ten cents per gallon.

EASIER PRICES RECORDED ON TURPENTINE

Montreal.

With turpentine in the south described as "off," the local market is weaker in sympathy and prices are reduced eight cents per gallon bringing a new quotation of $1.55 in one barrel lots. This price level is quite general, although a quotation five cents in advance is given. The market at producing centres has been on an easier trend during recent weeks, although recessions in prices have been of a minor nature and principally due, it is reported, to an easing in demand, which is considered more or less seasonable. Dealing with the American strike situation and difficulty of transportation of fresh supplies from the south, local importers point out that owing to a light demand this factor has not yet affected the market locally to any extent. Stocks are comparatively light, but it has been necessary to bring in little further shipments up to the present. With heavier requirements for fall trade, a firmer tendency may develop through rail strike conditions if an improvement is not forthcoming. Revised prices are as follows:

TURPENTINE—	Imp.	Gal.
1 barrel lots	1 55	1 60
2 to 4 barrel lots, per gal. ..	1 53	1 58
Broken lots	1 65	1 70

SLIGHTLY EASIER TONE IN SHELLAC MARKET

Montreal.

No further change is recorded in shellac since the price revision announced by some firms last week. The primary market is reported as a little easier because of a lack of interest on the part of buyers who apparently are not anticipating further requirements to any extent. Locally, also, little activity is in evidence, a quiet market usually expected at this season of the year. Following are unchanged price levels:

SHELLAC—	Pure White		Pure Orange	
In barrels	4 60	4 90	4 35	4 60
5 gallon jugs	4 75	5 10	4 50	4 75
1 gallon jugs	4 85	5 40	4 60	4 90

RAW MATERIAL COSTS STIFFEN WHITE LEAD

Montreal.

Only a very moderate degree of activity is now reported in white lead in oil, the summer months usually being a quiet period for this product. Corroders anticipate a resumption of brisker trade next month with the commencement of fall painting which has been quite extensively carried out, especially in more recent years. The undertone of white lead is described as quite firm, lead on primary markets continually showing a fairly strong tendency and linseed oil "holding its own." Although prevailing prices usually come in for discussion next month, there is little likelihood of lower prices being announced, according to one local manufacturer, considering existing costs of raw materials. Local quotations are $12.25 in five ton lots, and $13.00 in one ton lots and $13.35 in less quantities.

Toronto

TORONTO, August 17.—Turpentine again features the current paint markets, this time the development being a recession of ten cents per gallon. The tone at southern primary centres has been correspondingly easier during the past week or two, and this trend is now reflecting on the domestic market with the arrival of fresh supplies. Some apprehension is expressed in certain quarters, however, due to the possibility of the rail strike spreading throughout United States territory and thus tying up future turpentine shipments from southern producing areas. Current local stocks are not considered large, but have been improved by recent arrivals, and are sufficient for the prevailing moderate call.

In the window glass market some unsettlement is still evident, owing to the fact that easier quotations are evident on imported glass than the average levels recently given on the domestic product. A brisk movement is anticipated for fall, while the present trade is described as heavier than usual for this time of the year. In some quarters the impression is registered that lower quotations may be available in certain districts for that period.

TEN CENT REDUCTION IN TURPENTINE PRICE

Toronto.

Turpentine quotations on the local market have been lowered ten cents per gallon, this downward movement following the recent trend apparent in southern primary centres. Quotations at producing markets have been somewhat easier for the past week or two but this tendency was not reflected on the domestic market until the arrival of new shipments at the reduced levels. Some distributors state that local stocks have been improved through fresh arrivals, while others describe the current market as causing a certain amount of alarm in view of the fact that local supplies are not considered large, and with the possibility of the rail strike spreading, there exists some danger of a shut-off from southern primary sources. However, the market

tone at producing centres is again slightly easier this week, owing to the unsettled conditions causing a lull in the seasonal call, both on domestic and foreign markets. Shipments from the south are undoubtedly delayed, however, and upon the duration and extent of transportation difficulties in the United States territory depends the range of turpentine quotations during the ensuing weeks. Average current prevailing prices follow:

TURPENTINE—

1 barrel lots	1 70
2 to 4 barrel lots	1 69
5 gallon lots	1 85

Less than one barrel lots, 15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Carload lots of 70 barrels, price on application.

OIL QUOTATIONS FIRMER ON SEED RECOVERY

Toronto

Linseed oil quotations are again firmer on the local market, this development being generally attributed to higher flax seed prices. Distributors state that oil is now quite firm, crushers also maintaining a more uniform level. There exists a fair demand for linseed considering the time of the year, and while there is still evident a range in quotations on the local market, this is not so extensive as was recently the case, when the spread was as great as fifteen cents per gallon, or more. Flax seed markets have also exhibited a more steady trend and this has naturally reflected on the current oil price levels. With the arrival of the new crop, some variations in price may be expected, but it is stated that during the intervening period, linseed quotations should continue to hover in the neighborhood of the following levels:

LINSEED OIL—

	Per Gallon	
	Raw	Boiled
1 to 2 barrels	1 15 1 20	1 18 1 23
3 to 4 barrels	1 14 1 19	1 17 1 22
6 to 9 barrels	1 12 1 17	1 15 1 20

Less barrels, 15 cents per gallon.

MODERATE CALL FOR SHELLAC: MARKET EASIER

Toronto.

A slightly easier trend is now recorded in the shellac markets, but no marked change in domestic quotations has been announced. The nominal level remains at $5.40 for white, and $5.00 per gallon for orange in one gallon jugs, but some slightly easier levels are recorded in certain quarters. This range in prices is attributed to the fact that market conditions are more or less nominal, the current demand for shellac being variable. There is a seasonably quiet call. Prevailing average quotations follow:

SHELLAC	White	Orange
In bbls.	5 10	4 70
Gal. Jugs	5 40	5 00

USUAL QUIET TRADE EVIDENT IN PUTTY

Toronto.

Manufacturers and distributors report little activity in putty, this condition being usual at this season of the year. The summer dulness is at hand and no marked improvement is generally looked for until next month. It is observed that many dealers are probably awaiting some announcement regarding the extension of the booking date and the trend of prices for Fall trade before making current commitments.

PUTTY—

Standard, per 100 lbs.	5-ton lots	1-ton lots	Less
Bulk bbls.	$4 45	$4 95	$5 25
100-lb. drums	5 45	5 95	6 20
25-lb. irons	5 70	6 20	6 45
Bladders in bbls.	6 70	7 20	7 45
Do., less quantities	6 95	7 45	7 70
1 lb. tins	11 70	12 20	12 45

Pure Linseed Oil Putty, $1.50 per 100 lbs. advance over above prices for similar quantities.

TRADE STILL AWAITING BRUSH PRICE CHANGES

Toronto.

No changes have as yet been announced in quotations on brushes, and current trading in these products are naturally awaiting the trend of future developments in the price direction. Distributors state that business is usually quiet at this time of the year, it being between the seasonal call. Much interest is generally attached to the bristle markets, the future trend of brush quotations being dependent upon the primary supply. Manufacturers have predicted some revisions in the near future, including both declines and advances of a minor nature.

GLASS MARKET STILL IN UNSETTLED STATE

Toronto.

Distributors now describe the window glass market as conditionally more satisfactory since the uniform discount level was announced than was formerly the case, but it is noticeable that some imported glass is still being quoted at slightly easier levels than the ruling prices for the domestic product. The opinion is expressed that dealers are not over-stocked with glass, and that a good general demand will be experienced this fall, especially in view of the heavy building programs that have been in evidence throughout different sections of the country. There is reported to be more window glass moving at present, than is usual at this time of the year. The movement of plate glass, however, is mainly confined to city districts where construction of this class has been in progress.

JUST FAIR CALL FOR WHITE LEAD IN OIL

Toronto.

The current call for white lead in oil is described as of average proportions; with no new development in price from the recent revised levels. Manufacturers and distributors state that the movement is just fair, but is up to expectations for this season of the year. Following are prevailing prices:

WHITE LEAD IN OIL—

In 5-ton lots	12 70
In 1-ton lots	13 45
Less quantities	13 80

Lower Glass Prices on Eastern Markets

Reduction of Approximately Six Per Cent. Announced for Fall Window Glass Trade—Discount of List Less Twenty Now Being Quoted—Decline Not Yet Generally Adopted

As pointed out in a recent issue of Hardware and Metal, the probable trend of the window glass market would be downward for the usual fall trade. Substantiating this is the announcement of Montreal importers and distributors that quotations this week are reduced, and the $6.00 list less 20 per cent. is now being quoted. The former discount was 15 per cent., thus a reduction of approximately 6 per cent. is made.

The current situation in this market has attracted attention during recent weeks, a certain amount of unsettlement being in evidence which became more pronounced when business for fall was first being booked for import. Although prevailing prices were considered reasonably low when compared to replacement cost, certain firms were apparently willing to solicit business at even slightly lower price levels. The Belgian market has encouraged this trade to the extent that the franc has been receding in value for some weeks past. Even to-day there is little improvement in sight, the exchange value still being at a low level.

In announcing the new lower prices distributors express the hope that a more stabilized market will be established as quotations now given represent very little margin over replacement cost figures.

PITTSBURGH MARKETS

(Continued from Page 191)

safe market level should be preserved so that buyers would not be afraid to take hold freely after the coal strike. With a high market buyers would be likely to adopt a drastic policy of liquidating stocks, as they did in 1921.

This policy appears to have disappeared, if the present price advances are a criterion. One reason for abandoning the policy would be that there is scarcely any autumn business left to be done, for the simple reason that with production restricted the sales and purchases already made will last longer. The average mill is pretty well sold up to the end of the year, on the basis of its prospective production. If ability of buyers to consume steel is correspondingly restricted by coal and transportation conditions, the buyers in turn are covered for longer periods than they supposed a couple of months ago.

It is possible that when industry gets in smooth running order again, present prices of pig iron and steel products will hold, but that is extremely doubtful.

CURRENT MARKET QUOTATIONS

These prices are for such quantities as are usually ordered by retail dealers. Large buyers can frequently make purchases at better prices.

Tremendous Brush Business

Built on Quality

'Way back in 1856, the year of our inauguration, our firm ambition was to become makers of "perfect" brushes and brooms. And our firm resolution was to be absolutely fair in all our business transactions. Never, in all our sixty-six years of business, have we deviated from this plan.

Always our products have been the perfect brushes and brooms of their time. And you, who are among our hosts of friends and customers, know how fair we have always been in our business transactions.

Many improved methods of manufacture have been instituted, since our first years of business—methods that have permitted us to cope with the demand for Boeckh's Brushes. Yet we have always refrained from changing old methods for new and faster ones at the sacrifice of one iota of the quality of our products. Indeed, it is because of this fact that our business has grown with such tremendous rapidity.

Our large, modern factories are bright and well-ventilated. They are the last word in efficiency and up-to-dateness. This enables us to give our customers prompt service at all times. When in need of brushes, be sure to order a complete line of Boeckh's. It will increase your business to *sell* brushes of superior quality, as it has increased ours to *make* brushes of superior quality.

Distributors:-

You Are Invited to Visit Our Full-Line

EXHIBIT

In the Process Building

While at the Canadian National Exhibition be sure to visit our full-line paint and varnish display in the Process Building. Once each year we are privileged to be your host, and we welcome it as a real opportunity to help make your visit pleasant and profitable.

The Glidden line completely covers Paints, Varnishes, Ripolin Enamels, Stains, Colors, etc. Each product has that high unvarying quality which builds consumer confidence for the Glidden dealer.

Our regular salesmen will be in attendance at the Glidden Exhibit. They will gladly explain our special offers covering Endurance Paint, Ripolin, Jap-a-lac, etc. Your visit, we believe, will prove very profitable to you.

The Glidden Company, Limited

Toronto, Ontario

Branches at Montreal and Winnipeg

Have You Put on a 6c Jap-a-lac Sale?

The Jap-a-lac 6c sale idea passed the experimental stage long ago. It has been put into operation effectively in many cities and towns with complete success.

The quality of Jap-a-lac is such, that the sale of a trial can usually results in a steady customer. The 6c coupon brings the people in for Jap-a-lac. They buy *one* can, and get a *second* can for only 6 cents. You have made two sales because we furnish the extra cans free. These folks like your store and your merchandise so they come to you for other paint purchases.

Visit our exhibit, and let us tell you all about it.

JAP-A-LAC
HOUSEHOLD FINISHES

Ask Us About Our Special Ripolin Proposition

Our special Ripolin offer affords you an opportunity to put in a small stock of this famous Holland Enamel Paint at most attractive discounts. Ripolin quality needs no introduction to you. It is easily the longest-wearing, most beautiful enamel obtainable in the world.

We've a confidential offer we'd like to tell you about.

MARTIN-

A Paint and Varnish Product for Every Purpose and for Every Surface

100% PURE PAINT &

SENOUR

A Paint Selling Recipe

Whatever other factors may influence the saleability of Paints and Varnishes, in the final analysis the two all important things are—

First—the **Quality** of the Products.

Second—Their **Popularity.**

Both are significant. Both are essential to success. Both as embodied in Martin-Senour 100% Pure Paint and Varnishes offer you an unfailing recipe for real money making paint and varnish sales.

Quality Paints, Popular Paints—for every purpose and for every surface—paints, varnishes, stains and enamels that have built up flagging sales for many a Canadian Paint Dealer.

They'll do the same for you. Ask us about our dealer agency plan. Your enquiry won't obligate you one bit and we believe you'll be interested.

All protected with B-H PAINTS

THE widespread advertising campaigns, featuring the slogan "Save the Surface and You Save All" linked up with a steady campaign of propaganda, have put over, in a remarkably forceful and telling manner, the idea of protecting property with paint and varnish.

Right from the start of the "Save the Surface" movement Brandram-Henderson Limited have joined up with it. Each new B.-H. campaign drives home the value of paint for protection and the quality of B.-H. products.

B.-H. agents sell B.-H. products with complete assurance. They know that they have the best quality product made in Canada—a product backed by forceful advertising—striking as it is convincing.

This all means greater sales for B.-H. Agents and, naturally, greater profits.

Write for particulars of our Agency Proposition. We shall be glad to let you have them without obligation.

"The Finish that Endures"

There are Five Sound Reasons Why FLOGLAZE Finishing Pays in the Fall

REASON No. 1

In the fall the surface is thoroughly dry. During the spring a surface which needs repainting is sure to contain moisture and dampness or frost and it cannot be successfully painted until it has thoroughly dried out.

REASON No. 2

In the fall the wood is dry and absorbs more of the paint. The paint penetrates deeper into the wood therefore getting a firmer hold on it, giving the paint coating greater tenacity, holding and wearing qualities.

REASON No. 3

In the fall the weather is more settled and uniform and is warmer. This gives excellent painting conditions. Paint cannot be as successfully applied in the damp, unsettled weather conditions of spring.

REASON No. 4

A house needs its protecting coat of paint more in the winter months than at any other time. A house in need of repainting should never be allowed to go over the winter without this protection. It also needs protection against the dampness of early spring when paint cannot be applied.

REASON No. 5

It is easier to keep moisture and dampness out by applying a coat of paint when the surface is dry than it is to get moisture or dampness out of wood when you want to apply paint.

Jamieson's Interior Finishes

make just the right kind of Fall and Winter displays

Including "A beautifying protector" for every interior surface — Varnish Stains, Floor Paints—Art Enamels, Floor Enamels — a complete line that you will find pride and profit in handling.

A Beautifying Protector for Everything Under the Sun

Springtime in Fall and Winter!

If you are one of the many merchants who regard the Spring months as the only worth while paint selling season we suggest your trying out a regular display of Jamieson's Products during the coming Fall and Winter.

You will be surprised at the amount of Paint Products it is possible to sell during these two seasons.

Home owners are usually mighty proud of their property. They realize what paint and varnish mean in the way of surface protection and surface beautifying. To such people it is always spring time particularly in the matter of interior painting and "touching up."

They know Jamieson's Products—the Jamieson Trade Mark shown above is to them a "Word of Honor" that the Paint or Varnish back of it is as good as skill and experience can produce or money can purchase.

ELEPHANT BRAND

Strength & Long Life

The Elephant symbolizes strength and long life in the animal world, just as "ELEPHANT BRAND GENUINE WHITE LEAD" typifies both these qualities in the world of paint.

Its beautiful snowy whiteness, its unequalled smoothness of texture, its quality—guaranteed by the Government label on every can—has made ELEPHANT Brand the favorite white lead of the most successful painters in Canada.

Beauty and durability characterize every bit of Genuine Elephant. It has no rival, which explains why men who ask for "ELEPHANT BRAND" won't hear of a substitute.

Made up to the Canada Paint standard which is a definite guarantee of satisfied customers and repeat orders.

"The Kind Your Grandfather Used"

Founded on Service

This is no commonplace claim when applied to LIVINGSTON PRODUCTS as the history of the Company shows.

The aim of our extended service is that your interests be equally served from Vancouver to Prince Edward Island.

Before placing your orders for Linseed Oil let us prove that LIVINGSTON SERVICE means Quality, Value and Delivery.

"As gold is refined by heat, so character is tested and made pure in the cleansing fires of experience."
"Molten by time, but alloyed with Honor, Quality, Strength and Service, business experience becomes business character--that silent witness of every act; that great builder of reliable products."

From the book "Standards of Business" by Elwood E. Rice.

We Intend to make these Three Months

Busy Ones

"Save the surface you save all"-

Get Ready Now to Co-operate

You know what the "Save the Surface" Campaign did to keep Paint and Varnish sales up during the dull year of 1921.

You know what it has already done toward making 1922 the greatest Paint and Varnish year. Then you know that all pulling together we can make the Fall a big, busy Paint and Varnish season.

A special advertising campaign featuring the advantages of Fall Painting in general and Barn Painting in particular will be run during the next few months. These advertisements will prove a great stimulus for a record breaking Fall season.

Crops are good and money should be plentiful.

Get ready now to co-operate. Make special window displays. Use your local papers to point out the advantages of Fall painting.

By united action we can make these next three months big paint and varnish months.

Say to your Trade—"Don't put it off—put it on."

Save the Surface Campaign
43 St. Sacrement St.,
MONTREAL

EVERY BRUSH

Why Meakins Brushes Sell

Meakins Brushes sell because behind their indubitable present day worth there is a long tradition. Men, now grandfathers, bought, used and were satisfied with Meakins brushes over fifty years ago. To-day their children and grandchildren ask for Meakins brushes as a matter of habit.

It's a good habit.

Write for our illustrated catalogue.

A GOOD BRUSH

Why Meakins Brushes Stay Sold

Wood and steel and bristles of all kinds, rubber and tin and nails—all go to the making of brushes. Because Meakins brushes contain only the best of these raw materials is one reason they stay sold out. A greater reason than this applies.

Seventy years of knowing how, has given us skill and cunning in combining these materials to produce perfect brushes. Meakins brushes stay sold because they are made right.

"I would like to call personally on our customers"

"There is nothing I would like better than to be able to call personally on our customers and prospective customers," stated an executive officer of a large manufacturing concern a short time ago. "It is out of the question, however, I cannot get away. If I did undertake the job I figure it would take about four years steady travelling calling on about three to four hardware buyers every working day during the four years. We have only a few travellers, most of our lines are sold through jobbers and to a great extent, under our present sales policy, we entrust our sales and our competition to the jobbers and their salesmen. We therefore realize the need of keeping up as close a connection as possible with the wholesale and retail hardware trade and that is one reason why we are consistent advertisers in HARDWARE AND METAL. Our advertising in HARDWARE AND METAL stimulates the interest of wholesalers, travelling salesmen, retail hardwaremen and their clerks, and we believe HARDWARE AND METAL plays an important part in keeping up a steady demand for our products."

HARDWARE AND METAL reaches practically every worth-while buyer of hardware in Canada.

A New and Better Low Priced Watch

THE NEW HAVEN

THE NEW HAVEN

Open Face, 16 size, Plain or Fancy Snap Back and Bezel with Patented Stem Wind, "Pull Out" Stem Set, Antique Bow, Sunk Second Dial and Heavy Beveled Glass. Nickel Case.

YOUR WHOLESALER HAS THEM

The movement has been specially designed to take advantage of improvements which our long manufacturing experience has developed. The pinions are cut steel and all other steel parts are hardened and blued.

No part of the movement is riveted that is necessary to remove in taking the watch apart.

A separate plate enables the repairer to remove the mainspring barrel without taking the movement apart.

The "pull out" stem set is positive and quick in action and the winding is easy and smooth.

Plates are nickeled and back plate nicely damaskeened.

The watch carries a full guarantee.

Nicely boxed.

Packed one dozen in a carton. Handsome show case given with an order for 4 dozen.

THE RUSTLER

Strongly Made Case, Heavily Nickel-Plated

Ask your wholesaler for a case of Rustler Alarms. You will be surprised how quickly they move.

Owl Brand Roofing

—ATTRACTIVELY LABELLED SO AS TO EMPHASIZE THE QUALITY THAT GOES INTO EVERY ROLL

Whilst Others Rave, Owl Brand

DEALERS MAKE SALES AS NEVER BEFORE

If we could give you an adequate word picture of how Owl Quality Roofing is made our argument would be tremendously advanced. Suffice to say that it is made in a modern factory under the guidance of experts and subject to constant laboratory inspection. Owl Roofing is finished on both sides and either side can be laid to the weather. Owl Roofing has fire resisting qualities that make it a good insurance proposition. Rain water is not tainted by the use of Owl Roofing owing to the pure asphalt materials used in its construction being odorless and tasteless.

It's Not the First Sale that Counts—it's the Repeats

W. WALKER & SON, LIMITED

Owl Brand Insulating or Sheathing Paper
432 Sq. Ft. to Roll.

Owl Brand Products are absolutely guaranteed. The same high quality asphalt and all-rag felt is used in the Owl Brand Strip Shingles as in Owl Brand Roofings.

If interested tear out this page and place with letters to be answered

By Way of Explanation

Some one has said that to be great one must have enemies. We don't go so far as to charge anyone with being our enemy, but true it is that the phenomenal success which Owl Brand Roofing has rightly earned has set folks a-talking and some none too wisely. We take this opportunity of notifying the trade that no matter what is being said by word of mouth **or in letter form** Owl Brand Roofing is on the market to stay because dealer and consumer have said so in no uncertain terms. As for us we will continue to back Owl Roofing dealers with more and more sales helps so that others outside the knowledge of Owl Roofing experience may see the error of their ways and get into the charmed circle.

W. WALKER & SON, LIMITED

Roofing Breaks Sales Records

THE PUBLIC DEMAND OWL QUALITY ROOFING

"Owl" roofing is made 32-in. wide instead of 36-in.—a decided advantage. Roofing on the market today which is 36-in. wide is made so only from the manufacturers' ambition for a big production—a 32-in. width is longer in length than a 36-in., which means a lower production, but in a 32-in. roofing (such as the "Owl"), the laps are closer together and the tendency of buckling is practically eliminated.

"Owl" roofing is packed carefully, and every roll is inspected before being packed. **We put a good label on every roll because we are proud of Owl Brand Roofing.**

Personal Contact Gets More Trade

The best way you can make your business grow steadily is to meet and talk to passing motorists, and sell them on the service you can give them with a Bowser Chief Sentry. Then you can increase sales in your other departments.

The Chief Sentry not only saves time for the customer, but it enables you to handle more trade per hour.

The automatic features of the Chief Sentry, liberally advertised in the Saturday Evening Post and Literary Digest, reassure your trade that they will get full measure for their money. The sight glass on the discharge arm shows the customer that the measure is full. The tally bell announces the completion of each gallon of gasoline delivered. The Bowser centrifugal water separator insures gasoline as dry and pure as when fresh from the refinery. The recording meter acts as a perpetual sales register.

The Bowser Chief Sentry is high enough and big enough to make an impressive appearance and attract trade; it is low enough to go under any filling station canopy. It is unusually attractive in design. Bowser service combined with your personality, will attract more motorists **and bring them back.** Ask for booklet C-16, which describes the Chief Sentry money-making possibilities.

1 Master Dealer's Large Display Board.

This Fine Billmont Display Board FREE!

Here is a striking display board standing higher than a man, in strong attractive colors that will compel attention for your stock of Billmont Wrenches. It costs us real money to prepare these boards, but our aim is to help you SELL Billmont Wrenches.

One of these fine display boards will be furnished free to selected dealers who sign a Billmont Master Dealers' Contract.

A Live Merchandising Plan for Billmont Master Dealers

We will circularize your mailing list at no expense to you; inquiries will be referred to Master Dealers; newspaper cuts will be furnished free for your local advertising; special Master Dealers' prices enable you to sell mechanics and quantity purchasers; catalogs and advertising material furnished with your name imprinted.

The Billmont Wrench is a worth-while proposition. It fills a real need of mechanics, garages, car owners, farmers, industrial plants; in fact of every one working with nuts and bolts.

Billmont Wrenches are an economy, as well as a wonderful convenience. A set of eight wrenches, with only twenty-four sockets, equal 192 wrenches. It is surely an economy for any man to be able to buy such a **complete** outfit that yet contains so few tools. And you can sell them singly or in sets.

Remember "Billmont Sockets" are absolutely guaranteed against breakages when used with "Billmont Wrenches."

Write us for details of Master Dealer Proposition. It's a profit-maker!

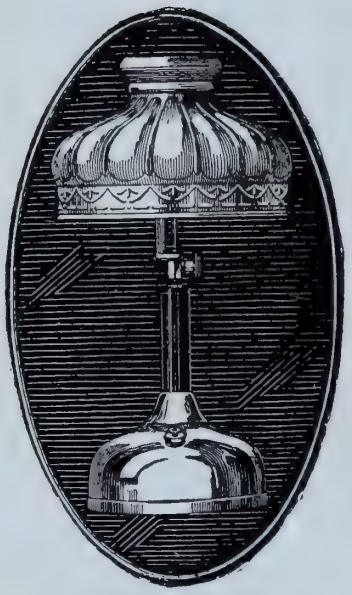
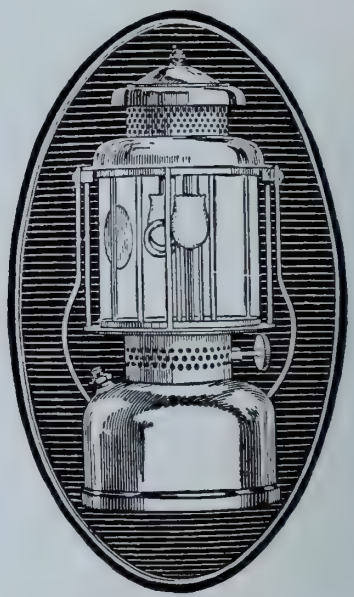
Coleman Quick-Lite
Lamps and Lanterns

Made in Canada



Style L Q 329

"It's the Light they Give that Sells Them"



Style L Q 327

Splendid Profit; Easy Sales!

EVERYWHERE—throughout the broad expanse of the Dominion, merchants are fully alive to the importance of dependable light for farm and home use. Coleman Quick-Lites are fast sellers because people want 300 candle power brilliance. The economy, cleanliness and safety of Quick-Lite Lamps and Lanterns are appreciated in more than a million homes across the border and in Canada.

Coleman Quick-Lites not only sell themselves—they help sell other merchandise for you. If you are handling paint—arrange a display of our color cards and cans with a Quick-Lite Lamp to show the true value of the colors. Use a Quick-Lite Lamp lighted on top of your show case in which you display cutlery. Use the Quick-Lite for lighting up your windows at night. There is no greater attention-getter than a lighted Quick-Lite in any store. Naturally, sales are easy.

Order through your jobber or write us for latest catalogue, price list and selling helps. Address

DUNLOP
CORD TIRES FABRIC

This Tire Fact is Certain
--DUNLOP Dominates

Dunlop Tires can be bought at your nearest Garage. Note the word **nearest.** We sell to every legitimate dealer —play no favorites. That means not less than 7,500 Garages or Tire Dealers throughout Canada are prepared to look after your tire needs immediately.

Sometimes when in quest of a tire you are advised to try this place or that place. Not so with Dunlop. **If he sells tires he stocks Dunlop.**

Because Dunlop Tires have a greater distribution than any other make, they have become known, not only as

The Tire That's Easiest to Get

But

The Tire That's Easiest to Get Mileage Out Of

If you want concrete evidence of just how good Dunlop "Cords" or "Fabrics" are to-day, turn this fact over in your mind:—

All Mileage Records in Canada Have Been Completely Eclipsed This Year by Dunlop Cord and Fabric Tires

Dunlop Tires, with Dunlop Extra-Heavy Tubes, challenge the world for Mileage, Comfort, Safety, Endurance and General Appearance.

One-Time Customers

EVERY dealer would like to have this line up of cars stopping for a supply of oil every day.

But how foolish it would be to expect this if each motorist only stopped once, then patronized some other dealer ever afterwards.

No dealer wants to be a "one-time customer" man. You don't, but if you try to sell oil *from the same barrel* to all car owners; you qualify.

The best oil for the Packard will not do for the Ford. The lubricating requirements of different cars are not the same. You must sell correct lubrication and satisfaction to your customers if you want them to buy their oil supplies from you regularly.

You can give unquestioned satisfaction to every customer if you will stock *the complete line* of Gargoyle Mobiloil and be guided by the chart of recommendations.

There is only one best oil for any automobile, motor truck or motor cycle Our Chart will tell you which one it is and make your oil customers permanent ones.

GARGOYLE

Mobiloil

Make the chart your guide

IMPERIAL OIL LIMITED

Manufacturers and Marketers of Imperial Polarine Motor Oils and Marketers in Canada of Gargoyle Mobiloil.

T-3165

Chart of Recommendations

(Abbreviated Edition)

THE correct grades of Gargoyle Mobiloil for engine lubrication of both passenger and commercial cars are specified in the Chart below.

How to Read the Chart:

A means Gargoyle Mobiloil "A"
B means Gargoyle Mobiloil "B"
BB means Gargoyle Mobiloil "BB"
E means Gargoyle Mobiloil "E"
Arc means Gargoyle Mobiloil Arctic

Where different grades are recommended for summer and winter use, the winter recommendation should be followed during the entire period when freezing temperatures may be experienced.

This Chart of Recommendations is compiled by the Vacuum Oil Company's Board of Automotive Engineers, and represents our professional advice on correct automobile lubrication.

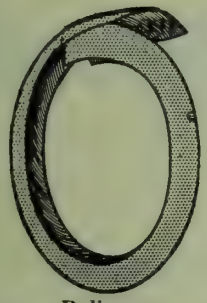
Think of the Mileage Since May 1!

Thousands of tubes and casings are needing repairs after summer touring.

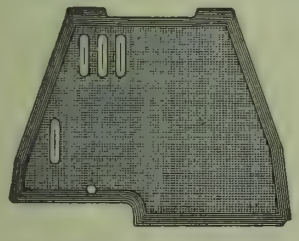
Sort Your Stock of---

GUTTA PERCHA

ACCESSORIES



Reliners



Heatproof Mats

Sort your stock now. Not only are there thousands of tubes and casings that have been used all summer and are now coming due for repairs, but there are yet many weeks of pleasant weather to wear out more.

Customers will be coming into your store rather often to ask for something to patch the "flat ones." Be ready to hand out the "Vulkapatch" and "Sealtite" with a reminder that they need no tools but the hands and the tube can be used at once. Tell them when the tube really goes that you can assure satisfaction with a "Gutta Percha" Tube.

Make Dominion Metallics Your Leaders This Fall

From BB Caps and .22's up to the speedy 30-30, Dominion Metallic Cartridges offer the dealer in ammunition a complete line which has long been famous for **dependability.** Even in the larger calibres, Dominion Ammunition holds enviable records.

Make these Metallics the basis of your ammunition stock this Fall—make them the leaders that will help increase your sales to sportsmen. Be sure your stock includes the Dominion .22 Super-Accurate and the New 30-30 with its extra speed of 200 feet per second. Both are big sellers, guaranteeing satisfaction to your customers.

Remember Dominion Ammunition is Dependable Ammunition, which you can safely back with your personal assurance.

Dominion Shot Shells hold many records at the traps and give genuine results in the field.

Check up your stock to-day, and order from your jobber.

Instantaneous take-down feature of Model No. 38 Rifle—the fastest selling .22 Repeater ever made.

Marlin

Repeaters

—the complete line

A remarkable selling combination! Guns that set the pace in design, accuracy and workmanship—and the most widely advertised—sold at new prices that set the pace in fast and profitable sales.

.22 Repeating Rifles

All Marlin .22 Caliber Rifles have: **Side-Ejection**—we discarded all old style top-ejecting guns 30 years ago. **Standard 24-inch Barrels**—we make no guns with stubby sawed-off barrels—**Standard Length Buttstocks—Ivory Bead Sights—Ballard Rifling—Take-Down,** easy to clean and convenient to carry—**Extra Quality Workmanship throughout.** They all shoot in the same rifle .22 Short, .22 Long and .22 Long-Rifle Cartridges.

Model No. 20—The premier repeating rifle for those who prefer the slide action and visible hammer. 25 Shots! Ivory Bead Sight! Full length octagon barrel! A man's size rifle—and a fast seller at its remarkably low price. Retails at a reasonable price.

Model No. 38, .22 Caliber Hammerless Repeating Rifle—sells on sight to all gun lovers. It is years ahead of all other .22 rifles in design, equipment and workmanship. **Ivory Bead Sight! Full pistol grip buttstock! Perfect build and balance! The instantaneous take-down,** with its many other superior features makes it **worth twice as much as any similar rifle,** yet it retails at reasonable prices.

Model No. 39—The only .22 Lever Action Repeater on the market. The choice of expert and professional shooters and all others who like to use the lever action in a small game and target rifle as well as in their big game rifles. **The best made .22 rifle in the world!** Retails at a reasonable price.

12 and 20-Gauge Shotguns

Marlin Repeating Shotguns are the best constructed and most up-to-date guns made.

Model No. 28, 12-Gauge Hammerless—Won the World's Championship at the last Olympic Games. The safest breech-loading shotgun ever built. Has perfect lines and more style than any other similar construction. A strongly built, powerful gun for use on ducks, geese, foxes, and all upland game and also for trap-shooting and other long range work. 6 Shots. Retails at a reasonable price.

Model No. 31, 20-Gauge Hammerless—the only real 20-gauge repeater. **Perfectly proportioned and built as a 20-gauge gun should be.** Handles with the utmost satisfaction the new powerful duck loads in 2¾-inch shells as well as the less powerful 2½-inch loads. A quick, light-weight, wonderful gun for all upland game and rail birds. 5 Shots Retails at a reasonable price.

Model No. 42, 12-Gauge Visible Hammer—A quick handling, hard-hitting, long-range gun that brings down the game far beyond the range of the average 12-gauge gun. Chambered to handle 2¾ and 2⅝-inch shells. **Quick Take-Down**—for convenient carrying and cleaning. 6 Shots. Retails at a reasonable price.

Marlin Big Game Rifles are made in .30-30, .32 Special, .32-40 and .38-55 calibers. They are ideal guns for hunting all North American Big Game.

DON'T DELAY ANOTHER DAY! Send us your firm name and address—get on our mailing list—receive our dealer co-operation—a most complete service. It means gun sales for you. Write us for the Marlin complete catalogue and dealer prices and selling helps.

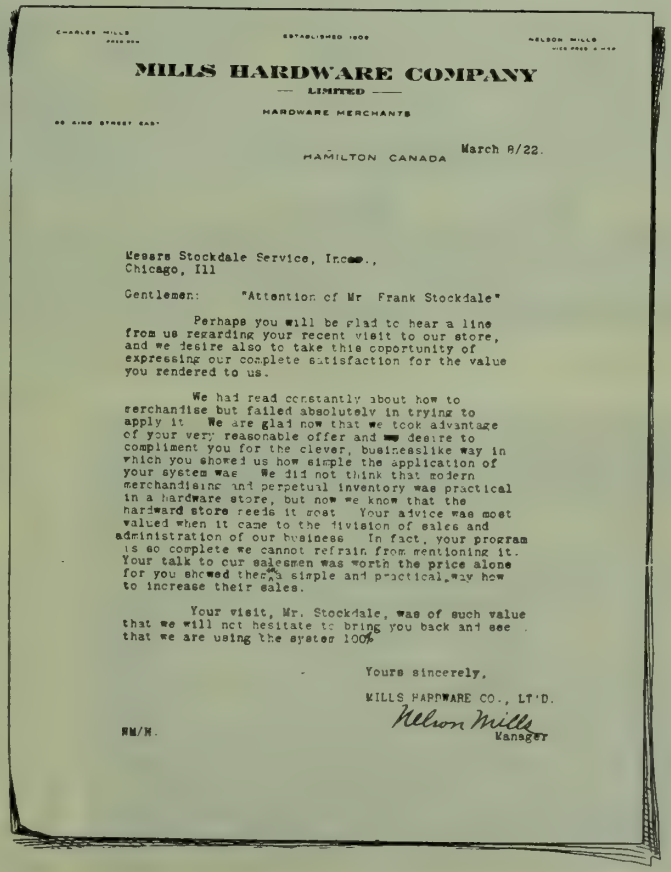
Evidence of the high opinion which Nelson Mills, Vice-President of the Mills Hardware Co., Hamilton, Ont., holds for the merchandising system installed in his store recently by Frank Stockdale is contained in the letter reproduced on this page from Mr. Mills to Mr. Stockdale of the Stockdale Service Inc. 115 S. Dearborn St., Chicago, Ill.



MILLS HARDWARE COMPANY
— LIMITED —
HARDWARE MERCHANTS

HAMILTON CANADA March 8/22.

Messrs Stockdale Service, Inc.,
Chicago, Ill

Gentlemen: "Attention of Mr Frank Stockdale"

Perhaps you will be glad to hear a line from us regarding your recent visit to our store, and we desire also to take this opportunity of expressing our complete satisfaction for the value you rendered to us.

We had read constantly about how to merchandise but failed absolutely in trying to apply it. We are glad now that we took advantage of your very reasonable offer and we desire to compliment you for the clever, businesslike way in which you showed us how simple the application of your system was. We did not think that modern merchandising and perpetual inventory was practical in a hardware store, but now we know that the hardward store needs it most. Your advice was most valued when it came to the division of sales and administration of our business. In fact, your program is so complete we cannot refrain from mentioning it. Your talk to our salesmen was worth the price alone for you showed them a simple and practical way how to increase their sales.

Your visit, Mr. Stockdale, was of such value that we will not hesitate to bring you back and see that we are using the system 100%.

Yours sincerely,

MILLS HARDWARE CO., LT'D.

The Original Keystone WESTCOTT Adjustable "S" Pipe Wrench

Makes a special appeal to your customers because it can be used in many out-of-the-way places quite inaccessible to the ordinary monkey-wrench. These efficient, reliable wrenches are made of first-class material, and are strong and durable.
These are the genuine Keystone "Westcott" wrenches, plainly trade marked "Westcott" on the handle. Many of your customers have used these exceptionally satisfactory wrenches for years and will replace them with no other kind. Display them well. Let the prospects know you have "Westcott" wrenches.
If your jobber cannot supply you, write us direct.

Portage Ave. Winnipeg

Western Canada Wheat Field

POSSIBILITIES OF THE GREAT WEST

The three Prairie Provinces have a land area of 454,789,678 acres. There are 178,000,000 acres fit for farming purposes but in 1921 only 35,847,000 acres were under cultivation.

The interior plains of Canada and the plains of Russia are the world's reserve granaries of hard spring wheat. The record production of Canadian wheat is 393,542,600 bushels (in 1915).

Canada, through the western provinces, has risen to second place in the world among wheat producing countries and Canadian wheat leads the world in quality. Nine-tenths of our wheat is grown in the west. Only one-tenth of our wheat lands are under cultivation.

"Wakyte" Chemical Closets
"Wakyte" Powder Chemical

WAKYTE MFG CO LTD · WINNIPEG · CANADA · TRADE MARK REGISTERED

Wakyte Products
of Quality in "Wakyte" Toys
"Wakyte" Weather Strip

The name "WAKYTE" on a product helps to build your reputation for honest merchandise at fair prices. The goods here described are made in Canada and are endorsed by thousands of satisfied users in all parts of the Dominion.

"WAKYTE" CHEMICAL CLOSETS

Here Are Some Popular Sellers

PATENTED

Chemical Closets That BUILD BUSINESS

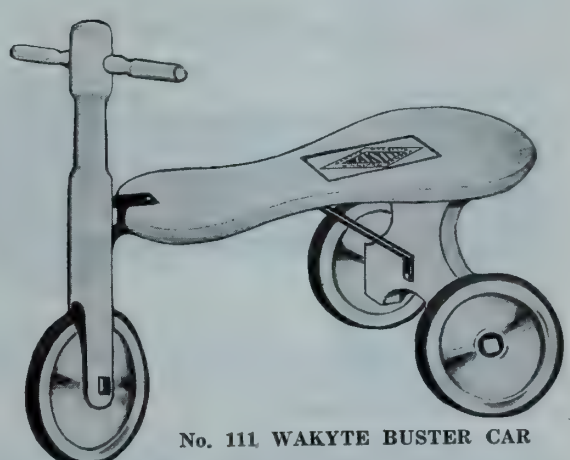
Wakyte Sanitary Chemical Closets fill a long felt want in districts where recognized conveniences are not found. A specially designed article with corrugated iron body, and with selling points that give service to the buyer, and a quick turnover and substantial profit for the dealer.

Wakyte Powder Chemical

We strongly recommend Wakyte Powder Chemical for use in all Sanitary Chemical Closets. In addition to containing much greater disinfecting properties than liquid chemical, it may be shipped under any weather conditions without loss or damage. Put up in attractive lithographed cans.

Wakyte Weather Strip

Made of selected oak nicely finished with green felt. Groove is made in the oak, and felt is firmly forced into groove, and then glued, giving it splendid wearing qualities and longer life.



No. 111 WAKYTE BUSTER CAR

is equipped with three pressed steel disc wheels and rubber tires. The body is artistically finished in Canary Yellow Enamel; wheels in Vermilion Enamel. Same size as No. 100, shipped three to a crate.

THE SWAN WEATHER STRIP

is made of WOOD and FELT

(PATENTED)

The wood is selected Fir, nicely finished. The felt is manufactured specially of lasting quality. Color, green.

Holes are drilled to prevent splitting. Nails are supplied with every set.

The top ends of the side pieces are coved so as to make a neat joint.

A set for a door is composed of two pieces 7 feet long for the two sides, and two pieces 3 feet long for top and bottom.

For shipping it is put up in bundles of ten sets and weighs 15 lbs.

BURGESS BATTERIES

Sitting on Top of the World

Just about expresses the position of Burgess "B"

Wireless Batteries

Absolutely Noiseless—Weak and distant audio frequency signals can be received with Multistage Amplifiers and Burgess "B" Batteries because Burgess "B" Batteries DO NOT DROWN OUT signals. Burgess "B" Batteries assure clear receiving. They will increase the efficiency of any receiving set and are cheaper in hours of service.

Burgess "B" Batteries
Not an Assembly of Flashlight Cells

Burgess "B," the Radio Battery, has been manufactured for wireless use since the infancy of radio. Burgess "B" Batteries **never have been, nor are they now, merely assemblies of flashlight cells.**

Burgess "B" Batteries were designed by radio experts for exclusive radio use, and these radio features are **fully patented.** You will find this special radio construction in Burgess "B" Batteries only.

BURGESS UNIPLEX BATTERIES

are assembled in a waterproof container of felt and asphaltum that absolutely prevents short circuiting from moisture.

Large insulated nuts make use of pliers unnecessary.

Connections and terminals are so carefully insulated that it is impossible to have accidental short circuit.

BURGESS NO. 6 DRY CELLS

Over fifty different features, patented for our exclusive use, combine to ensure supremacy for the Burgess line of batteries and accessories.

Burgess Flashlight Batteries, sold in unsealed cartons, are typical "BURGESS" leaders; they have strong brass terminals, heavy seamless zinc containers, and are uniform in size and quality.

The Truth About Roofing

"The first letter on 'The Truth About Roofing' has been somewhat delayed but will doubtless be in your hands by the time this notice appears. If your copy has not been received, please advise us immediately, for it may be possible that our mailing list is at fault. We would earnestly urge you to read this letter carefully, making a mental memorandum of each statement, for in this letter we have been obliged to go into considerable introductory detail. In our next letter, however, we will give you plain cold facts in terse terms, which will be very much to the point. What we have said in our first letter will be to some extent a key to what is to follow.

Remember we are not trying to advertise our products and what we shall accomplish by our series of letters will be of great value to all those interested in the roofing industry."

"Additional copies of our letter can be secured from our warehouses and sales offices at Halifax, St John, Montreal and Winnipeg, but we would suggest that you send direct to Windsor to be sure that your name is on our mailing list."

C·C·M· Automobile Skates

Canada Cycle & Motor Co.
LIMITED
WESTON - ONTARIO
Montreal
TORONTO
Winnipeg, Vancouver

Last year and the year previous were mild winters. To have a third successive open winter would be unprecedented. So, by all odds,

A Hard Cold Winter is Due

Prepare for it now. Look over your skate stock. Book your order for the sizes you are low in.

Don't forget to have a good stock of C. C. M. Bob Skates ready for the young boys, and an ample supply of C. C. M. Improved Steel Ankle Supports for those with weak ankles.

And send for the new C. C. M. Skate Catalogue. See the improvements and the new models for the coming season.

MAYTAG

invites you to call at Booth 52A, Canadian National Exhibition, Toronto, and see

"A Tempest In a Tub"

This is the only phrase that properly describes the action of the water created by

"THE GYRATOR"

in the

"NEW MAYTAG GYRAFOAM WASHER"

The only absolutely new principle of washing, and the greatest improvement in washing machine construction in the past ten years.

Cast Aluminum Tub

Rot proof, warp proof, dent proof, sanitary, self cleaning.

Famous Maytag Divided Wringer

All metal, automatic tension, automatic reversing drain board, lightning quick tension release.

Profitable Dealer's Proposition

Factory representatives in attendance at the booth. Canadian dealers can make territory arrangements.

THE MAYTAG COMPANY
Newton, Ia. **Philadelphia, Pa.**

COAL BASKETS FIRE SETS and FIREPLACE FURNISHINGS THAT WILL PLEASE

No. 851 (4 piece)

SAMPLES SHOULD BE ON YOUR FLOOR TO TAKE CARE OF EARLY FALL TRADE.

There is already a big demand due to the serious coal shortage.

WRITE for Catalogue and place your order at once to insure early delivery.

ELBOWS

Collins' riveted elbows are well made from good material. We have them in the following sizes:

Black Iron

3"....90°	3"....45°
4"....90°	4"....45°
6"....90°	6"....45°
7"....90°	7"....45°

Galvanized Iron

6"....90°	6"....45°
7"....90°	7"....45°
8"....90°	8"....45°

Ask for
COLLINS

Safety Stove Pipes

The Kind With The Split Rivet

Collins' stove pipes are made with the utmost care. Every length is inspected and is a sure fit. The iron is of the best quality and enables the dealer to sell at the top price. There is an excellent margin of profit for the dealer who sells Collins' pipe. We make galvanized pipe in the knocked down pattern.

QUALITY OIL CANS

Plain Spout Cans

These are made with large, strong spout. Oil flows quickly and without gurgles.

Side Rest Cans

Made from heavy materials, with quick shutting-off faucet.

Shipping Containers

The jacketed cans are covered with a galvanized iron jacket instead of wood. They will not get punctured in the side as easily as the wood veneer cans.

Never-Fail Oil Cans

On the market for ten years and still going strong. The handiest oil can yet invented. No lifting to empty, thus cleaner to handle. Pours quicker than any other style and shuts off as quick as a wink when you touch the valve. The price is away down now, so sales are large. Get in on this good thing and order a stock at once.

ASBESTOS LINED THIMBLES

Taper Pipes, T Pipes, Dampers, etc. Our thimbles are made right, easy to put in position, easily sold. Absolutely fireproof.

8" to 16" Floor Extension Thimble

We are makers of celluloid leg bands for poultry, also aluminum bands.

We have a new catalog illustrating many new styles of feed boxes, grit boxes, etc.

Write for catalog and prices.

Barrett Roofings, Cements Industrial Paints etc.

It Always Pays to Keep in Stock These Popular Barrett Products

WISE dealers and their customers all over the Dominion have learned that the name "Barrett" signifies quality,—that Barrett products are backed by long years of manufacturing experience, and that each of them is the best on the market for its particular use. Here are two of these famous products which are fast sellers everywhere. It will pay you to keep them always in stock.

Everlastic Liquid Roofing Cement

Unequalled for resurfacing worn-out prepared and "rubber" roofing. Easily applied, and dries quickly into a tough, durable coating. Proof against weather, water, acids, alkalies, and fumes. Comes ready for use in containers ranging from 1-pint tins to 40-gallon barrels and steel drums containing 43 gallons. Our consumer advertising has created a big demand for this product. It's a fast seller and a big profit maker.

Everlastic "Rubber" Roofing

This is a popular-priced roofing of unusually high quality. It is made of high grade waterproofing materials, and will give your customers sure satisfaction.

There is a big market in every community for this roofing, and during the past few years its sales have increased enormously. Everlastic "Rubber" Roofing comes in 1-ply (light weight), 2-ply (medium weight), and 3-ply (heavy weight), in rolls containing 108 sq. ft. Nails and cement are packed with each roll.

These buildings covered with Everlastic "Rubber" Roofing

The Factory of the Pedlar People Limited

Largest and Most Modern Sheet Metal Plant in the Empire

Pedlar's Steel Shingles

"George" and "Oshawa"

Protection!—In that one word is summed up the function of Pedlar's Steel Shingles.

Protection from fire, protection from lightning, protection from the weather—and this protection endures for years.

When the farmer is told about the many advantages of using steel shingles for his barns and outhouses, much profitable business ensues for the dealer who tells him.

Why Not Be That Dealer ?

Display Pedlar's Steel Shingles, talk steel shingles and you'll sell steel shingles.

Write For Quotations

Galvanized Iron Sheets—Black Sheets—Corrugated Iron—Corro—Crimp Roofing—Metal Ceilings and Walls—Metal Lath—Metal Corner Heads—"Steelcrete"—Metal Culverts—Metal-Clad Garages.

These three VIKO Roasters will be featured in the September and October national magazines to women.

Big Roaster Sales with VIKO this Fall

Now for a big season selling Viko Aluminum Roasters.

Viko Roasters will receive national advertising during September and October in the magazines which housewives read.

Make your plans right now. Turn the attention of the housewives to *your store* as the place where they can buy nationally advertised Viko Roasters. Write your jobber for the new, three-piece, brightly colored Viko Roaster trim.

Women prefer aluminum utensils for roasting and cooking. VIKO, The Popular Aluminum, is a big value at a very moderate price. It is durable. It is a trade-builder because it gives thorough satisfaction and is guaranteed. There are styles, sizes and prices for every need.

The Viko line offers you a good profit on every article and creates "repeat" patronage. Get ready, today, for "regular profit" Viko Roaster business. For further information—*Ask your jobber.*

Tell Them to Use Desolvo!

When any plumbers or in fact any other customers come into your store and ask regarding something that will clean clogged or frozen pipe, without necessarily having to tear up floors, lawns, etc., show them and recommend

Desolvo Sewer and Drain Pipe Cleaner

Directions call for it to be simply mixed with cold water to prepare it. It makes profitable sales and saves time and money for you on your own jobs.

Order from your Jobber.

ROYAL PURPLE
Stock and Poultry Foods and Remedies

To the Hardware Trade:

About 8 years ago we commenced introducing our Royal Purple Stock and Poultry Remedies and Foods through the Hardware Stores. Previous to that time our goods were being sold to General and Grocery Stores and Feed Stores. We found that there was keen competition between the different Merchandising Companies, and considerable price cutting.

In order to avoid this we decided to go to the Hardware Trade wherever possible, as we found very little price cutting in this class of business, and instead of there being several stores in the same line of business, we found that there was just one Hardware Store in the small towns, and that the trade generally would be split up between the other lines of business, but all the people would come to the one Hardware Store.

We found it difficult in the beginning to get the Hardware Men interested in our class of goods, but after our representatives got a few interested in selling our line they found their business rapidly increased in all the centres where our goods were handled by the Hardware Stores.

The following are the different lines of Goods we manufacture:

Royal Purple Stock Specific
Royal Purple Poultry Specific
Royal Purple Lice Killer
Royal Purple Cough Cure
Royal Purple Gall Cure
Royal Purple Sweat Liniment
Royal Purple Disinfectant
Royal Purple Worm Powders
Royal Purple Roup Cure
Royal Purple Colic Cure
Royal Purple Fly Oil
Royal Purple Chick Feed
Royal Purple Scratch Feed
Royal Purple Developing Meal
Royal Purple Laying Meal
Royal Purple Calf Meal
Royal Purple Linseed Meal (32% Oil)

We also carry Oyster Shell, Grit, Oil Cake, Epsom Salts, Sulphur, Beef Scrap, Beef Meal, Bone and Charcoal, and Sunflower Seed.

MR. HARDWARE MAN, if you are not handling our Royal Purple Supplies in your store, just write us and we will send you a full supply of advertising matter, explaining the big campaign of advertising we put on each season, mailing three times to the Farmers, between November and April, and we will also send you an Order Blank giving you the Wholesale and Retail Price of our goods. You receive 50% profit on all the Package Goods we manufacture.

You will find you will want our goods just as badly as we want your business, when you see the enormous demand we create for all these different supplies. There is more Royal Purple Calf Meal sold in Canada than all other Brands combined, at the present time.

For full particulars, write

To Holders of Five Year 5½ per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Dated at Ottawa, 8th August, 1922.

September First

issue will feature another complete Novelette

"Lady of Ventures"

By ANN GAY

A young and charming young lady dances through a maze of mysteriously surprising adventures.
A mystery story without a crime. Montreal at its best by a lady who knows it well and who throws the fascinating glamor of a charming romance over scenes and locations familiar to many Canadians.

Irresistibly funny
Ludicrously laughable
Excruciatingly humorous
Is Napier Moore's gem

"A Case of Amnesia"

Don't miss this

Other fine features

J. K. Munro—Follows shrinking politicians to their vacation lairs.

Col. Geo. Ham—In another of his inimitable Western Reminiscences. Calgary from Tent to Ten Stories.

Mugsey—John Gowan; a very human document featuring a canine hero.

Success—Beatrice Redpath builds us a fine story of the love of two men for one woman.

"Human Nature and the Postman," by Gertrude E. S. Pringle. More of the colorful "Merchantmen of the Seven Seas." The Woman's Department and the Scout's Page.

and another exciting section of the "Timber Pirate"

All these in the Sept. 1st Issue of

September First Issue

MACLEAN'S

"CANADA'S NATIONAL MAGAZINE"

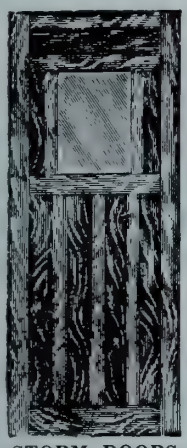
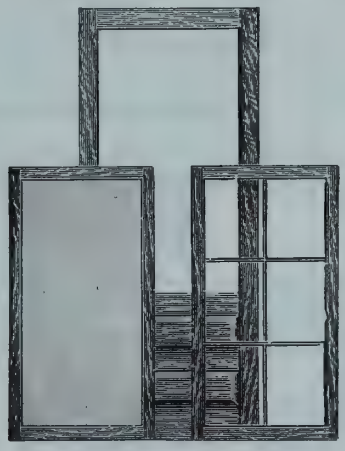
BRANTFORD

ALL YEAR AROUND

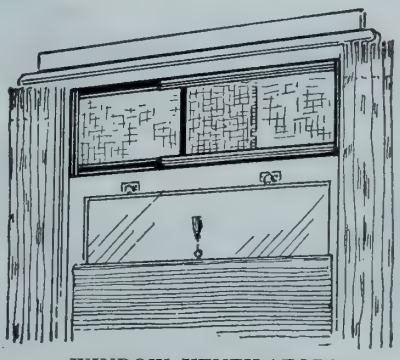
BUSINESS BRINGERS



STORM DOORS



COMBINATION
SCREEN AND STORM DOORS



WINDOW VENTILATORS

With coal scarce and high in price every live hardware man is going to put in a good stock of Brantford Storm and Combination Doors. These doors will save many a ton of coal and pay for themselves before the winter is half over. Get them on the floor as soon as the screen door and refrigerator season is over and get the all-year-around business.

Draft Screen Window Ventilators. There's going to be almost as much demand for them for the windows in winter as for fly screens in summer. Lets in the fresh air, keeps out the draft and snow, dust and dirt. Get some of this business; there is going to be a lot of it.

Refrigerators

30 different styles and sizes. The old reliable "Brantford Line," Canada's leading refrigerator for over a quarter century.

The reason—The best refrigerators made. All guaranteed.

Screen Doors and Window Screens

The complete line. Every style and size desired. 20 different patterns of doors. Only one standard of quality—the best.

Write for catalogues and prices.

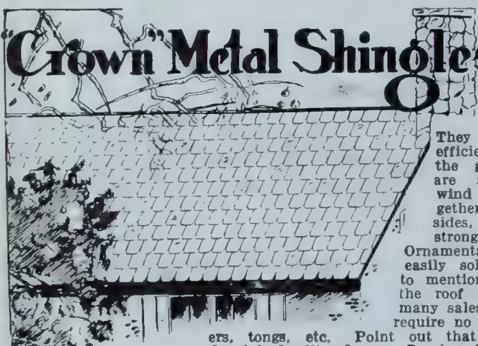
"Crown" Metal Shingles

Will Outlast Them All



They are being used where efficiency in roofing is of the greatest concern. They are absolutely storm and wind proof. Locked together securely on all four sides, they make the strongest roof on the market. Ornamental in design; they are easily sold and you have only to mention the ease with which the roof can be laid to make many sales. Point out that they require no solder, mallets, seamers, tongs, etc. Point out that they are made from **Special Quality Copper Bearing Shingle Plate**, a guarantee of their long life. We will be pleased to give you further details or any advice on sheet metal work—write us.

FLY TERROR

Sells to Boy Scouts

Boy Scouts, Prospectors, Surveyors, Lumbermen, Hunters, etc., all have use for Fly Terror—more than a "use." They have a crying, pressing, urgent necessity for Fly Terror. Advertise it and display it in the windows. It, at last, supplies a long standing need for a fly and mosquito repellant agreeable in odor and pleasant to use, non-injurious, not greasy, nor poisonous. Fly Terror affords complete protection for those exposed to the distressing attacks of mosquitoes and black flies.

MADE IN CANADA.

The Fly Terror Manufacturing Reg'd.

7 Notre Dame Square, Quebec, Canada

Why Fence Business Will Be Good This Fall

Many farmers will put up fence this Fall. They have the money now because of this year's excellent crops. They'll have the time as soon as harvest is over. Autumn, when their land is dry and clean, is a good time to fence.

The name Peerless on fencing means much to the farmer. He knows Peerless Fence by reputation or experience. He knows he is buying fence unexcelled for strength, durability and fine appearance.

Be sure you have an adequate supply of Peerless Fence to take care of your customers' requirements. Look your stock over now and sort up for fall business.

A Beautiful Roof that Wears for Years

Building for permanence and handsome appearance is the spirit of the time. The advances in home architecture are equalled by such artistic and enduring material as Brantford Asphalt Slates.

The home builder is assured of absolute roofing security, economy in construction, and beauty that harmonizes with natural surroundings.

The Asphalt coating of Brantford Asphalt Slates is surfaced on the weather sides with real, crushed slate in its natural colors (red, green and black). The colors are permanent. There is no expense for staining or painting. The slates are close-fitting, non-curling, fire-resistant and withstand the extremes of climate.

Brantford Slab Slates (four slates in one strip) and Brantford Crystal Roofing (in rolls) are other forms of the same high standard roofing.

Brantford Asphalt Slates

Distributed under Brantford Roofing Trade Marks, through Brantford Roofing Dealers. Stock carried, information furnished, service rendered by our dealer in your district.

The Ansonia *Sunwatch*

The Ansonia Sunwatch is a combination Compass and Sun-Dial, in a thin, satin-finished brass case, with longitude, latitude and variation tables on inside of cover, giving corrections for all parts of Canada. (The American Sunwatch is not adjusted for Canadian longitude and latitude.) The Compass is accurate and reliable, and the Sun-Dial tells the correct time anywhere in Canada.

Invaluable to motorists, hunters, fishermen, canoeists, Boy and Girl Scouts, guides and all outdoor people. It sells for $1.50, and is so attractively made that it is bought on sight.

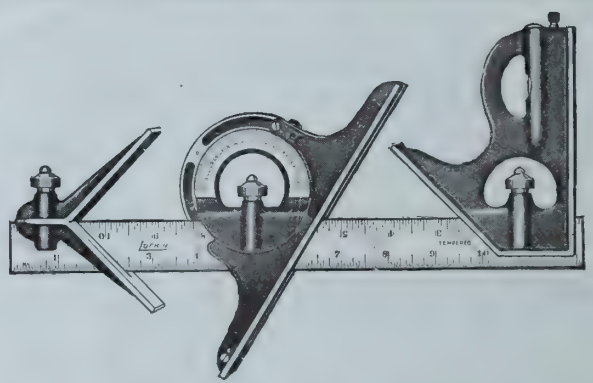
LUFKIN

COMBINATION SQUARES



LUFKIN

BEVEL PROTRACTORS
COMBINATION SETS

JUST PUT THEM ON DISPLAY

At a glance every mechanic's eye will be caught by their nicety of design and finish, and their distinctive color.
On closer inspection he will see among other improvements that both legs of center head are exactly same length and ends formed, insuring accuracy on any circumference, large or small. That the double protractor is readily convertible into single protractor, serving perfectly for every sort of work.

SEND FOR CATALOGUE — LUFKIN — MECHANICS' TOOLS

COMBINATION SQUARES, STEEL SCALES, HOOK SCALES, DEPTH GAGES, THICKNESS GAGES, CENTER GAGES, STEEL REFERENCE TABLES, FOLDING STEEL RULES, THE "UNIVERSAL" TRY AND MITRE SQUARES FOR WOODWORKERS (with and without level).

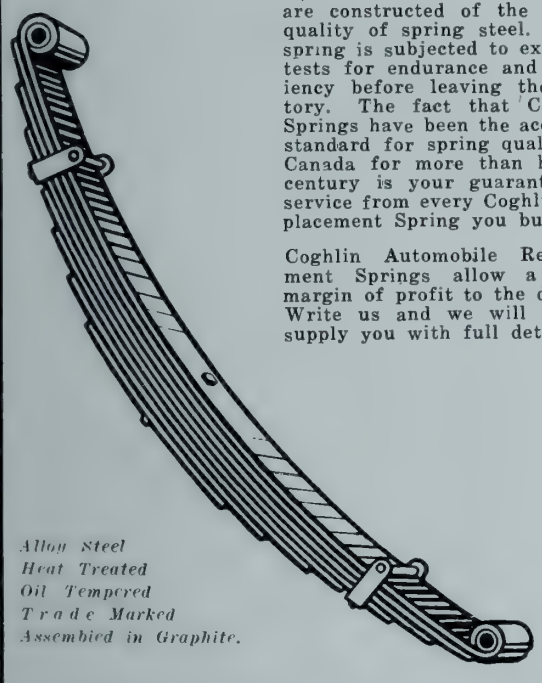
Springs---for all makes of motor cars. **Lyon Resilient Bumpers**---the all-spring steel automobile bumpers. **Crow Bars** and a general line of track tools.

COGHLIN SPRINGS

for all makes of cars



Alloy Steel
Heat Treated
Oil Tempered
Trade Marked
Assembled in Graphite.

are constructed of the finest quality of spring steel. Each spring is subjected to exacting tests for endurance and resiliency before leaving the factory. The fact that Coghlin Springs have been the accepted standard for spring quality in Canada for more than half a century is your guarantee of service from every Coghlin Replacement Spring you buy.

Coghlin Automobile Replacement Springs allow a good margin of profit to the dealer. Write us and we will gladly supply you with full details.

Lyon Bumper

The Only ALL-SPRING STEEL BUMPERS

LYON *Resilient* BUMPERS

Made of the finest spring steel, oil-tempered and heat-treated. They absorb the blows of collision impact as effectively as the springs of your car cushion the jolts and jars of rough roads. The Lyon Resilient Bumper is the only bumper that can be **repeatedly** bumped without becoming a shapeless mass.

What Columbias Do

—ring doorbells
—buzz buzzers
—provide ignition for Fords when starting.
—fire blasts.
—run toys.
—make telephones talk up.
—furnish ignition for gas engines.

Long life, high ignition power, low cost, all make Columbias the favorite Dry Cell in thousands of homes, on farms, and for industrial uses.

Your customers will appreciate the longer service which only Columbias give. This long life reduces the cost of ignition. The simplicity of Columbias enables any person to make the simple connections which bring the full power of Columbias into action.

Columbias are the only dry batteries consistently advertised on a nation-wide scale.

Order Columbias by name from your Jobber.

A Trim That Trims All Others

"Your window trims are the most strikingly colored, attractive and effective trims I have ever seen." That is the frank opinion of a man who has spent his whole life studying merchandising.

Have you seen one of these Diamond Ware or Pearl Ware trims? There are four—two Diamond, two Pearl. They are going very fast, these trims. To make sure of getting one write at once or place your order with our traveller.

Send For Free Price Tags

Our stock of free price tags is also getting alarmingly low, the chief reason being that merchants all over Canada are finding them most useful and effective not only in the store but for use in window displays. We believe that the effectiveness of a window trim is increased 50% by having a price tag with price clearly marked on every utensil in the display.

Some very valuable pointers on window and store dressing with several diagrams of good window lay-outs are contained in our little Manual of Selling Points—"Helping You to Make More Money." Free, of course! Send for it right away.

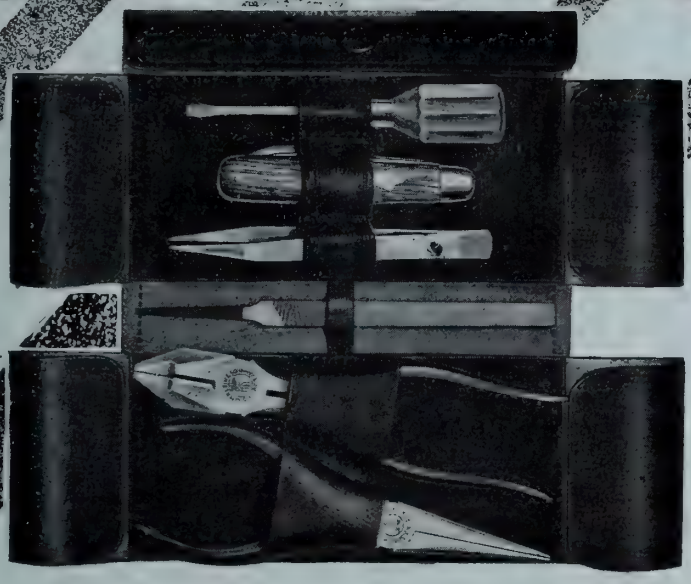
it's a Winner



The Klein Radio Tool Kit is a good all-year-round business-getter. Not only radio men, but the fellow who tinkers with his car, the "house mechanic," the electrician, the battery man—all are live prospects for this neat, compact pocket kit.

Put up in a snappy, full leather, wax-stitched pocket case—this kit includes one Klein 5-inch long-nose plier, one Klein 6-inch side-cutting plier, small screw driver, electrician's knife, a high-grade file and electrician's tweezers.

Costs $5.35 (F.O.B. Chicago), and sells over the counter at $7.50 (F.O.B. Chicago).

Wire your jobber or us your order for a dozen kits and display material to-day!

A TIME TO THINK

Just about this time of year the matter of Lawn Mowers for next season is a problem that must be settled.

Please pause for a moment and consider that the SMART MOWERS have been giving satisfaction for over two generations in every country of the world.

It surely pays better to handle a known line of Lawn Mowers backed by a service organization such as the SMART people at Brockville maintain.

The Mowers the Neighbors want to borrow

Two Important Points About GUTTA PERCHA ACCESSORIES

TRADE MARK GP BRAND

1. **They have proven that they sell well by doing it all over the Dominion.**
2. **There is a fair, just and worth-while profit in them for merchants.**

Hardwaremen all over Canada have been amazed at the volume of business that can be built with Auto Accessories. When your jobber devotes two or three hundred-page catalogues to accessories, it must be a paying branch of the hardware business. It is especially paying for the merchant when you get into the Accessory business right—with a complete, well-chosen line of "Gutta Percha" Accessories, backed by the established merit of "G.P." products and continuous advertising.

SEMI-ROTARY WING PUMPS

Are BRITISH MANUFACTURE Throughout.

The "Runwell" Semi-Rotary Wing Pumps are **British Manufacture**, and by reason of their general adaptability for a variety of circumstances, where a reliable and efficient pump is necessary, are becoming increasingly popular. The pumps are liberally designed to withstand rough usage and to give the full capacity specified. They are subjected to a rigid examination and are also tested under working conditions.

The "Runwell" Semi-Rotary is easy to manipulate and is designed to raise more water than any other type of hand-operated pump. All pumps have counter flanges fitted to branches, tapped Briggs standard thread.

Your Delivery Problem is Part of Your Sales Problem

Light delivery cars entail less labor and preparation than horses.
They are always ready.
They are more economical.
They extend the retail merchant's field.
They are good advertising.
And by improved service to your customers and by good advertising you get and keep customers.

A Three-Speed Chassis For Standard Bodies

There has been an insistent demand for a light delivery car, embodying the structural advantages that have made the Overland passenger car widely known for sturdiness, reliability and economy, and at a price that would make it profitable to the average merchant.

Here it is—a chassis designed to take a standard delivery body and built with the same strong frame used in Overland passenger cars and with the famous Triplex Springs that make for economy of operation and protection against road shocks.

To Holders of Five-Year 5½ per cent. Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent. interest, payable half yearly, of either of the following classes:—

(a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.

(b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Dated at Ottawa, 8th August, 1922.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

Division of Opinion Over Stamp Taxes

Montreal Metal and Hardware Association Take Definite Action to Collect Stamp Tax From Debtor—Canadian Wholesale Hardware Association Not Framing Definite Policy Yet But President Not Favorable to Passing Tax On—Retailers Express Varied Opinions

EDITOR'S NOTE:—The question of establishing policy in connection with the collection of Stamp Tax on drafts from the debtor still represents a broad division of opinion among retailers, wholesalers and manufacturers. Interviews appearing herewith show that definite action has been taken by one eastern association representing both wholesalers and manufacturers of hardware. That the action of the wholesalers in that association is not representative of the opinion of others is found in the fact that the Canadian Wholesale Hardware Association declines to lay down any definite policy as yet and the president is known to be unfavorable to the idea as expressed in an interview in last week's issue of Hardware and Metal. Meanwhile certain of the larger manufacturers and wholesalers are taking no action and while retailers are divided in opinion to some extent, the majority are unfavorable to passing on to them the Stamp Tax unless they specially request to be drawn on by drafts.

COLONEL Robert Starke, president of Starke, Seybold, Ltd., wholesale hardware firm of Montreal and president of the Montreal Metal and Hardware Association, announces that at a meeting of this organization it has been decided that members collect from their customers the stamp tax on drafts, and it was recommended that the following notation be placed on every statement so that all customers would be advised that the tax on the draft would be charged them if accounts were not settled otherwise.

"Unless we hear from you to the contrary, we will draw on you on ..... adding amount of stamp tax to draft."

It was pointed out that while in many cases the amount of the tax involved was small, the aggregate amount would be large enough for serious consideration and there was no doubt that the absorption of the tax by manufacturers and wholesalers would eventually result in customers settling none of their accounts by cheques, whereas the adoption of a system of charging the draft tax to customers would have the contrary effect, that is: it would result in the payment of nearly all accounts by cheque which would be a much more satisfactory system for the trade.

When asked if he thought many of their customers, who formerly took advantage of the cash discount and paid by cheque, would now await the receipt of draft, thus avoiding payment of the stamp tax, Col. Starke said that this remained to be seen. "Undoubtedly there were many customers who would not, realizing that a cash payment meant more to them than the stamp tax. However, the procedure of increasing the amount on drafts was not a pleasant one as there were bound to be dealers who would take exception to it, many of them who were very good customers. While the amount would be comparatively small on a single draft some merchants would not stop to think in what position the wholesaler was placed when asked to shoulder the burden for a period of twelve months dealing with hundreds of customers."

The system of including the amount of stamps necessary in the amount drawn on drafts seems to have gained favor among wholesalers, as another large jobbing house stated that they were already advising the trade that in future unless payment is made by cheque a draft covering the tax amount will follow. Attention was drawn to the fact that in the every-day business life of the wholesaler, payments of varying large amounts are paid to manufacturers which in every case must include the necessary stamps. It was pointed out that in a year this amounted to a surprisingly high sum, and to ask the wholesaler to again bear the burden of the stamp tax on his sales by affixing the necessary stamps on drafts should be surely considered an injustice to the jobbing house, or middle man.

Many Drafts Unaccepted

Payment by draft was very extensively used by the customers of this house, especially at the present time, and no doubt with all other wholesalers. If every draft sent out was accepted, the present legislation would not reach such serious proportions, but owing to the number which are returned almost daily, the expenditure on stamps will amount to thousands of dollars in a year's time. For instance, on a bad debt it is often necessary to issue a draft on several occasions and each time this is sent out it means an extra unnecessary expense in collection which the wholesaler must shoulder. To overcome the difficulty the only apparent method was to ask the retailer to pay the tax on all his payments, and the opinion was expressed that this would not be objected to by most dealers when it was considered that the wholesaler must do likewise to the manufacturer. One wholesaler stated that there would be really no injustice to the retailer if he was asked to pay this tax, as payment by cheque now necessitated it, so why not payment by draft?

From the standpoint of the retailer the question naturally has a little different aspect, although in most cases it would appear that the regulation will make little or no difference in payments. "We have always paid by cheque and will, I hope, always continue to do so," said F. Max Hill, manager of James Walker Hardware Company. "It is true that when we pay by cheque we are forced to affix the necessary stamps, but this does not offset the advantage we have in the discount when a cash payment is made. We have heard that

in future wholesalers will ask payment of this tax in the amount of draft so that it will really make no difference."

No Action by Wholesale Hardware Association

The secretary of the Canadian Wholesale Hardware Association discussing the subject with Hardware and Metal pointed out that while certain other organizations were taking steps to pass this tax on, the Canadian Wholesale Hardware Association was not forming any definite policy in the matter as yet and no action would probably be taken at least until the annual meeting to be held in October. It was pointed out that opinion was very divided on the subject, that while certain Montreal wholesalers were taking steps to collect the tax on drafts yet the president of the association does not favor this action. It was stated that manufacturers are chiefly urging the passing on of this tax to debtors and if they decide to do it unanimously the wholesaler will hardly agree to be in the position of having to pay stamp taxes of both the manufacturer and retailer.

Cannot Pass on to Consumer

Some further opinions of hardware retailers on the subject are as follows:

Geo. A. Elliott, of Elliott's Hardware, Brantford, Ont., says: "We strongly object to another tax being added to the retailers' burden. It will soon be that the wholesaler will want us to buy his stationery and pay for the office boy. The retailer is called upon to assume every expense connected with his business such as delivery of goods to customer—which in many cases the jobber escapes. Put us on record as objecting to paying for stamps on jobbers' and manufacturers' drafts."

Bernhardt Hardware Preston, Ont.—"We believe the intention of the Stamp Tax is to split up taxation and not to push it on to the ultimate consumer any more than possible. If the manufacturer passes this tax to the retailer and the latter cannot afford to pay it in addition to receipt taxes, sales taxes, etc., it will be necessary to pass it along to the public.

"As regards cost of collecting accounts why should not the manufacturer bear his share of this? The retailer cannot add costs of collection directly on accounts he collects from the public."

Taking the stand that it may be just as fair that the retailer should pay the stamp tax as that the wholesaler and manufacturer should bear it, Carter Bros., Picton, Ont., state: "We all have troubles of our own but we think the wholesaler and manufacturer has to stand up under the biggest burden."

I. W. Bennett & Son, Gananoque, Ont.—"Our interpretation of the Revised Stamp Law which came into effect on August 1st is that the tax belongs to the debtor, and we feel if a draft were made on us by a wholesaler or manufacturer that it would be quite legitimate to charge us with the stamp tax which we would have to pay providing we sent a remittance by cheque. It would seem to us that it would be desirable to have the government define definitely the party to whom this tax belongs, that is the seller or the debtor, inasmuch as there appears to be some confusion on the point. We would then all be operating on common ground."

Receipt Tax Being Framed On Basis of English Act

"THERE isn't a chance in the world of the tax on receipts being modified or abolished before the next session of parliament, and it is doubtful if any attempt will be made even then to interfere with it," said a high official of the Department of Customs and Excise to the Ottawa representative of Hardware and Metal, a few days ago.

The official's attention was drawn to the fact that retailers in convention in various parts of the Dominion were placing themselves on record as being strongly opposed to the new law, but he simply smiled a knowing smile and said it was only natural that men should kick over the traces when burdened with a new form of taxation.

"The country needs the money," he said, "and we are satisfied that quite a lot will be raised by means of the receipt tax."

"Well then what about the regulations that are to govern the new tax?" was the next question.

"They will be issued in plenty of time," replied the official. "I expect it will be about the middle of October before we have them ready. You know we are conducting a thorough investigation of the operation of the receipt tax in the old country, and it is more than likely that we will adopt regulations similar to those in existence there. The receipt tax has been in force in England for several years and has been working out very satisfactorily."

The official then switched the conversation to the stamp and sales tax and waxed enthusiastic over the results which have been secured of late. "The amendment to the stamp tax has only been in force a few days," he said, "but from the time it went into force on the first of August, until to-day (August 12) there has been a 400 per cent. increase in revenue, over the corresponding period in July. Taking the same periods for comparative purposes, there has been a fifty per cent. increase in the sales tax, while the revenue produced by the combined taxes (stamp and sales) has been exactly double that collected in the first ten days in July."

QUESTION RE WORKMAN'S HOURS

A retail hardwareman has made the following enquiry of Hardware and Metal:—"A workman is employed by the week, ten hour days. He reports for work at 7 a. m. and drives out to work. His ten hours are up at 6. Should he quit work at 6 p. m. or should he quit work at such a time that he can reach the place he started from at 6 p. m.?"

Taking this question up with other hardwaremen facing the same question two opinions on the subject are as follows:—1. Where the workman has not to report to the office in the morning and at quitting time I would want him at his place of work at 7 a. m. and not quit until 6 p. m., no matter what part of the city he was working in. But if he had to report at the office before going to work and before going home at quitting time in the evening, I would say his hours would be 7 a. m. at the place and 6 p. m. at the office. 2. I would establish the rule one way or the other; report at store one way at 7 a.m. and 6 p. m. and charge customer only for time workman was on the job, or if I could rely on the man I would save time and money by allowing him to report at the job only.

ACTIVE TRADE IN BUILDERS' HARDWARE

London, Ont.—In spite of an acute scarcity of brick there is no let up in the building activity here, and permits now are almost certain to pass the $3,000,000 mark for the year, a new high record. As a result of the unusually large amount of home building this season, hardware merchants have been enjoying a really splendid trade not only in tools and all lines of builders' hardware, but in household merchandise of all kinds. Large sales of electrical equipment, lighting fixtures, washing machines, vacuum cleaners, etc., are reported.

The season will make perhaps a new record for paints and house and floor finishes. The turnover of many hardware merchants is showing an unusually large and very satisfactory increase to date, with every indication that sales are going to be maintained. Farmers have been large buyers of paints this season but at that they are not in it with the city trade. The results of the Save The Surface campaigns are being shown, hardware merchants state, in the steady demand for paints and many of them have had to send in repeat orders to take care of requirements.

Although the season is advancing, architects are very busy with plans for new buildings and some of the largest jobs of the whole year will be commenced shortly.

Much Hardware Sold on Dollar Day

AN ARRAY of merchandise that "sold" itself, splendid store and window displays, snappy advertising and ideal weather all combined to make "Dollar Day" in London, Ont., a red-letter day in the history of local merchandising. Hardware merchants shared to the full in the record turnover and the entire enterprise was a remarkable demonstration of what co-operation can do.

Beginning one week prior to the big day local firms began letting the people all over the district know the day for special bargains. Through snappy newspaper copy tremendous interest was aroused. People came in by motor car and train from points 70 miles away and they came prepared to buy.

Many of those who came in motor cars came prepared to stay over two days and make other purchases as well as those they had picked out for "Dollar Day."

Practically every local hardware merchant went after Dollar Day business from a different angle. For instance, J. A. Brownlee, whose store is located right in the heart of the market district, made a drive on enamelware aiming to appeal directly to the farmers' wives. Both the firm's big show windows were filled with an attractive showing of enamelware and a double column advertisement, featuring special offerings with prices in large type was used. The display was a winner in every way and the company has never in any single day sold as much enamelware. Hundreds of farmers accompanied their wives to the store, making purchases of various articles they needed.

Electrical Goods Featured

The Purdom Hardware laid its plans to catch the trade of all home makers. A general assortment of merchandise was featured with half a dozen very attractive specials. A $135 electric vacuum cleaner only slightly used was offered for $35, three refrigerators were offered at discounts of 33-1/3 per cent., the figures being displayed in large type, 25, 40 and 60 watt tungsten lamps were priced at 39 cents and there were some splendid specials in cut glass, saws, razors and wash boilers. In two large boxes in the firm's advertisements a special of 10 per cent. off on paints and house finishes was featured. All lines moved well and the business was brisk throughout the day.

The Cowan Hardware announced in a quarter-page ad that it was specially pricing $40,000 worth of hardware lines so that people would get real bargains. It was also stated that this offering was being made in connection with preparations for moving to the new store. "Come Prepared To Buy As Prices Are

Now is the Time for Roof Protection

Finding that people will listen to warnings of damage likely to ensue if proper steps for protection are not taken, C. G. Bailey, hardware merchant, Queen St. East Toronto, uses this fact to good advantage in displaying roofing, paint and other protective materials. Here is one of his window displays arranged this week showing a model house, lighted at night, with roofing, sheathing, roofing cement for mending leaks, etc. Note the use of composition shingles on the flooring and color cards for shingle stains, etc. The arrangement of this window was very effective and being somewhat unusual brought many interested prospects into the store to discuss roofing protection before the Fall rains and snow arrive.

Irresistible," read the ad and it evidently caught the peoples' fancy as the store was beseiged throughout the day. There was an especially big turnover in tools, household supplies, ready roofing and paints.

Feature "Rush Specials"

J. G. Steele worked out an entirely different plan and one that was very successful. He featured a number of "Rush Specials" under the heading in heavy display type of "Value Of A Dollar Is Stretched At Steele's Hardware." The specials included combination offers such as a zinc washboard, a scrubbing brush, a galvanized pail, a galvanized tub and 50 feet of clothes line, all for $2.19; one bottle of floor or furniture polish, one pound of floor wax, a bottle of oil, a can of silver or brass polish and a package of steel wool, all for $1; ovens for gas or oil stoves at $1.95; $2 polish mops for $1, and special offerings of aluminumware. The advertisement backed by a splendid window and store display got across and there was a big turnover in the lines featured. Mr. Steele also used to splendid advantage five large display tables placed at vantage points in the store and filled with attractive offerings.

Farmers Have Money

W. A. O'Dell made a special drive on aluminumware and house paints and floor finishes. In one window there was a very attractive showing of shining aluminum goods and in the other a well-arranged assortment of paints. He also did an excellent trade.

One of the features of the day's business was the proof that the farmers have plenty of money and are ready to buy. Many of those who came in from the countryside had large sums of ready cash right ready to hand over for what they picked as good values.

Rush for Oil Heaters Due to Coal Shortage

Coal Strike Even if Settled May Cause Shortage Which Will be Felt for Months—Many Homes and Industries Making Arrangements for Oil-Burning Apparatus

THAT the present season contains somewhat unusual opportunities for the sale of oil heaters and stoves is the opinion of many manufacturers and distributors of these products. The prevailing coal situation, which has been developed by reason of strikes affecting both mine operation and the transportation of coal, has stimulated the general demand for oil-burning apparatus of various kinds.

Oil burners and oil furnaces are attracting the interest of consumers in greater volume, and the average impression is that similar influences are considered likely to react upon the movement of oil stoves and oil heaters as soon as the advent of Fall weather brings such devices into season.

In discussing this situation with Hardware and Metal, one manufacturer stated that oil heaters are selling very well, and there has also been noted quite a good call for oil stoves during recent weeks. Fall bookings are described as heavy. This manufacturer stated that the coal situation has undoubtedly made the general public somewhat nervous regarding a possible coal shortage during the coming months, and this has a direct influence upon the sale of these products.

With prices on oil heaters recently reduced, many merchants are awake to the business opportunities provided under existing conditions. However, the opinion of certain conservative distributors was to the effect that in several sections at least, stocks were not entirely cleared out last season and it is where a surplus of this nature exists, that must first be disposed of, which is holding up current orders in certain localities.

Discussing prospects for the coming season with another manufacturer, the opinion was expressed that the weather was not yet suitable to the heavy sale of heaters and oil stoves. Orders for these goods are just moderate, at present, which is considered usual for this time of the year. It was stated that there should be a noticeable increase in the volume of sales during the next few months, as the shortage of coal and the high prices for this kind of fuel likely to prevail during the coming winter, has been a factor in inducing many distributors of oil equipment to handle such products on a more extensive scale than formerly.

The substitution of oil-burning apparatus where coal was formerly used as fuel, is becoming a universal result of the miners' strike. Numerous inquiries for oil burners suitable for service in domestic heating furnaces are evident, while a number of steel producers are reported to be contemplating the adaption of oil-burning equipment in respect to foundry work. The oil heater and oil cook stove, however, are attracting increased interest for similar reasons, and for heating individual rooms and small structures, oil products are described as receiving a larger share of consumer attention, while for cooking purposes oil apparatus has long been in evidence as a substitute for other fuel methods such as coal and wood.

One of the largest manufacturers pointed out that while such factors might determine the volume of sales in the coming season, the influence of the coal situation is not yet apparent on their sales records, and no marked increase in bookings is expected until the colder weather sets in. Both manufacturers and distributors of oil heating and cooking equipment, however, are generally preparing for a good season because of the added incentive of the fuel market conditions.

NOVEL STUNT BY RETAILERS

"Dollar, dollar! Who's got the dollar?" will be one of the stunts introduced into the business campaign planned for Exhibition fortnight by the St. Clair Business Men's Association, Toronto.

A brand-new one dollar bill will be withdrawn from a neighborhood bank by one of the association and it will be attached to a card upon which the first owner will sign his name. He will then proceed to put it into circulation by purchasing a dollar's worth of something from one of his brother business men, who in turn will sign the card and go forth to buy something else. Thus the dollar will be made to circulate within the district for the whole two weeks, during which time a complete record will be kept of the various commodities it has purchased, while the names attached to it will furnish a personal history of its travels.

During the campaign the places of business occupied by the members of the association will display cards in their windows certifying to their membership. Thus customers will be able to distinguish between the campaigners and the others.

Each shop will be specially decorated for the duration of the campaign.

"PUTS THE LIGHT ON RETAIL BUSINESS"

(Continued from page 25)

to provide for breakages, loss of perishable goods, theft, etc., if the loss amounts to 10 or 15 per cent.; as it sometimes does, it is necessary to make a close investigation. A study of the figures on the merchandise record and the book in which entries are made of all goods sold at prices below the set margin (which really represent a loss under this plan) will soon reveal where the leakage exists and steps can be taken to tighten up.

The percentage of mark-up will vary in different stores, according to the number of turns of stock which can be made in a year. Then, too, it takes time for a store to establish what is a fair margin on the various lines of hardware. The idea is to take a set margin which covers administration, sales expenses and profit and use it for a while, later revising it according to what transpires. A different margin is provided for each item; thus garden tools in this particular case carry a margin of 37 per cent. based on 3 2-3 turns in the year, whereas some other lines may carry as high as a 60 per cent. margin on 1 turn.

Mr. Mills is of the opinion that this system provides hardware merchants with much needed light, and it is the wonder of many that more merchants do not fail in business by following the plan of setting a certain margin for all lines, cutting prices to meet certain competition, having no handy record of stock on hand, and having no idea of the relation of sales and administration expenses to the various items sold over the counter. More will be heard of the way in which the system is working out in the Mills store, at a later date.

"Puts the Light on Retail Business"

So the Merchandising Plan as Outlined by Frank Stockdale in Last Week's Issue of Hardware and Metal is Described by Nelson Mills, Hamilton, Ont.—How Various Information is Tabulated and Used in Applying This System

THOUGH the merchandising plan as outlined by Mr. Stockdale in last week's issue has been carried out by personal execution in the Mills Hardware Co. store in Hamilton, Ont., it has not yet had sufficient time to be developed in all its details, so that specific information as to its success can hardly yet be passed on. It has progressed far enough to indicate that the information given will be of great help in directing the business and once a year's operations have been completed specific data will be available.

Discussing the matter with Nelson Mills, vice-president of the company, Hardware and Metal was allowed a cursory glance at some of the records which suffice to show in general how the system works out. One of the most interesting is the Merchandise Record which, at the heading, provides for a notation of the "department," and "item" which is given by a code. Also at the heading is a place for the figure representing the average margin (gross profit) on that line. Space is also put for records of High Stock and Low Stock. The columns on the record provide for the notation of date of entry, stock on hand, from whom purchases are made, the cost, goods returned, total sales price, margin and percentage of profit.

Each column on this record is filled in monthly with the month's figures from the books and it is then immediately evident whether the margin which has been secured corresponds with the margin which is set and which appears at the head of the sheet. It should be explained that a certain margin is set, having in mind the number of times the stock should be turned in the year. This margin allows for the covering of all administration and sales expenses of the store. This margin may not be secured one month but it may be exceeded another month, so that a record spread over some months is necessary to ascertain what may be expected.

Margin Based on Stock Turns

It was explained that the margin set is based on the number of turns of stock normally expected, therefore the record for a few months will show at a glance what lines need stimulating. It will also show where extra sales effort should be applied. If the line does not respond to extra effort a quick survey of the records will show what is the matter.

Generally speaking the margins set for the Mills Hardware store have allowed them to sell goods at prices which ordinarily are looked upon as big reductions and compare very favorably with prices prevailing among other stores.

The underlying idea, of course, is to get the biggest margin consistent with turnover, realizing that retail business is to sell as much merchandise as possible. The more merchandise which is sold the lower the per unit overhead cost.

Under this plan the various lines of hardware are grouped according to certain classifications and each is given a code number. This number is placed on each invoice opposite the listing of the merchandise and the percentage of mark-up (either on cost or on selling price) for the number of turns required on that particular stock are extended right on the invoice by the accountants. The invoice is then turned over to the sales department whose responsibility it is to secure the number of stock turns noted and secure the margin as listed. Obviously goods invoiced direct from one manufacturer can be extended easier than those from jobbers listing many lines.

With the information on the merchandise record before them, the accountants can advise the store management from time to time which lines are falling below their quota.

One of the advantages of the system is that losses which are out of proportion to the store's trade can be checked up. Thus having in mind the fact that the store's losses should not be higher than 5 per cent. of the turnover,

(Continued on page 24)

"On Top" In Binder Twine Selling

Under the above heading J. B. Skelton, hardware merchant of Palmerston, Ont., ran this illustration in his local newspaper advertising. It was used for the purpose of indicating the extent of his business in binder twine and the fact that a large quantity of fresh new stock was available. It had a widespread effect judging by the new faces which were noticed among purchasers of binder twine at this store.

Editorials in Brief

IT IS ENCOURAGING to note that a number of manufacturers, wholesalers and retailers in the Canadian hardware trade have already found reason to appreciate the helpful nature of the data contained in the editorial and advertising pages of the Annual Fall Number which was issued last week, August 19. No effort was spared to make this issue the best yet from the standpoint of effective assistance to all branches of the trade in connection with present problems of merchandising and administration. The Editor will be pleased to have your opinion of the Fall Number.

Many Developments in Steel

DEVELOPMENTS are coming fast in the steel industry these days. The strike of bituminous coal miners has been settled in many states, while in Canada the Nova Scotia miners are still out and the workers in Alberta and British Columbia have resumed operations. The railway strike has again taken a bad turn indicating that settlement may be still further delayed. It is likely that a severe shortage of cars will develop which may impede the movement of merchandise considerably even after the settlement of the strike. Some railroad lines are already feeling a shortage of equipment due to the shopmen's strike and the resultant inability to repair rolling stock. Then in the face of this situation comes the announcement of a 20 per cent. increase in wages to certain classes of labor employed by the principal steel producers in the U.S. The reason underlying this increase is not clear, but it has so far only had the tendency of strengthening the claims of the striking coal miners for the establishment of higher wage scales.

There is no question that the fuel stringency is curtailing production of iron and steel, and every week sees more blast furnaces suspended. To date there has been little excitement among consumers and little of the scramble for material that is often seen in time of scarcity. Railroads, automobile works and other such industries are placing business despite the inability of the mills to promise any definite delivery date. An indication of the trend of prices is seen in the fact that the Iron Age composite price for finished steel is now 2.21c. per lb. against 2.169c. for several weeks and is now the highest since October 1921.

High Prices Don't Spell Success

DISCUSSIONS at retailers' conventions and informally among hardwaremen have frequently brought out the prime importance of the question of price in to-day's business. The price to the consumer represents the percentage of mark up which in turn indicates the expenses and margin of profit of that particular store. The price will govern very largely the volume of turnover by which the mark up is set. Hence it is of dual importance to hardwaremen.

The price has figured more intensively since 1917 than any factor in the making and unmaking of business. Why is this? The answer is that the price if proper and stable encourages demand and accelerates sales. If prices are too low, profits are cut off and industry wanes. The abnormally low price will not of itself develop business. When the price is too high, danger of quick deflation is threatened with a serious loss to the business enterpriser.

The chief object of business should be always for a proper and stable price. We cannot always take the index number as a safe guide, because it may happen that some prices are too low and others too high. The average may be all right. Thus in the depression the prices of basic commodities went too low, the prices of fabricated commodities did not fall enough to prevent maladjustment between the two, and this has been one of the chief occasions of a slow moving business. It was natural to expect higher prices for the basic commodities—not only natural but proper. In producing the fabricated commodities, however, costs should have controlled, so that any reasonable increase in the basic price could be absorbed without causing any decided upward swing in the price curve. We have not accomplished this, and it is one of the dangers in our present situation. We see the basic price rising and we hear comments on cotton going to an abnormal figure. Perhaps there is no reason for anticipating a high movement, though it is only to be expected that the prices which went too low should regain themselves in a measure. They ought not, however, to go to a point where business will be restrained.

Let there be a stiff control of the fabricated price, for if its upward swing is too great the liquidating value of commodities will again be in peril and we can well look for another depression. We are endeavoring to point out the mistake of believing that business success is bound up to high prices. It is bound up to stable prices. Prices that are reasonable w encourage buying, for they give a safe liquidating basis to commodities.

Big Future for Rural Trade

FINAL FIGURES governing the sixth census of Canada shows population on June 1 of 8,788,483, being an increase of 1,581,840 over the population recorded in 1911. The percentage of increase is about 21.95 per cent. It would seem by a perusal of the reports that the claims of agriculturists that the farming industry is the basic industry from certain standpoints, are borne out. Of the total population, 4,439,505 reside in rural districts compared with 4,348,978 living in urban centres. Alberta leads the way in so far as increase in population is concerned the percentage being 57 with Saskatchewan second with a 53 per cent. increase. Yukon shows a decrease, British Columbia gained 33 per cent., Manitoba gained 32 per cent., Nova Scotia gained 6 per cent., New Brunswick 10 per cent. Prince Edward declined 5 per cent.

Further evidences of the growing importance of the agricultural districts of Canada is found in the fact that settlers arriving in the three Western prairie provinces during the month of May numbered 1,020. They brought with them $227,000 in cash, and effects valued at about $100,000. This is bringing a relatively high proportion of wealth to the country and indicates that these are the type of settlers who are wanted to form community centres in the vast prairie lands of Canada.

Retailers and other business men in other branches of trade will realize, from such statistics, the fact that the agricultural districts of Canada are of a growing importance, that their special needs must be taken care of and that they offer wonderful business opportunities for those who study their requirements.

A Historical Event for the O. R. H. A.

Corporation Formed to Foster Interest of Retail Hardwaremen and to Encourage Uniformity in Customs and Usages of Trade and Commerce—By-Laws and Regulations Which Govern Procedure

THE official documents in connection with the incorporation of the Ontario Retail Hardware Association, as briefly referred to in August 12 issue of Hardware and Metal, constitute George Edward May, John Caslor, Harry Noah Joy and David Spencer Guffin, hardware merchants, all of Toronto, and Wilmott Ferdinand Macpherson of Prescott, retired hardware merchant and any others who have become subscribers to the memorandum of agreement of the corporation and persons who hereafter become members thereof, a corporation without share capital for the following purposes:—

(a) To foster the interests of those engaged in the retail hardware and stove business; to reform abuses relative

JOHN CASLOR

Toronto, Treasurer O. R. H. A. this year, named as director in the new corporation

thereto; to secure freedom from unjust or unlawful exactions therein and to disseminate any and all information in respect to lines handled by any of its members; (b) To procure uniformity and certainty in the customs usages of trade and commerce, particularly for those engaged in the retail hardware and stove business; to settle differences between members and to promote a more enlarged and friendly intercourse between business men engaged in the retail hardware and stove business; and to secure united action of all retail hardware and stove merchants in the Province of Ontario upon all matters re-

GEORGE EDWARD MAY

Toronto, President O. R. H. A. this year, named as director in the new corporation.

lating to the trade, provided the same is not contrary to law, or to the purposes of the association; (c) To establish and extend more intimate acquaintance among members of the association; to exchange suggestions and ideas of business plans and methods; to promote and cultivate friendly relations with manufacturers and wholesale hardware merchants, and to give expression of views

HARRY NOAH JOY

Toronto, executive member O. R. H. A., named as director in the new corporation.

as an association on matters relating to the trade; and (d) Generally to do all and everything necessary, suitable and proper for the accomplishment of any of the purposes, or the attainment of any of the objects, or the furtherance of any of the powers hereinbefore set forth, either alone, or in association with other corporations, firms or individuals, and to do every other act or acts, thing or things, incidental to or growing out of, or connected with the aforesaid purposes or powers or any part or parts thereof, provided the same be not inconsistent with the laws under which the corporation is organized or the laws of the Province of Ontario; with its head office at the said town of Prescott.

W. F. MACPHERSON

Prescott, Secretary O. R. H. A., named as director in the new corporation.

The aforementioned individuals are the first directors of the organization It is declared that 1, the subscribers to memorandum of agreement of the corporation shall be the first members and the coropration shall consist of the subscribers and of those who shall hereafter be duly elected as members of the corporation in accordance with the by-laws and regulations from time to time in force; 2, The interest of a member in the corporation shall consist of the subable and shall lapse and cease to exist upon the death of such member or when such member shall cease to be a member by resignation or otherwise in accordance with the by-laws and regulations;

(Continued on page 30)

Events in the Trade

BUSINESS CHANGES

J. A. Tanguay, 900 St. Catharines St., East, Montreal, has sold his retail hardware business to Ulric Archambault.

NEW FIRMS

Thornton & McWilliams, have opened a hardware business at 273 Glebemount Avenue, Toronto, with a complete line of hardware, paints, oils, glass, etc., tinsmith shop, etc.

FIRE LOSS

Fire which originated in the oil house spread to the store and dwelling of Charles Wale, at Hopeville, Ont., causing a loss of $25,000.

INCORPORATION

O. P. Hamlin, Co., Ltd., head office, Windsor, Ont., capital $50,000, to manufacture and carry on contracting business in plumbing and sanitary fixtures, heating supplies, etc.

New York Color and Chemical Co. Inc. has secured charter to operate in Ontario in the manufacture and sale of paints, varnishes, putty, white lead, enamels, etc.

PERSONAL

J. E. and Mrs. Scriven of Tilbury, Ont., are visiting with relatives in Tillsonburg, St. Thomas and Hamilton.

J. R. Simmonds of Jas. Simmonds Ltd., Halifax, was a Montreal visitor this week.

R. M. Bruce and family of Essex, Ont., have returned after enjoying a ten-day motor trip to Cleveland.

Norman Baiden, Lyons and Marks, Toronto, is severing his connection with that firm to commence a retail hardware business in Toronto.

Miss Margaret Wade, of London, Ont., who recently resigned as editress of the McClary Mfg., Co.'s "Wireless," left this week for Windsor where she will manage the border branch of a large bond house. A banquet is being held in London shortly by the company and office staff at which Miss Wade is to be the guest of honor.

OBITUARY

Charles G. Davis, former superintendent of the Maple Leaf Harvest Tool Company, at Tillsonburg, Ont., died very suddenly in England, according to a cablegram received from his wife. He went to England some months ago to rest owing to illness.

ERECT NEW HARDWARE STORE

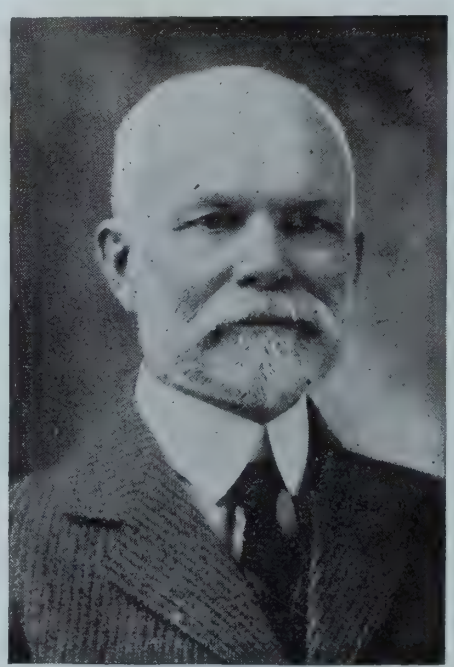
Montreal.—Lambert Hardware Co., 2552 St. Hubert St., is building a new hardware store to cost $20,000.

WIRE CONCERNS IN MERGER

The Wire Goods Company of Worcester, Mass., the Cassidy-Fairbank Company of Chicago and the Andrews Wire and Iron Company of Rockford, Ill., and of Watford, Canada, are consolidated as a $1,000,000 corporation with headquarters in Worcester. Eventually the business probably will be conducted under the name of the Washburn Company, the other corporation names disappearing.

SHERBROOKE STEEL FOUNDRY COMMENCES OPERATIONS

The Manganese and Steel Foundry, Limited, has commenced operations in Sherbrooke, Que., engaged in turning out castings. P. McCullough, formerly of the Canadian Brakeshoe Co., is president and general manager of the new concern, while A. S. Bayles, formerly of the Canadian Ingersoll Rand Co., is secretary-treasurer assuming control of the office. The company anticipates developing a Dominion-wide trade and plans to extend operations to other centres in due course.



HENRY WATTERS

Treasurer of the Dominion Board, R. M. A., and Ottawa retailer, who will be the special speaker at the directors' luncheon on Merchants' Day next Wednesday at the Canadian National Exhibition.

OFFICIAL STATEMENT RE BARRETT CO. TAKING OVER A. McARTHUR CO.

As some misinformation was given in the report appearing in last week's issue of Hardware and Metal concerning the purchase of the Alex. McArthur Co. of Montreal by The Barrett Co. Ltd., particularly that part stating that this company was controlled by the Allied Chemical Co. of New York, (which is untrue) Hardware and Metal publishes, as follows, the official statement of The Barrett Co.;

The Alex. McArthur Co. Ltd., has now been amalgamated with The Barrett Co. Ltd. The company was founded by Alex. McArthur about forty years ago and continued until his death in 1903 when the present company was incorporated by the late Lieut. Col. Colin McArthur, and D. J. Munn and others. This industry, manufacturing roofing and paper products, has a paper mill at Joliette, Que., a roofing mill at Montreal and several warehouses throughout the country. Its head offices are at 82 McGill St. The Barrett Co. Ltd., is the successor of the old Paterson Mfg. Co., manufacturers of roofing and paving products, with several plants and warehouses in the Dominion.

D. J. Munn, former president of the Alex. McArthur Co., has retired and H. C. Bonney, vice-president and general manager of The Barrett Co. Ltd., has now become the controlling officer of the Alex. McArthur Co. The two companies will be conducted separately as heretofore, each retaining its own identity and separate organizations except such changes along the line of manufacturing as will make for lower costs and greater efficiency. The McArthur Co. will continue to market its various special roofing products upon which its business has been built. The major portion of the staff of both companies will be retained and no changes whatever in the selling policies of the two companies are anticipated.

"MADE IN CANADA" CAMPAIGN

Montreal.—The Quebec branch of the Canadian Manufacturers' Association will again launch a campaign endeavoring to promote Canadian made goods through the numerous fall fairs throughout the province this year. Last year the association distributed four thousand large cards carrying the inscription "Make Canada Prosperous by Buying Canadian Products," and several thousand smaller ones inscribed "Produced In Canada."

IMPERIAL OIL CO. TO BUILD REFINERY IN WEST

Imperial Oil Company will build a new refinery at Calgary, to cost about $2,500,000. The site is about 107 acres, and the plant will have a daily capacity of 3,000 barrels of crude oil, which will likely be obtained from Wyoming or Montana, the present source of supply for the company's Regina plant refinery.

HARDWAREMAN TELLS OF EUROPEAN CONDITIONS

George Davey of Ingram and Davey, St. Thomas, Ont., who has just returned from spending three months in Europe, states that there is a splendid opportunity for Canadians to increase their trade with England. According to Mr. Davey, it is largely a question of going after the business. Britishers generally, and business men especially, he says, are most favorably disposed towards Canada.

While in England Mr. Davey did considerable buying at prices which he regards as very favorable.

Germany, he says, is prosperous to all appearances and the people very busy. After seeing what happened in France during the war, it is easy, he says, to understand why the French people are so insistent in regard to reparations.

At the regular meeting of the St. Thomas Kiwanis Club this week Mr. Davey gave a talk on his trip and conditions in Europe that was listened to with the keenest interest.

EXTEND GUTTA PERCHA AND RUBBER PLANT

London, Ont.—Important extensions to the local branch of the Gutta Percha and Rubber Co., Ltd., are planned for this fall. It was stated to Hardware and Metal that business has been excellent and that the firm will build a large addition to the present premises in order to provide increased warehouse accommodation.

There is an active demand at the present time for such seasonable lines as steam hose, air hose, packing, etc. Prices are ruling firm. A large trade has been done all season in automobile tires. With crop conditions the best in many years and farmers prosperous good trade is looked for in the coming months.

Just now with the threshing season on there is a big demand for thresher belts, agricultural hose and similar lines.

In the big civic holiday parade and celebration at Clinton, Ont., the float of the Clinton Hardware Co., was awarded third prize and won many hearty commendations from the crowd.

Frank N. Barrett, of Ingram & Davey Limited, St. Thomas, Ont., who recently purchased the A. E. Campbell Hardware in St. Thomas, takes possession next week. He plans developing the motor accessories department and specializing in builders' supplies and roofing.

Western Canada News

Fisher & Watson Hardware, Colinton, Alta., has been succeeded by Watson Hardware Co.

James Feir, of Wood-Vallance Co., Ltd., Regina, Sask., spent a few days in Winnipeg during the week.

Parsons & Piroth, hardware, Oak Lake, Man., has been taken back by W. W. McCubbin.

E. M. Adams, of Wood-Vallance & Adams, Calgary, Alberta, was a business visitor to Winnipeg during the week.

C. H. S. Bamford, sales manager of The J. H. Ashdown Hardware Co., Ltd., Winnipeg, is spending his vacation at Kenora.

W. C. Auld, the first hardware store to operate in Youngstown, Alberta, has bought the hardware stock of Ballantyne Bros., who are closing out their business.

E. A. Dykes, of Dykes & Rutley, hardware merchants, of Kindersley, Sask., was a visitor at the J. H. Ashdown Hardware Co., Ltd., Winnipeg. Mr. Dykes reported the crop outlook fair.

S. H. Whyte Manufacturing Co., Ltd., Winnipeg, have been appointed representatives for Western Canada for H. Nagle & Company of Montreal, manufacturers of Vol-Peek cement, silver and furniture polish, etc.

W. J. Wilson, sales manager of The Western Steel Products Ltd., Winnipeg addressed the Western publishers at their annual short course which was held at the Agricultural College this week on the subject of "Selling."

The annual convention of the British Columbia Paint Manufacturers' Association, held in Victoria, was one of the most successful in the history of the organization. Last season's "Save the Surface" campaign was said to be a marked success and as a result it was decided to carry on the drive during the coming year and to back it up with a strong advertising campaign emphasizing the importance of paint as a preservative. It was stated that there had been a good increase in paint sales owing to the building program carried on in Victoria, Vancouver and other centres of population.

Among those who attended were the following:

L. C. DeMerrall of the Martin Senour Paint of Vancouver, president of the B. C. Paint Manufacturers' Association; J. H. Hawkins of the Sherwin-Williams Paint Co., Vancouver; G. McBain of the Crown Paint Co., Vancouver; G. E. Smitht of the Brandram-Henderson, Vancouver; Norman Jessiman of Vancouver; H. C. Douglass of the A. Ramsay Co., Vancouver; Thomas Pearson, M. P. P., of R. C. Jamieson & Co., Vancouver; H. Darling of the Henry Darling Co., Vancouver; J. C. Pendray of the B. C. Paint Co., Victoria; J. N. Davey and W. M. Lawrence of Victoria.

A. G. Richards, manager of the plumbing and heating goods department of Marshall Wells, Alberta Co., of Edmonton, was a visitor among the trade of Calgary this week.

Much importance is attached to the location by Fred Blanchard, at the head waters of the Peace River near Hudson's Hope, of a large showing of iron which has been assayed at the Trail Smelter at sixty per cent. The locator reports that the strip which he uncovered was 700 feet in width and more than three miles in length.

Among the hardware men visiting Calgary this week were Fred S. Ditto of Stavely and Fraser Whimster of High River, Alberta. Both come from that portion of Alberta where crops can be described as good, and feel that they will be called upon this fall to take care of a good healthy volume of business that should be considerably in excess of recent years.

At the mid-summer dinner of the Vancouver Electric Club at the Hotel Vancouver this week, Lawrence W. Davis, field representative of the National Association of Electrical Contractors and Dealers, told the seventy-five members that business was on the upgrade and in his opinion would continue for the next five or six years. He said that to ensure public safety, all contractors and dealers should be licensed after the system followed in Ontario. It was announced that the electrical house which would be opened in September in this city, would demonstrate the great strides made in wiring of the home in recent years.

OPEN WAREHOUSES IN THE WEST

The Dominion Battery Company is opening warehouses in Winnipeg, Montreal, Calgary and Vancouver to facilitate service.

CONFERENCE CALLED ON B. C. STEEL PLANT

Victoria.—A conference of Imperial government officials, British steel manufacturers, Canadian government and British Columbia Cabinet Ministers will be held in London next month in connection with the proposed construction of a $12,000,000 steel plant on the British Columbia coast, according to announcement made here. The project it is claimed, is being backed up by the three governments. The Federal governments will be represented by Hon. W. S. Fielding, Minister of Finance, and British Columbia either by Hon. W. M. Sloan, Minister of Mines, or Hon. John Hart, Minister of Finance, according to M. I. Landahl of Vancouver, active in the undertaking.

Big Expectations for Copper Products

General Manager Quigley of Anaconda American Brass Co., Ltd., Newly Located Firm at New Toronto, Ont., Outlines Company's Plans for Canada—May Encourage Brass Cutters and Workers to Canada—Research Propaganda Doing Much Good Work

ANACONDA American Brass Limited has been incorporated in Canada, with capital of one million dollars, as a company chartered to manufacture and distribute brass, copper and nickel silver materials of every variety. As briefly announced in a recent issue of Hardware and Metal this company has acquired the business and good will of Brown's Copper and Brass Rolling Mills Ltd., of New Toronto. This plant is at present closed while inventory and repairs are being executed but it is expected to be in operation by September 1. This company is the Canadian end of the American Brass Company which has extensive mining and production interests in the United States with head office in Waterbury, Conn.

The officials of the Canadian company are as follows:—

President, John A. Coe; Vice-President, G. H. Allen, Vice-President American Brass Co.; Treasurer, C. F. Hollister, Treasurer American Brass Co.; Secretary, M. S. Moss; General Manager A. H. Quigley. Messrs. Moss and Quigley are the local directors on the board which in addition to the other officials named includes; John D. Ryan, Chairman Board of Directors of Anaconda Copper Mining Co.; C. F. Kelly, President Anaconda Copper Mining Co.; B. B. Thayer, Vice-President of Anaconda Copper Mining Co.; and Charles F. Brooker, Chairman Board of Directors American Brass Co.

Can Make Complete Line

Mr. Quigley, general manager of the Canadian plant, was formerly at Kenosha, Wis., the furthest west branch of the company, where he occupied the position of assistant manager. Prior to that he was employed at the mills in Connecticut. Mr. Quigley's whole business experience has been with this firm. Mr. Moss, secretary and superintendent, comes from the Buffalo branch where he was assistant superintendent. Mr. Quigley explained that the Anaconda Copper Mining Co. owns the American Brass Co., which in turn owns the stock of the new Canadian company.

The Canadian charter allows the manufacture of a complete line of products made by the company in the United States, but for the present only those products formerly made by Brown's Copper and Brass Rolling Mills Ltd., will be made. A lease has been taken on the latter's property at New Toronto for five years. Firms who are purchasers of the semi-finished product of the company include electrical, sanitary, domestic utensil, screw manufacturers, the building trades, furniture, stove, scientific instrument, flatware, hollowware, tableware manufacturers, plumbing goods, boat, steam engine, boiler makers, etc. Some articles are finished by the company but the bulk of their production is of semi-finished materials which are trade marked.

The bulk of their trade is direct with manufacturers, though they do sell through wholesalers as well. For now no arrangements are being made for distributing agencies throughout the country as most of the firm's business is done with industries which are largely located in Ontario and Quebec. The products include sheet brass in flats, strips and coils in various mixtures including high brass, low brass and bronze containing from 60 to 95 per cent. of copper. Copper is also produced in sheets, rolls and strips plain and tinned. Polished copper may also be made. The products also include rods including free turning, naval brass and bronze. Larger sizes of wire in various mixtures will be produced as well as sheet copper, hot and cold rolled used among other things for roofing.

Copper Shingles

Asked regarding the likelihood of making copper shingles tinted various shades by acids at the Canadian plant Mr. Quigley pointed out that these would not be made in Canada at present but that these along with other copper and brass products would later be made here providing the company's progress and opportunities for trade are favorable.

Speaking of the reasons for the company locating in Canada Mr. Quigley pointed out that it was done in order that better service might be given Canadian customers, though this branch will not handle any business now done with the head office or branches in the United States in products which will not be made in Canada. Mr. Quigley states that after investigation the firm is optimistic regarding the future of Canadian trade in copper and brass produc particularly. Some price advantage may accrue to purchasers of the company's products through the Canadian plant though the tariff was said to be not highly protective on these lines. Mr. Quigley expressed the opinion that the location here of this company will likely encourage cutters and workers in brass and other such industries to locate here. The propaganda being conducted by the Copper and Brass Research Ass'n. was said to be doing much helpful work in bringing to public attention the value of using copper and brass pipe and other such products.

A Historical Event For The O. R. H. A.

(Continued from Page 27)

DAVID S. GUFFIN
Toronto, named as director in the new incorporation of Ontario Retail Hardware Association.

3, The directors shall constitute the Committee of Management and 4, The by-laws and regulations for (a) election of members, trustees, directors and officers, (b) holding of meetings of members, trustees and directors, (c) establishment of branches, (d) payment of directors, trustees, officers and employees and (e) the control and management of the affairs of the corporation shall be made and established, subject to amendment or repeal as therein or hereafter by by-law or regulation provided, at a general meeting to be held not more than six months after incorporation at such time and place as the directors may determine, and such by-laws, regulations and amendments shall replace, exclude or modify those set out in form 4 in the schedule to The Ontario Companies Act.

Without Purpose of Gain

It is declared that the said corporation shall be carried on without the purpose of gain for its members and that any profits or other accretions to the corporation shall be used in promoting its objects.

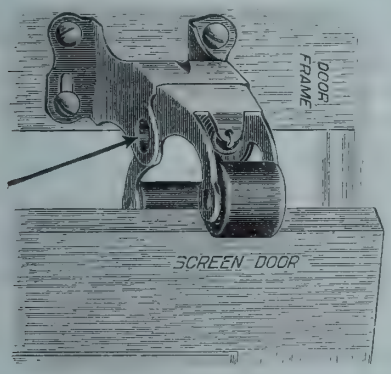
(Continued on page 44)

New Hardware Goods

Offered to Canadian Hardwaremen

NEW MARVEL HOLDER

Geo. W. Mallory, Blenheim, Ont., has produced a new model Marvel door holder for the 1923 market. The holder which is for screen and storm doors or any other light doors, is said to embrace many improvements over previous holders of this kind. There is a new improved angle bearing which gives additional strength and ease of operation and also makes the holder practically indestructible. The holder is made of cold-rolled steel, with a steel coil spring, and in japanned finish. The



holders are packed one dozen in a box and also in packages of twelve dozen boxes. It is said that the holder can be retailed at 25 cents each.

PATENT LOCK NUT

A new lock nut has recently been designed and patented by G. W. Hohme of Castor, Alberta. This locking device is described as consisting of the nut prepared with a recess and post to receive the locking portion. In this recess, is a small, square hole to receive one end of the spring, and another small hole for unlocking. The locking device is a disc with a handle, with pivot hole on centre made in form like a head, with neck and disc teeth. On the lower part of the neck is a small hole to receive the other end of the spring and also a slanting recess for unlocking. In assembling the lock nut, the spring is entered in the square hole, the locking device placed on post, and the other end of the spring placed in hole provided in lower part of neck. The spring will keep the lower teeth of locking device in contact with the post. For unlocking, a short turn forward is all that is required.

Steps are now being undertaken to manufacture this lock nut upon an extensive scale with a view to distributing it through the hardware trade.

SEMMENS EXTENSION LADDER

Semmens & Son, 174 York Street, Hamilton, are now making extension ladders, section ladders and straight ladders, of every description. These products have best hickory rungs, and are equipped with sturdy hardware. The manufacturers also point out that they can be easily raised or lowered.

EASY READING THERMOMETER

A new thermometer has been placed on the market by the Wilder-Pike Thermometer Co., Troy, N. Y., known as the Easy Reading thermometer. This thermometer has an enamel scale with a magnifying spirit tube which makes reading easily possible at a considerable distance. The easy reading thermometer is made in an assortment of wood backs and with either an 8 inch or a 10 inch scale.

FLEXIBLE PIPE HANGER

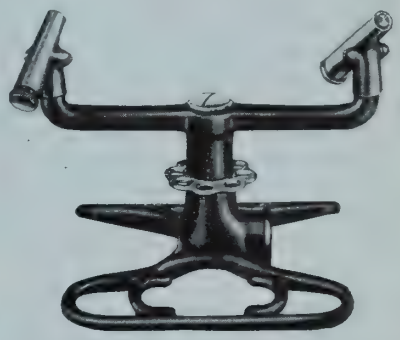
Messrs. W. H. Cunningham & Hill, Ltd., Richmond St., W., Toronto, are now putting on the market a flexible pipe hanger. This galvanized band can be easily bent to fit any sized pipe, while the distributors point out that the drive points are hardened so as to be easily driven into the joists. An important feature is the fact that the hanger can be shortened by winding around the pipe, if necessary. Another advantage claimed for the flexible hanger is the fact that one size can be used to take the place of many different sizes previously required.

OXFORD DRY MOP

Dry mops for use on hardwood floors and walls, are being manufactured by the Oxford Mop Co., of Woodstock, Ont. These products are at present being made in brown and red, and the manufacturers point out that this is strictly a dry mop, although, when dirty, it can easily be washed, and will dry out in good condition. Other features pointed out by the makers are that this mop has plenty of yarn twisted into it, and will not scratch any polished surface. The metal stamping on the end of the handle into which the mop fits, is brass plated and rust proof. The wire into which the yarn is twisted is galvanized and will not rust. The mop will also be supplied in a slate gray color in the near future, as well as various kinds of dusters. The Oxford dry mop is reversible, and can be quickly taken from the handle, and turned over, therefore giving two wearing surfaces.

RAIN KING SPRINKLER

The Rain King is the name of a new plant sprinkler, which has been placed on the market by the Flexible Shaft Co., Ltd., Toronto. The manufacturers point out that this new sprinkler is unusually small and compact, while it also embodies a number of new features in the even distribution of the spray. In the development of this product, the makers claim to have given much time to securing an equitable distribution of water. It is also stated as possible to regulate the spray to cover a circle



varying in size from 8 in. to 70 ft. in diameter. This particular sprinkler may also be adjusted to water strips of lawns, corners and odd shaped places, without touching the adjoining property.

CARTRIDGE RADIATOR CORE

The United States Cartridge Co., of Lowell, Mass., manufacturers of Cartridge radiator tubes, have established an agency in Western Canada, and have appointed the Guarantee Sheet Metal & Roofing Co., Winnipeg, their exclusive agents for Manitoba, Saskatchewan and Alberta.

The recent development of the cartridge core or radiator core constructed of cartridge tubes, provides direct interest for the automotive trade. Many automobile manufacturers are stated to be equipping their new models with radiators constructed of cartridge cores. One of the outstanding features of this new core is that it is composed of a number of small tubes known as cartridges, and soldered together and held in place by a metal strip. It is claimed that with this new principle the cooling surface is enlarged, while the core is more durable. Added to this is the outstanding feature of the easy method of repair. The core is so constructed that if one tube or a number of tubes become damaged, they can be readily removed, and replaced by a new tube.

The manufacturers of this product also supply an emergency repair kit.

Markets at a Glance

AN EXAMINATION of price changes on the current hardware markets reveals few primary revisions this week, but the general tendency remains firm. The new list on wrought iron piping, superseding list No. 54, which has been in effect since last December, provides higher prices on both buttweld and lapweld, black and galvanized piping. A slight upward revision in larger size boiler tubes is also noted, while a small increase is in effect on the lighter sizes of roll thread machine screws. Turpentine shows a recovery this week, and based on the substantial gain evident in southern producing centres, domestic quotations have advanced fifteen cents per gallon in several centres. A comparison in discounts is now apparent between the imported and domestic makes of window glass, with lower levels being quoted on Belgian glass. The Maydole line of hammers and certain makes of wooden rat and mouse traps record a decline in quotations.

THE WIRE market has gained strength and the weakness recently noted in wire nails has given place to some anticipations of higher levels in the near future. The mining resumptions in certain soft coal areas is not being counted upon to relieve the iron and steel industry to a great extent, as the rail strike, shortage of cars and priority orders combine to offset the immediate effect. Steel products in general, therefore, retain their recent strength, with no decided easing in prices being looked for as wages have been advanced by many steel producers, thus adding to production costs.

CURRENT reports from the Maritimes indicate that while certain rural sections have experienced the usual midsummer inactivity in the hardware trade, yet buying of anticipated fall requirements by merchants is progressing steadily. There is also an active trade in guns and ammunition, while heating goods are moving in fair volume. The tourist trade has also brought good business in automotive accessories. Farmers are generally assured of a better harvest this year, and it is observed that if market conditions are at all favorable, their increased buying capacity should give marked impetus to Fall and Winter trade.

WESTERN centres record the vital fact that building activity continues to affect the movement of many hardware lines, while wholesalers state that builders' hardware and tools experience a good steady call. Binder twine has witnessed an active season, and with improved crop conditions, the general business in this product reaches a satisfactory volume. Activity is now evident in numerous harvest supplies. Alberta jobbers also note a heavy run on harvesting equipment, and their stocks of these articles are admittedly low. Retail merchants handling implements find this branch taking up most of their time in looking after late deliveries, with brisk business in repairs and small sundries. Out on the coast districts, additional rains have not only stopped but have put out the recent forest fires, with the result that logging camps are again resuming full activity.

Montreal. Que.

MONTREAL, August 24.—The increased price list on steel pipe constitutes the outstanding feature in the hardware markets this week. The continued strengthening in the steel industry and its probable effect on many lines also attracts attention. This stronger tone is now reflected on boiler tubes, when many sized tubes are quoted at slightly higher figures, this tendency being more apparent in the larger sizes. A firmer tone is still noted on bar iron, steel products and wire nails, jobbing houses reporting that higher prices in the near future would not be surprising. Galvanized sheets remain firm notwithstanding recent advances. This tendency is reflected on corrugated sheets, conductor pipe and eavestrough. Soil pipe and fittings are in brisk seasonal demand, also radiators and boilers. The sale of stoves and ranges for Fall is limited up to the present but an active season at a little later date is anticipated.

PROBABLE ADVANCE IN WIRE NAIL PRICES

Montreal.

There is now a feeling among jobbing circles that a further revision in an upward direction may be made on wire nails in the near future. It is pointed out that in face of a firmer undertone, prevailing prices are lower than those quoted previous to the unsettled market in recent weeks. Although nothing definite could be gained from manufacturers the present market tone was described as very firm, and higher prices would not be surprising.

STRENGTH STILL APPARENT IN SHEET MARKETS

Montreal.

Notwithstanding quotations on galvanized sheets have for some weeks past been on an upward trend, and a firming tendency been present, the undertone of the market is still described as strong. One factor which has offset the former stronger tone to a degree in recent weeks is the somewhat lighter demand. The usual summer slackening has reflected in these products as in most iron and steel lines. However, this considered, and the fact that the coal strike is now more hopeful, has failed to cause any weakness, and distributors anticipate a firm market for fall trade. It is pointed out that trade will soon commence to improve, and with regard to imports from the United States there is, according to dealers, little hope of any quantities from this source for some weeks even with a resumption of more normal activity at the mills. The English market is reported as steady to firm, and will likely continue so in face

of a bigger demand after the summer months.

There is little or no change in tin plate or Canada plate, with quotations remaining at revision of a few weeks ago.

BLACK SHEETS—		
10 gauge, base	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 20	4 70
16 gauge	4 30	4 80

Galvanized, 60s	7 75

GOOD SEASONAL TRADE IN SOIL PIPE AND FITTINGS

Montreal.

Current trade in soil pipe and fittings continues good, and quite satisfactory for the present season of the year. Rather than the higher quotations, recently announced, tending to curtail buying, manufacturers state that the opposite effect was produced, dealers apparently convinced that the general upward trend in the iron and steel was bound to reflect on these products. The undertone of the present market is described as firm at following discounts:

SOIL PIPE—	
2 and 3 inch	35%
4 inch	35%
5 and 6 inch	35%
8 inch	net
Fittings—	
2 and 6 inch	45%
8 inch	net

FIRMER TONE IN COTTON WASTES: PRICES UNCHANGED

Montreal.

The firming tendency in cotton goods generally is said to affect cotton wastes to an extent, but the strength is not so apparent as in many other lines. Having a more or less direct bearing on domestic markets is the importation of cotton waste from England. Dealing with this it was pointed out to Hardware and Metal that imports from overseas have grown considerably during the past year. English manufacturers bring in the raw cotton from the United States and export the finished product to Canada and other countries. It is for this reason that fluctuations in the southern markets do not directly reflect on domestic markets as readily on wastes as on other lines.

	Per lb.
COTTON WASTE—	
Cream polishing	0 18
White, XXX extra	0 16
White XX grand	0 15
White XLCR	0 14
X Empire	0 13

Axle	0 20
Anvil	0 16
Dominion Wipers—	
White cotton	0 20
Colored cotton	0 14

SEASONAL DEMAND FOR RADIATORS AND BOILERS

Montreal.

A fairly active market is still recorded on radiators and boilers, the movement said to be seasonal and stimulated by the continuation of extensive building operations. The number of dwelling houses under construction, and prospects of further building during the later summer and fall months promise well for the sale of these products. The upward trend in the steel industry because of higher costs of raw materials, and strike conditions, reflect even a firmer undertone in goods of this class, and manufacturers express hope that a continued improvement will soon be in sight in both the coal and rail strikes.

STEADY TONE IN BRASS AND COPPER PRODUCTS

Montreal.

The steady tone in copper on primary markets reflects a similar tendency in brass and copper products such as sheets, rods and tubing. It is pointed out that quotations on the virgin metal have been advanced since the last price adjustment on the finished products, and present levels are somewhat firmer than previously. Only a fair volume of business in these lines is now in evidence at the following quotations:

	Base
BRASS—	
Sheets base	0 24
Rods, ½ to 1 inch, round	0 22
Tubing, seamless, base	0 30
COPPER—	
Rods, ½ to 2 inch	0 29
Soft sheets, plain, 16 oz. and heavier, lb.	0 32
Plain tinned, 16 oz. and heavier, lb.	0 36
Polished, and tinned, 16 oz. and heavier, lb.	0 41
Tubing, lb.	0 32

Above prices are for full sheets or bars. Cuts 5c. per lb. higher.

DULL TONE REPORTED IN SCRAP METAL MARKETS

Montreal.

The waste material markets are now reported in a dull condition, the midsummer quietness being fully reflected. Nominal quotations are unchanged and the only line showing any strength is non-ferrous metals. Copper and brass scrap are quite steady in sympathy with the tone of virgin copper on primary metal markets. Iron and steel materials are very dull with a slightly easier tendency in some instances. Following are average dealers' buying prices:

WASTE MATERIALS—	
Automobile tires	0 50
Rubber shoes	0 02
Yellow brass	0 05 to 0 06
Red brass	0 08¾
Light brass	0 04
Scrap zinc	0 03½
Lead, heavy	0 04½
Lead, tea	0 03
Light copper	0 08½ to 0 09
Heavy copper	0 11
Wrought iron R. rd., No. 1, per gr. ton	10 00
Malleable scrap (ton)	9 00 10 00
Pipe scrap (ton)	7 00
Heavy melting steel	9 50 to 10 00
No. 2 busheling	3 00
Boiler plate	8 00 9 00
No. 1 machinery cast	20 00 to 21 00

Showing Price Developments In Percentages.

BELOW IS A table giving the percentage of price developments, both increases and decreases during the past eight years on fifty staple hardware lines. The quotations on this representative list which were in effect August 1, 1914, are taken as the basis, and shown under the unit figure of 100. The average rise and fall of hardware prices in general from then until the present can be traced year by year both by the percentage of increase over the 1914 level, and also through the different index quotations which follow:

August	Increase	Index
1914	Unit level	100
1915	9 per cent.	109
1916	36 per cent.	136
1917	92 per cent.	192
1918	106 per cent.	206
1919	105 per cent.	205
1920	166 per cent.	266
1921	111 per cent.	211
1922	86 per cent.	186

In considering the above price trends, it must be remembered that the index figures only represent the standing of average hardware quotations in the first week of August of each year. The high peak of composite prices was attained in October, 1920, while the lowest levels reached since the prewar levels were registered in May of the current year when the index figure was at 184.5. Since that time the upward trend of prices has been more pronounced, this especially applying to the basic materials such as iron and steel.

INCREASE IN BAR PRODUCT PRICES ANTICIPATED

Montreal.

Iron and steel bar products remain at unchanged base prices, notwithstanding other domestic markets record a further upward revision. An advance in prices locally was anticipated last week, and in discussing a probable change this week the feeling is almost general that higher prices are pending. Local producers state that although there is reason for greater hopes in connection with the coal strike situation, the immediate outlook is little changed and they are still faced with importing higher priced fuel from overseas. There is also said to be a slightly better buying movement among jobbing houses and indications are that future demand will also assist towards maintaining a firm attitude in the market. Unchanged price levels are as follows:

IRON AND STEEL—	
Common bar iron, 100 lbs.	3 15
Refined iron	4 65
Irish finish machinery steel	3 20
Mild steel	3 15
Single recled machinery steel	5 25
Band steel	3 50
Spring steel	4 75
Sleighshoe steel	3 15
Tire steel	3 35
Harrow tooth steel	3 30
Toe caulk steel	4 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½

NOTE.—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra,

STILL FIRM TENDENCY IN CORRUGATED SHEETS

Montreal.

Prevailing conditions in the flat galvanized sheet markets, where a strong tendency is still apparent, contribute a firm undertone in corrugated sheets. Recent advances in the former product have not to date brought a corresponding increase in these products, but manufacturers state that a continued upward trend may mean higher corrugated prices in the fall months. Although the movement is somewhat slower than in earlier summer it is still fair and quite seasonal. List prices and discounts are the following:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	13 60
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75 cents per square extra.

STOVE AND FURNACE PRICES STILL FIRM

Montreal.

Manufacturers of stoves and furnaces, in outlining the market situation, state that the tendency is still decidedly in an upward direction. The question of a revision in prices however is very indefinite, higher prices apparently pending the future trend of raw materials and other productive costs. Production costs have already increased, but in view of the fact that Fall trade will shortly commence in earnest, advanced quotations will be withheld until it is found that they are absolutely necessary, according to one large manufacturer. Bookings for fall requirements have been comparatively small up to the present and reports from merchants throughout the country show that a considerable number of stoves have been carried over from last year. In face of this, however, an active trade is anticipated, commencing perhaps a little later than usual.

UPWARD REVISION IN BOILER TUBE PRICES

Montreal.

A further change is made in boiler tube quotations, many sizes showing increased price levels. These revisions appear for the most part on the larger sized tubes, all sizes from 2½-inch up being advanced. The upward swing in the steel industry generally is now reflecting on these products, quotations on primary markets having recently been advanced. The movement of boiler tubes is only fair and following are new higher prices:

BOILER TUBES—	Seamless	Lapweld
1 inch	19 00	....
1¼ inch	20 00	....
1½ inch	20 00	....
1¾ inch	22 00	....
2 inch	20 00	18 00
2¼ inch	22 00	20 00
2½ inch	25 00	21 00
3 inch	31 50	27 00
3½ inch	37 00	31 00
4 inch	46 75	39 50

Toronto, Ont.

TORONTO, August 24.—The increase in the steel pipe list, supplies one of the premier price developments on the current markets. Other revisions in hardware quotations are of a minor nature affecting such lines as wooden rat and mouse traps, while a similar slight reduction is noted on the Maydole line of hammers. A small revision to higher levels is in effect on certain lighter sizes of roll thread machine screws. The recent weakness in the wire nail market has now vanished and a stronger tone is apparent upon the elimination of the little war between manufacturers. The bar iron market retains a strong tone. In view of production costs keeping up even in the face of a settlement of soft coal strike conditions, no decided easing in price levels is looked for. Galvanized sheets continue one of the most active of steel products. Quietness reigns in the non-ferrous metal market, with lead remaining the strongest in the ingot group.

SLIGHT REDUCTION ON MAYDOLE HAMMER PRICES

Toronto.

Quotations on the Maydole line of hammers are now slightly reduced, the following new levels being in effect on these products:

MAYDOLE HAMMERS—

No. 1,—$18.00 per dozen. No. 1½, $16.60 per doz.; No. 12, $15.60 per doz. No. 11, $18.00 per doz. No. 11½, $16.60 per doz. No. 13, $13.85 per doz. No. 23, $12.50 per doz.

ROLL THREAD MACHINE SCREW PRICES HIGHER

Toronto.

There has been a slight advance in prices on some of the smaller sizes of roll thread machine screws. This change is stated to only affect the lighter make of roll thread, the cut thread machine screws remaining at former levels.

BAR IRON MARKET RETAINS STRONG TONE

Toronto.

Following the recent advance in prices on bar products, this phase of the local steel market reports a fair amount of activity, especially for this period of the year. Bar iron is moving fairly well, and there is also a scattered call for structural steel. Other bar products, such as hoops and band steel, are moving in small quantities. The market tone is still very strong, and in some quarters further advances in current quotations are looked upon as the order of the day. In comparison with the peak of price levels recently attained in southern primary markets, certain local distributors claim that quotations are considered likely to reach a notch higher than is now prevailing, under the assumption that the present conditions continue to reflect the upward swing of the pendulum during the ensuing weeks. Hopes of settlement in both soft and hard coal areas are now much brighter and this may have some effect in deciding future market movements. However, the additional increase in pig iron prices last week, naturally tends to further strengthen current bar iron quotations. There appears to be little effort to maintain a stated level, but the following is the average list of prices on the local market:

IRON AND STEEL—	
Mild steel bars, base	3 25
Mild steel bands 3-16 in. base	3 75
Bar iron, base	3 25
Angle iron, base	3 35
Horse shoe iron	3 85
Tire steel	3 45
Spring steel	7 00 8 00
Sleigh shoe steel	3 25
Cold drawn steel	4 50
Hoop steel	4 50
Norway iron	12 50
Toe caulk iron	4 10
Crucible cast sheet steel	28 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

GALVANIZED SHEETS IN MARKED ACTIVITY

Toronto.

Galvanized sheets continue to be the most active of steel products on the local

market. Arising from the brisk seasonal call for sheets in construction and other activities, there has developed increased production of domestic galvanized, but this has also been supported by heavier importation of varying quantities from English mills. Deliveries from southern producers have been more or less delayed by strike conditions. Uncertainty is the keynote in the delivery situation, and it is stated that if the rail and coal strikes were completely settled immediately, matters have now reached the stage where considerable time must elapse before conditions in the steel industry would again be restored to normal. The demand for sheets keeps up in unexpected volume and while the movement in some circles is of fluctuating extent, yet the general call for this material is described as such that no stocks are being accumulated. Black and blue-annealed sheets are also moving fairly well for this season. Following are average local quotations:

BLUE ANNEALED SHEETS—

10 gauge, base	4 00
12 gauge	4 05
14 gauge	4 10
16 gauge	4 15

BLACK SHEETS—

18-20 gauge	4 80
22-24 gauge	4 85
26 gauge	4 90
28 gauge	5 00

A charge of 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Hd.
28 gauge	7 50
26 gauge	7 25
24 gauge	6 65
22 gauge	6 30
18 and 20 gauge	5 80

	Premier	and Apollo
10¾ oz.	6 75	7 30
U. S. 28 base	6 35	6 90
U. S. 26 base	6 05	6 60
22 and 24	5 90	6 45
18 and 20	5 75	6 30
16	5 60	6 15
12 and 14	5 45	6 00

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown in 20c. per 100 pounds.

PLATES, CANADA—

WASTES NOT AFFECTED BY PRIMARY CHANGES

Toronto.

Although the raw cotton market has been fluctuating, with the average tendency in an upward direction, there has not been any reflection of these condition in cotton wastes. Distributors state that primary trends of this nature are not always immediately apparent in wastes, other factors also governing this market. Current trade continues on a moderate basis, with no specific features having been recorded. Quotations on these goods continue at the unchanged levels contained in the current market price pages.

Increased Price List on Steel Piping

New List Appears on Domestic Markets Due to Increased Production Costs—Higher Prices on Pig Iron and Coal Cited as Premier Factors in Situation Resulting From Strike Conditions Affecting Industry

HIGHER PRICE levels on both black and galvanized steel buttweld and lapweld pipe are now in effect from August 23, this development being principally due to the recent increase in production costs. Such a change in quotations is also in line with the prevailing conditions in this industry outlined in recent market reports appearing in Hardware and Metal. The new list, No. 56, contains a relative higher scale of prices on the various sizes, based on a similar increase as that which was announced on southern primary markets last week, to the extent of $6.00 per ton on black piping and $4.00 per ton on galvanized. While this change was first put into effect by the Independent Mills and was not immediately uniform, the additional advances on pig iron, coupled with higher fuel costs, are further elements in this situation causing other producers to fall in line.

A very firm tone has existed for several weeks in wrought iron piping, and it was considered problematic in distributing circles as to just when the expected higher price levels would come into effect. In view of the advancing costs of basic elements, the opinion was expressed that should any upward revision take place on U. S. markets, such a movement would undoubtedly be followed by domestic producers, as similar factors influenced the situation in both areas. How long the present strength will be retained—especially in the face of higher quotations—is generally considered problematic. However, in this connection, it is pointed out that not only have production costs in the steel industry recently attained correspondingly higher levels, but that wages in certain sections have been increased by producers to the extent of around twenty per cent. Even with a settlement of the coal strike, fuel prices remain high, and no expectation of easier production costs in this direction exist, at least for some time. Owing to the unusual conditions produced in the industry by the combined effect of the recent coal and rail strikes, a considerable period must elapse before market conditions will again reach normal. Following is the revised pipe list No. 56:

WROUGHT PIPE

Price List No. 56. August 23, 1922.

Standard Buttweld Pipe S/C

	Steel		Gen. Wrot. Iron

GOOD OUTLOOK EVIDENT IN RADIATOR TRADE

Toronto.

Current trade in radiators and boilers is described as very brisk, with an optimistic viewpoint in evidence regarding the outlook for fall. The improved conditions noted during the past few weeks continue apparent, with the market considerably strengthened by scarcity and higher prices on such raw materials as pig iron and coke. Delivery of these basic elements is also stated to be more or less tied up as a result of southern transportation and coal mine strikes, these conditions providing a very firm undertone for future quotations. No price changes have been made effective on domestic centres, but one manufacturer stated that the possibility of any easier levels for late season trade has practically been removed by the developments in the steel industry and the current quotations have not taken into consideration such tendencies.

RADIATORS—

Revised radiator list prices are for 1, 2, 3, 4 and 5column radiators per square foot.

38 in., $1; 32 in., $1.10; 30 in., $1.15; 26 in., $1.20; 23 in., $1.26; 22 in., $1.30; 20 in., $136; 18 in, $140; 16 in, $150 14 in., 155; 13 in. $1.60.

Discount on 2, 3, and 5-column standard sizes, 59 per cent. for water and 60 per cent. for steam.

Discount on 1-column standard size, and 2, 3, and 4-column hospital sizese 51 per cent. for water and 52 per cent. for steam.

Discounts on 1-column hospital size, water, 33 per cent.; steam, 34 per cent.

Wall radiators—5 ft., $1.15; 6 ft. $1.10; 7 ft., $1.05; 9 ft., $1.05; 12 ft., $1.05 Discount 56 per cent.

BOILERS—

Water:

Round, 64 per cent off list. Square, 15 per cent. off list.

Steam:

Round, 28 per cent. off list; square, 15 per cent. off list.

FAIRLY GOOD TRADE IN COPPER AND BRASS

Toronto.

Copper and brass sheets are reported to be in good demand, manufacturing consumers being interested in the market. This has developed a firm tone, which added to the upward trend of virgin metals, places quotations on a strong basis. Brass and copper rods, however, are somewhat quieter. Trade in these products was fairly good during the spring months and it is generally expected that repeat orders will be in evidence during the fall. Some sheet copper is being required for roofing purposes. Manufacturers and distributors report that business on the whole is better than last year, but even at that could be more satisfactory. Some difficulty with shipments from southern primary centres has been experienced recently. Following are unchanged price levels on sheets, rods and tubing:

BRASS—	
Sheets base, per lb.	0 23
Tubing, base, per lb.	0 28
Rods, base, per lb.	0 20
COPPER—	
Rods, base, per lb.	0 28
Soft Sheets, plain, 16 oz. and heavier, per lb.	0 29
Do., plain tinned 16 oz. and heavier, per lb.	0 36
Do., polished and tinned, 16 oz. and heavier, lb.	0 41
Tubing	0 32

STEEL SCRAP QUOTATIONS SHOW WEAKER TREND

Toronto.

The scrap material markets continue on a quiet scale, while business in scrap iron is very dull, with a down trend noted on some descriptions. Steel scrap has been weaker and prices have been reduced about 50c a ton. Borings and turnings, which have had some demand during the past few weeks, have also eased off, the demand having subsided. Grate bars and car wheels have been offered at lower price levels.

Scrap copper has been steady, although consumers have continued to order only in such quantities as their present limited requirements call for. Red brass, on the other hand, has been in fair demand. Following are the usual averages of dealers' buying prices for fairly large quantities:

SCRAP MATERIALS—		
Scrap Iron		
Heavy melting steel (Hamilton)	13 00	13 50
Borings and turnings	6 00	7 00
Rerolling rails	12 00	13 00
Scrap pipe	5 00	6 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	9 75	10 25
Agricultural malleable	12 00	13 00
Railroad malleable	13 00	14 00
Net tons—		
No. 1 cast	18 00	19 00
Stove plate	15 00	16 00
Grate bars	11 00	11 50
Standard car wheels	14 00	15 00
Scrap Metals		
Heavy copper and wire	10 75	11 25
Light copper	9 25	9 75
No. 1 composition	9 00	9 50
No. 1 comp. turnings	7 25	7 50
Light brass	3 50	4 50
Heavy yellow brass	5 50	6 50
Heavy Lead	5 00	5 50
Tea lead	2 75	3 50
Scrap zinc	4 25	4 50
Scrap Rubber		
Boots and shoes	2 00	....
Lumbermen's rubber boots	1 25	1 50
Auto tires	0 40	0 50
Solid tires	6 60	1 00

WEAKNESS VANISHES IN WIRE NAIL MARKETS

Toronto.

An element producing renewed strength in the wire nail market, is seen in the fact that the little war among the nail makers which recently favored the consumer as regards price levels, is now apparently subsiding. A probable advance in wire nail quotations in the near future is, therefore, considered one of the likely results of this situation.

REVISION IN RAT AND MOUSE TRAPS

Toronto

A revision is announced in wooden mouse and rat traps, these products being on the following lower price levels:

TRAPS, MOUSE—
Holdfast, $3.25 per gross. Victor, $2.75 per gross. Roundwood, four-hole, $15.50 per gross.
TRAPS—RAT—
Holdfast, ...$1.20 per dozen.
Victor .....$1.15 per dozen.

QUIETNESS REIGNS IN NON-FERROUS METALS

Toronto.

The usual mid-summer quietness now reigns in the ingot metal markets. There have been some minor fluctuations in price on primary centres, but these changes have not been of such an extent as to affect the level of local quotations. Lead remains the strongest metal in the non-ferrous group.

While current trading is limited, the trend in ingot metals has been primarly toward higher price levels, for the reason that the accumulated war stocks have now been almost completely absorbed, and such metals as copper, lead and zinc are approaching a normal basis. It is considered that the only barrier to the return of prosperity in metals is the lack of stabilization in foreign exchange, and until that stabilization is reached, a series of ups and downs will be experienced as far as demand and prices are concerned.

COPPER—Moderate buying exists in copper, both on primary and domestic accounts. Prices, however, remain firm under the circumstances, southern primary centres recording that while copper consumers are evidently seeking concessions, producers are turning down bids below the current level.

TIN—The domestic tin market continues very quiet, and primary centres are also dull. Prices are in practically all quarters a shade easier, the downward trend in London leading this phase of the market. Local prices continue at the 36 cent level.

LEAD—Prices on lead remain very strong and advances have been recorded in southern primary markets. Domestic price levels are unchanged at present, but the $7.50 mark is undoubtedly firm. The reserve stocks of lead have been considerably reduced during the past few weeks, and it is generally conceded that a marked improvement in the statistical position of this metal has been taking place. The market is considered strong.

SPELTER — This market continues firm but primary conditions are unchanged. There is not much activity to record, but prices are principally steady. The recent strength in zinc is still evident and it is noted that current offerings are limited in quantity. Local prices remain at $8.25.

ANTIMONY—This metal continues quiet and unchanged, either in prices or market conditions. Local quotations hover in the neighborhood of 6 and 7 cents.

ALUMINUM—Prices on aluminum show no variation, the recent level still being in effect. This applies to both primary and domestic markets, where trading in aluminum is dull. Local prices remain between 20 and 21 cents.

London, Ont.

LONDON, August 24.—Hardware business has been very fair here during August and now shows some activity along fall lines. Many merchants are taking in their fall goods now as a shortage is expected on certain seasonal goods.

Price changes are light, while reports on collections are good.

FAIR MOVEMENT NOTED IN LINSEED OIL

London, Ont.

A good seasonal sale is evident for linseed oil, with prices on this product at present unchanged at the following levels:

LINSEED OIL—	Raw	Boiled
1 to 2 bbls., per gal	1 20	1 23
3 to 5 bbls., per gal.	1 19	1 22
6 to 9 bbls., per gal.	1 17	1 20

Less barrels, add 15 cents gal.

HIGHER PRICES NOW DEVELOP ON IRON PIPE

London, Ont.

New higher price levels are now in effect on steel and wrought iron piping, it being noted that a shortage is evident for some of the smaller sizes. The recent marked advances in raw material costs, have caused the firmness of primary markets to be reflected in the finished goods.

LANTERNS AND GLOBES IN SEASONAL MOVEMENT

London, Ont.

Distributors report that both lanterns and lantern globes are now moving in seasonal volume, the orders to date being generally regarded as satisfactory. Following are current price levels:

TIN LANTERNS—
Short and Long Pattern, $9.20 doz. Copper Wall Lantern, $12.30 doz. Dash Reflector Lanterns, $12.80 doz.
LANTERN GLOBES—
Short or long pattern—1 doz. to case $1.35 doz. 3 doz. to case $1.25 doz. 6 doz. to case $1.20 doz.

CALL FOR TURPENTINE IN MODERATE VOLUME

London, Ont.

A fair demand is noted for turpentine, with quotations still firm at the recent levels, which follow:

TURPENTINE—	Imp. Gal.
1 bbl. lots	$ 1 80
2 to 4 bbl. lots	1 79
5 gal. lots	1 95

ACTIVE TRADE IN WHITE LEAD IN OIL

London, Ont.

Sales for white lead in oil, which have been good all season, are again now more active. Prices continue firm and unchanged at the levels in effect during recent weeks.

WHITE LEAD IN OIL—
Pure, Tons, $13.55 per 100 lbs. Less Tons, $13.90.
Elephant, Tons, $14.05. Less tons, $14.40.

GOOD MOVEMENT OF ROPE AND CORDAGE

London, Ont.

Rope and cordage sales have been good this season, and continue to be very fair at present. Prices are unchanged since the last downward revision, which placed the following levels in effect:

ROPE—	lb. base
Pure Manilla	0 21
Beaver Manilla	0 19
British Manilla	0 19
New Zealand Hemp	0 19
Sisal	0 17

ANOTHER REVISION IN WINDOW GLASS PRICES

London, Ont.

Another revision has taken place in window glass prices, the increased discounts being in effect on imported glass only. Belgian glass is now quoted at list less 20 per cent. on less than 25 cases, while on lots of 25 cases or over the discount is list less twenty-five per cent. On the other hand, no change has been made in quotations on the domestic manufactured window glass, both Libby-Owens and Pilkington glass being quoted at the recently revised levels of list less ten and fifteen per cent. for the respective quantities.

HEAVY SEASONAL CALL FOR SASH WEIGHTS

London, Ont.

Along with various other lines of builders' hardware, an increased demand for sash weights is noted throughout this district. This is supported by the general construction activity. Prices on sash weights are firm and unchanged at the following basis:

SASH WEIGHTS—
Round 3-lbs. and larger, $2.50 per 100 lbs. 1 lb. Sections, $3.25 per 100 lbs. ½-lb. Sections, $3.75 per 100 lbs.

SUPPLY OF CUT NAILS NET YET IMPROVED

London, Ont.

The supply of cut nails on the local market has not improved to any great extent since this low condition of stocks was reported, and a good seasonal sale of these products is evident. Quotations on nails remain unchanged as follows:

NAILS—	
Wire, base	3 65
Cut, base	4 60

APPLE PARERS CONTINUE IN POPULAR DEMAND

London, Ont.

There is a good sale for apple parers continuing throughout this season. Prices are unchanged, the prevailing quotation on the Hudson line being $14.-85 per dozen.

GLASS CASTOR CUPS IN GROWING MOVEMENT

London, Ont.

Dealers in this vicinity report that there is evident an ever-growing sale for the style of castor known as glass castor cups. Following are current quotations on these products:

GLASS CASTOR CUPS—
No. 1830 x 2⅜"—32c. per set of four. No. 1830½ x 2¾", 38c. No. 1831 x 3¼"—43c. No. 1832 x 4"—65c.

FAIR MOVEMENT OF PUTTY NOW RECORDED

London, Ont.

A better movement of putty is now generally reported, with prices on this product firm and unchanged at the following levels:

PUTTY—	Per 100 lbs.
Standard, 100 lb. drums	6 30
Do., 25 lb. drums	6 65
Pure, 100 lb. drums	7 80
Do., 25 lb. drums	8 05

GOOD SALES NOTED FOR GASOLINE IRONS

London, Ont.

The sale for gasoline irons has been good this season, general satisfaction being expressed with the movement of these goods. The prevailing price of the Coleman is $5.00 each, while the Comfort is quoted at $5.35 each.

Winnipeg, Man.

WINNIPEG, August 24.—Wholesalers and retailers report that the hardware business is showing a decided improvement. The crops throughout Manitoba and Saskatchewan are reported good, running from 15 to 30 bushels per acre and in some localities there will be a much larger yield. Soil pipe and fittings have shown an advance. Galvanized sheets are ruling firm and local stocks are practically unobtainable. There is a good movement for trough and conductor pipe. Quite a number of buildings are going up and the demand for builders' hardware lines is showing a decided improvement.

HIGHER QUOTATIONS ON SOIL PIPE AND FITTINGS

Winnipeg.

Advanced quotations are reported on both soil pipe and fittings, the extent of the increase varying on the different sizes. Two and three inch is quoted at less 15 per cent., four, five and six inch less 25 per cent. The revised discount on fittings are two to three inch less 35 per cent. Four, five and six inch less 40 per cent. A shortage of raw material due to poor transportation facilities and the delayed deliveries due to the rail strike has caused the market to firm up. The demand for soil pipe and fittings is keeping up well and the season's volume has been very satisfactory.

GALVANIZED SHEETS SCARCE WITH FIRMER TONE

Winnipeg.

There is a good demand for galvanized sheets and the market is ruling firm. Deliveries are effected by the rail and coal strike complication. American and Canadian manufacturers, due to the shortage of fuel, have reported that they cannot take orders or promise shipments inside of from 60 to 90 days. Local wholesalers' stocks are about depleted. Prices remain firm.

PRICE AGAIN LOWER ON LINSEED OIL

Winnipeg.

Owing to the downward trend of flaxseed prices the market for linseed oil has taken a decline of 3 cents. Raw is now quoted at $1.30 and boiled at $1.33.

BUILDING ACTIVITY REFLECTS ON HARDWARE LINES

Winnipeg.

Hardware lines for which a steady enquiry has been received and which are quite active at the present time are those appertaining to the building industry. Wholesalers state that builders' hardware and tools are in good demand. With a number of building permits issued for small homes and a certain amount of repair work the trade is optimistic regarding future business.

LEAD RULING FIRM ON PRIMARY MARKETS

Winnipeg.

There is a stronger tendency on lead and lead products. Traps, bends, lead pipe and solders show no change but with the continued strength of the primary market higher prices are considered as quite possible.

BINDER TWINE IN GOOD SEASONAL DEMAND

Winnipeg.

With the improved crop conditions, the general demand for binder twine is reported heavy. Prevailing conditions in the trade are reported to be satisfactory.

FAIR BUSINESS NOTED FOR CATTLE TIES

Winnipeg.

Fall bookings for cattle ties and ropes are fully up to expectations as reported by the wholesale trade, as well as other fall lines such as buck and cut saws.

Calgary, Alta.

New Refinery Will Lower Oil Prices: Jobbers' Stocks of Harvest Supplies Low

CALGARY, Alta.—An announcement of great importance to the citizens of Calgary in particular and to the province in general was made public by the mayor and city council this week, to the effect that recent negotiations carried on quietly have secured to Calgary a two and a half million dollar oil refinery to be erected by The Imperial Oil Co. A site of approximately 108 acres has been secured which is already served by the city's public utilities and construction is to begin as soon as the citizens and the provincial government ratify the agreement. The terms of the agreement are of great advantage to the city and ratification will be rushed through so that construction will start early this fall. This means work through the winter for probably a thousand workmen and will put an end to the immediate unemployment problem. When completed it is estimated that regular employment will be given to from 300 to 500 men, mostly skilled, and the pay roll will run about fifty thousand dollars a month. Future developments in the oil business will naturally centralize around this plant as a nucleus and together with the by-products will go far to assure Calgary's position as the industrial centre of Alberta. Citizens look on this as the most important development since securing the Ogden shops, and as an added reason for believing that the business depression of the past year is placed definitely behind us. The Imperial Oil Co. estimates as a result of this, a reduction of three cents per gallon in gasoline with corresponding reductions in kerosene and other products; an item in itself that will represent a large aggregate. Interest is very evident among those who have engaged in boring operations. Several fields in the province are being tested out with more or less promise of success, and the belief that oil will be found in paying quantities has received great encouragement.

Crop Returns Good

Crop weather continues good and cutting may almost be described as general. and returns from the harvest fields are more than bearing out earlier estimates.

Jobbers report quite heavy runs on bolts, rivets, canvas, staples, forks and other lines necessary to harvesting operations. Indications are that retailers' stocks are low and it is questionable if jobbers' stocks will stand the strain on some very staple lines.

Hardware merchants handling implements report this branch as taking up most of their time looking after last-minute deliveries, with a splendid business on repairs and small sundries.

City business seems to show a disposition on the part of the buyer to shop and on the part of the merchant to stir up interest in seasonable goods by display and advertising with results pretty much reflecting the quality of the effort. Generally speaking it has been difficult to get the turnover to the point where expenses are easy.

An examination of price changes for the week shows little of importance to indicate future movements. Changes are quite numerous but affect isolated lines of small shelf goods mostly and seem to evidence a change in laid down cost rather than a market change. A few changes are noted below.

Linseed Oil still continues a weekly feature, this time with an advance of 4 cents a gallon, making present quotations 1.24 for raw and 1.27 for boiled at Calgary, Edmonton and Lethbridge.

Quotations on putty show a general re-adjustment leaving the larger containers at a lower level and the smaller containers higher, with demands reported quite active. Current prices are as follows: Casks—$6.00; 100-lb. drums—$7.00; 25-lb. irons—$7.25; 12½-lb. irons—$7.50; 5-lb. tins—$11.25 per 100 lbs.; 1½-lb. tins—17½ cents and 1-lb. tins—15 cents each. Calgary, Edmonton and Lethbridge.

A decline of about 12½ per cent. is noted in this week's quotations on screw hook and strap hinges, present prices being: 6-in. $3.85 per doz.; 8-in. $4.45 per doz.; 10-in. $5.70 per doz.; 12-in. $6.30 per doz.; 15-in. $7.15 per doz.; 18-in. $10.20 per doz.; 21-in. $11.70 per doz.; 24-in. $14.65 per doz.

New quotations on Marlin rifles and shot guns show substantial reductions with following prices ruling: Rifles—No 20, $21.00; No. 27, $30.25; No. 38, $25.25; No. 93, $38.45; No. 39, $28.50. Shot guns—No. 28, $4815; No. 31, $48.-15; No. 42, $40.75.

Local quotations on cow ties show some changes with active sorting for fall trade. Open rings and three-chain pattern are now quoted 1/0, $4.30; 2/0, $4.75; 3/0, $5.25; 4/0, $6.60. Special pattern 1/0, $3.25; 2/0 $3.60; 3/0, $4.20 per doz.

The better grades of babbitt metal are offered at a lower price, the new prices noted being: copperine No. 1, $37.25; copperine No. 2, $31.25; high pressure, $32.25; magnolia, $36.25.

Starrett tools are priced about 10 per cent lower than recent quotations, and a big reduction is made in leather gun cases in preparation for the usual active demand for this line for opening of shooting season.

St. John, N.B.

Maritime Trade in Guns and Ammunition Active; Heating Goods Also Moving

ST. JOHN, N.B.—Ammunition promises to be active during the coming season. The jobbing houses have already found an active demand. One house received a carload shipment some time ago, and their salesmanager advised Hardware and Metal that he was ordering nearly fifty thousand rounds at once in order to fill up broken quantities. Rabbits are reported to be uncommonly plentiful this year, to the point of being a nuisance to the farmers, and while many of them will be snared, no doubt a good deal of ammunition will be used for their destruction. There is still very little movement in the sales of rifles for fall trade, but a little activity is shown among shot guns of the low price grade. Last week showed a mid-summer inactivity in the hardware trade, many people of the buying class away on holidays, but the wholesale houses report orders for stove pipe and other heating goods, for lanterns, axes, game traps and other things that are associated with the fall season. While the axe trade has not developed as fully as it was expected it would, there is considerable improvement, and a St. John manufacturer states that he was in receipt of a good many orders of a substantial size last week. It is considered that the prices of axes are very low now, and that dealers might do much worse than anticipate their wants in this line immediately, while if they wait a little longer they may do more waiting than is good for them.

Lumbering Activity

The prospects favor considerable lumbering activity, and if that comes about there will be a large demand for axes. Wire nails have been receiving a fair amount of attention lately, on account of price movements. Declines have been reported, but now the movement is slightly upward. A little war among the nail makers has favored the consumer lately, though apparently the conflict is subsiding now. The feeling in regard to business prospects continues to be one of confidence. One reason for it is the crop situation. The greater portion of an exceptionally heavy hay

crop has been housed in good condition. Oats will show a large yield. Potatoes are turning out well, as are all vegetables. Apples will be a good crop. All small farmers are assured of a generous harvest this year, and if market conditions are at all favorable their buying capacity will be such as to give a good impetus to fall and winter trade in the stores. The increased demand for lumber has greatly decreased stocks, and the provincial department of crown lands anticipates pretty nearly, if not quite, a normal cut of logs next fall and winter.

Tourists Good Buyers

American tourists have spent a good deal of money in New Brunswick this season. Travel has been heavy. On one day early this month, no less than fifteen hundred passengers arrived on through trains and by steamers. More motorists have come this year, and a large number of foreign cars are seen all over the province. The business in automobile accessories has been exceptionally good, and still continues to be active. St. John jobbing houses handling accessories have been well supplied with orders from hardware merchants and garages throughout the province. More cars and better roads react upon each other in a most satisfactory way and the good road policy of the New Brunswick government has been the means of greatly increasing the number of cars.

Price Changes

With the holiday season for schools about over, the trade is being quoted the following prices on school slates: common, 5 x 7, $1.10; 6 x 9, $1.60; 7 x 11 $1.75; 8 x 12, $2.20; 9 x 13, $2.70; noiseless, 6 x 9, $2.35; 7 x 11, $2.80; 8 x 12, $3.30; 9 x 13, $3.75. The latest price on turpentine is: bbls., $1.75, less $1.85.

Electrical Installations Increase

An increase in electrical work for this year, in comparison with the record of work for the corresponding period in 1921, is reported by the St. John city electrical inspector. There has been an increase of twenty-five per cent. in new installations, and also more repairs and more replacements. While labor cost has dropped only slightly, there has been a cut of fifty per cent. in wiring charges. Wire during the last eight months has been down practically to pre-war prices. The erection of the exhibition lighting system has been finished, and an estimate has been prepared for a proposed White Way, leading from the center of the city to the exhibition grounds.

Daylight saving will end in St. John at midnight, September the ninth.

Hamilton, Ont.

Report Orders for Fall Hardware Now Arriving in Satisfactory Volume

HAMILTON, August 24.—Recent upward price changes in the hardware markets seem to have strengthened the confidence of the buyer to some extent, both manufacturers and distributors reporting that trade has shown no signs of slackening off owing to higher costs, but on the contrary current business is described as on the mend. Orders for Fall delivery are arriving in satisfactory proportion, while the volume of present turnover is good for this time of the year.

The hardware markets present an interesting study. Reaching their highest peak just after the war, hardware prices have undergone a continuous depression until they "scraped the bottom" a few months ago. Since that time a feeling of more confidence among buyers, engendered by the liquidation of high priced stocks, the establishing of more efficient production and lower transportation costs have combined to provide an incentive for better business and a realignment of prices having a fairer relation to costs of production have resulted. Practically each week sees fluctuation in both directions on various hardware commodities.

There is still the firm tendency in iron and steel products, with production in the industry handicapped. Domestic producers are considering future coal supply and meanwhile quantities of Welsh coal are reported as having reached eastern ports.

In discussing the situation from a buyer's point of view it is stated that distribution is continuing quite favorably, the demand being seasonably quiet. Distributors also appear satisfied to await further developments as production is quite ample to meet present requirements. Although a higher market seems likely, action on the part of buyers to get under cover has been quite moderate under the circumstances.

A concerted movement is being made by certain organizations of manufacturers and wholesalers to pass on to the retailers the cost of stamps affixed to drafts for collection of accounts from retailers. The stand taken by these branches of trade is that if the retailer pays his account by cheque he assumes the cost of the stamp, whereas if the same account is settled by draft the drawer must pay the cost of the stamps. Under the new regulations this stamp tax assumes large proportions where a considerable number of drafts are taken into consideration. Further, this tax is likely to pyramid if the present practice of presenting drafts two or three times before acceptance, is followed.

Pittsburg,

PITTSBURG, August 24.—Production of pig iron and steel continues to decrease. Receipts of coal by the iron and steel industry are not increasing, while one stock pile after another plays out. Here and there some good-sized stocks remain.

The so-called "settlement" of the coal strike at a conference in Cleveland, called by President Lewis of the United Mine Workers and attended by many operators of Ohio but few other operators, does not settle the strike. The operators who signed at the Cleveland conference were said to represent 60,000,000 tons annual production out of 400,000,000 tons previously union. This, however, was not 15 per cent. of the total strike, as there are strikes in non-union mines, particularly in the Connellsville region. Possibly the union expected a stampede of operators to sign the scale after the Cleveland meeting, but thus far there has been no stampede. A number of additional operators have signed but as a rule they are small operators, and the total capacity signed up is certainly far under 50 per cent. of the capacity formerly union, while the non-union strikes are continuing.

Guessing at Strike Results

There are various guesses as to what will occur in future. On two points there is a strong preponderating opinion: (1) That the non-union strikes in the Connellsville region will crumble by about September 1, probably with a moderate advance in wages over the scale paid last March, but positively with no semblance of recognition of any union; (2) That the leading operators of the Pittsburgh district, under the leadership of the Pittsburgh Coal Company, will absolutely refuse to sign the national union scale and will hold out as long as necessary for a district settlement with reduced wages and with elmination of the check-off, with an alternative of the district becoming simply open shop or non-union.

Coal Supply Still Limited

Coal production will increase in a moderate way from week to week, but the coal available must be distributed to the more important consumers, and steel consumers will get no preference or priority. Hence there is no definite promise of an early increase in the iron and steel industry's coal supplies and there is merely hope that there will be increased supplies of coal and coke from the Connellsville region. The question then would be whether such increase would offset the further decrease in supplies that is promised by stock piles running out one after another.

It is altogether too soon to predict when the production of pig iron and steel will increase, or even to predict when the decrease in production will cease.

Weekly Paint Markets

Montreal

MONTREAL, Aug. 24.—A much firmer tendency in the turpentine market is the feature of the paint markets this week. Following an easier trend when local prices receded approximately seven cents last week, the tone of the market is now much the reverse and quotations in some quarters are increased to the extent of fifteen cents per gallon. This advance is not announced by all distributors as some firms are quoting from stocks on hand and apparently willing to sell at former purchase values. Those who have bought on the present market state that they are forced to quote the higher figures because of the gain in the market at primary centres. Here an appreciable improvement has been noted because of a better demand and a much brighter outlook with the end of the coal strike in sight. Linseed quotations are unchanged with the undertone of the market fairly firm owing to light available supplies of seed. Although the flax-seed market has fluctuated considerably during the past week, crushers anticipate a firm tendency from now until the new crop. Window glass quotations remain at the revision of one week ago, and white lead in oil, putty, shellac, also paints and varnishes record little or no change with trade in general described as seasonably light.

AVAILABLE SEED SUPPLY FIRMS LINSEED MARKET

Montreal.

There has been no change made in linseed oil quotations during the week and there is a feeling that a steady tone will likely continue in the market for the weeks following until the new crop of flax seed is felt. One local crusher stated that present indications pointed to a firm situation, as it was even now difficult to purchase seed on the cash market, stocks in the North-West being at their lowest level in years. Notwithstanding recent reports on crop conditions were not as favorable as previously received, the present position with regard to supplies available was sufficient to maintain a firm tendency. During the week the seed market fluctuated considerably and at the close of last week there was a decidedly downward tendency in evidence. This has been partially recovered and at the present time a stronger feeling is again noticeable. Following are unchanged price levels:

TURPENTINE—		
1 barrel lots	1 60	1 75
2 to 4 barrel lots, per gal.	1 58	1 73
Broken lots	1 70	1 85

HARDWARE AND METAL'S PRICES WERE CORRECT

A Hamilton wholesale hardware firm has written to the Toronto broker who sends out prices on linseed oil and turpentine regarding prices on linseed oil quoted in recent issues of Hardware and Metal. The letter from them on the subject is as follows: "We have had a good deal of complaint by our salesmen in the last few days regarding the prices of oil quoted in Hardware and Metal. The London market given in the issue of August 5th was $1.20, the Montreal report $1.01 and the Toronto market $1.03, (a range of $1.03 to $1.10 appeared). Our own opinion is that this publication has mixed up the cost and selling price and thereby misinformed the retail trade."

It is unfortunate that those who should be such authorities on prices have such meagre knowledge of prevailing conditions in the various markets in Canada as is indicated by this letter. Hardware and Metal's range of prices on linseed oil in that issue and in every issue are absolutely authoritative. Linseed oil can be purchased in any reasonable quantity at either the low or the high price shown in the range at Toronto or Montreal. The situation in linseed oil has been rather varied for some time and a considerable spread has existed. In the weeks since August 5 issue this spread has narrowed somewhat resulting in prices this week as follows: Montreal $1.12-$1.14; Toronto $1.15 to $1.20; London $1.20 per gal. in 1 to 2 bbl. lots for raw linseed oil.

SHARP INCREASE IN TURPENTINE PRICES

Montreal.

Following the slump in turpentine prices last week, a substantial gain is now recorded and quotations in some quarters have soared to the extent of fifteen cents per gallon. Certain distributors have not yet increased price levels and there is a distinct variation in quotations. The market in the south advanced considerably towards the close of last week and those forced to purchase at prevailing values are naturally quoting higher than others with stocks on hand who are apparently willing to sell according to their former purchase prices. Conditions in primary circles have materially improved, demand increasing, with a much brighter outlook now that the strike situation presents a more hopeful aspect. Demand locally is still seasonably dull, and importers are hoping for an improvement in the rail strike which will assure no difficulty in future imports. Following are local average quotations:

TURPENTINE—		
1 barrel lots	1 75	1 85
2 to 4 barrel lots	1 74	1 84
5 gallon lots	1 90	2 00

NO FURTHER CHANGE IN WINDOW GLASS

No further change is made in the window glass market since the recession in prices last week. Importers state that the new lower quotations were announced in the hope of stabilizing market conditions and in anticipation of a good fall trade in the weeks to follow. A fair amount of import orders have been received, but it is yet a little early for the active booking season for this trade. Prevailing prices, as announced last week, are 20 per cent. off the $6.00 list which will be found on current market pages.

Toronto

TORONTO, August 24.—The revision in discounts on imported window glass and the sudden upward climb of turpentine prices, provide the premier developments in this week's paint markets. While domestic glass quotations remain unchanged locally, new discounts are in effect on imported glass. In the turpentine market, local stocks are described as scarce and with rising quotations at southern producing centres owing to increased export demand and with new shipments being considerably delayed owing to American transportation difficulties, the increased levels are reflected on the local market. There is still a range in prices, however, certain distributors offering some stocks at a few cents below the new higher mark. The same situation is apparent in linseed oil, but a good movement of linseed for this time of the year is stated as serving to maintain current prices.

Quotations on seed are somewhat steadier, the general impression being to

await the arrival of the new crop. No changes have as yet been announced in brush prices, but the revised levels containing both increases and reductions on different lines are expected to be available early next month. There is generally reported to be a fair movement in paints, varnishes and enamels considering this is the mid-summer period.

CURRENT MOVEMENT OF LINSEED OIL GOOD

Toronto.

Linseed oil prices are showing very little activity, the general tendency being to await developments which may result when the new flax seed crop comes on the market. Prices on seed have been steadier during the past week and as a consequence local oil quotations remain unchanged at the levels recorded in the last issue. There is still a range in quotations, however, certain distributors quoting a price several cents per gallon below the $1.20 mark. It is considered quite possible that any sudden inrush of new seed might force the price downward a few cents. Current trade in linseed oil is stated to be remarkably good for this season of the year, and while none of this business is of an extensive nature, yet the aggregate reaches a considerable volume. This has tended to keep prices maintained at the current levels which follow:

LINSEED OIL—	Per Gallon	
	Raw	Boiled
1 to 2 barrels ..	1 15 1 20	1 18 1 23
3 to 4 barrels ..	1 14 1 19	1 17 1 22
6 to 9 barrels ..	1 12 1 17	1 15 1 20

Less barrels, 15 cents per gallon.

TURPENTINE PRICE IS AGAIN CLIMBING UP

Toronto

The upward swing of the pendulum is again evident in the local turpentine market this week, prices having been advanced from five to fifteen cents per gallon. While a reduction of ten cents per gallon was recorded last week, it is pointed out by distributors that this level was only in effect for a very brief period, the market staying down at the lower price for just a day or two. Many quarters report that the $1.80 quotation was never really changed, and thus a five cent advance recorded this week, brings the average to $1.85 per gallon in one barrel lots. Where the $1.70 mark was in effect, a fifteen cent increase is made. However, other distributors are quoting a price several cents per gallon below this, as they state that they are still working on their stocks, and therefore not yet showing such a marked increase from the previous $1.70 mark.

Local stocks of turpentine are generally described as scarce, there having been much delay experienced in securing fresh shipments from southern producing centres. Owing to the slow movement of freight, due to transportation difficulties over American roads, new arrivals are infrequent and uncertain.

There has been a fairly large export movement of turpentine from Savannah and other southern points, thus accounting for the upward climb of prices at production fields. The market tone has considerably strengthened again, as a result of these movements, and while the rail strike conditions tied up shipments to some extent and stocks on hand in the south are more plentiful than might otherwise be the case, the bullish state of the current market is considered in some quarters as more reliable under those conditions. There is, how

a range appearing in quotations on the local market. Average levels are given as follows:

TURPENTINE—		
1 barrel lots	$1 75	$1 85
2 to 4 barrel lots	1 74	1 84
5 gallon lots	1 90	2 00

Less than one barrel lots, 15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Carload lots of 70 barrels, price on application.

NEW DISCOUNT LEVELS ON IMPORTED GLASS

Toronto.

Following the issuing of new discounts on window glass in eastern market centres, local distributors have announced another revision in discounts, but this change is effective on imported glass only. Prices on the domestic product are, at present, unchanged. Belgian glass is now quoted at list less 20 per cent. on less than 25 cases, while on lots of 25 cases or over the discount is list less twenty-five per cent. On the other hand, no change has been made in quotations on Libby-Owens and Pilkington window glass, both these products being quoted at the recently revised levels of list less ten and fifteen per cent. for the respective quantities.

In discussing this situation with Hardware and Metal, it was stated that there has been no apparent decline in primary Belgian markets, and the present change is no indication of weakness in the imported glass situation. It was stated that with the improved fall movement developing during the ensuing weeks, glass prices should tighten up, and be considerably steadier than during the past month or two.

The movement in the present direction was outlined in last week's issue of Hardware & Metal, it being stated that some unsettlement was noted with regard to the local price situation. The opinion has been expressed that the adoption of these new discount levels will serve to materially improve the general market tone.

SOME BRUSH PRICES HIGHER; OTHERS LOWER

Toronto.

While the new revised prices on brushes are described by manufacturers and distributors as imminent, no announcement with regard to such a change has yet been made. It is stated that the revised levels will be available early next month, and will contain some slightly advanced prices, while other lines of brushes will probably appear with slightly lower quotations. In comparison with last year when a general reduction varying between ten and twenty per cent. was made, this season will note changes comprising a re-adjustment according to the state of the bristle market. It is stated that the prevailing situation remains very firm, and some scarcity in primary circles is being anticipated by certain manufacturers during a moderately good sale.

Canadian-Made Turpentine Now on Market

Product Made From Canadian Spruce Claimed to Meet All Requirements of Turpentine and Combines Qualities of Imported Grades With Lower Cost—Recent Success in Eliminating Characteristic Odor of Spruce Wood

TO replace the standard grade of turpentine with a Canadian product is the claim of certain domestic manufacturers in the Province of Quebec. Made from the Canadian spruce, makers of this product claim that it has every good quality of southern turpentine and can be put to the same use as the imported product with equal results and at a lower price.

Eliminate Spruce Odor

Used as a thinner for wood or enamels, for oils or japan colors, or for reducing oil stains, satisfaction is assured, for it evaporates smoothly and evenly and has particularly good penetrating power. In addition it has the great advantage of uniformity. Due to a carefully standardized technical control of the output at the mills, moisture and free rosin are eliminated, ensuring uniformity of every gallon which leaves the plant.

Much progress is also claimed to have been made with regard to the odor which could be detected. Differing from gum turpentine in that it is made from wood, the characteristic odor of the spruce wood was noticeable. This odor had nothing whatever to do with the working qualities of the turpentine, however, as many paint and furniture manufacturers found it entirely satisfactory. But the elimination of this was desirable, and during the past year success had been obtained so that the odor is not now objectionable. Turpentine is perhaps as well known to the trade as any staple commodity usually carried in the hardware store, and the efforts of domestic producers in this direction have therefore attracted considerable attention.

The Public's Interest in Paint and Varnish

What Interests the Retailers' Customers is of More Importance to Us Than What May Interest Us—Happy Day for the Paint Trade When the Public Buys Paint and Varnish as it Buys Clothes

Editor's Note:—Some helpful pointers concerning the interest of the public in paint and varnish are outlined in the following address by Allen W. Clark, father of the Paint Up, Clean Up campaign, who draws attention to the fact that what interests our customers is of more importance to us than what may interest us. Frequently retailers overlook this important fact:—

AS A BOY I was much impressed with a story about the Hudson Bay Co., in which its traders were instructed about as follows: "Talk to each customer in his own language or dialect; sell him what he wants, whatever he wants it for. You are here to sell the goods the easiest and quickest way. You are not here to change the language, religion or customs of anyone. Unless it helps to sell the goods, do not waste time arguing to get other ideas into their heads."

That I assert is sound merchandising to-day. Therefore, let us keep in mind this fact of The Supremacy of the Public's Interest in the products and activities of the paint and varnish trade, in our consideration of the Clean Up and Paint Up Campaign as the trade's approved and successfully demonstrated approach into the public's lively interest, favor and co-operation; through organized local community-wide activities which create the ideal conditions for the utmost yield from our further sales promotion efforts of any sort.

Now what is the public's chief interest in our trade and its products? The point I am trying to make is that what may interest us very much in our business, according to our own personal inclinations, environments, etc., may not be the thing that most interests our customers and that therefore is the thing of supreme importance to us in our selling efforts. So again I ask, what is the public's interest in us a in our products and our activities?

Following is an editorial which recently appeared:—

"PAINT AND HAPPINESS: Discovery by the paint manufacturers, in convention, that their product is more than a preservative of building material and that it can be employed also to esthetic advantage is characteristic of the trend of the times and is significant because it marks a stage in the transition from an old order to a new. The purely material argument had greater weight in the day when people were so busy reclaiming a wilderness and getting roofs over their heads that they had little time and small resources to devote to the more subtle enjoyments of life. Now that the pioneering has been done, the urge of art has more room for development; beauty asserts its claim to sit beside utility.

Farmhouse Becomes a Cottage

"It is equally true of architecture and of a score of other crafts, as a comparison of pioneer dwellings and of pioneer furniture with those of to-day will show. The farmhouse of old has become a cottage or a bungalow when it is not a mansion; the 'little red school house,' which once had but four straight walls and a hip roof, delights the eye when viewed in its setting in a grove of trees; at every turn, in town or country, the tendency toward the beautiful is manifest on every hand.

"In justice to the labors of our forefathers, however, it ought not to be forgotten that they, too, had their aspirations for beautiful things. They built as best they might with the money and materials they had and they made possible the more ornate but not more happily inhabited houses that are characteristic of the present time. It is up to the new generation to make good the oft repeated but sometimes disputed contention that superficially pleasanter surroundings make people in reality happier in particulars that really count."

We also had an address by the Mayor. You remember what he said. In brief, as published in all the papers, he summarized his message to us, to this whole community, in these closing words:

"You can't advocate your Clean Up and Paint Up Campaign too strongly. All the people are with you in this movement. We realize that it is a good thing for the community as well as a good thing for you."

These expressions are typical of public sentiment, of official sentiment toward our trade and its products. They are typical of that nearly four million lines of news and editorial matter and Mayor's proclamations that I asked you to put a value on—though it is impossible to estimate its value by the dollar mark.

Paint It Anyway

But here is another clipping, with a heading whose first three words I hope will never find a permanent place in the vernacular of paint and its friends. It is a 3-column picture of "a home made brighter by painting anew." The article opens with the statement that "Interest in the Clean Up and Paint Up idea is becoming so widespread in this city that many houses and bungalows that are in excellent condition are being treated to a coating of paint notwithstanding." And the headline reads "Doesn't Need Paint. Paint It Anyway."

Whence comes this "Doesn't Need Paint" idea? Who says, or who shall say exactly when we "need" hats, or shoes or clothing—or paint and varnish? Let us fix our limitations on the buying of these, and other things, solely upon our individual desires and abilities!

Happy indeed the day for the paint trade when all the public buys paint and varnish as it buys its clothes—to keep up appearances and all their values, and long, long before any need for protection asserts its demands. Therein, as for the clothier, the hatter and the shoe dealer, lies the paint trade's line of least resistance, of easiest selling, of greatest sales frequency, and of largest and most regular sales volume.

"The Finish that Endures"

PORCH AND VERANDA FOR FALL PAINTING

There is no better time for applying FLOGLAZE PORCH AND VERANDA than the Fall. Hot summer days have thoroughly dried out the surface leaving it in the best condition for refinishing.

If FLOGLAZE PORCH AND VERANDA finish is not applied now, rain, wind and snow will get in their destructive effects this coming Winter.

Dealers will do well to remember that crop conditions, weather forecastings, etc., tend to indicate greater demand for paints this Fall than in the past.

Are You Ready to Fill the Needs of Your District?

Our dealer's booklet "A Guide to Large Profits" gives detailed description of Floglaze Porch and Veranda and six other Floglaze lines. Write for a copy.

"Don't Brush By" But "Buy a Brush"

A window display containing a number of effective ideas for the display of brushes is seen herewith as arranged by W. H. Jeffries of Fraser Hardware Co., Vancouver, B. C. Such exclusive displays of brushes are frequently arranged in conjunction with paint windows, as is the case with this one. With the approach of Fall months, some colored leaves might be used such as has been done in this display. Note the use of pedestals, glass shelving, to display certain types of brushes and the suspension of other brushes on light chain.

THE PUBLIC'S INTEREST IN PAINT AND VARNISH

(Continued from Page 42)

The Clean Up and Paint Up Campaign was founded ten years ago to enable the paint and varnish trade to utilize, develop and satisfy exactly this, the universal and the most compelling human instinct, that of pride, or self-respect, or the desire for the good opinion of our fellows.

The appearance of one's self and of his belongings is the primary and universal manifestation of this instinct or desire, and the universally recognized first essential in making a good appearance is Cleanliness; after which comes the necessity and the efforts for its continuous maintenance, as the necessary background for any fair outward show or appearance.

Paint Maintains Cleanliness

Paintliness has become the recognized esential for and the incentive to this maintenance of cleanliness. Paintliness is to-day almost the synonym for the Cleanliness, Thrift and Civic Pride manifested in the care-taking attention to property that therefore is winning paint such deserved recognition as the protector of building and frontage values against deterioration and depreciation.

A HISTORICAL EVENT FOR THE O. R. H. A.

(Continued from page 30)

The statement of purposes and objects of the corporation as agreed upon among the directors of the corporation is as follows:—

The subscribers as outlined will be the first members and the directors will determine the terms and conditions on which subsequent members shall be admitted. The first directors hold office until the first general meeting and unless otherwise provided for the subsequent directors will hold office for one year or until their successors are appointed. Any member may transfer his interest in the corporation by writing signed both by the transferor and transferee and duly registered. The first general meeting shall be held at such time, not being more than two months after incorporation and at such places as the directors determine. Subsequent general meetings will be held as prescribed by the corporation in general meeting and if no other time is prescribed this will be on the fourth Wednesday in January in every year. Directors may convene general meeting on requisition of five or more members who shall express the object of the proposed meeting in writing. Ten days notice must be given of a general meeting, outlining the business to be dealt with.

Thirty Members a Quorum

A meeting may be dissolved if within an hour of meeting there is not a quorum of members present. The chairman of directors will preside at each general meeting and if he is not present the members shall choose one their number as chairman. The chairman may adjourn a meeting but none other than business left unfinished at previous meeting can be dealt with at adjourned meetings. Thirty members constitute a quorum. The future remuneration of directors and remuneration for services performed previously to the first general meeting shall be determined by the corporation in general meeting.

The office of director shall be vacated if he holds any other office or place of profit under the corporation; if he is concerned in the profits of any contract with the corporation. The director shall not vacate his office by reason of being a shareholder or member of a corporation which has entered into any contract with this corporation but he shall not vote in respect of such contract or work. A retiring director is eligible for re-election. Other paragraphs of the regulations deal at length with voting and other such details.

An Invitation To You

We extend a hearty invitation to all hardware merchants to visit Boeckh's Brush exhibit, at the Canadian National Exhibition. You will find us in the Industrial Building—Booth 68.

We will be very glad indeed to see you and hope you will take this opportunity of talking over with us anything you wish concerning Boeckh's Brushes, their uses, and sales.

We are planning to have a very fine display this year—one that will serve as an inspiration to you for next year's business.

Don't forget—Industrial Building Booth 68—any time during the Exhibition. See the diagram at the right, which shows where you'll find our exhibit.

CROWBARS

Per 100 lbs.—Montreal, $7.75:

Luxeberry Enamel will delight your customers because it will brighten their dingiest rooms **and keep them bright**—it gives the white **that stays white.**

Luxeberry satisfies people of good taste because it glows with a rich, soft pearly lustre instead of giving the hard, icy glare of ordinary enamels.

Easily kept clean—washes like china.

Comes in white, ivory, cream, London grey, True Blue, Cherry Red and Sultan Green.

Luxeberry ENAMEL

Made by the makers of Liquid Granite — the world's best floor varnish.

IT PAY TO BUY GOOD TORCHES

Improved Double Needle Torches save time and fuel. Over 300 degrees more heat is produced as the gas is superheated and properly mixed with the air in a new way and 60 per cent. of all Burner troubles overcome. **Both Needles are blunt** which prevents forcing the gas orifice, as with other makes having sharp pointed Needles. Upper Needle cleans orifice, lower regulates. They are the latest and best made. Jobbers supply at factory prices. Write for a catalogue.

Barrett Roofings, Cements Industrial Paints etc.

It Always Pays to Keep in Stock These Popular Barrett Products

WISE dealers and their customers all over the Dominion have learned that the name "Barrett" signifies quality,—that Barrett products are backed by long years of manufacturing experience, and that each of them is the best on the market for its particular use. Here are two of these famous products which are fast sellers everywhere. It will pay you to keep them always in stock.

Everlastic Liquid Roofing Cement

Unequalled for resurfacing worn-out prepared and "rubber" roofing. Easily applied, and dries quickly into a tough, durable coating. Proof against weather, water, acids, alkalies, and fumes. Comes ready for use in containers ranging from 1-pint tins to 40-gallon barrels and steel drums containing 43 gallons. Our consumer advertising has created a big demand for this product. It's a fast seller and a big profit maker.

Everlastic "Rubber" Roofing

This is a popular-priced roofing of unusually high quality. It is made of high grade waterproofing materials, and will give your customers sure satisfaction.

There is a big market in every community for this roofing, and during the past few years its sales have increased enormously. Everlastic "Rubber" Roofing comes in 1-ply (light weight), 2-ply (medium weight), and 3-ply (heavy weight), in rolls containing 108 sq. ft. Nails and cement are packed with each roll.

These buildings covered with Everlastic "Rubber" Roofing

K. & S. TIRES & TUBES

Give You More than You Pay For

K. & S. Tires are made up to the highest standard possible. Quality is the primary consideration. Our only instructions to the factory are to use the best materials obtainable, and to give each and every tire individual attention. The result is that K. & S. Tires are absolutely dependable and in a class by themselves. K. & S. Tires are made in Canada for Canadian roads.

Get in Line to Serve Your Customers With K. & S. Tires Which Have Stood the Test

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Subscription price for HARDWARE AND METAL is $4.00 per year or less than eight cents per issue.

Northland Ski Manufacturing Co. Northland Ski St. Paul, Minn. U.S.A.

Advertising in HARDWARE AND METAL is economical, because the advertiser reaches only a class of business men directly interested in his product. The readers of HARDWARE AND METAL are big buyers because they buy for business as well as for private consumption.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.
